LEGAL DECISIONS

Alta. Supreme Court—
(Appellate Division) quashes certification order on ground of an error in law on face of record, 582.
Rules that certification order issued by Canada Labour Relations Board not subject to review on *certiorari,* 366, 367.
Upholds a certification order and rules *certiorari* not applicable, 44.
Upholds jurisdiction of provincial courts to review proceedings before Canada Labour Relations Board, 193.
B.C. Court of Appeal rules that union local liable for damages for a breach of union membership contract, 499.
B.C. Supreme Court—
Refuses injunction to restrain picketing on the ground that a contractor has no status to apply for injunction, 45.
Rules that a purchaser of company's shares is not bound by a collective agreement, 131.
Rules B.C. Labour Relations Act applies to employees of Simon Fraser University, 311.
Man. Court of Appeal—
Affirms that trade union, being legal entity, cannot sue in representative action for breach of collective agreement, 582.
Confirms jurisdiction of Court to review award of a non-statutory arbitration board under collective agreement by originating motion under Queen's Bench Act, 645.
Man. Court of Queen's Bench—
Assumes jurisdiction to review, on notice of motion, the decision of a non-statutory arbitration board to protect property and civil rights, 418.
Rules that trade union is a legal entity under Labour Relations Act and under the Common Law, 192.
N.B. Supreme Court (Appeal Division) upholds employee's right to sue for damages for wrongful dismissal notwithstanding grievance procedure under collective agreement, 250.
N.S. Supreme Court decides Rand Formula valid under N.S. Trade Union Act, 499.
Ont. Court of Appeal—
Rules arbitration board had jurisdiction to substitute suspension for dismissal of workers for breach of collective agreement, 645.
Rules employee cannot sue for wages due under collective agreement when right to payment disputed, 311.
Rules employee has no right to participate in arbitration proceedings under collective agreement respecting union-management policy, 499.
Ont. High Court—
Rules decision of arbitration board on referred question of law not subject to judicial review, 700.
Rules operation of limousine service at federal airport not within federal jurisdiction in relation to the field of aeronautics, 755.
Rules that, in certifying a union, the CLRB acted within its jurisdiction and observed the principle of natural justice, 43.
Supreme Court of Canada—
Confirms that an interprovincial company is not subject to the provincial Minimum Wage Act (Quebec), 130.
Refuses to hear appeal against conviction of contempt-of-court charges against 26 demonstrators at Peterborough plant of Tilco Plastics Limited, 15.
Rules that direct appeal to that Court from decision of a provincial Labour Relations Board not permissible, 366.

Rules that grievance procedures under collective agreement cannot deprive an employee of the right to sue for unpaid wages, 249.

All subscriptions payable in advance. SPECIAL GROUP SUBSCRIPTION OFFER—Five or more annual subscriptions, $1.50 per subscription (Canada only). Send remittance, payable to the Receiver-General of Canada, to the Circulation Manager. BOUND VOLUMES—$5 per copy delivered in Canada, $7 per copy to other countries. CHANGE OF ADDRESS—Attach previous address label.

New Year Messages

A Goal for Centennial Year

Hon. John R. Nicholson

Minister, Canada Department of Labour

Canada had an exceptionally prosperous year in 1966, and, as might be expected, this prosperity was reflected in high employment and higher incomes for labour.

Nicholson

The number of paid workers in employment rose by nearly 6 per cent, and the increase in labour income from 1965 to 1966 will probably be more than 12 per cent, the largest since 1955-56. Consumer prices in 1966 averaged less than 4 per cent higher than in 1965, so the total real labour income rose by over 8 per cent.

This is the background against which we must look at the complex and worrying industrial disputes of the past year. Admittedly, 1966 was a difficult, in fact a very trying, year in industrial relations. Settlements in several of the major collective agreements that came up for renewal were reached only after strikes or the threat of strikes. Regrettable as this may be, in my opinion, such situations are not unnatural in a booming economy, when labour endeavours to maintain its full share of the economy's growth.

When the growth of the economy is slowing down, with profits shrinking and unemployment rising, strikes tend to be much less frequent and of shorter duration. In my opinion, however, labour should not be unfairly criticized for trying, when the economy is booming, to gain its rightful share of the national rising income.

The strikes that caused the greatest loss and disruption were, of course, those connected in one way or another with transportation, our most vital industry. Concern over such work stoppages is natural. A large part of the foreboding, however, was reserved for the effects of the settlements reached which, in some instances it was said, were so large as to have a serious adverse effect on the economy. I have seen no proof of this. Moreover, it must be recognized that in a free society, major labour-management adjustments must take place occasionally.

We must remember also that today other important issues in labour disputes loom just as large as wages and other monetary benefits—such issues, for instance, as job security in the face of technological change. The way in which problems of this kind are faced and solved may well, in the long run, be equally important to the economy.

It must be kept in mind that peaceful industrial settlements are still the general rule. In the past year, close to 125 disputes under federal jurisdiction were dealt with by conciliation officers or conciliation boards. Only 10 of these resulted in legal strikes. This means that the vast majority of settlements in these disputes were made without any stoppage of work. We tend to forget that, in addition to these 125 disputes, there were many more settlements worked out by the parties themselves in industries under federal jurisdiction without any recourse to Department of Labour conciliation officers or mediation services.

The costs of labour disputes and their settlements are often widely publicized. There are, however, other costs that are much more alarming, but which rarely receive any public attention whatever. For all Canadian industries, the time-loss caused by work injuries in 1965 was estimated at 7,000,000 man-days. When the 1966 figures are in, it is likely that time-loss from work injuries will be twice that of work stoppages, even in this year of major disputes.

This clearly highlights the importance of the Canada Labour (Safety) Code that was passed by Parliament just over a week ago—an Act which, I am convinced, will be considered, in the years to come, a major achievement of 1966.

There is much work to be done during the coming year under the new

Canada's Second Century

Claude Jodoin

President, Canadian Labour Congress

As we enter Canada's second century we must be prepared to think in terms of the new century. All that has been accomplished in our first century—and it is a great deal—has provided us with a solid base on which to build. This is our responsibility — and our success or our failure will depend on how well we build.

Jodoin

The application of this truth applies as much, if not more, in the area of labour-management relations as in any other field. It is no exaggeration to say that the economic future of our century-old nation—and so the social and other futures—will depend to a very considerable degree on our success in meeting the problems that now confront us.

It is in human relations that we are lagging. Our advances in the scientific and technical fields have been considerable. But we have failed to keep pace in human needs.

This is the task that confronts us as we enter Canada's second century. We have many advantages. We are a relatively small country in terms of population. We are a country with a diversity of interests. Industrially we are a young but rapidly growing nation. Ours is a country with a tremendous future. All this lends itself to breaking new ground.

Surely, under all these circumstances, we, as Canadians, can again demonstrate the pioneering spirit that built our country and can make a really significant contribution to the great challenge of relating scientific and technical advances to human needs.

Safety Code. Each and every year on the average, approximately 70,000 persons under federal jurisdiction suffer employment injuries, and every other working day some such worker is killed on the job. The Canada Department of Labour is now in a position to play a full part in reducing the toll of needless suffering and waste of human resources that result from such accidents.

The new Safety Code is designed to become another part of a complete Canada Labour Code. The first part, the Canada Labour (Standards) Code, went into effect in July, 1965, setting minimum standards of wages, hours and holidays for workers under federal jurisdiction.

It provided for a period of adjustment to the wages and hours-of-work provisions, and a number of deferments were granted. On January 1, all deferments of the minimum wage provisions will end, and all employees under federal jurisdiction will receive the benefits of these provisions.

Further, a great deal of progress has been made in the application of the hours-of-work section of the Code. It is now in effect for the employees of the major airlines, for instance, and it will soon apply to most radio and television broadcasting.

Canadians have good reason to be optimistic about 1967. From what we know at present, it seems likely that there will not be the same pressures on the economy as there were in 1966. As a consequence, prices of goods and services are not likely to rise as much as in the past year. This probability, coupled with the fact that fewer major collective agreements come up for renewal in 1967, holds out the hope of a greater measure of industrial peace in our Centennial Year. I sincerely hope that this proves to be the case.

We cannot look for the same rate of growth of the economy as in the year just ending, however. There is now virtually no slack to be taken up in the economy, and, under such circumstances, greater economic growth can come only from an increase in the labour force or an increase in productivity.

Although the labour force is expected to increase by about 3 per cent in the year ahead, productivity will not reach this level unless more effective measures are taken.

From this we can expect in 1967 a rise of about 4 per cent in the volume of goods and services produced, compared

The Promise of 100 Years Ago

Charles Smith

Chairman, Canadian Railway Labour Executives' Association

New Year 1967, Centennial Year, a date which has been anticipated by all Canadian citizens with hope that the promise of 100 years ago to weld together a strong, united nation would be realized and that Canada, the land of opportunity, would celebrate its birthday in peace and happiness.

Smith

The workers of this country, who by their efforts have brought about the economic stability necessary to attain nationhood, have a right to celebrate the Centennial and to be justifiably proud of their accomplishments during a century of progress.

Unfortunately, as we approach the New Year, Confederation faces many complex problems, and the utmost co-operative effort and understanding is essential if our two founding races, French and English, are to go forward together to the promise of greatness.

The Canadian Railway Labour Executives' Association, representing railway employees in all provinces on a national basis, is vitally concerned with the preservation of our democratic processes under Confederation. We shall continue to use all our resources to prevent fragmentation of workers on a racial or geographic basis. Separatism in any form has no part in the union structure, and we condemn any action that attempts to separate the railway worker in Quebec from his fellow-worker in British Columbia or any other province. It is indeed regrettable that money now being spent in union conflict, particularly in Quebec, could not be put to much better use for the greater benefit of all workers.

The year 1966 will be remembered primarily by railway employees because of the general railway strike, which demonstrated the solidarity of workers in their justifiable demands for equitable treatment in comparison to workers in other industries.

The action of the Government in forcing a termination of the strike—with compulsory arbitration as a final solution—has created many problems for both employees and the union leadership. Violation of the law could only result in chaos, and responsible leadership cannot advocate such a policy. To do so would be to abdicate the responsibility of office.

One thing has been made crystal clear: The processes of the Industrial Relations and Disputes Investigation Act, under which railway unions function, must be revised to provide more effective machinery for true collective bargaining and elimination of delay in reaching settlement.

CRLEA will do everything in its power to co-operate with the Government in this respect, while at the same time registering unequivocable opposition to the theory that compulsory arbitration is the only solution to the problem of negotiations in the railway industry. The report of the Industrial Inquiry Commission by Mr. Justice Freedman, received late in 1965—without doubt one of the most important reports ever issued in connection with collective bargaining on the railways—will have a profound effect upon future policy.

The year 1966 has been a year of frustration and unrest for railwaymen. Procrastination and delay in reaching a settlement of notices served in November 1965 has built up a feeling of active resentment against Government interference. The myth that wage increases are the direct cause of inflation has been exploded, for productivity continues to show steady growth, and profits continue to increase. Labour expects to share equitably in the benefits of increased productivity through technological innovations, and it will accept no less.

As we move forward to the New Year, let us hope that the clouds of anxiety which beset the union-management-government relationship will be lifted, and that, by a realistic approach to the problems confronting us, a method may be found to avoid the conflict engendered by the existing abortive collective bargaining process.

50 Years Ago

Wage increases in January 1917 ranged from one cent an hour to 10 per cent

Railroads in United States contesting constitutionality of eight-hour act

In December, 1916 the Guelph Radial Railway Company, "by voluntary concession, granted their motormen and conductors, to the number of 24, an increase of a cent an hour," the LABOUR GAZETTE of January 1917 reported. About 2,000 employees of the Toronto Electric Railway Company got an increase of 2½ cents an hour, and car cleaners got 1½ cents.

The Canadian Pacific Railway Company gave an increase to its maintenance-of-way employees, retroactive to October 1. Foremen got 20 cents a day more, and the men under them got 25 cents. Arbitrators in a dispute between the Quebec Street Railway and its employees unanimously awarded the latter an increase of 2½ cents an hour. Employees of the Dominion Express Company, who were earning less than $2,000 a year and had not less than six months' service, were granted an increase of 10 per cent. The change affected 1,876 employees.

Engineers and firemen on the Morrisey, Fernie, and Michel Railway were given an increase, the engineers' wages being raised to $42.26 a week from $40.53, and the firemen's wages to $28.14 from $26.46 a week. Twenty-two plumbers and steamfitters at Kingston had their wages raised to $3.50 from $3.00 for an eight-hour day. A bridge and iron company in Bridgeburg, Ont., voluntarily gave its 1,000 employees an increase of 10 per cent.

Railroads in the United States, the GAZETTE said, had begun suits attacking the constitutionality of the Adamson eight-hour act, which had become law in the previous September, and which had averted a strike of railroad trainmen that had threatened to paralyze 200,000 miles of railway. The companies contended that the act arbitrarily and unreasonably deprived them of liberty of contract, and by increasing wages had deprived them of property without due process of law. The Department of Justice had issued a statement on November 15 to the effect that it would take direct charge of these cases.

The GAZETTE compared this law with an award that had been given a short time before by arbitrators in the case of the railway switchmen in the United States. The switchmen had demanded an eight-hour day, with time and a half for overtime, at the same time as the trainmen were making a similar demand. Unlike the trainmen, however, they had agreed to submit the dispute to an arbitration board. The award of the board had granted the eight-hour day as a unit of reckoning, but had not established the principle recognized in the law that had settled the trainmen's dispute—namely, that 10 hours' pay for eight hours' work was a minimum day's wage.

The GAZETTE published figures from returns supplied by trade unions giving the percentages of their numbers who were unemployed on three different dates: December 30, 1915; June 30, 1916; and September 30, 1916. On the first of these dates, the percentage unemployed for all manufacturing and mechanical industries was 3.1; on the second date, 1.1; and on the third date 1.3.

In steam railways, the percentages were 2.4, 0.5, and 0.6; in navigation, 12.2, 2.3 and 1.1; in building and construction, 28.3, 8.6 and 6.3; in mining and quarrying, 5.9, 1.2 and 0.7. For all occupations together, the percentages were: 8.7, 2.1 and 1.4.

"Although immigration showed a gain as compared with 1915, the relief afforded was very slight," this journal said. "In British Columbia, however, the increased demand brought several hundreds more Japanese and Chinese than in the previous year. Figures (unrevised) prepared by the Immigration Department for the calendar year show the total immigration for 1916 as 65,732, an increase of 17,266, or about 36 per cent over 1915, when the number of immigrants was 48,466." (In 1912-13, immigration had reached a total of 402,432.)

The numbers arriving from Great Britain were given as 9,606 in 1915 and 8,617 in 1916; from the United States, 36,098 in 1915 and 51,613 in 1916; and from other countries, 2,762 in 1915 and 5,484 in 1916.

"Navigation on the lakes closed December 1, but from some ports freight was carried until about the middle of the month," this journal said. "Shipping at winter ports was brisk, and longshoremen were well employed. Navigation between Point du Chene and Summerside, P.E.I., closed December 30. Halifax reported that work along the waterfront was very active, and promised to continue so throughout the winter; about 1,200 men were loading and unloading steamships. At Saint John, longshoremen were well employed, and crews were working day and night.

"Up to the close of navigation on December 30, the port of Montreal was busy, though the returns for the year in the number of vessels and tonnage showed a falling off from the previous year, accounted for by shortage of vessels and a labour shortage in the Nova Scotia coal mines, which caused a falling off in the number of coasting vessels coming to Montreal. . . ."

In the Prairie Provinces, it was reported that little grain remained unthreshed in the Saskatoon district, and that at Calgary, threshing was about completed and men were returning in large numbers to the cities for other employment.

NEWS BRIEFS

Canada-wide postal strike averted by agreement signed few hours before deadline on November 15

A Canada-wide postal strike was averted by an agreement reached on November 15, a few hours before the strike deadline. Under the terms of the agreement, the 20,500 members of two large unions, the Letter Carriers' Union of Canada and the Canadian Union of Postal Workers, were given an increase of 25 cents an hour across the board.

A few days before the settlement was reached, the Government had appointed Mr. Justice André Montpetit of the Quebec Superior Court, who had formed the Royal Commission of Inquiry into Working Conditions in the Post Office Department (L.G., Jan., p. 9) as a mediator in the dispute between it and the postal employees.

The dispute began toward the end of August with a demand by the Canadian Union of Postal Workers for pay increases of between $1 and $1.16 an hour for its 11,000 members; and this demand was followed some three weeks later by the threat of a strike by the Letter Carriers' Union of Canada, if the Government did not grant its 9,500 members a wage increase of 39 per cent by November 15.

The pay of postal workers would ordinarily have been due for review with effect October 1, but in the past, a considerable period has usually elapsed before the amount of such increases has been announced.

Shortly after the letter carriers made their demand, it was given out that the Government was considering an offer of an interim pay increase for the postal workers, and on October 17 the Civil Service Commission announced that it had recommended an interim increase of 6 per cent, leaving a further increase open to collective bargaining next year.

On October 18, the Prime Minister said in the Commons that the Government was considering "whether any exceptional procedures are required" to avert a strike by the postal workers. He said, however, that he hoped no such interruption of mail service would occur. At this time, the Treasury Board was holding meetings with the postal unions, but there was said to be no indications that the Treasury Board was ready to increase the 6-per-cent interim increase recommended by the Civil Service Commission, and the unions were holding out for a minimum of 19.5 per cent.

Hon. E. J. Benson, Minister of National Revenue, who was in charge of negotiations with the postal unions on behalf of the Government, speaking in the Commons on November 1, gave no hint of any substantial progress in settling the dispute, and he termed the postal workers' demands "unreasonable."

William Kay, President of the Canadian Union of Postal Workers, said at a rally on November 6 that the employees would accept nothing but the "Pearson formula" of a 36-per-cent wage increase (apparently an allusion to the settlements that had resulted from earlier Government intervention in the strike of longshoremen in Quebec ports (L.G., Sept. 1966, p. 497, Dec. 1966, p. 706) and the strike of St. Lawrence Seaway workers), with an interim increase of 18 per cent while negotiations were going on.

The unions set November 15 as the date for a strike to begin, but a spokesman for one of the unions said that this did not preclude further mediation—Mr. Justice Montpetit having by this time been appointed mediator in the dispute. Until almost the last moment, it appeared that a strike was imminent, since negotiations with the help of the mediator were conducted in secrecy, and there was little sign that a settlement was likely before the strike deadline was reached.

The settlement accepted by the union leaders was ratified by the members after the leaders had explained its terms to them, but there were bitter complaints from local union officers across the country, and some demands from union members for the resignation of Mr. Kay. No attempt was made, however, to engage in wildcat strikes in defiance of the agreement.

Women invited to join trade commissioner service

Hon. Robert Winters, Minister of Trade and Commerce, told the House of Commons in October, "One step to broaden the various aspects of our trade commissioner service is that we are now doing more to encourage young women to apply. I am hopeful that suitable qualified candidates will come forward for recruitment."

CMA spokesman objects to Freedman Report

"We don't think it is proper that management should be obliged to negotiate the right to operate more efficiently," Jack Whitelaw, Executive Vice-President of the Canadian Manufacturers' Association, said recently, with reference to the recommendations of the Freedman Report (L.G., Jan.-Feb. 1966, p. 4).

He said that manufacturers would be "gravely concerned" if the Government were to contemplate enacting legislation that would make technological change subject to "the concurrence of unions."

It was the first time that a spokesman for the CMA had replied to the Freedman Report, which recommended that innovations that led to the disappearance of jobs should be delayed until the next contract negotiations, or should be made an issue on which a union could strike during the life of an agreement.

Mr. Whitelaw said that legislation such as that proposed in the report would give unions the power to veto changes that employers wished to make in order to increase efficiency.

But he also pointed out that manufacturers realized it was their duty to minimize as far as possible effects of change that were harmful to employees. As evidence of this, he cited training and retraining programs, severance pay and other provisions.

Nurses' association director returns from U.S.S.R.

Dr. Helen K. Mussallem, Executive Director of the Canadian Nurses' Association, has recently returned from the U.S.S.R. where she acted as Senior Consultant and Chief Rapporteur for a seminar sponsored jointly by the World Health Organization and the Ministry of Health and Welfare of the U.S.S.R. from October 6 to 28, 1966.

The seminar brought together 23 senior nursing officers from 22 different countries to observe and study all aspects of health services in the U.S.S.R.

Under the direction of Lyle Creelman, Chief of the Nursing Section, WHO, the seminar began in Moscow in the Union of Soviet Socialist Republic and travelled to the Ukrainian, Georgian and Abkhazion Republics. Cities and communities visited included Kiev, Tbilisi, Vinnitsa, Tulchinsk, Sukhymi and Kalinino.

A complete report will be available from the World Health Organization during the latter part of January 1967.

U.S. Industrial Conference Board observes 50th anniversary world convocation

The National Industrial Conference Board's 50th anniversary world convocation on "The Future of Capitalism," took place in New York City in September. George Meany, President of the AFL-CIO, and Erwin D. Canham, Editor in Chief of the Christian Science Monitor, were among the speakers.

Mr. Meany contended that U.S. business had prospered richly from the mass markets created as a result of increased benefits won for all workers by organized labour. He defended labour's right to strike, and argued that it was used by unions only as a last resort.

"Without it, there is no free collective bargaining," he said. "Moreover, if the Government takes away the right to strike by forcing free men to work against their will, the Government also destroys the basis on which the enterprise or industry operates for the profit of private investors."

Labour, he said, had no desire to put companies out of business, or to eliminate profits. It merely wants a fair share of the income in return for the contribution workers are making to the economic system.

Growth Threatened

Mr. Meany said that the U.S. economy continued to face the problem of unemployment, while the lack of proper balance today threatened its growth. "Business investment in new plants and machines is in the third year of a superboom and cannot continue. The installation of these new and automated plants and machines is increasing productive capacity much faster than the demand for goods and services can grow under ordinary conditions. So the potential for a big gap between the economy's ability to produce and its ability to buy is developing."

Mr. Canham observed that if labour unions did not exist, they would have to be created for the greater benefit of the U.S. economy. He maintained that recent failures in the collective bargaining process, which resulted in a number of strikes that seriously affected the public interest, invited increased government intervention that was dangerous for both labour and management.

"Such intervention is harmful to both sides. It interposes Government in the market process. Government has no business in the market process," Mr. Canham said.

He suggested that there was a substantial degree of identity between business and labour, one representing money capital and the other labour capital. But the relationship that prevails between them is too often that of adversaries, although they are essentially partners.

Mr. Canham added that the problems of their relationship could be reduced if labour were given greater information about company operations, and perhaps a greater say in its management—although he acknowledged that Mr. Meany might reject membership on a board of directors as an attempt to "take him into camp."

Middle-Income Gains

A chartbook released at the conference showed that the nation's middle-income group, continuing to gain economically, now receives the major share of all personal income. "The 'bloodless' income revolution under contemporary capitalism is steadily re-shaping, almost inverting, the income pyramid," notes the chartbook.

Just after World War II, about one third of all income was in the hands of households whose annual incomes were today's equivalent of $7,000 to $15,000. Those in this income bracket today control more than half of all incomes. Further, whereas two thirds of the country's households had incomes of less than $5,000 a year in the early 1940s (expressed in 1965 dollars), about one third are now in that bracket. One in four homes currently has an income of $10,000 or more, up from one in 20 some 25 years ago.

In announcing release of the chartbook, titled "Modern-Day Capitalism: Progress, Problems, Potentials," NICB President H. Bruce Palmer observed: "In the midst of the new war upon poverty which affects a fifth of our people, it is well to recall that the free market mechanism and the use of the profit incentive have helped raise the remaining four fifths of this nation's population to levels of living unmatched in history."

Americans live twice as well as they did a half century ago, judged by the goods and services they consume, the chartbook points out. As late as World War I, the American factory employee averaged little more than $10 to $15 for a 50 to 55 hour work week. Today, his cheque averages $110 and above, and he buys considerably more, despite persistent price rises.

The chartbook was prepared by Martin R. Gainsbrugh, Chief Economist at NICB, and by Gertrude Deutsch, Senior Economist.

PARLIAMENT

An amendment to the National Housing Act to encourage the demand for housing by increasing the loan ratio for rental housing from 85 per cent of the lending value to 90 per cent, and by providing that loans for the purchase of existing housing should be made insurable, was introduced by the Minister of Labour and given first reading on October 27 (p. 9187) as Bill C-241. The bill was given second reading on November 15 (p. 9943), and third reading on November 17 (p. 10034). It received the Royal Assent on November 22 (p. 10191).

An extension from November 15 to November 30 of the period of negotiations between the railways and the unions under the special legislation that ended the railway strike at the beginning of September, was announced by the Minister of Labour on November 15 (p. 9928). The Minister said that he was recommending the extension to the Governor in Council on the strength of a report from the mediator, Dr. Carl Goldenberg, to the effect that favourable progress was being made in the negotiations.

An increase in the rate of interest on National Housing Act loans from 6¾ to 7¼ per cent, with effect until March 31, 1967, was announced by the Minister of Labour on November 22 (p. 10224). The Minister said that after March 31 the rate would be reviewed every quarter.

The third annual review of prices, productivity and employment by the Economic Council of Canada was tabled by the Prime Minister in English and French on November 21 (p. 10105).

Bill S-54 (from the Senate) to amend the Canada Labour (Standards) Code was introduced by the Minister of Labour and read for the first time on November 24 (p. 10273).

Canadian nurse loaned to WHO

Miss Margaret D. McLean, Consultant Hospital Nursing, Department of National Health and Welfare, and chairman of the Canadian Nurses' Association's Committee on Nursing Services, was loaned to the World Health Organization to direct a seminar in Teheran, in November, on "The Development of the Clinical Services for Nursing Education." Twenty Middle Eastern countries participated in the 10-day seminar.

When it ended, Miss McLean visited France, Sweden and Britain to observe their nursing service administrations.

CLC brief criticizes bargaining legislation

A detailed criticism of the Government's legislation to establish collective bargaining in the public service was contained in a brief submitted some time ago by the Canadian Labour Congress to the joint committee of the Senate and the House of Commons on the public service of Canada. The legislation in question was contained in Bills C-170, C-181 and C-182.

The CLC's main criticisms as summarized in the submission were:

—the legislation, particularly C-170 to provide for the establishment of a system of collective bargaining applicable to employees in the public service of Canada and for the resolution of disputes arising out of such collective bargaining, was unnecessarily complicated and restrictive;

—the legislation placed arbitrary barriers around the business of collective bargaining and thus reduced the employees' opportunity to have a say in determining their own conditions of employment;

—the proposed Public Service Staff Relations Board and its chairman were given greater powers than was necessary or desirable;

—the procedures for the settlement of disputes were unduly complicated and they reduced freedom of action compared with that which prevailed in private industry and in the public service elsewhere;

—Bill C-170 removed, even though only temporarily, the right of employees to establish bargaining units and bargaining agents of their own choosing, and otherwise interfered with the right of employees' organizations to decide their own internal systems of government;

—the proposed legislation failed to provide adequate procedures for appeal;

—Bill C-170 "gratuitously" interfered with "the right of employees to make political decisions;"

—Bill C-170 failed to provide for the check-off of union dues, which already existed, or to consider other forms of union security.

The Congress said that these bills represented "a landmark in the history of the public service of Canada," but it contended that since in this legislation the Government, which was also the employer, was making the "ground rules" of collective bargaining in the public service, it was important for it to avoid making rules that seemed to favour itself as the employer. It went on to argue that "if such an imbalance is in fact written into the legislation, then the legislation itself will be more the shadow than the substance of genuine collective bargaining and of a sound employer-employee relationship."

Women faculty members in Canadian universities

The activities of a four-member committee of the Canadian Association of University Teachers (CAUT), which began work in the fall of 1965 to determine the extent and nature of discrimination against women faculty members in Canadian universities, are reported in a recent bulletin of the Association.

Matters to be considered by the committee included promotions, workloads, opportunity to serve on policy-making committees, and research opportunities, as well as salaries and pensions.

In 1961, the CAUT had adopted a resolution establishing a policy of equal opportunity for women in university faculties. Of the 35 presidents who at the time received copies of the resolution, 23 replied endorsing the policy outlined. In view of the time that had elapsed, the committee thought it should be able to determine to what extent the declared policy had been put into practice.

Terms of reference for the committee included exploration of the extent of discrimination against female academics in respect to: salaries, promotions (including administrative appointments), retirement schemes, insurance plans and other benefits, and the attitudes of male colleagues.

As to salaries, an analysis of data published by DBS* each year from 1956-57 to 1963-64 showed a considerably lower average median salary for women. The gap between the median salaries of men and women grew wider every year, and, although the changes in the ratio of women's salaries to those of men have not been completely consistent, the relative position of women in 1963-64 was worse than it was in any preceding year, with the exception of 1960-61.

The committee proposed also to undertake analysis of these DBS data with respect to discrimination in promotions and in relation to retirement schemes, insurance plans and other benefits.

**Salaries and Qualifications of Teachers in Universities and Colleges, 1963-64*, published by the Dominion Bureau of Statistics, Education Division, Higher Education Section, Queen's Printer, Ottawa, Ontario, May 1964.

Welfare Council Committee to join Homehelp Services

The Canadian Welfare Council's National Committee on Visiting Homemaker Services, on which the Women's Bureau of the Canada Department of Labour is represented, recently applied for membership in the International Council of Homehelp Services, with headquarters in Utrecht, Holland.

Regulations and by-laws of the international organization define home-help work as that which is "executed by private and statutory organizations and is given in the families by qualified persons under competent direction and in general for a limited period of time, to assist the family unit or individual in cases of illness, overwork, incapacity, absence of the mother or housewife, in cases of maternity, old age and other social reasons."

Aims of the International Council are: To build relationships between all homehelp organizations, to exchange ideas, to organize meetings, to collect information, to study questions related to the service, to promote research and distribution of the results of research, to promote reciprocal visiting among members.

Membership on the Council is open to private organizations, statutory organizations and co-ordinating organizations on the national level. Miss Taggart of the Toronto Visiting Homemakers' Association, who has been elected as a member of the Central Committee, further explains: "While separate private and public organizations may join the Council as individual members, the practice in most countries is for the co-ordinating national organization only to join, and to be allocated votes in accordance with the total number of homemakers employed by all its member agencies."

She added that it would be "preferable for Canada to follow the practice of membership through the co-ordinating organization, The National Committee, since meetings will probably be in Europe, and individual agencies would find it difficult to send representatives, even if this were desirable."

Nursing consultant retires

Miss Mildred Walker, Senior Nursing Consultant, Division of Occupational Health, Department of National Health and Welfare, recently retired after 17 years service with that branch. She will be succeeded by Miss Irene Courtenay who has had extensive experience in public health nursing service, including the armed services, industry and government.

CNTU dissociates itself from federal bodies

Quebec's Confederation of National Trade Unions announced in the middle of November that it was dissociating itself from all the federal bodies on which it was represented, as a mark of its dissatisfaction with certain decisions of the Canada Labour Relations Board.

The immediate cause of discontent was the Board's rejection of the Confederation's application for bargaining rights for certain employees of the Canadian Broadcasting Corporation, and for employees of the Canadian Pacific Railway Company's Angus Shops in Montreal. In each of these cases, the CNTU claimed to have enrolled a majority of the employees in the bargaining unit as members, but the CLRB refused the application on the ground that the employees in question had already been enrolled in national bargaining units that could not be broken up.

Another cause of CNTU dissatisfaction was the federal Government's Bill C-170, regarding collective bargaining in the public service of Canada, which would give the federal Cabinet power to decide on bargaining units for federal civil servants. The Confederation contended that the bill, which was then in the committee stage, would be a serious stumbling block to union freedom, and would have grave consequences for federal civil servants in the Province of Quebec.

Besides the CLRB, the Confederation has had representatives on the Economic Council of Canada, the National Employment Committee, the Quebec Regional Employment Committee, the Unemployment Insurance Advisory Committee, the National Technical and Vocational Training Advisory Council, and the Centennial Commission.

Four conditions laid down by the CNTU for its return to the boycotted institutions were:

—in cases in which there is a conflict of unions, the CNTU should have equal representation with the Canadian Labour Congress;

—in cases where the CLRB is choosing between rival unions, the chairman alone should vote;

—all nine members of the CLRB should be bilingual, including the president; and

—the CLRB should maintain national bargaining units only if "natural" bargaining units within the main unit agree to this.

"If there is no change," said Marcel Pepin, President of the CNTU, "we will simply never return to these federal organizations. We will examine what further strategy to adopt when the time comes. The changes we are seeking are essential for the respect of the freedom and right of association of the worker we represent."

Feeling in the CNTU about the issue was so strong that Mr. Pepin attacked the Canada Labour Relations Board in a speech before the International Labour Organization, and he threatened to lay an official complaint with the ILO against the Government of Canada.

Toronto University conference scheduled for January

A conference on "Wages, Prices, Profits and Economic Policy" will be held by the Centre for Industrial Relations, University of Toronto, on January 23 to 25, 1967 at the Park Plaza Hotel, Toronto.

The subjects of discussion will be: "Wage-Price-Profit Relations in Canada —The Problem in Perspective"; "A Diagnosis of the Problem"; "Foreign Experience"; and "A Policy for Canada."

The speakers will be: Dr. John Deutsch, Chairman, Economic Council of Canada; Hon. Mitchell Sharp, Minister of Finance, Canada; Dr. Arther M. Ross, Commissioner of Labor Statistics, United States Government; David McQueen, Economic Council of Canada; and Prof. G. L. Reuber, Head, Department of Economics, University of Western Ontario.

The second and third days of the conference will close with a panel discussion in which a number of specialists will take part.

with more than 6 per cent during the year just ending.

An increased growth in productivity is of crucial importance in maintaining and increasing our total economic growth. It is the key factor that will determine Canada's level of prosperity and the living standards of all Canadians.

We can increase it, but the task demands all our imagination and initiative in making the best possible use of our resources—human and material—in adopting every useful technological and other advance, and in building a positive and more effective industrial relations system.

There is no more worthy goal for our Centennial Year.

Labour legislation for Ontario women workers

Legislation of interest to women workers in Ontario is detailed in a recent leaflet issued by the Women's Bureau of the Ontario Department of Labour.

The leaflet covers the subject of wages, and gives the minimum wage in effect—$1 per hour for men and women. Five exceptions are listed in which wages somewhat lower than the legal minimum are permitted, mainly for learners, seasonal workers, students who work part-time and persons under 18 years of age.

Complaints of violations of the law concerning equal pay for equal work, and of discrimination on account of race, creed, colour, nationality, ancestry or place of origin, in connection with employment or membership in trade unions, are dealt with by the Ontario Human Rights Commission, as also are cases of alleged discrimination against persons between the ages of 40 and 65.

Failure to comply with legislative provisions, concerning earnings or hours of work, including restrictions about hours for women, vacations with pay, meal periods, rest areas and lifting weights, should be reported to the Labour Standards Branch of the Department of Labour, the leaflet points out.

Overtime pay, sick leave, maternity leave and notice of termination of employment are not covered by legislation. These matters are usually dealt with by company policy and practice, or are decided jointly by the employer and a union.

Omission

Readers will recall a two-part article, "Collective Agreements in Industry," that appeared in the October and November issues of the LABOUR GAZETTE.

We neglected to mention in a footnote to Part II that, because of space limitations, 10 of the tables prepared to augment the text had to be omitted. The tables deleted were all short ones. Provisions contained in them were summarized in the text under "Miscellaneous Provisions."

The tables were: Some Form of General Wage Adjustment or Reopening; Guaranteed Employment or Earnings; Paid Bereavement Leave (Parents, Children, Spouse, Brother, Sister); Paid Bereavement Leave (Father-in-Law, Mother-in-Law); Compensation for Negotiation of Collective Agreements; Compensation for Grievance Work; Contracting Out; Moving Expenses or Relocation Allowances; Training or Retraining; Protective Clothing or Equipment, Uniforms, etc.

Royal Commission of Inquiry Report Into Post Office Working Conditions

More than 200 recommendations made concerning various aspects of administration and policy based solely on grievances presented at the hearings

"A large number of the post office employees' grievances are, first and foremost human relations problems," says the report of the Royal Commission of Inquiry Into Working Conditions in the Post Office Department, which was published in October.

The report is a highly detailed one containing 282 recommendations, most of which concern various aspects of administration and policy, and it is based solely on an examination of complaints actually made to the Commission. It makes this clear when it says, "This report will . . . not contain remarks or observations on all working conditions of postal employees, but solely on grievances presented at the hearings."

Hon. Mr. Justice André Montpetit of the Quebec Superior Court was the single commissioner, but he was assisted by two advisers, one appointed by the Government and the other by the three staff organizations that represent the postal employees: the Canadian Postal Employees' Association (now known as the Canadian Union of Postal Workers), the Federated Association of Letter Carriers (now known as the Letter Carriers' Union of Canada), and the Canadian Railway Mail Clerks' Federation.

Paul A. Faguy, then Director General of the Emergency Measures Organization, was appointed by the Government as its representative; and Romeo Maione, then Assistant Director of International Affairs of the Canadian Labour Congress, was appointed to represent the staff associations.

Hon. Mr. Justice Montpetit

General Impressions

The Commission considers the questions it deals with from the point of view of both management and employees, and most of its recommendations are in the nature of suggestions for the improvement of conditions affecting the employees. At the beginning of the report, however, it gives some "general impressions," the first of which is that quoted in the first paragraph above.

"Except in one or two districts," the report continues, "the attitude of some supervisors and postmasters towards their employees leaves much to be desired. These people have only a vague notion of the importance of maintaining good relations with their staff. This is one of the main reasons why the national leaders of the staff organizations do not share the opinion expressed in the Report of the Royal Commission on Government Organization that 'morale is very high' in the Post Office Department . . .

"We heard too often of postmasters or supervisors who consider themselves almost infallible, or who under the pretext of maintaining at any cost their conception of order and discipline, obstinately refuse to change any decision taken at a lower level.

"The forthcoming collective bargaining will only increase the implications and consequences of the sayings and doings of all supervisors at every administrative level. It will be important to think much more carefully before taking action in order to avoid provoking too many recourses to the grievance procedure, and creating unnecessary difficulties and troubles for headquarters. Hence a well-conceived policy of consultation and of exchange of viewpoints at all levels becomes essential. . . .

Communication for Morale

"We are firmly convinced that a well conceived method of communication between the administration and the national, regional and local leaders of the staff organizations, and also between supervisors and employees, will create eventually in the Department an atmosphere of trust and mutual understanding, and ensure a spirit of co-operation and helpfulness which will benefit everyone. Such a policy will help to raise the employees' morale. . . .

"The Department did not conceal its concern over morale. It was quite evident that it did not wish to spare any effort to have the Department adjust itself to new concepts of co-operation.

"These new concepts are not meant to deprive management of its right to manage. They are conducive instead to ensuring the full co-operation of all of the staff in the improvement of working conditions and the maintenance of an efficient postal service.

"We hope that the Department will succeed in convincing its district directors, postmasters and supervisory staff not only to accept these concepts, but also to put them into practice without reservations. It is true that the anticipated results will be obtained only if each and everyone, in every field service, makes an effort to accept them. Instructions and directives are somewhat like laws: however good and progressive they may be, they are often only as good as the people who have been entrusted with their enforcement.

"Also, we hope that the employees' representatives will prove to be willing to participate in this evolution already

started. These representatives have not only rights but also duties and responsibilities. Some are rebelling to the point that they are alarmingly unwilling to compromise. In everyone's best interest, they will have to learn to be more conciliatory, more understanding, and more reasonable.

Joint Consultation

"They will change their attitude if they have the very definite impression that they are receiving all the consideration they are entitled to as employees' representatives. There are always two sides to a coin. And if there is any area where it is important to know when to make allowances, and agree, at the opportune moment, to acceptable compromises, it is in the field of consultation—especially when it is inspired by a true desire to co-operate.

"We believe that under these terms, staff relations in the Department will become what they ought to be, and that the Department, together with the staff organizations and the employees themselves will ensure that they remain cordial and frank.

"We were impressed with the difficulties . . . the Department often faces, depending on the nature of the working conditions. It is not always master of the situation. Solutions sometimes are not within its control. This type of situation is not very helpful in its relations with employees. These employees are among a large group of civil servants and, as such, are subject to certain statutes which fall within the exclusive jurisdiction of Parliament, and over which the Department has no control. . . .

"It must be recognized, however, that there is a vast sphere of activities where the Department has complete control. It can be credited with excellent achievements and plans which show promise. On the other hand, there are quite serious gaps which should be corrected without delay. . . ."

Modern Methods

The report said that, following the recommendations of the Royal Commission on Government Management, the Department had been trying for the past two or three years to keep up with the times and to apply modern management methods. In pursuance of this policy, headquarters had delegated many of its responsibilities and much of its authority to district directors and postmasters. These in turn had delegated to those under them duties and responsibilities they had never had before. "In fact, the Post Office Department has adopted a far more advanced decentralization policy than many other departments. This policy was and still is sound. . . ."

The rapid expansion of the economy had affected the whole postal service, the report pointed out. Consequences of this expansion had been "the almost unforeseeable increase in the volume of mail, the rapid development of several large centres, the movement of population, the necessary recourse to more modern means of transportation, the difficulties of recruiting labour in some places, the competition of large industries with regard to wage levels and general working conditions, the increase in night work, the make-up of a larger number of shifts at unusual hours, etc.

"All of these factors have influenced the Department's day-to-day relations with its employees. They caused certain problems to which the Department did not always give serious consideration because it did not care to agree to any concession which might affect in any way the speed and efficiency of the postal service.

Dated Attitudes

"If we had to explain this conduct, we would be inclined to ascribe it to a state of mind rather than to a considered and intentional policy. There are some senior employees in the higher grades in the Department who have been promoted from the ranks but still have the attitudes which were prevalent at [the time they were promoted]. They did not keep up with the times and, consciously or unconsciously, they refuse to do so. They are living in the past. They have a decided tendency to sacrifice the morale and welfare of the employees to their idea of an unequalled postal service.

"This lack of moderation, or this attitude, which prevents people from seeing the tremendous possibilities of a policy of a happy medium, has caused strong resentment amongst employees.

"We have noticed serious deficiencies in personnel administration at all levels. These may be due to the enormous difficulties which most departments experience in recruiting really competent men for this type of work which has become highly specialized. Whatever the reason may be, the Department is in dire need of such men. Many personnel officers in local offices have not been trained adequately for personnel work. We do not cast any doubt on their sincerity and desire to do their best. These people, whether because they have to perform too many incidental or secondary duties, or because they see their function as that of disciplinarians or schoolmasters, do not, at times, fulfil their responsibilities in this area of work which covers so many different kinds of activities. . . "

Staff Rotation

The report said that it was normal for an organization as large as the Post Office Department not always to be aware of its own shortcomings, and it suggested that as a means of dealing with this problem the Department should "not only continue but also intensify its program of staff rotation in order to benefit from different opinions, even though we are aware of the difficulties and opposition that this approach might arouse. It is equally essential to bring new blood into some of the key positions of the post office organization. A few strong personalities, unfamiliar with the ways and customs of the postal service, should bring about changes and stir those who do not see a need for such changes.

"The Department can derive great benefit from the program instituted by the Civil Service Commission for the rotation of administrators as part of a better career planning program. It must strive to obtain closer co-operation or more effective and prompt action from those other agencies which are responsible for the physical and environmental working conditions and for the general atmosphere in the working areas.

"We would like these agencies to co-operate fully and assist the Department by delegating the necessary powers, and the financial means not now available, as and when required.

"The implementation of collective bargaining with its accompanying discussions and negotiations, together with the institution of a grievance procedure will help resolve a good number of the problems. A progressive and understanding attitude on the part of everyone concerned will do the rest. Our inquiry would not have been called had all the privileges mentioned in the preceding paragraphs been granted to employees at the right time.

Service—at a Price

"Our commission was greatly impressed by the Department's efforts to give the public the best possible service. On the other hand, the employees showed, by their attitude and statements, that they too are anxious to work in a progressive postal service and they are proud to provide such a service.

"The need for rapid and almost instantaneous service continually came up in our discussions with management. . . . This preoccupation for speed, however, must not sweep aside every other consideration. Even though we are sure that

the people of Canada want an excellent service, we are also just as sure that they do not want this at the expense of the employees' welfare.

"Better schedules for mail handling could be put into effect in certain localities in order to improve hours of work and shift schedules, to facilitate transportation and parking, to prevent, at least partially, the constant recurrence of peak periods in the evening, to reduce weekend and night work and, finally, to restrict and bring to normal proportions the use of part-time and casual employees."

The Commission said that an even flow of work through the various operations of the post office would facilitate the settlement of many of the more serious grievances, and it recommended the hiring of outside consultants to study the problem of workloads, and the employment of full-time staff whenever possible. This, it thought, would lead to increased efficiency and to a saving in costs, a continuation of good service to the public and improved morale for the employees.

It expressed some surprise that little had been said by the postal clerks about mechanization and automation, since they would be the first to be affected by it. "Possibly they see this problem only far in the future. We believe this is a problem of prime importance which should be looked into immediately by all interested parties, since its effect will be very serious not only on job security but also on job classification, seniority, etc."

Crown Corporation?

One of the more important of the Commission's recommendations concerned the proposal that the post office should be made into a crown corporation. This proposal, it appears, came from the staff organizations of the postal employees, and the main purpose of the change, from their point of view, was that it would give them all the rights and advantages of a trade union. The Commission said that Bill C-170 (Public Service Staff Relations Act) would satisfy these aspirations only in part.

It went on to say, however, that it thought the designation of the post office as a crown corporation would be premature. It recommended that the Government should "proceed with a serious and thorough study so that it may make its position clear, once and for all, on the advisability of giving the Post Office Department the status of a crown corporation. Due consideration should be given to the national interest as well as to the economic and social implications of such a change."

The Commission attached great importance to joint consultation between management and the employees' organizations regarding important proposed changes in working conditions, and it recommended that two local joint committees should be set up immediately in every staff post office, Grades 14 to 19 inclusive, one for the postal clerks and one for the letter carriers. These committees should meet once a month, and at these meetings local working conditions would be the subject of discussion, negotiation and recommendation. The Commission also recommended that similar joint committees should be set up at every staff post office, Grades 9 to 13 inclusive, if the employees in those post offices wished it.

The report further recommended that two national joint committees should be set up in Ottawa, one for postal workers and one for letter carriers, to deal with matters of national concern in a similar way to that in which the local committees were to deal with local matters.

Overtime and Favouritism

The report made a number of recommendations that were intended to deal with employees' complaints of excessive overtime work, excessive use of part-time and casual employees, and of favouritism and nepotism in the hiring of these employees, and also of favouritism in the treatment of casual employees compared with the way full-time employees were treated. It also gave some attention to high turnover of postal employees in some parts of the country.

As a safeguard against favouritism in hiring, the commission recommended that all hiring of casual, part-time, or any other employees not coming under the Civil Service Act, should be done through the National Employment Service. It also recommended that the Department, in co-operation with the local joint committees, should make a survey of part-time and casual employees on strength at each staff post office, and that postmasters at such offices should be required to display monthly reports on the number of part-time and casual employees in his office, and of the number of hours worked by them.

An "equitable allowance for sick or special leave with pay under the same conditions as are applicable to full-time employees," should be granted to part-time employees, the report said.

Recommendations were made for the regulation of the use of special help at Christmas time.

The commission examined a complaint that the Department had employed too many female workers. It said, however, that these employees made up only about 2 per cent of the full-time staff, and that the Department was obliged to observe the Civil Service Act and Regulations, which gave equal rights to men and women, and under which, women might apply in any competition as long as they could meet the conditions specified in the competition poster.

To make it easier to compare jobs in the post office with jobs in other employment in setting and revising salary rates, the commission recommended that a point rating scale should be used in the classification of all non-supervisory operating positions in the post office. It also recommended that postal employees should reach the maximum of their salary range in three years instead of from four to seven years as at present.

Regarding working hours, the report recommended that local joint committees in each staff post office should be authorized to start as soon as possible a detailed examination of working hours and shift arrangements, with a view to reducing as much as possible evening and night work, and work on Christmas Eve and New Year's Eve and on weekends. It also recommended that methods and procedures followed in granting and sharing overtime should be clarified, and it suggested that an employee called back to work overtime after he has left the office should be paid for a minimum of three hours. It was also suggested that a reduction of service on weekends should be considered.

Meal Breaks and Boots

The Department should make clear its policy regarding employees' right to a meal break of at least a full half hour during their eight-hour day, and coffee breaks should be allowed as a right rather than as a privilege, the report said.

A recommendation regarding pay arrangements proposed that postal employees should be paid every two weeks instead of twice a month.

It was recommended that the payment of an allowance for boots that was in practice before August 1965 should be resumed.

The report said that the post office was one of the few departments in which seniority was recognized as an important factor in such matters as the choice of vacation periods, preferred assignments,

10th Annual Convention of Ontario Federation of Labour

Resolutions call for legislation to remove all injunctions in labour disputes, and to prevent the hiring of strike-breakers Government policies on inflation, medicare, student aid and the auto trade pact spark lively debates

The largest convention in its 10-year history was held by the Ontario Federation of Labour when more than 1,000 delegates assembled in Kingston from November 7 to 9 for the annual review of the labour situation in Ontario. It was the first time that more than 1,000 delegates have attended an OFL convention.

Many contentious issues were examined on the floor at Memorial Arena as delegates expressed their opinions on the more than 90 resolutions that came before the meeting. Chairman was OFL President David B. Archer.

During the convention, a resolution was passed that called for "full commitment to the building of a stronger New Democratic Party" through support of New Democratic candidates at the next provincial election.

Welcomed by Mayor

The convention was called to order by John McKinnon, President, Kingston and District Labour Council. A welcome to the delegates was extended by His Worship Mayor Robert A. Fray of Kingston.

Joseph Morris, Executive Vice-President, Canadian Labour Congress, addressed the delegates at the opening session. He spoke in place of Claude Jodoin, President, Canadian Labour Congress, who was unable to attend owing to illness. Mr. Archer presided over the business sessions after delivering the opening address.

JOSEPH MORRIS

Mr. Morris spoke on the present economic situation and the injunctions issue. Referring to the economic situation, he said that the public of Canada has been told that the workers are responsible for price increases because of the extraordinary high wages they are getting.

"This argument has been sold with a great deal of success, by the use of the slickest propaganda techniques yet devised," he said. "We must speak up and make our position known; we must combat this propaganda that is being used to camouflage the reaping of high profits and the introduction of unwarranted price increases."

He said the idea has spread that just about every union member has pocketed a 30-per-cent increase in the past few months. "That is absurd. It is quite true that some workers have won 30-per-cent wage increases—and, in general, they were long overdue. But what is ignored is that these increases are, as a rule, being spread over a three-year period. It is also a fact that these 30-per-cent increases that have been won, have applied to only a very small proportion of the Canadian labour force."

Labour Income

Turning to some statistics, Mr. Morris said that, in the second quarter of this year, total labour income increased by only two per cent, the smallest increase since the fourth quarter of 1964. "According to the federal Department of Labour, wage increases in major contract negotiations in the first six months of this year averaged only 15.4 per cent—and this was to be spread over two years. Surely it is obvious that Canadian workers have not been getting enormous increases."

What has been happening to executives in the salary brackets, he said, is very different from the experience of workers who depend on wages. "According to a survey made recently by H. V. Chapman and Associates and published in *The Financial Post*—which can hardly be regarded as a propaganda outlet for trade unions—'over-all salary increases in the four years 1961 to 1965 for 16 categories of executives, was 27 per cent. . . . In the same period, average weekly manufacturing wages reported by the Dominion Bureau of Statistics increased by 17 per cent, with a rise of just over four per cent in 1965'."

Mr. Morris claimed it was not true that wages have gone far out of line with productivity. Over a period of years, Canadian labour costs, on a unit basis, have been among the most stable in the world. From 1957 to 1964, unit labour costs went up only three per cent—less than any other industrialized nation. "It is quite true that there has been some acceleration since, but this has by no means been alarming. Productivity has continued to outpace wages up to this point, and it is only now that wages are catching up."

Profits Ahead of Wages

Profits, he said, have been consistently running well ahead of wages, and workers are only now catching up. But, of course, when the time comes for the workers to get their share, then the screams of alarm can be heard all the way from Newfoundland to Vancouver Island.

This is the old story, he said. Profits go up, prices rise, and then, last in line, come the workers and the farmers. Some companies have been expressing their sorrow that the amazingly high profits they have been reaping in the past few years are not likely to continue indefinitely.

"It seems to me that it is time there was a slowdown in profits," continued Mr. Morris. "While we haven't been

Top officials re-elected and voted pay raise

David B. Archer of Toronto, was returned as president of the Ontario Federation of Labour for his ninth term at the annual convention in Kingston. Douglas F. Hamilton of Toronto, also was returned as secretary.

The Federation voted salary increases for both officials. The president's salary was increased from $11,500 to $14,000, and Mr. Hamilton's was raised from $11,000 to $13,500.

In a recorded vote, Mr. Archer scored 726 votes, and his opponent Myer Shapiro of the Canadian Union of Postal Employees, Toronto, received 110 votes.

Mr. Hamilton received 621 votes, while his lone opponent, Jack White of the Iron Workers local of Toronto, polled 207 votes.

Fifteen candidates were nominated for the 12 positions of vice-presidents. Elected, with their vote, were: James Dowell, Ottawa, 783; John Whitehouse, Toronto, 766; Michael Reilly, Toronto, 763; Norman Paxton, Kapuskasing, 759; Iona Samis, Toronto, 758; Purdy Churchill, Toronto, 756; George Barlow, Toronto, 739; William Punnett, Toronto, 733; Jack Pesheau, Port Arthur, 732; Dennis McDermott, Toronto, 720; Harold Thayer, Ottawa, 699; Michael Fenwick, Toronto, 697.

John McKinnon, left, President of the Kingston Labour Council, chats with OFL President David B. Archer and Joseph Morris, right, Executive Vice-President of the Canadian Labour Congress. Mr. Archer was re-elected President.

hearing too much about profits, we have been hearing a great deal about inflation. This is a word that has been repeated over and over in an effort to block both industrial workers and farmers in their efforts to gain a fair share in our expanding economy.

"Let's get this straight. We are not now facing an inflationary threat. If inflation is giving cause for concern, then it is simply because an inflation hysteria has been whipped up, deliverately creating fear in the minds of the Canadian people so that there might be public opposition to wage increases, and acceptance of the high profits and the high prices that are already in effect."

Threat of Recession

He said there should be concern now about recession, not inflation. "I don't think we have to suffer serious economic setbacks; but if we don't stop taking action to stop an inflation threat which doesn't exist—and if we don't start taking action to combat a threat of recession that does exist—then we are going to be in trouble.

"This is no time to cut back; this is a time to go ahead so that the wheels of industry will not slow down. And one of the essential factors in maintaining the pace of our economy is the maintenance and the improvement of our consumer demand.

"The dollars that our members have won in recent wage increases, and the dollars that they will win in negotiations now underway or about to take place, will help consumer demand."

There is not a working family in this country that has not some unfilled need in the way of a new rug, or a new refrigerator, or any one of a thousand things, he said, and this is where the money our people get goes to, and this is what can hold the economy up.

"Those who continue to shout this out-dated word 'inflation' are not only creating a false fear—they are endangering our economic future."

Important Role for Federations

Concerning injunctions in labour disputes, Mr. Morris said they, and compulsory arbitration, are the reasons why the Canadian Labour Congress called a national legislative conference at Ottawa in September. Delegates, he said, endorsed the strong position taken by delegates to the constitutional convention in Winnipeg last April (L.G., June 1966, p. 280). Federations, said Mr. Morris, have an extremely important role to play in this matter, because injunctions fall within provincial jurisdiction.

"I would like to express the application of the Congress for the vigorous and effective action that has already been taken by the Ontario Federation of Labour. In this area, as in many others, your Federation has displayed leadership of the highest calibre.

"We must continue to keep this matter before both our own members and the general public. The principle at stake here is the principle of freedom of speech; it affects everyone. If trade unionists are to be deprived of the right of expressing their opinions, then the question arises, who comes next? The acceptance of such restrictions would undercut the most basic principles of our whole democratic system.

"The men who are in jail in Peterborough today are making their sacrifice not only for the Tilco workers; but for all trade unionists, and all Canadians, and all who believe in democracy. We must never let them down—and we must never let down the cause for which they stand.

"The trade union movement today is being challenged—through the misuse of injunctions and by other legal handicaps; we are being challenged at the bargaining table; and we are being challenged on the broad economic front."

Concluded Mr. Morris: "The labour movement has always been challenged—it is a movement that was born in strife, and has survived and grown in struggle. I am positive that you will fulfill your responsibilities today, and in the future, as you have in the past, and that together we will march on to a better life for all workers in Canada, and throughout the world."

DAVID ARCHER

Mr. Archer reported that every Labour Council in Ontario has grown in the last year or two, reflecting new organizational activity and improved employment conditions. The Federation had also taken forward strides in membership, in activities, and in participation in the programs of other similarly oriented organizations.

"There is no question but that there is a new and militant mood in the trade

Perspective of Centennial Project

Substantial progress has been made by the Ontario Federation of Labour on a new project—the construction of a home for labour in Toronto. The building was approved at least year's convention as a project for Centennial Year, and a site has been obtained on the north side of Eglinton Avenue East, between Don Mills Road and Don Valley Parkway. The project is estimated to cost about $3 million. Ground should be broken on the site by March, and the target date for completion is the spring of 1968. Union offices in Toronto are in various locations, and the new home will bring them together under one roof. In addition to the offices, the building will have an auditorium to seat 500 persons, a labour research centre, a library, board rooms, and a cafeteria. The building will rise eight storeys, provide approximately 100,000 square feet of space, and be fully air-conditioned. There will be parking for 250 cars.

union movement today," he said. "It depends on what side of the fence you are on, how you accept it. To the few on the other side of the fence, the mood is regrettable, if not dangerous.

"To the many on our side of the fence, this mood is a welcome sign of an alertness, an awareness, a sign of concern, a reaching for justice, which is one form of guarantee of a continuing, living, and aggressive democratic organization. To my mind these attributes are far more desirable than apathy, resignation, fearfulness, and the don't-give-a-damn attitude which has undermined more than one union, more than one society, more than one nation.

Mr. Archer said that too many corporation lawyers talk as though they represented the sorely tried and deprived minority. They join the hue-and-cry against the gains organized labour has been making in recent years. They hopefully believe that the public will continue to be misled by their propaganda that wage increases have been outrageous, that wages have been pushing up prices and have created the inflationary conditions which are said to exist.

"Fortunately, in recent years, the tools of economic analysis have been sharpened enough to enable us to cut through this propaganda and to destroy these unfounded charges.

"In almost every year from 1956 to 1965, wages have lagged behind productivity," he said. "According to the Dominion Bureau of Statistics, taking 1961 as 100, productivity to the end of 1965 had risen to 136.8; wages and salaries had gone up to 135.3; but profits were up to 152.9."

It was only this year that wages have matched or slightly exceeded the productivity figures, "but prices were going up long before. So you have to look to causes, other than wage pressures, for any inflation which has taken place."

Mr. Archer referred to the joint House-Senate Committee that is looking into the increased cost of living. He mentioned the 1958 report from a Royal Commission on Price Spread, saying the report was pigeon-holed and "we don't want to see this happen all over again."

Regarding the protest by housewives in pricing practises, Mr. Archer said he was sure the convention "will go on record as supporting their public protest, and in favour of all sensible means of dealing with the Barnum and Bailey circus approach that characterizes some aspects of the modern market place."

On the pretext of dealing with a supposedly serious inflationary situation, the federal Government had cut back on Medicare and student aid, two important measures which should become part of policy under any circumstances, said the speaker. He referred to the national health program in Britain that the British Labour Party introduced after World War II. "If labour could do that in war-torn Britain in 1946, we can do it in an affluent peaceful Canada in 1966."

He referred to the cutting off of the planned contribution of $10 million to help young people get a university education and said it "is just as disturbing. In 1965, this federal Government gave the giant auto corporations a gift of $50 million to bribe them into the U.S.-Canada auto trade pact. In 1966, this same Government refused a fifth of that amount for support for education in the name of fighting inflation. How cheap, how irrational, can you get?"

The auto pact, he said, was questioned by the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America, by the Federation, and by members of Parliament.

Soothing Syrup

"All of us were given plausible arguments to allay our fears," continued Mr. Archer. "It would work out for the best. It would increase employment in Canada. It would in a short time bring down the price of cars close to the U.S. level. We now know that these plausible arguments were just soothing syrup. The UAW tells us that up to 6,000 employees are being relieved of their jobs in the auto industry. We all know that auto prices have not been reduced. So what happened with the $50 million?"

Referring to General Motors, he said its profit target is 20 per cent on capital after taxes, and for every dollar of increased labour costs since 1947, it has raised automobile prices by $3.75. "That is why it is the richest corporation in the world, and last year turned in the biggest profit ever reported for any corporation in the world. General Motors takes in more money each year than all the Governments in Canada put together. How much influence do you think the Canadian Government had when it asked G.M. to roll back prices?"

Age-Old Problem

In the 10 years that the Federation has been in existence, no problem, he said, has received more attention than the question of injunctions in labour

disputes. It was an age-old problem "which has again been catapulted into the limelight by another plague of injunction writs, this time climaxed with the sentencing of 26 of our members to jail terms.

"Remember that what we are talking about is not just injunctions generally as they were intended to apply in property disputes between individuals. We are talking about injustices of court injunctions in labour disputes."

He said that court injunctions in labour disputes have been severely limited in the U.S., but in Canada they go marching on. "It is time that that march stopped. That is the message which the trade union movement in Ontario, and in Canada, is trying to convey to our Governments."

He referred to the case of Tilco Plastics in Peterborough, saying the *ex parte* injunction was issued on the flimsiest of evidence; that it barred picketing for four days in a legal strike; that the company used that period to run in strike-breakers; that the trade unionists from locals affiliated with the Peterborough Labour Council rightly considered this to be a rank injustice; that they used the method of peaceful assembly to express their protest; and that for that act, they were arrested, tried and convicted.

Cloud Over Bargaining Table

"Everything that happened after that has had the effect of deepening the conviction of the trade union movement that good faith in negotiations can be rendered meaningless by reactionary employers, backed by court injunctions. This is the cloud hanging over the bargaining table today. This is the cloud which can only be dispersed by changes in legislation, both at Queen's Park and at Ottawa.

"But we are warned that the Governments now in power won't change the legislation. If that is the case, then, I say, change the Governments. This coming year you will have the opportunity to change the Ontario Government, which has been in power for 23 years."

He called upon all representatives of the Canadian labour movement to fully support the Ontario New Democratic Party's all-out bid to become the Government of Ontario after the 1967 election. "The new NDP slogan is 67 in '67, meaning the number of seats the party needs to become the Government of Ontario. The injunction issue, like so many others today is a political issue. Let's join together and help fight it on the political front."

Mr. Archer said the Federation supports the Canadian Labour Congress in its policy of calling a halt to the escalation of the war in Viet Nam, and demanding the unconditional withdrawal of all foreign troops, and the institution of peace negotiations according to the Geneva Agreement of 1954.

Supreme Court Refuses to Hear Appeal

The Supreme Court of Canada refused to hear an appeal against the conviction of contempt-of-court charges of 26 men who took part in a labour demonstration in February 1966 at the Tilco Plastics Limited plant in Peterborough. The three-member court panel delivered its decision November 7 after argument by Toronto lawyers E. B. Jolliffe and Ian Scott.

The demonstration outside the Tilco Plastics Limited plant was called as a protest against the use of court injunctions in labour disputes. An injunction had been issued limiting pickets at the plant to 12.

None of the Tilco strikers were among the 26 persons arrested. Chief Justice G. A. Gale of the Ontario Supreme Court, sentenced five labour leaders to two-month jail terms, and the 21 others to 15-day sentences. One of the 15-day sentences was suspended because the person had a heart condition.

The Ontario Court of Appeal turned down an appeal two weeks before the Supreme Court of Canada decision, and the jail terms took effect immediately. Mr. Jolliffe and Mr. Scott, seeking formal leave to appeal to the country's highest court, said the persons arrested at Tilco were denied fundamental rights.

Mr. Jolliffe, representing 19 of those involved, said they were taking part in a lawful assembly to protest injunction laws in general. Their demonstration was not part of the actual picketing being carried on by the 35 Tilco strikers.

Foreign Aid

Next year, said Mr. Archer, we will be celebrating centennial year. "It will be a time when we will pause to survey all of the many achievements of the past hundred years, and reflect on the many blessings of this great and plentiful land in which we live.

"But what about the standard of living of other peoples in this world? Should we not do something about turning the billions and billions of dollars now being spent on destruction into the constructive task of helping the world's needy people? Isn't the war on poverty, and ignorance, and suffering the real war we should be fighting?

"I say that 0.39 per cent of our national income is not enough for Canada to give to needy nations, when Britain is giving 0.67 per cent, and France 1.26 per cent. The objective of the International Confederation of Free Trade Unions is one per cent of the national income for foreign aid. Let's not be complacent about our contributions to the solution of the problems of world affairs.

"The stark reality is that the nations of the world are spending 15 times more on weapons of war—about $150 billion a year—than is being spent on aid to developing countries," said Mr. Archer.

Court Injunctions

The issue of court injunctions in labour disputes was debated at some length by conference delegates before a resolution was passed demanding that all injunctions be removed from labour disputes, and that an all-out campaign be undertaken to achieve this end. The campaign could involve the calling of a special convention of the Federation if necessary.

The resolution also called for an organized campaign to press for legislation that would prevent industry from hiring strike-breakers during a legal strike.

A militant knot of delegates were not satisfied with the resolution, and urged the members to press for a campaign of civil disobedience to defy injunctions used in labour disputes. Rather than sanction mass civil disobedience, however, the Federation's officers urged the delegates to vote for the recommendation of legislation to end court injunctions.

Mr. Archer stated that the resolution would give the Federation all the power it needed to fight court injunctions. He defended himself against delegates who felt the resolution was not aggressive enough by saying: "OFL officers are not lacking in militancy. The day David Archer is afraid to go to jail to stand up for the socialist principles he has stood for all his life—that's the day you can throw him out. But let's not get foolish and emotional, and let's not adopt a policy that cannot be carried out."

Federation Criticized

Some delegations criticized the Federation executive for not calling a general strike in Ontario in protest against the jailing of 25 Peterborough trade unionists for mass picketing at the Tilco Plas-

OFL Annual Conventions to Continue

A resolution that Ontario Federation of Labour conventions be held every two years instead of annually, starting after the 1967 convention, was defeated by delegates in Kingston.

A total of 842 voted in favour of the resolution, which would have amended Section 2 of the present OFL constitution. There were 336 votes opposed.

Although the majority of delegates favoured the resolution, an additional 72 votes were required to change the existing constitution. Under Federation law, for a constitutional clause to be amended, a two-thirds-majority vote is necessary.

The standing vote came after a lengthy floor debate. Main support for the resolution was given by the smaller locals whose delegates thought conventions annually were too expensive.

tics Limited plant where the employees were on strike.

Members of the executive, including Mr. Archer, and a number of delegates, urged unionists to recognize the injunction issue as a political one, and to work toward defeat of the provincial Government and the election of the New Democratic Party.

Mr. Archer told the convention that the Federation just could not get the power to call a general strike. He said he had called in directors of all major Canadian unions, and they told him they could not grant the Federation the right to call their members out on strike.

"I have enough trouble at local strikes getting some members to respect a legal picket line," he said.

Fund-Raising Project

George Watson, Canadian Director for the Textile Workers' Union of America, said the Federation had a project that will raise money to finance the fight to defeat injunctions. "Its purpose is to raise $500,000," he declared. "So far we have raised only $37,000—a disgrace. If the critics of our actions would put their hands in their pockets and get behind this, we might see some more action on the fight against injunctions.

"If we can raise a dollar a head, or even 50 cents a head from all affiliated union members, we could raise the $500,000, or at least $250,000 in short order," Mr. Watson said.

The delegates heard one of the employees of the Tilco Plastics Limited plant in Peterborough, Bob Sarginson, describe how he spent 15 days in prison for criminal contempt in defying an injunction limiting picketing at the plant. He asked the delegates to remember the remaining five union officials who would be in prison until Christmas.

The experience, he said, had given new meaning to the terms "law, lawful assembly, jail and free speech." The word "jail" now conjures up visions of concrete, stone, bricks and bars, uncomfortable bed, rough wool blankets, one visitor for five minutes a week, public showers, and toilets with no seats or doors.

A resolution was passed that asked the OFL to take steps to achieve a full pardon for the 25 convicted trade unionists.

Free Collective Bargaining

Delegates endorsed a resolution urging the Canadian Labour Congress to give full support to the postal workers and other affiliates in their fight for free collective bargaining.

The resolution said that Bill C-170, as proposed, would restrict free collective bargaining. It pointed out that civil servants and other government employees, including postal workers, could be given full collective bargaining rights under the Industrial Relations and Disputes Investigation Act. At the time of the convention, Bill C-170 had been given first reading in the House of Commons (L.G., June 1966, p. 278).

S. A. Little of Ottawa, National President of the Canadian Union of Public Employees, said civil servants are "browned off" when they hear—even from people in the labour movement—that they are not entitled to the rights that labour unions have.

"We don't want compulsory arbitration rammed down our throats—and if we are to avoid it, we will require the full support of the labour movement in defeating Bill C-170," he declared. "It's a completely unnecessary piece of legislation which is already covered by the Industrial Relations and Disputes Investigation Act."

Larry Sheffe, President of the Ottawa and District Labour Council, said the convention should go on record as congratulating the postal workers' union for the leadership it has shown in the fight for collective bargaining rights for civil servants.

The convention adopted a resolution opposing any form of compulsory arbitration at any time in any section of the labour movement. Delegates criticized compulsory arbitration for undermining free collective bargaining, and called for repeal of any existing laws allowing compulsory arbitration.

Postponement of Medicare

The convention passed another resolution criticizing the proposed move by the federal Government to postpone Medicare until July 1, 1968. They voted to pressure the federal Government into enacting Medicare by July 1, 1967 as promised in their election campaign.

Delegates also condemned the Ontario Government for introducing a medical plan, OMSIP, that does not provide sufficient coverage or scope to be of benefit to the majority of Ontario residents. Subsequently a resolution was passed urging the provincial Government to institute a plan to provide full medical, dental, and drug prescription care for the people of Ontario.

Consumer's Bill of Rights

A statement on wages, prices, and the consumer was submitted by the executive board of the OFL. It contained three recommendations that the convention favoured:

—a consumer bill of rights guaranteeing the right to be informed, the right to safety, the right to choose, the right to be heard;

—a prices review board to hold a watching brief over price increases, to make recommendations to the Government, and to inform the public; and

—legislation to introduce a system of more uniform weights and packaging, and to provide more safeguards against dishonest and extravagant advertising.

The statement suggested that the Senate-Commons Committee on Consumer Credit, now examining price trends and inflationary pressures, include in its investigation money costs, land costs, health services, auto insurance, education, and food costs.

Finance Charges

The statement described charges for financing consumer goods on time-payment plans as, in too many cases, exorbitant. One of the worst offenders in urban housing costs is the high price of land, it said, and warns that if no counter action is taken, land costs will continue to skyrocket.

On the subject of health services, the statement described postponement of Medicare by the Government as "an irrational reaction to a non-existent threat of spiralling inflation. For low-income families and those on fixed income, a well-organized public health service is

the logical way to provide an essential service at a saving of money and an addition to dignity. The postponement will waste money rather than save it."

The Federation urged the adoption of automobile compensation legislation, operated on the lines of the Workmen's Compensation Board, with authority over automobile safety and car insurance.

The statement deplored the federal Government's decision to again postpone its plan to provide $10,000,000 in university scholarships.

Food Costs

The statement urged a detailed analysis of food costs, and proposed that, when all the necessary information has been gathered, it should be presented to the Royal Commission on Consumer Credit. "In addition we would support the elimination of trading stamps as a costly device, adding unnecessarily to food costs." The statement urged abolition of deceptive packaging, and the establishment by governments or consumer organizations of programs to help the housewife to shop intelligently, and get the most for her food dollar.

Speaking on the same theme, Clifford Pilkey, President of the Oshawa District Labour Council, urged trade unionists to fight their way out of the consumer jungle by investigating the possibility of forming good warehousing co-operatives. He said that if trade unionists could achieve lower food costs for their families, it would be the equivalent of getting a wage increase at the bargaining table.

Mr. Pilkey said Local 222 of the United Auto Workers, Oshawa, is prepared to start a pilot project with a union food co-operative. A committee has been set up, he said, to study an idea whereby savings instead of being passed on as a dividend at the end of the year, would be passed on in the form of lower food prices. He urged all locals to investigate the establishment of such a co-operative.

Labour Legislation

A resolution calling on the provincial Government to amend legislation to establish a 40-hour work-week in all forms of employment was passed. It also asked that overtime be limited to 100 hours a year in excess of 40 hours a week and that overtime be voluntary on the part of the employee. The Legislature will be asked also to require payment at time and one half for work after eight hours, and double time for Saturday, Sunday and holidays.

Ronald McNab of the United Steelworkers of America, Sudbury, had asked that the resolution be referred back to the committee to have the hours changed to 35 a week and overtime rates at double time for each hour over eight hours a day. "If we pass this resolution we will be ratifying what we were asking for 15 years ago," he said.

Other Resolutions

Other resolutions approved:

—urged the provincial Government to eliminate the means test from all Department of Public Welfare legislation;

—recommended an increase to $110 a month from $75, together with a cost-of-living bonus, in pensions paid to dependent widows under the Workmen's Compensation Act; and an increase to $60 from $40 a month in allowances paid to children;

—requested that one central authority, under the provincial Department of Labour, be established to plan, coordinate, and control all aspects of safety education, and that all safety associations be brought under the control of this central authority;

—requested the provincial and federal Governments to amend legislation permitting union members the right to refuse to cross legal picket lines of other unions without losing their jobs;

—asked the Canadian Labour Congress to urge the federal Government not to allow Trans-Canada Pipe Lines to build a new gas line linking Manitoba and Ontario through U.S. territory;

—urged the elimination of "racial discrimination" by the College of Physicians and Surgeons of Ontario in their refusal to grant licences to medical graduates from India who, with the approval of established hospitals, were practising medicine;

—asked that the Human Rights Code be amended so that it would be illegal to engage in discrimination in small apartment buildings and real estate transactions;

—supported inclusion of a cost-of-living escalator clause in all collective agreements; and

—called on union affiliates to give adequate notice of intention to strike to other unions where more than one union is involved with a single employer.

A collection was taken up among the 1,001 registered delegates to the convention for striking trade unions in Canada. The collection raised $895. By unanimous consent the Federation added the remainder to bring the sum up to $1,000.

Seven More Grants by Department Under University Research Program

The award of seven more grants with a total value of $24,000 under the Department of Labour's University Research Program was announced toward the end of November. These awards were in addition to the 28 grants announced last July (L.G., Aug. 1966, p. 428).

The subjects of study and the names of the recipients are:

Les appareils de direction d'une fédération syndicale "internationale" dans un contexte québecois: dimensions politiques, économiques et culturelles, by André Saint-Amand;

L'introduction de la négociation collective dans la Province de Québec ou les débuts du syndicalisme industriel québecois, by Miss Celine Saint-Pierre;

Labour Force and Migration in Canada, by Jay Beaman;

An Appraisal of the Skills and Work Potential of Mental Health Patients, by David A. Chambers;

Predicting Vocational Success for the Mentally Retarded Adult, by David Gibson;

La recherche en relations industrielles dans les universitiés canadiennes depuis 1960, by Louis-Marie Tremblay; and

An Economic Analysis of some Aspects of Population Movements, by M. C. Urquhart.

Applications for these grants are accepted up to March 1 each year from postgraduate students, university faculty members, and others possessing research qualifications, provided that they are Canadian citizens or can show that they will be residing in Canada on a continuing basis. The postgraduate training of applicants must have been in the field of social sciences.

A report and summary of findings of each research project must be submitted to the Labour Department-University Research Committee, but the rights to the studies remain the property of the authors, and many are subsequently published.

The latest awards bring the total number of grants awarded during the 16 years since the Program was initiated to 144, with a total value of $258,581.69.

The Role of a Women's Bureau..

ONTARIO

by Jo Ann Poglitsh, Research Assistant,

Women's Bureau, Ontario Department of Labour

CAN

by Marion

Women's Bureau, Cana

The Ontario Women's Bureau was established in October 1963, with the basic function of facilitating the integration of women into the labour force.

As a basis for many aspects of our work it is necessary to have a picture of the number of women in the labour force, how that number has changed, and how it is changing. Most of our statistical information comes from the Dominion Bureau of Statistics and the federal Women's Bureaus in Canada and the United States. The increasing rate of return to the labour force of married women whose children have grown and who, consequently, have time to take a job is a trend of major significance. It has implications in the fields of training, education, counselling, and other areas in which the Bureau is involved.

As well as providing background for our work, statistical information is often requested by organizations or individuals outside the government. Questions of interest are: the labour force participation of married women, ages, occupations and earnings of women, ages of children of working women.

Labour Legislation

As part of the Bureau's function of advising the government on labour legislation with respect to women, we keep up to date on changes in the other provinces and in the United States.

In 1965, information on Ontario labour legislation pertaining to women was prepared in the form of a news letter, and was distributed to employers. The number of telephone calls subsequently received from employers indicates that this service was well received and much needed.

Annually a member of the staff gives lectures on labour legislation as part of a University of Toronto lecture series entitled "Law and the Woman". This year three such lectures will be given.

Recently, we prepared a leaflet explaining to women what is and what is not required of the employer by law. This was done in response to continuous inquiries on the subject. Many people have erroneous ideas, as long custom is often confused with law. Among the customs for which there is no legislative basis are coffee breaks and sick leave.

Counselling

Early in 1964 we prepared a pamphlet called "How to Find The Job You Want". This was intended as a guide for mature women, telling them how to go about looking for a job, but it has been extremely popular among young people as well. Thousands of copies have been requested by high school guidance personnel.

Our first project in counselling took place at the 1964 Canadian National Exhibition. At the Women's Bureau booth, we placed several counsellors to advise women visitors in choosing occupations and finding training. This was very popular and gave us an opportunity to distribute questionnaires asking women about their labour force participation, their interest in employment and training, their skills, what they would like to do, their opinions on day care centres; 13 questions in all were asked and 8,000 women stopped to fill out the questionnaire and talk with interviewers.

From this we learned that although women were very eager to work, in general they had very little knowledge of training and employment opportunities.

Continued on page 20

The term Women's Bureau may have various connotations. In the Canada Department of Labour it has been defined as a small branch that serves as a focus for departmental policies and activities relating to the position of women in the labour force. The ILO has come up with a useful descriptive phrase that applies broadly to types of organization that have been developed for similar purposes in various countries: "administrative arrangements for handling questions relating to women workers."

Fundamental to the functioning of such a unit is the premise that women workers and their work belong within the mainstream of the labour force. In setting up a Women's Bureau or some similar administrative arrangement for dealing with the problems of women workers, a Department of Labour does not in any sense lessen its responsibility for continuing consideration of women's employment within all aspects of its concerns. Rather it is simply endeavouring to ensure that the particular problems involved receive adequate attention.

On the whole, these problems are not new problems, but as the economy develops and women's employment expands, the problems become more complex and take on new manifestations. In all parts of the world, governments are finding that there is need for some type of administrative arrangement to deal with them.

A Women's Bureau is not an operational unit in the usual sense of that word. Rather it is an instrument that is oriented to research and fact-gathering, directed to the creation of an informed approach to the problems of women's employment and the cultivation of a climate of opinion that influences and helps achieve needed action. Its role is

. In the Opinion of Three of Them

by Christine Waddell, Director,

Women's Bureau, B.C. Department of Labour

expressed, therefore, both within the Department of which it is a part and at the same time in relation to the community—with organized groups of employers and workers, professional associations, women's groups and other agencies concerned with women workers in paid employment.

But what are these particular problems of women workers and their work with which a women's bureau must occupy itself? They can be classified under three headings according to their origin: historical and traditional, psychological, and biological. Whatever their origin they are all moulded by changing social and economic circumstances.

The employment of women is not a new phenomenon. Ever since the onset of the industrial revolution, women have been going out of the home to work for pay. Industrialization had rather later beginnings in Canada than in the United States and Europe. In older, more settled parts of the country, however, as industries were developed and towns established, women became part of the industrial labour force. The Report of the Royal Commission on Labour and Capital in 1889 directed public attention to the deplorable conditions in which women were working in factories and mills of Quebec, Ontario and the Maritime Provinces. Already in 1884 and 1885 factory laws for the protection of women and children had been passed in Ontario and Quebec, laws that became a basis for further legislation that restricted working hours—the beginning of present-day factory acts and other instruments that restrict the hours of work of all members of the labour force.

The Census of 1891 is the source of earliest statistics on women workers in

Continued on page 20

History shows that in the 1900's British Columbia women were in the forefront pressing for improved labour legislation. As a result of their endeavours, the Factories Act was enacted to protect women and to prevent minors from working in factories where unhealthy conditions existed. Later, in 1918, Mrs. Mary Ellen Smith, the first woman ever elected to the Legislature, successfully guided through the Female Minimum Wage Act. Mrs. Helen Gregory MacGill was one of the three members appointed to the first Minimum Wage Board, which was empowered to establish minimum wages for women only.

Over the years women have played an increasingly important part in urging numerous improvements in social legislation. In recognition of this and of the rapidly increasing participation of women in the labour force, in 1965 a woman Industrial Relations Officer, Christine Waddell, was engaged by the Department of Labour and given extensive training in all phases of the Department's activities. She made calls with officers from the Labour Standards Branch dealing with complaints made by employees or carrying out routine inspections. The Factories Branch arranged inspection tours through different types of industrial establishments where the majority of employees were female, to better observe the working conditions and the amount of protection under present regulations. A conducted tour of the Workmen's Compensation Board demonstrated the types of therapy and assistance offered to women who had been injured in the course of their employment. Then, in company with Safety Inspectors from the Accident Prevention Department, calls were made at various types of establishments where most of the employees were women.

The Apprenticeship and Industrial Training Branch had their Counsellors take Mrs. Waddell along on visits to employers and employees to see the assistance afforded to apprentices who wanted training or thought they were not getting as complete a training as they felt necessary. Different Trade Schools were also inspected to see that the regulations were being adhered to, or if any changes should be made.

During 1965 women's organizations approached the Government with a well-documented brief asking for a Women's Bureau within the Department of Labour. Undoubtedly these organizations were influenced in making their request by many factors other than the increase in the female working population. In acknowledgement of these representations, a Women's Bureau was established in 1966 with Mrs. Waddell as Director.

Contacts were made with other Women's Bureaus. A set-up similar to that of the Women's Bureau, Canada Department of Labour seemed a firm basis on which to begin operations, to augment rather than duplicate their endeavours on a provincial basis, utilizing already established avenues.

Even in the embryo stage, the Women's Bureau took part in discussions and expressed opinions regarding legislation then under consideration. The result was a new Maternity Protection Act, whose application had been broadened to protect most women working in the province so that they may, if they so desire, legally apply for leave of absence before and after the birth of a child without fear of losing their employment.

When the Factories Act was completely revised, it too was the subject of

Continued on page 21

Canada

Continued from page 19

Canada. At that time, roughly one of every eight paid workers in the country was a woman. Their ten leading occupations were: domestic servant, dressmaker, teacher, farmer, seamstress, tailoress, saleswoman, housekeeper, laundress and milliner: all of these were types of work associated with the traditional household. Women who were engaged in manufacturing were chiefly in the textile industry—again a traditional occupation of the pioneer household.

Although industrialization brought new jobs for women, the need for training and preparation for those jobs was taken lightly. There was great discrepancy—as there still is—between the trade and indeed the professional skills of women and of men. Herein lies a basic concern of a Women's Bureau: the encouragement of adequate occupational preparation for women. This includes concern for girls in school for whom, increasingly, education and training are no less important than for boys.

The classification of jobs according to gender was carried over from the domestic to the industrial economy and still persists. Occupational distribution has tended to stiffen along traditional lines, and sharp distinctions between men's work and women's work seriously limit the potential not only of women but also of men. On the whole, the limitation is more stringent for women, who are practically barred from some fields of work, not on any rational basis but by reason of prejudice and sheer force of habit. It is true that in many situations women are barred for lack of essential qualifications, a lack resulting from traditional ideas about their education and training, or for lack of relevant experience, again largely due to traditional concepts of women's role. Too often, also, women themselves erect barriers through unwillingness to accept the responsibilities of more exacting work.

This whole area of traditional attitudes and patterns of employment for women requires continuing exploration and relevant action. Girls, for instance, need to be exposed to wider vocational horizons and encouraged to obtain adequate training for whatever fields they wish to enter. If these are new fields, girls may need special encouragement and support from parents and teachers. At the same time, employers must be made aware of women's capabilities in order to ensure broader opportunities for them, not only at the hiring stage but in promotion and advancement in business and the professions. The accomplishment of this is a long-term undertaking but one that is an essential concern of a Women's Bureau, and calls for it to draw on all available resources of information and experience for the publication of relevant material and for consultation with interested individuals and groups.

The level of women's wages was one of the earliest problems of women workers about which the conscience of governments was aroused. By 1920 minimum wage legislation applicable to women workers had been adopted in six Canadian provinces. It exists now in all the jurisdictions, federal and provincial, and parity of rates for men and women have been accepted in most, though not yet all, of them. The fact remains, however, that the occupations in which women cluster tend to be the lower paid ones.

On the whole, also, women workers are less well organized than men workers. Their rates of pay are, therefore, less often subject to bargaining. This fact perhaps more than any other led to the intervention of governments to ensure them minimum rates of pay. Again, because the reserve of women to take on less skilled jobs is elastic, their wages and salaries are correspondingly depressed. The occurrence of shortages may help to improve the remuneration of women, if they are prepared to take advantage of available opportunities, quite as much as that of men. Not surprisingly, then, women's wages and salaries are a subject of concentration for Women's Bureaus, not only in terms of minimum rates but in perspective of the principle of equal pay for equal work. Moreover, an important part of the job of a Women's Bureau is to ensure that women are acquainted with the facts of economic life.

By directing attention to these long-range continuing problems I may not have emphasized sufficiently the urgency they have taken on as a result of the revolutionary changes of the past few decades—particularly since 1950. During this period there has been a dramatic expansion in the employment of women —the percentage increase in their employment has considerably exceeded that for men. Even more remarkable, however, has been the growth in the labour force participation of married women. As late as 1941 the participation rate for married women was somewhat less than 4 per cent. By 1951 it had climbed to more than 11 per cent. By 1961 the rate of the previous decade had doubled, and in 1965 it was estimated at slightly over 25 per cent. This year it has continued to rise until at least one in every four married women in Canada is in the labour force.

Alongside this phenomenon is the arresting fact that the most marked increase in labour force activity has occurred among women over the age of 35. At present half of the female labour force is in this upper age group. Once their children have grown beyond immediate dependence, a new phase opens up in a woman's life. She is ready to enter or re-enter the labour force.

Paid employment is no longer a preoccupation only of the girl just out of school, looking forward to marriage, or of the woman who remains unmarried or who is widowed, divorced or separated. You will appreciate that these facts lightly touched upon confront us with problems that urgently require attention:

—the need to take steps to improve women's occupational competence by providing adequate counselling and training for women re-entering the labour force in middle life;

—the need to develop social policies to enable and support the efficient utilization of women in the labour force, e.g., maternity leave, including the protection of a women's right to return to employment after childbirth and a period with her child in at least its early infancy, and

—the need, increasingly recognized, to bring about improved standards of day care for children of working parents.

Herein lies the *raison d'être* of a women's bureau: to bring about an informed approach to the problems of women's employment and encourage such attitudes and action as will facilitate the integration of women workers within the total labour force.

Ontario

Continued from page 18

To help fill the information gap we began in the fall of 1964 to gather files of occupational information, including qualifications and availability of training for a wide variety of jobs. By summer 1965, we had accumulated detailed information on 100 occupations. This information was printed on handy IBM cards and distributed at our second Canadian National Exhibition. These cards were popular with all age groups, mature women trying to find out what occupations were available with a minimum of training as well as high school students considering training for their future. In the fall of 1965 these cards were bound into booklets, which have been in

demand by people in counselling and guidance as well as others. The list of jobs was expanded and distributed again at the 1966 Canadian National Exhibition. Requests for both the bound booklets and for individual job cards have continued.

Our 1965 and 1966 Canadian National Exhibition projects attracted a great many high school students. In our talks with them we found that they were often unrealistic about their participation in the labour force. Many thought that they would work only until they were married. This prompted us to develop another pamphlet. "The U In Your Future". It explains to girls that they will be working a good many years more than they expect and encourages them to be prepared for a later re-entry into the labour force after their children have grown.

Mature women wanting to begin employment are finding it increasingly necessary to develop some kind of skill. To make it possible for them to do so we continue to encourage the development of more training courses for women.

Last year we co-operated with a number of other organizations to have a course for Visiting Homemakers established at the Adult Training Centre of the Toronto Board of Education. The course was very well received, and has now graduated three classes. We expect that a course to train Child Care Assistants for employment in day nurseries will be started this winter under the same auspices.

Another aspect of training involves assisting mature university graduates with no past work experience to enter the work force. Part of the answer for these women may lie in the development of more "semi-professional" training courses, in occupations where there are labour shortages.

With nearly 60 per cent of Ontario's female labour force married, the matter of day care for their children has become of increasing public concern. Legislation is already in existence that permits municipalities to set up day care centres and receive considerable financial support from the federal and provincial Governments. Communities have been very reluctant, however, to develop the needed facilities. The Women's Bureau last spring encouraged five departments of the government to get together in an interdepartmental committee to consider what could be done to speed up the development of day care centres.

The committee developed a list of suggestions which, if implemented, will help put Ontario on the way to an adequate day care system.

In the near future we have plans for two publications. One, "The Law and Women in Ontario," will give a general idea of the law as it affects women in such areas as property rights, support of children, marriage and inheritance.

The other publication will be on the subject of maternity leave practices, and will be sent to employers. This is a factual presentation of maternity leave practices in other jurisdictions and is meant to be used by Ontario employers as a guideline in establishing their own policies. The need for this information became apparent in a survey last year of 88 employers across the province that covered employer attitudes and practices regarding part-time employment, executive training for women, age factors, as well as maternity leave practices. The wide variation in maternity leave policies among these companies showed that more factual information was needed. The publication will also include medical advice concerning maternity leave and the employment of pregnant women.

The efficient integration of women into the labour force requires study in a variety of areas. In addition to encouraging the development of training programs for women and employer acceptance of women on an equal basis with men, we are concerned also with social services such as day care, homemaker services, and counselling; with equitable taxation policies and with flexibility of scheduling in both education and employment so that women's various roles may be compatible.

British Columbia

Continued from page 19

recommendations by the fledgling Bureau. The provisions of the new Act have been extended to include shops and offices, which are predominantly staffed by women, and many new provisions for the protection of women have been introduced.

Since coming into operation, the Bureau has assisted women by means of personal interviews and contact with women's organizations. When the enquiries related to working conditions, the necessary information has been supplied or the enquirer has been directed to the proper office for assistance. The Women's Bureau discovered, however, that every woman's problem was not one connected with her employment. Many times it was her desire to obtain a job. Sometimes a woman who may have been away from employment for 15 or 20 years was seeking information about working conditions and job opportunities. In this regard a close liaison is maintained with the Canada Manpower Center.

The Board of Industrial Relations held hearings throughout the province on the revision of Minimum Wages and the making of an Order under the Annual and General Holidays Act, which provides authority for the Board to make orders requiring employers to give employees a general holiday with pay. Unions, companies, and private individuals presented oral and written briefs giving reasons why minimum rates should be increased or held at the present level. The absence of women's organizations from early hearings was noticeable; but once they were informed personally of when hearings would be held in their city, representatives of women's groups appeared with watching briefs. The Director held meetings with these groups whenever possible to acquaint them with the present regulations.

Counsellors in the schools discovered that young girls entering the labour market for the first time were seldom aware of the regulations passed for their protection. The Director therefore has visited classes to inform the students of their rights and responsibilities and the protection afforded them by the Department.

Similar situations arose with private employment agencies. When employment agencies became aware there was a Women's Bureau willing to explain the fundamentals to their counsellors, they requested instruction. Now they contact the proper department if a question arises that they are unable to answer.

Various women's organizations are requesting the Director to address meetings of their members. Others consult the Bureau to ascertain what fields of endeavour they might pursue to enable women to take their rightful place.

The responsibilities of the new Bureau are wide and varied. They include correlating existing information regarding legislation, and determining trends with regard to age, training practices, and conditions affecting working women. The Bureau serves as a channel of communication with women's groups, employers, and labour organizations. It stimulates investigation and research by the other branches of the Department, and compiles comprehensive reports in such areas as equal pay for equal work, maternity protection, minimum wages, and employment benefits.

Employment Fatalities in Canada

The employment fatalities covered in this review involved persons gainfully employed, and occurred during the course of, or arose out of their employment, and included deaths resulting from industrial diseases.

Statistics on employment fatalities are compiled by the Economics and Research Branch from reports received from the provincial Workmen's Compensation Boards and certain other official sources. Newspaper reports are used to supplement these. For industries not covered by workmen's compensation legislation, newspaper reports are the Department's only source of information. It is possible, therefore, that coverage in such industries as agriculture, fishing and trapping, and certain of the service groups, is not as complete as it is in industries covered by workmen's compensation legislation. Similarly, a small number of traffic accidents that are in fact industrial may be omitted from the Department's records because of lack of information in press reports.

The number of fatalities that occurred during the period under review is usually greater than indicated in the article and tables. Fatalities that were not reported in time for inclusion, however, are recorded in supplementary lists, and statistics are revised accordingly in the next annual review.

Table 1—Fatalities in Proportion to Employment, by Age Groups and Sex,* 3rd Quarter of 1966

	Fatalities		*Employment*	
Age Group	*Number*	*Per Cent of Grand Total*	*No. of Workers†* (000's)	*Per Cent of Grand Total*
14-19	19 (–)	6.9 (–)	595 (419)	7.9 (5.5)
20-24	24 (–)	8.7 (–)	645 (386)	8.5 (5.1)
25-44	129 (–)	46.5 (–)	2,314 (809)	30.5 (10.7)
45-64	91 (2)	32.8 (.8)	1,584 (604)	20.9 (8.0)
65+	12 (–)	4.3 (–)	177 (44)	2.3 (0.6)
TOTAL	275 (2)	99.2 (.8)	5,315 (2,262)	70.1 (29.9)
GRAND TOTAL	277	100.0	7,577	100.0

* Figures for women in parentheses.

† DBS estimates, Special Surveys Division, special tables, week ending August 20, 1966.

The Canada Department of Labour has received reports on 277 employment fatalities that occurred in Canada during the third quarter of 1966. During the previous quarter, 261 fatalities were recorded. This is 33 more than the previously published total of 228 (L.G., Oct. 1966, p. 574). In the third quarter of last year, 390 fatalities were recorded —52 more than the preliminary figure of 338 (L.G., Jan.-Feb. 1966, p. 29).

Of total fatalities that occurred during the third quarter of 1966, 36.8 per cent were in the occupational division of craftsmen, production process and related workers; 32.1 per cent of total fatalities occurred in the construction industry.

During the quarter under review, there were five multi-fatality accidents that brought death to 29 workmen. Ten crew members were drowned when their dredge was swamped by a large wave, and sank in the St. Lawrence River near Quebec City. Nine construction workers died when a bridge span collapsed into the Rideau River in Ottawa. A boat towing a load of logs overturned in Lake Onatchiway, near Chicoutimi, and four loggers lost their lives. Three garage employees were burned to death in an explosion of varsol cleaning fluid in Merritt, B.C. and in Corner Brook, Nfld., a head-on crash between a flat car and a diesel switching engine in a CNR yard claimed the lives of three workmen.

Table 2—Fatalities in Proportion to Employment, by Main Occupational Grouping and Sex,* 3rd Quarter of 1966

	Fatalities		*Employment*	
Main Occupational Grouping	*Number*	*Per Cent of Grand Total*	*No. of Workers†* (000's)	*Per Cent of Grand Total*
Primary industries	57 (1)	20.6 (0.4)	749 (83)	9.8 (1.1)

GRAND TOTAL	277	100.0	7,577	100.0

* Figures for women in parentheses.

† DBS estimates, Special Surveys Division, special tables, week ending August 20, 1966.

Fatalities in proportion to employment by sex and age distribution are shown in Table 1.

Analysis of this table shows that men who comprised 70.1 per cent and women 29.9 per cent of the total workers employed were involved in 99.2 and 0.8 per cent of the total number of fatalities. The 45-64 age group, which comprised 20.9 per cent for men and 8.0 per cent for women of the total workers employed, accounted for 32.8 and 0.8 per cent of the total number of fatalities.

Men in the age groups 14-19, 20-24, 25-44, and over 65, who comprised 7.9, 8.5, 30.5, and 2.3 per cent of the total workers employed, accounted for 6.9, 8.7, 46.5 and 4.3 per cent of the total number of fatalities. Women comprised 5,5, 5.1, 10.7, and 0.6 per cent of the total workers employed in these age groups, but no fatalities for women were recorded.

Fatalities in proportion to employment be sex and main occupational groupings are shown in Table 2.

A rough analytical summary of the main occupational groupings shows that

men in the primary industries occupations and white collar and service occupations, who comprised 9.8 and 27.9 per cent of the total workers employed accounted for 20.6 and 9.0 per cent of the total number of fatalities, while women in the same occupations comprised 1.1 and 24.2 per cent of the total workers employed, and were involved in 0.4 per cent of the total number of fatalities in each of the two occupational groupings.

In the manual occupations, comprising 37.0 per cent of the total workers employed, of which 32.5 per cent were men and 4.5 per cent were women, men accounted for 69.6 per cent of the total number of fatalities, and there were no fatalities recorded for women.

Three industry divisions accounted for 62.8 per cent of the total number of fatalities.* These were: construction, 32.1 per cent; transportation, 18.4 per cent; and manufacturing, 12.3 per cent. The remaining 37.2 per cent were distributed in other industry divisions in this order: forestry, 9.0; mining, 8.7; agriculture and trade, 6.5 each; service, 2.5; public administration, 2.2; and fishing, 1.8 per cent. A cross-section analysis reveals that the greatest concentration of fatalities* occurred in the construction industry and 25-44 age group.

An examination of cross-classifications of industry divisions to pinpoint the main concentrations of fatalities by occupations shows that 87.3 per cent of the total fatalities that occurred to craftsmen, production process and related workers were as follows: construction, 45.1 per cent; manufacturing, 21.6 per cent; and transportation, 20.6 per cent. Similarly, 72.0 per cent of the total fatalities that occurred among labourers and unskilled workers (not agricultural, fishing, logging or mining) were in construction, and 61.0 per cent of the total fatalities that occurred among transportation and communication workers were in transportation, communication, and other utilities.

Two accident-type categories accounted for 50.2 per cent of the total number of fatalities*. These were: falls and slips, 27.1 per cent; and struck by different objects, 23.1 per cent. The remaining 49.8 per cent were distributed in other accident-type categories in the following order: collisions, derailments, wrecks, etc., 16.6 per cent; caught in, on or between, 13.0 per cent; electric current, 6.5 per cent; conflagrations, temperature extremes and explosions, 6.1 per cent; miscellaneous accidents, 3.6 per cent; over-exertion, 2.5 per cent; inhalations, absorptions, and industrial diseases, 1.1 per cent; and striking against or stepping on objects, 0.4 per cent.

An analysis of cross-classifications of the main accident-type categories by industry shows that 76.6 per cent of the fatalities that were in the category of being struck (by such objects as falling trees or limbs, landslides or cave-ins, automobiles or trucks, materials falling from stockpiles and loads, objects being hoisted or conveyed, and objects falling in mines or quarries) occurred as follows: in construction, 37.5 per cent; in forestry, 20.3 per cent; and manufacturing, 18.8 per cent. Similarly, 66.7 per cent of the fatalities that were in the category of falls and slips (from buildings, bridges, catwalks, towers, etc., to different levels, such as excavations, harbours and seas) occurred in construction, 50.7 per cent, and in manufacturing, 16.0 per cent.

Finally, 50.5 per cent of the fatalities in the category of collisions, derailments, wrecks, etc., (that involved automobiles and trucks, railways, aircraft, tractors and loadmobiles) occurred in the transportation industry.

The same analysis shows that 70.6 per cent of fatalities in manufacturing were the result of falls and slips or being struck by different objects; 52.0 per cent of fatalities in forestry resulted from being struck by different objects; 45.1 per cent of fatalities in transportation were collisions, derailments, wrecks, etc.; and 42.7 per cent of fatalities in construction were falls or slips.

*See Table H, p. 79.

14th Annual Report—1965-66

Injuries to Public Service Employees Cost More Than $4,600,000 in 1965-66

The 14th Annual Report on Claims for Work Injuries of Federal Public Service Employees, covering 1965-1966, discloses the following:

Disbursements for compensation, medical and hospital services, administration expenses and salaries in lieu of compensation, were more than $650,000 above the figure for 1964-1965. The report attributes the increase to higher costs of medical and related services, improved benefit rates in several of the provinces, as well as to the greater number of claims settled. Higher salaries and a greater number of employees were also a factor. The aggregate of the direct costs was estimated at approximately $4,600,000, an increase of 16 per cent.

Indirect costs, such as those caused by work interruptions, delayed services, involvement of supervisory staff, and loss or damage to material and equipment, should also be taken into account, the report emphasizes. Experts estimate that the ratio of indirect costs to direct cost is, on the average, 4 to 1, which would make the total accident bill close to $23,000,000.

The number of employees in the service increased by 5,000 during the period to a total of 237,000.

During the year, employees suffered a total of 19,756 injuries, an increase of 289 from the 1964-1965 figures. There were 24 fatal injuries, 9 permanent disabilities, 4,656 injury-leave cases, 2,932 compensation cases, 11,739 minor injuries, and 396 cases for which claims were not allowed.

The total cost of all compensation benefits paid from the Consolidated Revenue Fund was $3,008,691, up 10 per cent over 1964-1965, plus the amounts paid to provincial workmen's compensation boards for their administration services under the Act—a sum of $383,358 for the period. One third of the expenditure went for hospital and medical services, two thirds to compensate for income losses of injured or deceased employees.

Salaries paid in lieu of compensation under the injury-leave provisions amounted to $1,203,312, up 31.8 per cent from the previous year.

Including expenses for administration charged by the provinces, the compensation benefits, and the salaries paid in lieu of compensation, the direct gross cost of accidents and injuries suffered by persons employed in the federal public service was $4,595,361.

The accident frequency rate for the 105 separate reporting units ranged from zero to 115.74. The rate for the public service as a whole was 17.22, an increase of almost 2 per cent.

Labour Standards Legislation Enacted In Eight Jurisdictions During 1966

Fair Wages and Hours of Labour Act is amended by Parliament

Paid statutory holidays provided for in British Columbia

Vacation benefits are extended in Manitoba and Ontario

During the 1966 sessions of Canada's Parliament and the provincial legislatures, new labour standards provisions were adopted in eight jurisdictions.

Parliament amended the Fair Wages and Hours of Labour Act to bring provisions respecting wage rates and hours of work into conformity with those of the Canada Labour (Standards) Code.

Amendments to the Newfoundland Minimum Wage Act changed the definition of wages, and strengthened enforcement procedures.

In Manitoba, a new Vacations with Pay Act provided for allowances to employees whose services are terminated during a working year; amendments to the Employment Standards Act established a uniform overtime standard throughout the province; the Employment Services Act was amended.

Amendments were made in Saskatchewan to the Hours of Work Act, and the Saskatchewan Annual Holidays Act.

The Ontario Hours of Work and Vacations with Pay Act was amended to provide for two weeks vacation with pay after 36 months of employment.

Some changes in the stamp system of vacation pay credits in effect in the construction industry were made, through amendments to the Nova Scotia Vacation Pay Act.

British Columbia provided for eight paid holidays a year, and replaced its Maternity Protection Act.

On July 1, a new Child Welfare Act went into force in Alberta, amending Section 34 of the Alberta Labour Act—the section governing the employment of children.

FAIR WAGES

Parliament amended the Fair Wages and Hours of Labour Act to bring the wages and hours standards in this Act into conformity with those of the Canada Labour (Standards) Code. The amending Act implements certain assurances given in the name of the Government by the then Minister of Labour during the debate on the Labour (Standards) Code, at which time he stated:

> In the case of work on government contracts, changes will be proposed in the Fair Wages and Hours of Labour Act later in the session, in order that those covered by this legislation will also be brought into conformity with the hours of work and minimum wage standards of the Canada Labour Code.

Enacted in 1935

Enacted in 1935, the Fair Wages and Hours of Labour Act provides for the payment of fair wages on federal government construction contracts. The term "fair wages" has been defined as "such wages as are generally accepted as current for competent workmen in the district in which the work is being performed for the character or class of work in which such workmen are respectively engaged; but shall in all cases be fair and reasonable."

The amending Act, which will come into force on proclamation, has added a proviso to the effect that in no case may wages be less than the minimum hourly rate set under the Canada Labour (Standards) Code. This means that, after the amending Act is proclaimed in force, the minimum wage payable for work on a federal government construction contract will be $1.25 an hour. If the prevailing rate is higher in a certain area, the contractor will, as before, be required to pay the higher rate.

Hours Provisions Amended

The hours provisions, which currently limit working hours to eight in a day and 44 in a week except when extended by a special permit issued by the Minister of Labour, have also been amended. Working hours are to be restricted to eight in the day and 48 in a week, but one and one-half the fair wage rate required under the contract is to be paid after eight hours in a day or 40 in a week. At present, regulations under the Act require the payment of the overtime rate after eight and 44 hours where permits for extended hours have been issued. The Minister said that a substantial number of permits had been issued when work had to be completed in a short season or in circumstances where completion of a contract was urgent. Under the new system, he said, a contractor would be allowed to work up to 48 hours in a week without a permit, so long as the overtime rate was paid after 40 hours.

A penalty provision was also introduced. Every contract is to contain a provision that, in the event of a default in carrying out the wages and hours conditions, the contractor will be assessed liquidated damages in the sum of $50 for every default.

MINIMUM WAGES

Amendments to the Newfoundland Minimum Wage Act changed the definition of wages and strengthened enforcement procedures.

The amended Act makes it clear that the term "wages" includes every form of remuneration for labour performed, but does not include tips and other gratuities.

New provisions, similar to those in the Newfoundland Industrial Standards Act, permit an employer to make voluntary restitution of wages owing to an employee. If an officer finds that an employer has failed to pay the prescribed minimum wage, he may determine the balance owing and, if the parties concerned agree as to the amount, the employer must transmit it within two days to the Deputy Minister of Labour, who will pay the money to the employee. If an employee cannot be located, the money will be placed in a special account and, if not claimed within two years, will become part of the Consolidated Revenue Fund. An employer who complies with this provision will not be

liable to prosecution if the Attorney General so directs.

Mandatory Provision

Another new provision now makes it mandatory, rather than discretionary, for a magistrate who has convicted an employer of failure to pay the minimum wage to order him to pay the employee any outstanding difference between the amount actually paid and the prescribed wages. Such an order is enforceable in the same manner as a judgment of the court in a civil action. The employee, however, retains the right to take any other action for the recovery of the amount owing.

HOURS

In Manitoba, amendments to the Employment Standards Act established a uniform overtime standard throughout the Province.

Part III of the Employment Standards Act requires the payment of time and one-half the regular rate for all time worked in excess of the prescribed limits—eight in the day and 44 in the week for women, and eight in the day and 48 in the week for men. Prior to the coming into force of the amendment, the statutory overtime standard applied only to scheduled employments in the larger, more industrialized areas of Manitoba. In other types of employment and in the smaller centres, the lower overtime standard set out in the minimum wage regulations (one and one-half the minimum wage) applied.

Standard Extended

Effective May 1, 1966, the statutory overtime standard was extended to all industries in all parts of the province, except industries such as agriculture and fishing, which are exempted from the Act. Construction workers will continue to be governed by the Construction Industry Wages Act and the regulations under that Act.

Another amendment made the Minister of Labour responsible for the enforcement of the hours provisions. Previously, the Department of Labour was not charged with the responsibility of securing compliance with the overtime pay requirements.

An amendment to the Saskatchewan Hours of Work Act amended the exemption for agricultural workers to make it clear that it applies only to employees "employed primarily in farming, ranching, market gardening or any other undertaking for the culture or production of grain, fruit, vegetables, live stock and dairy produce or any of them."

ANNUAL VACATIONS

Ontario amended its Hours of Work and Vacations with Pay Act, which previously required employers to give employees a week's vacation with pay after a year's service, to provide for a two-week vacation after 36 months of continuous or non-continuous employment, with a corresponding increase in vacation pay, effective July 1, 1966.

This means, that as before, an employee is entitled to a vacation of at least one week for each of the first three years of his employment, with pay at the rate of two per cent of his pay for all work done during the vacation year.

After 36 months of continuous or non-continuous employment, an employee is now entitled to at least two weeks vacation for each year of employment completed thereafter, with pay in an amount equal to four per cent of his earnings.

An employee having four years of continuous or non-continuous employment on July 1, 1966, qualified for two weeks vacation with pay, provided he had not already taken a paid vacation during his fourth year of employment. An employee who started to work on or after July 1, 1966, will be entitled to one week's vacation in 1967, 1968 and 1969, and to two weeks vacation in 1970.

One Period or More

This two-week vacation may be granted in one period or it may be divided into two periods of one week each.

The amending Act makes it quite clear that the whole of the period of employment with an employer, both before and after July 1, is to be counted when computing an employee's entitlement to vacation with pay under the amended legislation.

Another amendment gave the Industry and Labour Board, which administers the legislation, authority to approve provisions in agreements between an employer and his employees respecting annual vacations with pay in lieu of annual vacations.

New regulations that went into force on the same day as the amending Act brought vacation pay requirements for terminated employees into conformity with the Act; dropped the service requirement for employees who left their employment voluntarily; and discontinued the stamp system of vacation credits except in the construction industry (L.G., Oct. 1966, p. 595).

Manitoba

In Manitoba, a new Vacations with Pay Act went into force on June 1, replacing legislation originally enacted in 1947. It continues to provide for an annual vacation of two weeks, with pay at the rate of 4 per cent of regular wages after a year's service. A new feature is the provision for the payment of a vacation allowance to employees whose services are terminated during a working year.

Another change is that the accumulated credit system in effect for transitory employees in the construction industry in Greater Winnipeg has been discontinued.

Coverage

The Act covers all employees in the province (including Crown employees), except employees in agriculture, ranching or market gardening and employees subject to federal labour jurisdiction. Domestic servants—a group formerly covered—are also excluded under the new Act.

Service Requirements

There is no change in the service requirements. To be eligible for a two-week vacation, an employee must work at least 95 per cent of the regular working hours during a continuous 12-month period. Continuity of service will not be broken by any absence for which an employee receives workmen's compensation. Also, when computing regular working hours, the employer must not include the vacation period or absences up to 30 days for a certified illness or for authorized leave.

Vacation Allowance

A vacation allowance is now payable on termination of employment. An employee whose services are terminated during a working year is now entitled to 4 per cent of his regular wages for the period worked.

Subject to the conditions specified in the Act, the Manitoba Labour Board was empowered to exempt an employer with a fixed costs contract from paying this allowance until after December 31, 1966, to employees engaged in the performance of such a contract.

System Discontinued

As noted above, the accumulated credit system in effect for transitory employees in the construction industry in Greater Winnipeg has been discontinued. This system provided for regular deposit by employers with the Department of Labour of vacation wages owing to employees, and the disbursement of these wages annually to the employee by cheque. Under the new legislation, procedures are the same as in other industries, and payments are to be made directly from the employer to the employee on termination of employment.

The Act includes transitional provision designed to ensure that construction workers receive any amounts owing to them under the accumulated credit system or the vacation stamp system in effect prior to 1960.

Nova Scotia

Amendments to the Nova Scotia Vacation Pay Act made some changes in the stamp system of vacation pay credits in effect in the construction industry.

Previously, employers in the construction industry were required to affix stamps equal to two per cent of employees' earnings in employees' stamp books within 10 days of termination of employment, if they were not entitled to a vacation or to pay in lieu of a vacation. The amended Act provides that, if a construction worker is paid on an hourly basis, the employer must provide him with a stamp book, if he does not have a current one, and must affix stamps therein within three days after each pay day. Such an employee is not, however, entitled to an annual vacation or to pay in lieu of a vacation.

As before, the stamp system may be extended to other industries by order in council.

Another amendment makes it quite clear that an employee is entitled to the vacation and pay prescribed by the Act, notwithstanding that vacation benefits provided under an agreement, contract of service or custom are more beneficial in some respects than the provisions of the Vacation Pay Act.

Saskatchewan

The clause in the Saskatchewan Annual Holidays Act excluding employees in agriculture from the Act was reworded, to bring it into conformity with the province's Hours of Work Act, the amendment of which is described on page 25.

STATUTORY HOLIDAYS

British Columbia amended its Annual Holidays Act to provide for eight general holidays with pay. In line with this change, the Act was renamed the "Annual and General Holidays Act."

The amended Act empowers the Board of Industrial Relations, after holding an inquiry, to issue an order requiring employers to give their employees a general holiday with pay. In the Act, a general holiday is defined as "New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Remembrance Day and Christmas Day or any day substituted for any such holiday in an order of the Board."

In an order respecting general holidays, the Board may lay down the conditions under which a general holiday must be granted, and may specify the pay to which an employee is entitled for a holiday on which he works or does not work and the manner in which it is to be determined. It may also provide for exceptions and for the substitution of an alternative day for any of the eight holidays listed.

Public hearings were held in June, but no order has been issued to date.

According to press reports, the Minister of Labour said that most trade unions had already negotiated statutory holidays or pay in lieu thereof and that the new legislation would ensure that non-union workers would receive the same benefits.

OTHER LABOUR STANDARDS

British Columbia's new Maternity Protection Act, which replaces an earlier act of the same name, is designed to protect female employees against dismissal while absent on maternity leave.

Broader in scope than the previous legislation, the new Act applies to all types of employment, except farming, horticultural operations and domestic service.

The Act provides for six weeks leave of absence during pregnancy. Upon receipt of a certificate from a duly qualified medical practitioner stating that a named employee is pregnant and that her confinement will probably occur on or about a specified date, the employer is obliged to grant that employee leave of absence at any time during the six-week period immediately preceding the date specified in the certificate.

Not Employable

The employment of a woman immediately after childbirth is again prohibited. Upon receipt of a medical certificate giving the date of delivery, an employer is forbidden to allow that woman to work for six weeks following that date or during the period recommended in the certificate, whichever is longer.

The Act also protects a woman against dismissal while absent on maternity leave. An employer is not allowed to dismiss an employee or to give her notice because of absence before or after childbirth until and unless she has been absent for a period of 16 weeks. The onus of proving that the reason for dismissal is not because of her absence rests with the employer.

Child Welfare Act

A new Child Welfare Act in Alberta, which went into force on July 1, 1966, amended Section 34 of the Alberta Labour Act—the section governing the employment of children. The new Act also amended certain provisions of the former Child Welfare Act concerning the employment of children in entertainment, and repealed certain other provisions respecting the employment of children and young persons, to remove duplications and conflicts.

Alberta Labour Act

Section 34 of the Alberta Labour Act continues to prohibit the employment of a young person under 15 years of age in any factory, shop or office building or in any other employment without the written consent of a parent or guardian, and the approval of the Board of Industrial Relations. An exception is again made, however, for a child excused from school attendance for the purpose of obtaining vocational training through employment. Subsection 3 of this section, which authorized the Lieutenant Governor in Council to make regulations respecting the employment of children, has been amended.

Children Under 15

Regulations may again be issued permitting the employment of children under 15 in specific occupations and may now impose such conditions as are considered proper. As well as authorizing regulations prohibiting the employment of persons 15 to 18 years of age in occupations considered likely to be injurious to life, limbs, health, education or morals, the Act now provides also for regulations imposing restrictions on the employment of young persons in this age-group in specific occupations.

The minimum age for employment in entertainment has been raised from 10 to 12 years. The new Child Welfare Act provides that, notwithstanding section 34 of the Alberta Labour Act, the Child Welfare Commission may, upon application, grant a licence permitting the employment of a child over 12 years of age in entertainment.

The Commission must be satisfied that the employment will not be harmful to the child's life, limbs, health, education or morals, and that proper provision has been made to secure the health and kind treatment of the child. In the licence, the Commission may fix the period of time and the hours of the day during which the child may be employed and may also prescribe other conditions and restrictions with respect to the employment.

Deletions

To remove duplications and conflicts, the new Act has removed three other provisions in the former Child Welfare Act governing the employment of children or young persons. One prohibited the employment of a child under 16 between 9 p.m. and 8 a.m. in any occupation likely to be harmful to his life, limbs, health, education or morals; another made it illegal to employ a girl under 18 in a restaurant or hotel without the written consent of a parent or guardian; and the third empowered a municipal council, under defined conditions, to pass by-laws for regulating, controlling and licencing children working as messengers, vendors of newspapers and small wares and shoe-shiners.

Employment Agencies

The Manitoba Employment Services Act, which formerly required employment agencies to be licenced by the Department of Labour, was amended to prohibit charges for placement services.

In particular, it now forbids an employment agency to charge any person a fee for obtaining employment for him or for introducing him to a prospective employer. It is also illegal for an employment agency to charge any person a fee for accepting an application for employment or for placing his name on a list of persons seeking employment.

Any contract providing for a fee for placement services is null and void and unenforceable.

Any person who, after coming into force of the amendment (April 27), paid a fee for placement services may recover the amount so paid in a court of competent jurisdiction.

Royal Commission

Continued from page 11

choice of shifts and carriers' walks, and in promotion as far as the railway mail clerks were concerned. It approved of this policy, but it made some suggestions for improving it.

The Commission found that the way in which competitions for jobs were conducted, and the promotion system itself, were criticized "more bitterly than anything else," and the Department, it said, was greatly surprised to learn this. A common complaint was that promotions were "fixed" beforehand, and that an employee who was favoured by a supervisor was sometimes given a special chance to gain job experience before the competition was held.

Competition Lists

The Commission said that it was impossible for it to investigate individual cases, but that, although there might have been exaggeration or prejudice in these charges, it was hard not to believe that there was at least some foundation for them. It made several recommendations. One of these was that lists of vacancies to be filled by competition should be posted in every staff post office. Employees should be invited to enter their names on these lists, and those whose names were entered should all be given an equal chance to gain experience necessary to improve their chances in the competition.

Another recommendation was that the immediate supervisor of one or more applicants should not be a member of the competition rating board.

The Commission considered suggestions that promotion should be by seniority only, and although it did not agree with this principle, it recommended that seniority should be given some weight, rather than that, as at present, merit should be the sole criterion.

The report recommended that the Department should abolish the practice of temporarily reducing salaries as a disciplinary measure. It also made several other recommendations regarding discipline.

Observation Galleries

The Commission refused to recommend the abolition of "observation galleries" as a means of checking theft and tampering with the mail. It noted that these galleries were in use in post offices in the United States, England, Australia and elsewhere, and it said that they seemed to have been found to be indispensable. It did recommend, however, that the Department should issue further instructions emphasizing that such galleries were to be used only for the purpose of safeguarding the mails.

A proposal was made by the Commission that post office employees should be allowed to engage in partisan political work outside working hours, and to contribute to, or deal with political party funds. It also recommended that non-supervisory operating employees of the post office should be allowed to stand as candidates in federal or provincial elections, should be given leave without pay in order to engage in campaigning for election, and, if unsuccessful, should be reinstated without any loss of rights or privileges as a civil servant. If elected, they would be required to resign immediately.

Other Recommendations

Other recommendations made by the commission advised that the Department should:

—make every effort to obtain the qualified staff needed to carry out its training and development program, and that in its training courses it should give top priority to courses in human relations for supervisors;

—take various steps to reduce the risk of accidents at work, study and define occupational diseases in the Post Office Department, improve first-aid kits and encourage employees to take first-aid courses, improve working conditions in office buildings and railway mail cars, allow mail sorters to use stools, try to improve the design of stools and consider the advisability of covering the floor where sorters stand to ease strain on the sorters, and try to provide parking space for employees;

—allow overtime to letter carriers whenever the volume of mail is heavier than usual, if the weather is inclement, or whenever they work longer than usual;

—pay railway mail clerks a differential for time on duty at night in the railway mail car, reach agreement with the Federation of Railway Mail Clerks on the most appropriate method of combining mileage and layover allowances, and make arrangements for dead-heading by railway mail clerks.

Finally, the Commission recommended that the senior officer responsible for personnel administration should be given the rank of Assistant Deputy Minister and should report directly to the Deputy Postmaster-General, and that the personnel administration should be reorganized, with a sufficient staff and with all necessary research facilities.

Provincial Safety and Health Legislation in 1966

British Columbia revises its Factories Act, extending coverage to shops and office buildings

Other provinces authorize new safety and health regulations

During the 1966 sessions of the Provincial Legislatures, the most significant enactment in the field of occupational safety and health was the new Factories Act adopted in British Columbia, which went into force on April 1, the date of Royal Assent, replacing an earlier Act of the same name. Broader in scope than the previous legislation, the new Act applies to shops and office buildings as well as to factories.

Amendments to existing legislation were adopted in a number of other provinces, some of which provided for additional regulations to control safety or health hazards. These included amendments to the Fire Prevention Act of Nova Scotia and the Public Health Act of Ontario.

Other changes included: amendments to the Gas and Oil Burner Act and the Gas Pipe Line Act in Manitoba, and amendments to the Mines Regulations Act in Saskatchewan and the Coal Mines Regulation Act in Alberta.

BRITISH COLUMBIA

Factories Act

British Columbia's new Factories Act represents the first major revision of the legislation since 1951. Among other changes, coverage was extended and enforcement procedures were clarified and strengthened. Welfare requirements were up-dated and a new section concerned with elevating devices was added.

Administration

As before, the responsibility for the administration of the legislation is vested in the Department of Labour. Accident prevention remains the responsibility of the Workmen's Compensation Board, and officers of the Board also inspect factories, shops and offices, as well as other workplaces outside the scope of The Factories Act, for compliance with regulations of the Board, which lay down numerous safety rules governing machinery, equipment and processes.

Coverage

The new Factories Act applies not only to factories but also to shops and office buildings.

The definition of "factory" has also been expanded to cover any building, premises or place where any manufacturing process is carried on, or where any form of energy or power is used to move or work any machinery used in manufacturing goods, or to aid the manufacturing process. Places where any manual labour is exercised by way of trade or for purposes of gain in, or incidental to the manufacturing process are covered, except private homes where only members of the same family live and work.

Maintenance plants used for the maintenance of aircraft, locomotives, and vehicles used for transport purposes are expressly covered.

Opening a Factory

To ensure that factories are structurally sound, the Act makes it compulsory to submit plans and specifications for departmental approval before starting to erect a new building or to alter an existing structure. This requirement was not spelled out in the former legislation, but, in practice, inspectors specified that this be done under authority of the general powers granted to them in that Act.

As before, notice of occupancy must be given to the inspector one month after operations begin.

Powers of Inspectors

In addition to the usual authority to enter and inspect premises, examine records and other documents, and question employees, an inspector is authorized to take with him into any premises a medical practitioner, a medical health officer or a public health inspector. (The *Annual Report of the Department of Labour* for the year ending December 31, 1965, stated that, because of the need to expand inspectional services, a study conducted earlier in the year had clearly indicated that the assistance of public health inspectors in doing factory inspections would be an efficient and economic method of solving this problem and, after consultation with the Department of Health Services and Hospital Insurance, arrangements had been completed to make this plan of operation effective.)

The new Act also gave factory inspectors express authority to bring in technical experts to make examinations and tests and, where necessary, to take samples.

Another new provision empowers an inspector to issue "stop-work orders," if, in his opinion, any "place, matter or thing" in a factory, shop or office is a source of danger to the health or safety of persons employed therein.

The over-all responsibility for ensuring a proper working environment rests with the employer. It is his duty to see that, during working hours, the factory, shop or office, and all passages and sanitary conveniences under his control are properly lighted and heated so that they are not injurious to the health, safety and comfort of the employees. The owner of a building has a similar responsibility with respect to the parts under his direct control or used in common by the tenants or occupants.

The sanitary and washing facilities to be provided are spelled out in detail. Among other requirements, the owner of a factory building must ensure that every washroom is equipped with at least one washbasin, or washing facilities satisfactory to the inspector, connected to a source of hot and cold water, for every 15 employees. Upon the written request of an inspector, the employer must provide showers and additional washbasins, if the health of employees is likely to be endangered by the presence of poisonous, irritating or infectious materials or gases or by extremes of temperature or humidity.

Washrooms in shops and in office buildings are to be equipped with washbasins in accordance with the requirements of the current National Building Code of Canada.

Every factory is to be provided with a lunchroom, and it is the duty of the employer to see that no meals are eaten where any manufacturing process is carried on. Taking food into part of any room where paint, varnish, dye, white lead, arsenic, ionizing radiation, or other poisonous substances or atmospheric contaminants are present is prohibited.

As before, the employer must supply seats for female factory employees, upon the written direction of an inspector.

To reduce fatigue, it is now obligatory for an employer to provide a resilient

material, satisfactory to an inspector, for female factory employees to stand on while employed in work that necessitates constant standing on cement or hard-surfaced floors.

In a factory, shop or office employing 10 or more female employees, a rest-room must be provided and supplied with the required equipment. An inspector may, however, grant a full or partial exemption.

Every employer in charge of a factory or shop must provide suitable accommodation for employees' street clothes and for work clothes that must be dried or cleaned or kept separate from street clothes owing to the presence of poisonous, infectious or irritating materials.

Overcrowding in offices is prohibited. In a factory or shop, at least 300 cubic feet of room space must be provided for each employee.

Every workroom in a factory or shop is to be maintained at a "reasonable temperature," defined as not less than 65° Fahrenheit measured at five feet from the floor, unless otherwise authorized by an inspector. By written notice to the employer, the inspector may prescribe a standard of minimum and maximum temperatures for any room in a building, having regard to the health and comfort of the employees. If, owing to the nature of the manufacturing process being carried on, excessive heat is created, the inspector may require the owner to install special heat-reducing appliances.

Other provisions designed to ensure a safe and healthful working environment deal with the provision of safe drinking water, housekeeping and sanitation. Additional requirements may be prescribed by regulation.

It is the duty of the employer to see that every workroom in a factory is properly ventilated by natural or mechanical means. Other provisions concerned with factory atmospheric conditions require employers to equip with hoods, and to install local exhaust systems for any machinery creating dusts or impurities in quantities dangerous to the health of employees.

The Act authorizes regulations for the protection of persons engaged in any industrial process involving the use or manufacture of poisons or other harmful substances. Among other matters, these regulations may provide for periodic medical examination of persons engaged in such processes, and may require the reporting of cases of affection from dangerous or harmful substances or industrial poisoning.

Elevating Devices

Part II of the Act, which deals with elevating devices, contains provisions formerly in the regulations, together with some amendments and aditional requirements.

It applies to all vertical or inclined lifts used for raising or lowering passengers or materials, except those excluded by the regulations. The Chief Inspector may, however, by written notice, extend the application of any requirement to any lifting device excluded from the Act or regulations.

No elevating device may be operated without a licence, which must be renewed annually. The conditions under which licences are to be granted will be prescribed by regulation.

To make the legislation more flexible, the Act does not set out technical requirements for elevating devices, but gives the Lieutenant Governor in Council broad authority to make regulations. Among other matters, the regulations may lay down standards with respect to the design, construction, installation, maintenance and inspection of elevating devices.

Regulations adopting relevant safety codes or standards with or without modifications are also authorized.

Regulations fixing a minimum age for elevator operators, or providing for the licensing of operators, may also be issued.

One of the new safety provisions requires an inspector to rate the maximum carrying capacity of every elevating device in respect of weight or number of passengers carried at its original design capacity, with due reduction for poor construction, age, deterioration, and like considerations.

When an elevating device is being inspected, the owner, person in charge, or the contractor responsible for installation or maintenance is now obliged to report any known or suspected defects.

Other new provisions provide for the cancellation or suspension of a licence, or the sealing of an elevating device under certain conditions. If, in the opinion of an inspector, an elevating device is in an unsafe condition, or is being operated in a dangerous manner, or by a person who does not hold the required licence, or if an inspector's instructions are not complied with, or the prescribed repairs, alterations or replacements have not been made within the required time, a licence may be suspended or cancelled by the Chief Inspector, or the inspector may seal the device on the instructions of the Chief Inspector.

An elevating device that had been condemned by an inspector may not be repaired or put back into operation without written permission of the Chief Inspector.

A written authorization from the Chief Inspector is also required before an elevating device previously in use may be sold, exchanged or reinstalled in a new location. (This does not apply, however, to an elevating device sold along with the building or premises in which it is located.)

Any device that has been out of service for a year or more may not be put back into operation unless it has been inspected and a special permit obtained from the inspector.

Boiler and Pressure Vessel Act

An amendment to the Boiler and Pressure Vessel Act provides that no person may commence the installation of a boiler unless he has obtained a permit from the Chief Inspector of Boilers of the Department of Public Works in accordance with the regulations under this Act. Previously, a permit was required before any low-pressure boiler could be installed or altered.

MANITOBA

Gas and Oil Burner Act

In Manitoba, amendments were made to the Gas and Oil Burner Act to ensure the safe handling of liquefied petroleum and the safe installation of appliances using this type of fuel.

In the amended Act, the term "gas" is defined to include liquefied petroleum.

Another amendment forbids any person to keep, store, distribute, deliver or dispose of any liquefied petroleum, unless the design and construction of the storage tanks and containers, and the places where they are kept, comply with the minimum standards prescribed by the regulations.

Regulations adopting any relevant codes or standards dealing with liquefied petroleum were also authorized. The Minister of Labour said this would enable the Government to adopt as regulations under the Act any relevant standards drawn up by the Canadian Standards Association.

Gas Pipe Line Act

An amendment to the Gas Pipe Line Act amended the regulations section of the Act to permit the Lieutenant Governor in Council to issue regulations adopting any relevant codes, rules or standards drawn up by the Canadian Standards Association or other similar organizations. The amendment was made retroactive to August 1, 1959.

The Minister of Public Utilities, who introduced the legislation, said that, under the regulations of the Gas Pipe Line Act,

it had been the practice, since 1959, to adopt standards set by organizations such as the Canadian or American Standards Association. Reviewing the regulations recently, however, the Legislative Committee on Statutory Orders and Regulations had pointed out that there was no authority in the Act to do this. The amending Act, the Minister said, was intended only to regularize procedures followed since 1959.

NOVA SCOTIA

The section of the Nova Scotia Fire Prevention Act empowering the Minister of Labour to make regulations respecting fire prevention, subject to the approval of the Governor in Council, was expanded to provide for regulations:

(a) Governing the manufacture, carriage, handling, storage and disposal of explosive or flammable liquids, gases, chemicals and other flammable material;

(b) relating to the approval, and regulating the sale, installation and maintenance of equipment or appliances using flammable liquids or gases as fuel; and

(c) respecting the precautions and measures to be taken and provided to protect persons from fires in hospitals, nursing homes, convalescent homes and homes for the aged.

Another amendment empowered the Fire Marshal to conduct regional or travelling training schools for firemen.

According to the *Nova Scotia Department of Labour Bulletin* of August 1966 (p. 3), plans call for the appointment of a fire service training officer to assist fire departments throughout the province in their training, and to develop a standard training program.

PRINCE EDWARD ISLAND

An amendment to the Steam Boiler Act of Prince Edward Island made the Minister of Labour, rather than the Public Utilities Commission, responsible for the administration of the legislation governing the operation of steam boilers.

ONTARIO

In Ontario, amendments to the Public Health Act expanded the power of the Minister of Health to make regulations respecting ionizing radiation to include regulations governing sources of ionizing radiation used in commerce and industry, as well as other sources of ionizing radiation.

Any regulations issued may regulate or prohibit the installation, use, movement, handling, maintenance, storage or disposal of sources of ionizing radiation.

ALBERTA

Coal Mines Regulation Act

The Coal Mines Regulation Act, which sets out technical requirements for equipment used in coal mines, and the safety measures to be observed in or about such mines, was amended with respect to qualifications of members of the Board of Examiners and of mine managers, assistant managers and strip-mine surveyors.

The section setting out the qualifications of members of the Board of Examiners, the representative-type board responsible for examining applicants for certificates of competency, has been amended to permit the appointment of persons not presently employed in the operation of a mine. Two of the representative members must hold either a first-class certificate for underground mining or a manager's certificate for a strip mine; the other two must hold a miner's certificate or have had five years of strip mining experience. As before, the other member will be the Director of Mines or a mining inspector nominated by him.

Another amendment makes it quite clear that the manager or assistant manager of a coal mine, or a person acting in either capacity, must have had experience in the type of mining for which he is appointed. No person may be appointed as or act as manager or assistant manager of an underground coal mine unless he is the holder of a first-class certificate for underground mining. A person appointed to a similar position in a strip mine must hold a manager's certificate for a strip mine.

Other amendments make it possible for a person to obtain a certificate as a strip-mine surveyor without his having had experience in surveying underground mines, provided he has alternative qualifications.

Boilers and Pressure Vessels Act and the Pipe Line Act, 1958

An amendment to the Boilers and Pressure Vessels Act, and the Pipe Line Act, 1958, of Alberta permits the Lieutenant Governor in Council to exempt any class of pressure vessels from the legislation. At present, small boilers and pressure vessels, and certain other kinds of pressure vessels subject to regulation by the Board of Transport Commissioners of Canada and the Board of Public Utility Commissioners of Alberta, are exempted.

SASKATCHEWAN

In Saskatchewan, amendments to the Mines Regulation Act amended the definition of a mine, and changed requirements with respect to the keeping of plans and compliance with orders of an inspector.

The definition of a mine has been expanded to include any premises used for crushing, reducing, melting, refining or treating any mineral, soil, earth, rock, quartz, stone or clay.

It is now mandatory for every mine owner or his agent to keep a plan of the mine in the mine office, or in the principal office of the mines belonging to the same owner in the district in which the mine is situated, and to make it available for inspection upon request. Previously, this provision applied only to mines in which more than 12 persons were ordinarily employed underground.

Plans of every abandoned mine must now be sent to the Minister of Mines, regardless of the number of persons previously employed there.

If an inspector issues a written order requiring a dangerous condition to be remedied within a stated time, the mine owner or his agent now has 30 days in which to send the inspector written notice of the steps taken to comply with the order.

NEW BRUNSWICK

Among other changes, new provisions were added to the Motor Vehicle Act of New Brunswick to ensure the safe operation of trucks hauling pulpwood and logs on public highways.

The explanatory note to the bill said that many complaints had been received about such trucks, and that representations on this matter had also been made by the Industrial Safety Council of New Brunswick.

The new provisions are similar to those in Appendix A to the Regulations under the Industrial Safety Act. They forbid any person to operate on any highway any vehicle carrying logs piled in two ranks which extend above the stakes, or any vehicle carrying logs over four feet long piled crosswise on a vehicle body, unless the logs are secured in the prescribed manner. Also, no person may operate a vehicle carrying logs or other material over eight feet long piled lengthwise on a vehicle body or trailer unless the required precautionary measures are taken to prevent spilling.

PRICE INDEXES

Consumer, November 1966

The consumer price index (1949=100) rose 0.1 per cent to 145.5 at the beginning of November from 145.3 in October. The November index was 3.8 per cent higher than the November 1965 index of 140.2.

In the current period the housing, clothing, health and personal care, recreation and reading, and tobacco and alcohol indexes all recorded increases ranging from 1.3 per cent for recreation and reading to 0.1 per cent for tobacco and alcohol. The food index decreased 0.6 per cent and the transportation index remained unchanged.

The food index moved down 0.6 per cent to 144.7 from 145.6 in October. Lower prices were reported for chicken, all beef, all pork except smoked ham, and all other meat and fish items except veal chops and sausages. Other decreases included seasonal reductions for root vegetables, cabbage, fresh fruits except oranges, and sugar.

The housing index rose 0.3 per cent to 146.6 from 146.1 as a result of increases in the shelter and household operations components. Higher rental rates and increased costs for both tenant and home-owner repairs and property taxes accounted for the increase in the shelter component.

The clothing index advanced 0.5 per cent to 129.8 from 129.2. Prices were generally higher for men's wear, children's wear and footwear. The index for women's wear was slightly higher and the index for piece goods remained unchanged.

The transportation index remained unchanged at 151.1. The health and personal care index rose 1.0 per cent to 184.5 from 182.7.

The recreation and reading index advanced 1.3 per cent to 161.3 from 159.2 with higher prices reported for motion picture admissions and sporting equipment. The tobacco and alcohol index edged up 0.1 per cent to 126.5 from 126.4.

Group indexes a year earlier (November 1965) were: food 138.2, housing 142.0, clothing 123.7, transportation 148.7, health and personal care 177.9, recreation and reading 155.0, and tobacco and alcohol 122.3.

City Consumer, October 1966

The consumer price indexes rose in four cities, fell in five, and remained constant in one between September and October 1966. Movements ranged from an increase of 0.3 per cent in Vancouver to fractional decreases of 0.1 per cent in Saint John, Toronto, and Saskatoon-Regina. No change in the index was recorded in St. John's, Nfld.

The component indexes displayed mixed tendencies throughout the regional cities. Food indexes decreased in all cities with the largest recorded in Montreal, and the smallest in Halifax. Housing indexes rose in all cities except one, where the index remained at the September level. Clothing indexes advanced in all cities, with movements ranging from a high of 2.6 per cent in Montreal to a low of 0.1 per cent in Saint John.

Transportation indexes rose in two cities, fell in seven and remained steady in one. Health and personal care indexes advanced in all cities except Toronto, where the index remained unchanged. Recreation and reading indexes rose in all cities except St. John's, where it remained constant. Tobacco and alcohol indexes were unchanged across Canada.

Regional consumer price index point changes between September and October were: Ottawa + 0.4 to 144.9; Montreal + 0.3 to 142.6; Saint John + 0.2 to 141.7; Toronto + 0.1 to 148.1; Saskatoon-Regina + 0.1 to 136.9; Halifax + 0.1 to 139.0; Winnipeg + 0.1 to 140.6; Edmonton-Calgary + 0.3 to 136.2; Vancouver + 0.4 to 140.0; St. John's* unchanged at 126.5.

Wholesale, October 1966

The general wholesale index (1935-39 = 100) declined in October to 260.7 from 260.8 in September. It was 3.4 per cent higher than the October 1965 index of 252.1. Four of the major group indexes decreased and four increased.

The animal products group index declined 0.4 per cent in October to 298.7 from 299.9 in September because of lower prices for fresh and cured meats, fishery products, leather and hides, and skins. A decrease of 0.3 per cent to 228.2 from 229.0 was reported in the non-ferrous metals products group index; and a decrease of 0.1 per cent occurred in two major group indexes—wood products to 342.0 from 342.4, and iron products to 268.6 from 268.9.

The chemical products group index advanced 0.4 per cent to 211.3 from 210.4 in September. The vegetable products group index rose 0.3 per cent to 225.9 from 225.3 on higher prices for fresh fruits, livestock and poultry feeds, and tea, coffee and cocoa. An advance of 0.3 per cent to 194.7 from 194.1 occurred in the non-metallic minerals products group index, and the textile products group index rose 0.2 per cent to 252.0 from 251.6.

Residential Building

The price index of residential building materials (1935-39=100) increased in September by 0.2 per cent to 346.4 from 345.7 in August, and to 151.9 from 151.6 on the 1949=100 base. The non-residential building materials index (1949=100) advanced by 0.2 per cent to 150.8 from 150.5 in August.

* On base June 1951=100.

U.S. Consumer, October 1966

The United States consumer price index (1957=100) increased by 0.4 per cent to 114.5 in October from 110.2 in September. A year ago in October the index was 110.4.

Higher costs for housing, medical care and apparel contributed to the increase. Grocery store prices went down an average of two tenths of a per cent, mainly because of lower prices for pork and chickens, and a seasonal decline in prices of many fresh fruits and vegetables. Bread prices dropped, but the price of eggs and milk rose.

Automobile prices were up slightly on the new models. The added costs resulted mainly from new safety equipment and longer warranties.

British Retail, September 1966

The British index of retail prices (Jan. 16, 1962=100) declined to 117.1 at September 20 from 117.3 at mid-August. The index a year ago was 113.0.

The decrease in the index was due mainly to reductions, largely seasonal, in the prices of fresh vegetables, fruit, beef, mutton and lamb. The index for foods fell by about 3 per cent to 109.6, compared with 113.0 in August. The index for the food group as a whole fell by nearly 1 per cent to 115.1, compared with 116.1 in August.

The group index for fuel and light, clothing and footwear, and services, increased, and the transport and vehicles index declined. In the remaining five groups there was little change.

Employment and Unemployment in October

An estimated 7,324,000 persons were employed in October, compared with 7,311,000 in September, and 7,008,000 in October 1965. The labour force, at 7,519,000 in October, was 340,000, or 4.7 per cent higher than a year earlier.

Unemployment was 24,000 higher than a year ago, but declined by 10,000 to 195,000 from the September figure of 205,000.

The unemployment rate in October was 2.6 per cent of the labour force, compared with 2.4 per cent in October 1965 and 3.7 per cent in October 1964. Seasonally adjusted, the October 1966 unemployment rate was 3.5 per cent.

The labour force in October, at 7,519,000 was 340,000, or 4.7 per cent higher than a year earlier. Employment was up 316,000, or 4.5 per cent, during the year.

Unemployment was 24,000 higher than a year earlier.

Between September and October, non-farm employment showed an above-average increase of 55,000, offsetting the usual large seasonal drop in farm employment. This compares with an average September-October increase of 20,000 during the past five years.

The September-October increase in non-farm employment was concentrated in trade and manufacturing. In all other non-farm industries, employment levels remained virtually unchanged.

From October 1965, non-farm employment was up 387,000, or 6.1 per cent, the largest gains being in manufacturing, community, business and personal service, and in trade. Farm employment, at 561,000, was 71,000 lower than a year earlier.

In Ontario, Quebec and British Columbia, employment levels were noticeably higher than a year ago. In the Atlantic and Prairie regions, the year-to-year employment gains were relatively small.

Unemployment decreased by an estimated 10,000 to 195,000 between September and October. In comparison, the change in unemployment over the past five years has varied from an increase of 40,000 to a decrease of 5,000. The October estimate was 24,000 higher than a year earlier.

About three quarters, or 144,000 of the total number of unemployed had been out of work for three months or less. Some 24,000 had been seeking work for from four to six months, and 27,000 for seven months or more.

This review, including the classification of labour market areas and the table on labour statistics, has been prepared by the Manpower Information and Analysis Branch, Department of Manpower and Immigration. NOTE: Beginning September 1, 1966, there have been procedural changes that affect registration data which form the basis for classification of areas. This grouping system is not therefore, comparable with that of a year ago.

Labour Market Conditions

British Women Trade Unionists Discuss Night Work and Part-Time Work

A report* prepared for the 36th Annual Conference of British women trade union representatives deals with various aspects affecting women's work, under some 34 headings. Among others, two items, night work for women and part-time employment, are of special interest in Canada at the present time.

An earlier conference requested the Women's Committee to study all issues involved in night work, and to bring into the open conflicting views on this controversial subject.

Legislation passed in 1920, providing that "no young person or woman shall be employed at night in any industrial undertaking", was amended in 1936 to exempt from responsible managerial positions women who were "not ordinarily engaged in manual work." The Factories Act of 1961 does not specifically mention night work, but it stipulates that employment of women and young persons must not exceed 11 hours a day, and shall not begin earlier than 7 a.m. nor end later than 8 p.m.

Women factory cleaners are not covered by this stipulation. The majority of women who work elsewhere than in factories, are also exempt. Hours worked in non-manual occupations have never been restricted. Consequently night work is prevalent in nursing, certain welfare work, the police force, air services, canteens, and for telephone operators.

There are conflicting opinions about the desirability of restrictive legislation in this matter. Those who favour a flexible attitude maintain that restrictions on hours may be prejudicial to women in employment, and may thwart attempts to achieve equal pay. They believe that a woman should be free to make a choice and should not be subject to restriction by law.

Not Good for Anyone

Although there has been no medical evidence that the physical effects of night work are worse for women than for men, it is admitted that it is not good for anyone. In Sweden, a law forbidding night work for women was repealed and later replaced with legislation prohibiting night work for both men and women except in certain essential services.

Those who favour continuation and extension of the ban to all women workers argue that night work has harmful physical effects—tiredness, greater proneness to accidents, and digestive disorders. They maintain that these effects have a greater impact on women because of the dependence of the family on the woman. A further argument put forward is based on moral grounds, and has to do with the risks that arise when women have to travel to and from work through deserted streets.

The Committee lacked information regarding the number of women actually working at night and the kind of work they were doing. They were equally uninformed about the attitude of the unions and of the women themselves to a projected change in the legislation. Although the Minister of Labour was empowered to grant exemptions from restrictions under certain circumstances, and the granting of such exemptions was publicized, there was no accurate information about the number of women actually working at night.

Since it had been announced that the Ministry of Labour would be undertaking case studies on employment restrictions covering women and young persons and their effect on productivity, the Women's Committee deferred further study on the subject.

The study of changing patterns in women's employment drew attention to the growing importance of part-time work. Except in the manufacturing industries, where a periodic survey has been made for some years, and in the public service, there was no accurate source of information on the extent of part-time work performed.

The Ministry of Labour, drawing on information compiled in the 1961 census, reported the number of part-time women workers as 25 per cent of the "economically active." This represented a 10-per-cent increase since the 1951 census. In Canada, data compiled from the 1961 census indicated that 17.3 per cent of the female wage earners worked "less than 35 hours" per week.†

A list of the occupations with more than 25 per cent part-time workers showed charwomen and cleaners at the top with 84 per cent, followed by waitresses with 58 per cent, and shop assistants with 32 per cent. Among clothing, food, drink, tobacco, laundry and dry cleaning workers, 26 per cent were working on a part-time basis.

The report further indicated that the proportion of part-time workers in a particular occupation was not related directly to the total number of women employed in it. For instance, there were over a million women clerks and cashiers—more than in any other occupation, but the proportion working part time was only 15 per cent. Similarly, only 13 per cent of the typists and 10 per cent of the telephone operators were employed on a part-time basis.

More Study Warranted

It was noted that the information used was five years old; and in one particular instance, that of nurses, recent statistics showed that although part-time nurses made up 20 per cent of the total in 1961, the proportion had increased to 35 per cent by 1964. Thus the continuous growth of part-time work, and prospects for substantial increases in the future, warranted closer attention and study.

Many married women worked part time because they wished to, others did so because suitable full-time work was not available. Some women part-time workers were expected to work harder during the short peak hours than their full-time colleagues. At the same time, they might not be eligible for the same benefits as full-time workers. They might be at a further disadvantage if costs of travel and child care were the same as for full-time workers.

From the trade union point of view, it was more difficult to organize part-time workers than regular employees; and they constituted a threat to the effectiveness of union machinery and to the security and working conditions of those who worked full time.

Standards for Workshops Developed

About 65 persons from all parts of Canada attended the recent seminar in Toronto sponsored by the Canadian Rehabilitation Council for the Disabled in co-operation with the Canadian Association for Retarded Children, Canadian National Institute for the Blind, Canadian Mental Health Association and the federal and provincial governments. Those who attended were specialists in the field of rehabilitation, and represented voluntary agencies, workshops and governments.

The purpose of the seminar was to study, develop, and approve a set of basic standards for rehabilitation workshops.

The guest speaker was Antonio C. Suazo, Executive Director, National Association of Sheltered Workshops and Homebound Programs, Washington, D.C.

In addition to the development of basic standards, it was hoped that the seminar would reach agreement on a method by which sheltered workshops could most effectively achieve these standards. A discussion of a practical method of certifying those programs that do maintain effective standards was also on the agenda.

Following the adoption of workshop standards, a resolution was approved calling for the setting up of a committee composed of a representative group that would undertake to lay the foundation for a proposed structure for a Canadian organization of sheltered workshops, thus carrying on the work begun at the seminar. The suggestions of the committee were to be presented for consideration to all interested agencies. The committee, to be known as the Canadian Committee on Rehabilitation Workshops, was to carry out this program during the next 12 months, when another meeting would be called to approve or amend the committee's proposals.

At the annual meeting of the Canadian Rehabilitation Council for the Disabled, held in Toronto on October 21, a number of awards were presented.

The Reader's Digest Award was presented to The Edmonton Aphasic Association. The award, which was given for "distinguished service in developing and expanding community rehabilitation services for the handicapped during 1965-66", was presented by R. J. Collins, Associate Editor of the Reader's Digest Association (Canada) Limited. Mrs. Evelyn Unger, the founder of the Edmonton Aphasic Association accepted the award on behalf of the Association.

Spurred on by the needs of her son, who had been diagnosed as 'aphasic', (aphasia is the inability to use or to understand spoken language as a result of defect or damage to the central nervous system), Mrs. Unger sought out other parents whose children had similar difficulties. The result was that in April 1963, the Edmonton Aphasic Association was formed, and in May, the group was accepted as a member of the Alberta Council for Crippled Children and Adults. With the advice and backing of the Council, the Association set to work to establish a school for the children in whom it was interested.

In September 1964, one classroom with 10 pupils was set up in space provided by a United Church in Edmonton. By September 1966, the school had grown to four classrooms, with 40 children attending. The Alberta Council supports the school financially, and the Government of Alberta has recently provided a grant for each child six years of age and over.

At the presentation of the award, R. Bruce Grey, President of the Canadian Rehabilitation Council for the Disabled, explained that this organization had been chosen from among many nominated because it served as an example of what could be accomplished in the field of rehabilitation and education by individuals who, through their efforts, influenced the community.

The award of $500 was accompanied by a framed certificate that acknowledged the work of lay people, interested in this field of special education, for a group of children heretofore deprived of suitable education.

The "Timmy" Award

The "Timmy" Award, established in 1959 by the National Easter Seal Committee, is in the form of a citation. It is presented to an individual who has rendered some outstanding service to disabled children through the Easter Seal Campaign.

The award this year was presented as a combined award to a group made up of Foster Hewitt, Waldo Holden, Ken Soble and Conn Smythe. In 1947 these men, along with Len Hedley, a previous winner of this award, met to see what they could do to aid the annual Easter Seal Campaign. Their combined effort over the last 20 years has produced what has become known across the country as "Timmy's Easter Parade of Stars."

H. H. Popham, Chairman of the National Easter Seal Committee, presented the plaques, which bear the inscription: "Presented by the Canadian Rehabilitation Council for the Disabled in recognition of Distinguished Service to Crippled Children."

The C. W. Taylor Award

The C. W. Taylor award, established to emphasize the important part played by many volunteers across Canada in making a happier life for the crippled child, was presented to David A. Amory, President of Chevrolet Motor Sales Company of Montreal Ltd. This award is not an annual one. It is presented only to a person who, over a period of years, has demonstrated distinguished leadership in developing more adequate services for the handicapped in his own community, in his province and across Canada.

In spite of his various business interests, Mr. Amory has devoted much of his time and effort to promoting services for crippled children. In 1939 he became President of the Province of Quebec Society for Crippled Children, and from 1952 to 1954 he served as President of the Canadian Council for Crippled Children and Adults. In 1953, he was awarded the Coronation Medal by Her Majesty, Queen Elizabeth II, for his work with the Canadian Council for Crippled Children.

Mr. Amory is Past Governor of the School for Crippled Children (now known as the Mackay Center for Deaf and Crippled Children); Governor of the Montreal Children's Hospital; Governor and Past Vice-President of the Reddy Memorial Hospital; and Past Chairman of the Finance Committee of the International Society for Rehabilitation of the Disabled. He is the fourth person to win this award.

Training Methods for Older Workers

Procedures have not yet reached the level of refinement used in the training of children and adolescents, despite the increasing importance attached to adult training, says an OECD report

In spite of the increasing importance attached to adult training by countries belonging to the Organization for Economic Co-operation and Development, methods of training older workers have not yet reached the level of refinement used in the training of children and adolescents says the introduction to a new report issued by the OECD.

This report "Training Methods for Older Workers," written by R. M. Belbin, Ph.D. for the Manpower and Social Affairs Directorate of the OECD, is the subject of the following review:

Utmost Flexibility

"An active manpower policy calls for the utmost flexibility in the use of human resources. Economic and technical development demand individual and group changes not only from one occupation to another, but from one sector to another. To adjust to these changes in occupation, learning and re-learning are essential.

"This report presents a comprehensive survey of current scientific knowledge on the changes in human capacities with advancing age, particularly in regard to learning ability and power of adaptation, and describes the various methods of training which have been used. The findings reflect the growing evidence that learning and training are possible even in the higher age groups, provided that the conditions necessary for such training are established and the methods used are suitably adapted to the ever changing human capabilities and needs."

At present, the very limited amount of experience in this field has given rise to a number of tentative and somewhat contradictory reports about the effectiveness of the training of older adults. The report is therefore designed to bring together the relevant information. It is divided into three chapters and conclusions. The first of these covers the scientific evidence available on the influence of age on learning capabilities; the second chapter gives an account of experiences in the training of older workers; and the third chapter deals with the various methods of training.

Learning Capacity

Chapter 1 discusses the work of experimental psychologists in evaluating adult learning capacity. Experimental studies, starting early in the present century, show that older people can learn even to a fairly advanced age. The choice of materials, however, is very important. Loss in capacity to learn was found to be greatest with experimental "nonsense" materials, and least with materials that had meaning. Also studied were the effects of comprehension, memory, retention, rigidity in unlearning, motivation and intelligence.

Influences that affect older peoples' ability to learn reveal a good deal about how older people work. For example, accuracy is one of their strong points, so that the older worker tends to make fewer errors than the younger worker. In the matter of speed alone, however, the situation is reversed. The older worker should be allowed to work at his own pace, and not at a fixed speed. The importance of how the information is put before the older learner, and the need for careful evaluation of the older workers' abilities, were also brought out.

Many workers change jobs in their middle or later years for a variety of reasons. Those with readily marketable skills usually have little difficulty in finding suitable employment. Others, without these skills, tend to find re-employment in jobs low in skill, status and pay. Training could put the better jobs within reach of this group.

Chapter 2 deals with training experiences under various headings: retraining existing employees, training new employees, retraining of workers following industrial closures, special training schemes for older workers, and training of long-term unemployed.

Although, in industry, attention to the special characteristics and needs of older trainees brings improved results, for scientific purposes the information obtained is insufficient to bring out the principles underlying the most effective training methods.

Three Stages

Evidence must therefore be sought from experimental studies performed under controlled conditions. This is the subject of Chapter 3. The evidence indicates that there are three stages in adult learning:

—discovery: the trainee discovers the facts by active participation;

—understanding: the trainee relates his learning to his previous experiences;

—consolidation: practice and rehearsal.

The complete report is available from the Queen's Printer, Ottawa, or branch stores, under the title *Training Methods for Old Workers*—Report No. 2 in the series, *Employment of Older Workers (OECD)*, at $2 per copy prepaid.

Five Aspects of Automation Discussed At Area Labour-Management Conference

Five different aspects of automation were discussed at an area labour-management conference in Guelph, Ont., in October. The one-day meeting, jointly sponsored by the Canada Department of Labour, Ontario Department of Labour, Ontario Federation of Labour and nine local and district Labour Councils and Chambers of Commerce, attracted 273 registered labour and management representatives.

The Minister of Labour, Hon. John R. Nicholson, explained at the closing dinner the role of the federal Government in meeting automation. At the morning session Kenneth P. DeWitt, Assistant Director, Labour-Management Consultation Branch, Canada Department of Labour, discussed the role that joint labour-management consultation can play in preparing for automation.

Other speakers were: James W. Singleton, Educational Director, Board of Education, Burlington, who spoke on training; Eamon Park, Toronto, Assistant National Director of the United Steelworkers of America, who discussed the social effects of automation; and Jim McNeal Jr., President, Budd Automotive Canada Ltd., Kitchener, who explained planning for automation.

Major Tool

In his remarks, Mr. Singleton said training progress in the past 10 years had been "startling" in its success, and that there was almost complete approval of training and retraining as a major tool for a healthy, productive society.

Discussing the Federal Technical and Vocational Training Assistance Act and the programs it offered the provinces, Mr. Singleton said, "The outline and original concept of the Act and its subsequent agreements (with the provinces) is one of the most imaginative ventures on the educational scene. . . ." He warned, though, that "artificial barriers" to education and training had to be removed if Canada was to make full use of its manpower resources.

"Educational requirements are being used as job and trade selection devices throughout our society. Artificially high standards are used to 'weed out' the number of applicants. This fact is observable at all levels from the unskilled to the professional."

Key Factor

Mr. Park stated that automation is "a key factor in stimulating rapid economic growth, thus making possible higher living standards for all . . ." but, he added, "it is also true that the introduction of technological change causes great hardships . . . So far, the group in our society that has been called upon to make the greatest adjustments are the working men and women. But the problems inherent in the age of automation are national in scope, and the costs involved must be shared by all segments of society—not foisted on those least able to afford them."

He stated that all groups—labour, management and government—had to share the blame in not preparing well enough for automation, and he urged "that we immediately pursue the various programs needed to make the process of adjustment . . . as painless as possible for the people involved. . . ."

Mr. McNeal described automation as "an attitude toward production," and he noted that, although some of its applications had been "ill conceived," others had produced excellent results, not only in the type and quality of production, but also in the creation of new work areas.

"Both the federal and provincial Governments appear to have done a fine job in preparing for, and coping with, automation and its effects," he said. "Technical and Vocational Training Programs 4 and 5 have resulted in many employees acquiring new skills demanded by automation. . . . This makes sense right down the line; as the employee learns higher skills, he increases his earning power, and the company also benefits from improved operations. . . ."

Innovations

Outlining the federal Government's role, Mr. Nicholson stated that, "to remain competitive in world markets we must use every technological advance in automated equipment, processing, purchasing and marketing available to us, and we must continually encourage our manufacturers to seek quality design."

He added that "innovation, whatever its definition, does involve Government the moment it affects substantial numbers of individual Canadians through loss or change in their employment, and the moment it adversely affects whole communities or substantial segments thereof."

Mr. Nicholson described the various Government programs that are oriented to cushion and use automation—programs operated by the Labour-Management Consultation Branch and the Manpower Consultative Service, together with manpower mobility, technical and vocational training, tax incentives for manufacturers, and grants for industrial research.

Mr. DeWitt pointed out that joint consultation between labour and management did not weaken the rights of either party, but was a most sophisticated way of settling major mutual problems before they reached the grievance or strike stage. He noted that "prior consultation" between labour and management was essential for technological change to be implemented equitably.

The panel findings were mainly concerned with education and training. The consensus was that more technical teachers should be recruited from active work situations in order to keep abreast of modern techniques; that educational authorities should keep in close contact with management and unions to tailor training to actual needs; and that employees should receive advance notice of impending change so that they could be retrained.

Certification and Other Proceedings Before the Canada Labour Relations Board

By the Employee Representation Branch

The Canada Labour Relations Board met for five days during October. The Board granted 11 applications for certification, rejected five such applications, ordered four representation votes, and granted one application for revocation of certification. During the month, the Board received nine applications for certification and one application for revocation of certification.

Applications for Certification Granted

1. United Steelworkers of America, on behalf of a unit of checkers and clerks employed at Sept-Iles, by Clarke Steamship Company Limited, Montreal, Que. (L.G., Aug. 1966, p. 457).

2. Transport Drivers, Warehousemen and Helpers' Union, Local 106 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers employed by Grenier Express Inc., Shawinigan, Que. (L.G., Sept. 1966, p. 522).

3. Dawson Miners' Union, Local 564 of the International Union of Mine, Mill and Smelter Workers (Canada), on behalf of a unit of employees employed in the Clinton Creek area of the Yukon Territory by Cassiar Asbestos Corporation Limited, Clinton Creek, Y.T. (L.G., Oct. 1966, p. 589).

4. International Union of Operating Engineers, Local 115, on behalf of a unit of employees of Dawson Construction (Northern) Limited, Whitehorse, Y.T., employed in the Whitehorse area of the Y.T. (L.G., Nov. 1966, p. 657).

5. Canadian Marine Officers' Union, on behalf of a unit of marine engineers employed by Branch Lines Limited, Sorel, Que. (L.G., Nov. 1966, p. 657-58).

6. Canadian Merchant Service Guild, on behalf of a unit of marine engineers employed in the company's Tilbury Island-Victoria and Okanagan Lake barge and ferry services by the Canadian National Railways (Canadian National Barge & Ferry Service) (L.G., Nov. 1966, p. 658).

7. Canadian Merchant Service Guild, on behalf of a unit of marine engineers employed aboard the SS *Prince George* by the Canadian National Steamship Company Limited, Vancouver, B.C. (L.G., Nov. 1966, p. 658).

8. Canadian Merchant Service Guild, on behalf of a unit of marine engineers employed in the company's British Columbia Lake and River Service by the Canadian Pacific Railway Company (B.C. Lake & River Service—Okanagan Lake) (L.G., Nov. 1966, p. 658).

9. Canadian Marine Officers' Union, on behalf of a unit of marine engineers employed aboard the *Liquilassee* by Porter Shipping Ltd., Toronto, Ont. (L.G., Dec. 1966, p. 740).

10. Canadian Merchant Service Guild, on behalf of a unit of marine engineers employed by McKenzie Barge & Derrick Co. Ltd., Vancouver, B.C., aboard towboats owned and/or operated by the company (L.G., Dec. 1966, p. 741).

11. Canadian Merchant Service Guild, on behalf of a unit of marine engineers and electricians employed by Northland Shipping (1962) Co. Ltd., Vancouver, B.C. (L.G., Dec. 1966, p. 741).

Applications for Certification Rejected

1. Brotherhood of Locomotive Firemen and Enginemen, applicant, Canadian National Railways, Montreal, Que., respondent, and Brotherhood of Locomotive Engineers, intervener (L.G., Sept. 1966, p. 521). The application was rejected because it was not supported by a majority of the employees eligible to cast ballots in the representation vote conducted by the Board.

2. *Syndicat national des employés des usines des chemins de fer (CSN)*, applicant, and Canadian Pacific Railway Company, Montreal, Que., respondent (Angus Shops) (L.G., May 1966, p. 237). The following had intervened: Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; International Brotherhood of Firemen, Power Plant Operators, Oilers, Helpers, Roundhouse and Railway Shop Employees; Brotherhood of Railway Carmen of America; Division No. 4, Railway Employees' Department; Sheet Metal Workers' International Association; International Brotherhood of Boilermakers, Iron Shipbuilders, Blacksmiths, Forgers and Helpers; International Association of Machinists and Aerospace Workers; International Brotherhood of Electrical Workers; Brotherhood of Maintenance of Way Employees; International Molders' and Allied Workers' Union; United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada. The application was rejected because the proposed bargaining unit applied for by the applicant is not, in the opinion of the Board, appropriate for collective bargaining in the circumstances.

3. United Steelworkers of America, Local 6536, applicant, Cassiar Asbestos Corporation Limited, Clinton Creek, Y.T., respondent, and International Union of Mine, Mill and Smelter Workers, intervener (L.G., Dec. 1966, p. 740). The application was rejected because it was not supported by a majority of the employees affected in the representation vote conducted by the Board.

4. Canadian Merchant Service Guild, applicant, British Columbia Ferry Authority, Victoria, B.C., respondent (masters, mates, radio operators) (L.G., Aug., 1966, p. 457). The B.C. Government Employees' Association and the Attorney General of British Columbia had intervened. The application was rejected for the reason that the Board is of the opinion that the Act does not apply to the Crown in right of the province of British Columbia. (Reasons for Judgment) (See No. 5 below).

5. Canadian Merchant Service Guild, applicant, and British Columbia Ferry Authority, Victoria, B.C., respondent (marine engineers, electricians) (L.G., Aug. 1966, p. 457). The B.C. Government Employees' Association, and the Attorney General of British Columbia had intervened. The application was rejected because the Board is of the opinion that the Act does not apply to the Crown in

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the functions of the Canada Labour Relations Board, for which the Employee Representation Branch of the Department is the administrative agency.

right of the province of British Columbia (Reasons for Judgment issued) (See No. 4 above).

Representation Votes Ordered

1. Canadian Union of Public Employees, applicant, Canadian Broadcasting Corporation, respondent, International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada, intervener, American Newspaper Guild, intervener, and *Syndicat général du cinéma et de la télévision* (*CSN*), intervener (L.G., Sept. 1966, p. 552). The Board directed that the names of the Canadian Union of Public Employees and the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada appear on the ballot (Returning Officer: T. B. McRae).

2. Seafarers' International Union of Canada, applicant, and St. Maurice Dredging (1966) Ltd., Notre-Dame de Pierreville, Que., respondent (unlicensed personnel) (L.G., Nov. 1966, p. 657) (Returning Officer: R. L. Fournier).

3. Brotherhood of Locomotive Engineers, applicant, National Harbours Board, Montreal Railway Traffic Dept., Montreal, Que., respondent, and Brotherhood of Locomotive Firemen and Enginemen, intervener (L.G., Nov. 1966, p. 658). The Board ordered that the names of the applicant and the intervener appear on the ballot (Returning Officer: R. L. Fournier).

4. Transport Drivers, Warehousemen and Helpers' Union Local 106, General Truck Drivers' Union, Local 879, and General Truck Drivers' Union, Local 938 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicants, Overnite Express Limited, Hull, Que., respondent, and Canadian Transportation Workers' Union 192, N.C.C.L., intervener (L.G., Nov. 1966, p. 658). The Board ordered a new vote following a request for review and directed that only the names of the applicants would appear on the ballot (Returning Officer: A. F. Tulloch).

Application for Revocation Granted

W. A. McCulloch, *et al.*, applicants, the Cape Breton Projectionists' Union of the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada, Local Union No. 848, Sydney, Glace Bay and New Glasgow, N.S., respondent, and the Hector Broadcasting Co. Ltd., New Glasgow, N.S., respondent (L.G., Oct. 1966, p. 590). The application was for the revocation of the Board's order dated September 27, 1961, certifying the respondent union as bargaining agent for a unit of employees of the respondent company employed at Radio Station CKEC, New Glasgow, N.S. The granting of the application followed a representation vote ordered by the Board.

Applications for Certification Received

1. General Truck Drivers' Union, Local 879, Teamsters, Chauffeurs, Warehousemen and Helpers' Local Union 91, Teamsters, Chauffeurs, Warehousemen and Helpers' Local Union 141, General Truck Drivers' Union Local 938, Transport Drivers, Warehousemen and Helpers' Union Local 106, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Finch & Sons Transport Limited, Montreal, Que. (Investigating Officer: S. Emmerson).

2. International Association of Machinists and Aerospace Workers on behalf of a unit of pilots employed by Quebecair, Rimouski, Que. (Investigating Officer: R. L. Fournier).

3. Seafarers' International Union of Canada on behalf of a unit of unlicensed personnel employed by North Shore ship-

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Conciliation and Arbitration Branch. The Employee Representation Branch acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944 and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for controlling applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements—that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and Other Proceedings Before the Canada Labour Relations Board and (2) Conciliation and Other Proceedings Before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's Newfoundland. The territory of the officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; officers resident in Toronto confine their activities to Ontario; officers in Montreal are assigned to the province of Quebec; and officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Conciliation and Arbitration Branch and the Employee Representation Branch are in Ottawa.

ping Lines Ltd., Montreal, Que. (Investigating Officer: R. L. Fournier).

4. Truckers, Cartagemen, Construction and Building Material Employees' Local Union No. 362, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Shorty's Transport Ltd., Edmonton, Alta. (Investigating Officer: J. D. Meredith).

5. Truckers, Cartagemen, Construction and Building Material Employees, Local Union No. 362, General Truck Drivers and Helpers, Local 31 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Northern Industrial Carriers Ltd., Edmonton, Alta. (Investigating Officer: D. H. Cameron).

6. International Union of Operating Engineers, Local 115, on behalf of a unit of employees of Humphrey Construction Ltd., North Vancouver, B.C. (Clinton Creek, Y.T., Project) (Investigating Officer: D. H. Cameron).

7. Professional Transport Workers' Union of Canada, on behalf of a unit of employees of Veteran Transfer Ltd., Edmonton, Alta. (Investigating Officer: D. H. Cameron).

8. Vancouver Harbour Employees' Association, Local 517, International Longshoremen's and Warehousemen's Union, on behalf of a unit of employees of the National Harbours Board, Vancouver, B.C. (Investigating Officer: J. D. Meredith).

9. Vancouver Harbour Employees' Association, Local 517, International Longshoremen's and Warehousemen's Union, on behalf of a unit of security men employed by the National Harbours Board, Vancouver, B.C. (Investigating Officer: J. D. Meredith).

Applications for Revocation Received

N. Grant and S. T. Hannan, applicants, Canadian Brotherhood of Railway, Transport and General Workers, respondent, and the Canadian National Railways, Montreal, Que., respondent. The application is for the revocation of the Board's order dated June 30, 1952, as amended on June 29, 1965, in respect of a unit of employees of the Canadian National Railways, employed in the office of the Manager of Merchandise Claims, St. Lawrence Region (L.G. 1965, p. 735).

Conciliation and Other Proceedings Before the Minister of Labour

By the Conciliation and Arbitration Branch

During October, the Minister of Labour appointed Conciliation Officers to deal with the following disputes:

1. The Shipping Federation of Canada, Inc., and Locals 1039 and 1764 of the International Longshoremen's Association, Saint John, N.B. (Conciliation Officer: H. R. Pettigrove).

2. Canadian Pacific Railway Company, British Columbia Coast Steamship Service, and Vancouver CPR Shipyard Workers' Union, Local 1522, CLC (Conciliation Officer: D. S. Tysoe).

3. Canadian National Hotels Limited (MacDonald Hotel, Edmonton) and International Union of Operating Engineers, Local 857 (Conciliation Officer: J. D. Meredith).

4. McCabe Grain Company Limited, Edmonton, Alta., and Local 987 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: J. D. Meredith).

5. Quebec North Shore and Labrador Railway Company, Sept-Iles, Que., and Brotherhood of Railroad Trainmen (Conciliation Officer: C. E. Poirier).

Settlements by Conciliation Officers

1. Island Fertilizers Ltd., Charlottetown, P.E.I., and Labourers' Protective Union, No. 9568 (Conciliation Officer: H. R. Pettigrove) (L.G., Dec. 1966, p. 742).

2. Monarch Transport Ltd., Edmonton, Alta., and Retail Clerks' International Association, Local 401 (Conciliation Officer: J. D. Meredith) (L.G., Nov. 1966, p. 659).

3. Canadian Marconi Company, Montreal, and Salaried Employees' Association (Marconi) (Special Services Division, Field Service Group) (Conciliation Officer: C. E. Poirer) (L.G., Aug. 1966, p. 457).

4. Radio Trois-Rivières Inc. (CHLN) and National Association of Broadcast Employees and Technicians (Conciliation Officer: C. E. Poirier) (L.G., Aug. 1966, p. 458).

Conciliation Boards Appointed

1. Canadian Pacific Railway Company, and Brotherhood of Railroad Trainmen (Dining Car Service Employees) (no Conciliation Officer previously appointed).

2. CHAB Ltd. (CHAB-TV) Moose Jaw, Sask., and National Association of Broadcast Employees and Technicians (L.G., Dec. 1966, p. 742).

Conciliation Boards Fully Constituted

1. The Board of Conciliation and Investigation established in October to deal with a dispute between Canadian Pacific Railway Company, and Brotherhood of Railroad Trainmen (Dining Car Service Employees) (see above) was fully constituted in October with the appointment of Dr. Louis Fine of Toronto, as Chairman. Dr. Fine was appointed by the Minister in the absence of a joint recommendation from R. V. Hicks, Q.C. and Harry S. Crowe, both of Toronto, who were previously appointed on the nomination of the company and union, respectively.

2. The Board of Conciliation and Investigation established in September to deal with a dispute between *La Télévision de Québec (Canada) Ltée*, and National Association of Broadcast Employees and Technicians (L.G., Dec. 1966, p. 742) was fully constituted in October with the appointment of the Hon. E.

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the administrative services of the Minister of Labour and the Conciliation and Arbitration Branch of the Department.

Marier of Pointe Claire, Que., as Chairman. Mr. Marier was appointed by the Minister in the absence of a joint recommendation from Marcel Belanger of Quebec City and Claude Trudel of Montreal, who were previously appointed on the nomination of the company and union, respectively.

3. The Board of Conciliation and Investigation established in September to deal with a dispute between *Rod Service Ltée,* Montreal, and *Le Syndicat National des Employés de Rod Service* (*CSN*) (L.G., Dec. 1966, p. 742) was fully constituted in October with the appointment of the Hon. P. A. Badeaux of Montreal, as Chairman. Mr. Badeaux was appointed by the Minister in the absence of a joint recommendation from Marius Bergeron and Jean-Robert Gauthier, both of Montreal, nominees of the company and union, respectively.

4. The Board of Conciliation and Investigation established in September to deal with a dispute between Consolidated Aviation Fueling and Services Limited, Montreal, and Lodge 869 of the International Association of Machinists and Aerospace Workers (L.G., Dec. 1966, p. 742 was fully constituted in October with the appointment of Judge Armand Sylvestre of Montreal, as Chairman. Judge Sylvestre was appointed by the Minister in the absence of a joint recommendation from H. McD. Sparks and Raymond Boulet, both of Montreal, who were previously appointed on the nomination of the company and union, respectively.

Board Reports Received

1. Air Canada, and International Association of Machinists and Aerospace Workers, Lodges 714 and 1751 (L.G., Dec. 1966, p. 742).

2. United Press International of Canada, Ltd., and The Canadian Wire Service Guild, Local 213 of the American Newspaper Guild (L.G., Nov. 1966, p. 659).

Board Report of Settlement

Baton Broadcasting Limited, Agincourt, Ont., and National Association of Broadcast Employees and Technicians (L.G., Aug. 1966, p. 458).

Settlement After Strike Action

Dominion Auto Transit Company Limited (Windsor and Chatham terminals) and Dominion Auto Carriers Limited (Oakville terminal) and Local 880 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L.G., Dec. 1966, p. 742).

Disputes Lapsed

1. Brewster Transport Company Ltd., Banff, Alta., and Division 1374, Amalgamated Transit Union (L.G., Oct. 1966, p. 591).

2. North Canada Air Limited, Prince Albert, Sask., and Canadian Brotherhood of Railway, Transport and General Workers (L.G., Aug. 1966, p. 458).

Wage Schedules in October

During October, the Department of Labour prepared 330 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada for works of construction, remodelling, repair or demolition, and certain services. In the same period, 180 contracts in these categories were awarded. In addition, 115 contracts containing the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation, Defence Construction (1951) Limited and the Departments of Defence Production, Post Office, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned, or to others who have a *bona fide* interest in the execution of the contract.

Contracts awarded in October for the manufacture of supplies and equipment were:

Department	*No. of Contracts*	*Aggregate Amount*
Defence Production	126	$ 1,243,004.00
Post Office	33	509,493.42
Royal Canadian Mounted Police	1	3,905.00
Transport	1	3,441.02

Also in October, the sum of $10,547.85 was collected from 22 contractors for wage arrears owing their employees as a result of the failure of the contractors, or their subcontractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for distribution to the 470 workers concerned.

Insurance Registrations And Other UIC Statistics

On September 30, insurance books or contribution cards had been issued to 4,934,191 employees who had made contributions to the Unemployment Insurance Fund since April 1.

On the same date, registered employers numbered 345,598, an increase of 628 since August 31.

Enforcement Statistics

During September, 9,557 investigations were conducted by enforcement officers across Canada. Of these, 6,662 were spot checks of claims to verify the fulfilment of statutory conditions, and 1,053 were miscellaneous investigations. The remaining 1,842 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 312 cases, 102 against employers and 210 against claimants.* Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 556.*

Unemployment Insurance Fund

Revenue received by the Unemployment Insurance Fund in September totalled $34,981,469.09, compared with $36,046,963.82 in August and $32,957,-684.05 in September 1965.

Benefits paid in September totalled $12,264,891.19, compared with $11,-821,420.49 in August and $11,501,411.94 in September 1965.

The balance in the Fund on September 30 was $225,890,402.05, on August 31 it was $203,173,824.15, and on September 30, 1965 it was $102,913,044.68.

Laval University convention

The value of the strike as a means of collective action by workers to gain recognition of their demands was one of the subjects of discussion at a Convention on Quebec Affairs at Laval University last November 9, 10 and 11. Students from the University's Faculty of Law and the Industrial Relations Department invited several eminent persons to participate in the discussions.

The general conclusion that emerged from the discussions was that in North America, strike action still remains "an essential element of economic and social life." The conference suggested, however, that it be adapted to the numerous changes that have occurred over the past few years in economic and social fields.

*These do not necessarily relate to the investigations conducted during this period.

Canada Department of Labour

Legal Decisions Affecting Labour

Ontario Court of Appeal rules that, in certifying a union, the Canada Labour Relations Board acted within its jurisdiction and observed the principle of natural justice

Alberta Supreme Court upholds a certification order and rules *certiorari* not applicable

British Columbia Supreme Court refuses injunction to restrain picketing on the ground that a contractor has no status to apply for injunction

On July 7, 1966, the Ontario Court of Appeal allowed an appeal from a decision of Mr. Justice Jessup of the Ontario High Court quashing a certification order. The Court of Appeal ruled that, in certifying a union, the Canada Labour Relations Board acted within its jurisdiction and observed the rule of natural justice, which, in the case at bar, demanded that the persons to be included in the proposed bargaining unit should know that the application for certification had been made, that they should be given an opportunity to state their case if they so desired, and that the Board should act in good faith.

Summary of Facts

Before compulsory collective bargaining legislation became effective in Canada in 1944, the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees had, through voluntary negotiation, concluded agreements with the CPR in respect of the clerical staff in various station, freight and yard offices and freight sheds across Canada. After such legislation became operative, it obtained 18 certification orders covering clerical employees in general offices of the CPR and collective agreements were negotiated in each of these cases. At the time of the application for certification that led to the proceedings before the courts, the brotherhood and the CPR were parties to 40 collective agreements that brought together under a master agreement about 7,200 employees.

In June 1963, the brotherhood brought forward its comprehensive application for certification, proposing the establishment of a bargaining unit covering all clerical employees of the CPR in stations, offices and general workshops across Canada. The proposed unit would include the employees already covered by subsisting agreements (about 7,200 employees), and in addition those not previously included, who numbered around 3,200. Letters of objection to the proposed unit were sent to the Canada Labour Relations Board by some of the latter group of employees representing a total just short of 1,700 persons.

The Board's answers to these petitions constituted an invitation to the groups of railway employees who were objecting to being included in the proposed new unit, to apply to the Board to intervene. None of these persons or groups availed themselves of this invitation, although they constituted more than half of the employees being sought for inclusion in the bargaining unit. The Board sent the letters to the first person who signed the petition in each case, on the assumption that the recipient would communicate the contents to the other petitioners.

On June 7, 1965, the Board, after a hearing at which none of the petitioners were represented, certified the brotherhood as a bargaining agent for a new bargaining unit as requested, comprising approximately 10,309 employees. Of these, some 7,300 were found to be members of the brotherhood.

Order Quashed

The certification order was challenged in *certiorari* proceedings. On March 9, 1966, Mr. Justice Jessup of the Ontario High Court quashed the order on the ground that, in determining the appropriateness of a bargaining unit under Section 9(1) of the federal Industrial Relations and Disputes Investigation Act, the Board did not observe natural justice nor, in particular, the principle of *audi alteram partem*. Mr. Justice Jessup held that any employee who might be included in a determined bargaining unit was a party whose rights were affected. Accordingly, in a situation where an employee who had signed a petition objecting to a union's being his bargaining agent did not have notice of the union's application, and was not given the opportunity to be heard, the Board's certification order should be quashed (*Regina v. Canada Labour Relations Board et al., Ex parte Martin et al.* (1966) 56 D.L.R. (2nd) p. 491; 66 CLLC, para. 14,127).

The Board and the union appealed Mr. Justice Jessup's decision.

Certification Order Restored

On appeal, Mr. Justice Laskin, in his reasons for judgment, held that the case at bar could not be reviewed on *cer-*

tiorari because there was no excess, or loss or declining of jurisdiction on the part of the Canada Labour Relations Board. If the proceedings in the courts had been by way of general appeal, Mr. Justice Laskin would have been inclined to set aside the certification order because, in his view, the Board showed poor judgment in exercising its discretion under the governing statute and its governing rules. But *certiorari* proceedings are not appeals; and the fact that the Board acted unwisely by failing to instruct the employer to post copies of the application for certification in its various offices across Canada, does not mean it acted without or beyond its jurisdiction. He stated that a court should not translate into a question of jurisdiction its objections to the manner in which the Board has exercised the powers granted by the Legislature.

Regarding the issue of natural justice that the Board was bound to observe even though it was given by the statute a very wide discretion in the exercise of its powers, the Court of Appeal held that in the case at bar the requirements of natural justice demanded that the persons concerned should know of the application that was being made to include them in a bargaining unit; that they should be given an opportunity to state their case if they so desired; and that the Board should act in good faith.

The court held that, under the rules of procedure of the Board, the petitioners were not entitled as of right to previous notice. It was obvious, however, from the form of the petitions they sent to the Board, that they were acquainted with the purpose of the application for certification. Furthermore, if the petitioners had availed themselves of the Board's invitation to intervene, they would formally have become interested parties to the application, and as such entitled to official notice thereof. Thus, the petitioners had ample opportunity to assert a claim to participate in the certification proceedings. But they failed to do so; and therefore the alleged violation of natural justice by the Board could not be accepted.

The Court of Appeal set aside the decision of Mr. Justice Jessup and restored the Board's certification order.

Regina ex rel. L.R.B. (Can.) et al. v. Martin et al. and Canadian Pacific Railway Company, 66 CLLC, para. 14,144.

ALBERTA

On June 8, 1966, Mr. Justice Dechene of the Alberta Supreme Court dismissed an application for *certiorari* and upheld a certification order issued by the Alberta Board of Industrial Relations on the ground that, although the decision of the Board was based on an erroneous interpretation of the union's constitution, such an error was not a case involving error of law on the face of the record, or any excess or want of jurisdiction that would justify quashing the certification order on *certiorari.*

Certification Order

On August 10, 1965, the Alberta Board of Industrial Relations certified the Sheet Metal Auto Body, Motor Mechanics and Allied Production Workers, Local 414, Edmonton, as the bargaining agent of a unit of employees of Stedelbauer Chevrolet Oldsmobile Ltd., consisting of "all the employees of the company, with the exception of office workers, salesmen and supervisory personnel."

Certiorari to Quash

The company applied for an order of *certiorari* to quash the decision of the Board on the following grounds:

—failure to inquire properly into the question of whether the union was in fact a proper bargaining agent, having regard to the constitution and bylaws of the union;

—failure to determine whether or not the employees of the company, for whom application for certification was made, were entitled under the constition and bylaws of the union to be members;

—grant of certification was made without requiring a vote of the employees, when the evidence disclosed that the employees had paid an initiation fee of only $1, when in fact the union constitution called for an initiation fee of a greater amount of money; and that no proper dispensation was obtained from the international constitution; and

—grant of certification was made to the Sheet Metal Auto Body, Motor Mechanics and Allied Production Workers, when in fact an application for certification was made by the Sheet Metal Workers' International Association, Local 414, and when there was no evidence before the Board that the said Sheet Metal Workers' International Association, Local 414, had changed its name.

Mr. Justice Dechene noted in his reasons for judgment that the company's argument rested mainly on the following points: The union had no jurisdiction to accept the company's employees among its members because:

—they were all employed as mechanics and not as body repair men;

—the employees did not pay the dues required by the constitution of the union;

—all the employees were paid on a "flat rate or piece work" system; and

—the name of the union had been changed.

Regarding the issue of whether the certified union was in fact a proper bargaining agent, and whether it could accept the company's employees among its members, having regard to the constitution and by-laws of the union, a reference was made to the power of the general president of the Sheet Metal Workers' International Association as defined in Art. 3, Section 1 of the union constitution which reads, in part, as follows:

> The General President shall preside at all meetings and conventions of this Association and at meetings of the General Executive Council. He shall preserve order, and in all cases where the vote is equally divided in a convention or meeting of the General Executive Council, he shall cast the deciding vote. He shall enforce all laws of the Association, decide all questions of order and usage, interpret and decide all points of law and controversies, and decide all constitutional questions.

Art. 3, Section 2(g) of the constitution reads, in part, as follows:

> The General President shall have full authority to specify, designate or change the specific territory and classes of work over which each local union or district council shall exercise jurisdiction, to organize and charter additional local unions or district councils in accordance with this constitution, and to determine the specific territory and classes of work over which newly chartered locals or district councils shall have jurisdiction.

The general president of the Sheet Metal Workers' International Association wrote on January 29, 1965, the following letter to Raymond A. Gall, international organizer at Edmonton:

> Please be advised that you have my permission under Article 10, Section 2(e) of the International Association's constitution to organize auto body workers, motor mechanics and other allied production workers in the Province of Alberta, and that all such persons are eligible for membership upon application and the payment of the initiation fee which, pursuant to the said section, is hereby set at $1.

Board in Error

In the opinion of Mr. Justice Dechene the Board's decision was wrong. The

general president's authority to "interpret and decide all points of law and controversies and decide all constitutional questions" (Art. 3, Section 1 of the union's constitution above cited) could not reasonably be wide enough to include an altogether different class of workers than that which was originally covered by the constitution. Moreover, on the evidence, the company in the case at bar did not have a single employee who could be classified within the terms of the union's written constitution.

In the opinion of Mr. Justice Dechene, if the court proceedings were in the nature of an appeal, the court would find in favour of the applicant because the Board had erred in its determination. But the application at bar was by way of *certiorari* and to succeed on *certiorari* the company needed to show either lack of jurisdiction, breach of natural justice, or an error on the face of the record.

Reviewability on Certiorari

Mr. Justice Dechene noted that the Board had been entrusted by the Act with jurisdiction that included the jurisdiction to determine the existence of a fact that was "a condition precedent to the exercise of jurisdiction." The fact to be decided in the case at bar was that "the applicant union had as members a majority of employees." In *International Brotherhood of Elec. Workers Local 213 and Labour Relations Board (B.C.)* (L.G. 1955, p. 83) and in *re Bakery & Confectionary Workers International Union of Amer. Local 468* (L.G. 1950, p. 703) Mr. Justice Whittaker, in applying the B.C. Act, took the position that a court should not interfere with a board's statutory duty to make findings of fact, even when it disagrees with those facts that thereafter become the basis for the board's jurisdiction. The British Columbia legislation applied in these two cases, provided that certification of a trade union could be granted under two methods:

—by satisfying the board that the trade union applying for certification had, as members in good standing, a majority of the employees in the unit; or
—if in doubt on that question, a vote of the employees might be ordered.

In the case at bar, there was a third ground of certification, under Section 63 of the Alberta Labour Act, that enabled a majority of the employees in a unit to select a bargaining agent. These employees must be members in good standing according to the constitution and bylaws of the applicant, or they must have applied for membership and paid the initiation fee not longer than three months before the application was made. The record, in the case at bar, showed that application for membership, and presumably payment of the fee, took place one week before the application to the Board.

Another ground for the application to quash the decision of the Board rested on the allegation that the employees did not pay the dues required by the constitution. They paid an initiation fee of $1, pursuant to the general president's letter of January 29, 1965. The union constitution provides a fee of $15 during the first 90 days after the issue of a charter, and $25 thereafter; but it also provides by Art. 10, Sec. 2(e) that the general president may, in peculiar conditions, authorize a lesser amount "for a specified purpose and for a specified period of time." Mr. Justice Dechene noted that no purpose or time were specified, and that he would not have accepted such a letter. However, the Board was obviously "satisfied" within the meaning of the Act, and therefore the court could not interfere.

Another ground for the application for *certiorari* was based on the fact that all the employees were paid "on a flat rate or piece work" system.

Art. 16, Sec. 1(c) of the international constitution stated, as follows:

> " . . . and no person compensated on a lump sum, piece work or other basis, which is not in accordance with the wage scales and working conditions established by this association and the local unions and councils affiliated therewith, shall be eligible to make application for membership or be accepted or continued as a member of this Association . . ."

This provision presupposes an existing union with wage scales and working conditions previously negotiated. The union's position was that those were precisely the reasons why the union was being organized, and both the Board and Mr. Justice Dechene found this answer acceptable.

Finally, the company's argument dealt with a change in the name of the local unit, from the time of the grant of the charter. On March 10, 1965, the general secretary-treasurer wrote to the international organizer in Edmonton, giving official notification that the appropriate name of the newly chartered local union was "Sheet Metal Auto Body, Motor Mechanics and Allied Production Workers, Local No. 414." Yet, the application for certification on June 21, 1965, was made on behalf of "Sheet Metal Workers' International Association, Local 414."

The Board's file and the correspondence used both names at various times. The order of certification dated August 10, 1965, used the name prescribed by the general secretary-treasurer. In the opinion of Mr. Justice Dechene, the inclusion in the name of the words "Auto Body, Motor Mechanics" was not authorized by the union constitution and gave a wrong impression. Yet, in his view, the Board had been "satisfied," and unless conditions could be shown that justified a writ of *certiorari,* the court was powerless to interfere.

Certiorari not Applicable

Mr. Justice Dechene stated that *certiorari* was available to correct errors of law on the face of the records. In the case at bar, if the Board erred, such errors were mistakes of fact, consequently *certiorari* was not available.

Mr. Justice Dechene dismissed the application for *certiorari* and upheld the certification order.

Re Alberta Act, Stedelbauer Chevrolet Oldsmobile Ltd. v. Board of Industrial Relations of Alberta and Sheet Metal Auto Body, Motor Mechanics and Allied Production Workers, Local No. 414, (1966) 56 WWR, Part 12, p. 747; 66 CLLC, para. 14,140.

BRITISH COLUMBIA

On June 2, 1966, Mr. Justice Kirke Smith of the British Columbia Supreme Court dismissed a motion for an interim injunction to restrain peaceful picketing by school employees in support of a legal strike, on the ground that the plaintiff, who was a contractor employed by a School Board to extend and modify premises owned by the Board, had no status to apply for an injunction, since he had no proprietary interest in the land and premises in question.

Summary of Facts

Local 389 of the Canadian Union of Public Employees was on strike against the Corporation of the City and District of North Vancouver, the North Shore Union Board of Health, and the Board of School Trustees, School District 44 (North Vancouver). The strike was legal and the picketing was conducted in a peaceful and orderly manner.

The School Board employed a contractor to extend and modify premises owned by the Board and occupied by a school. There was only one access road to the existing school buildings and the additions under construction. Some school employees picketed the entrance to this access road with the result, unintended, that the members of the Carpenters' Union employed by the con-

tractor and members of other unions employed by subcontractors, refused to report for work.

Motion for Injunction

The contractor brought a motion for an interim injunction to restrain the picketing. The plaintiff contended that, although the strike might have been legal, the picketing was illegal as contravening the provisions of Section 3(2)(c) of the B.C. Trade-unions Act. He pointed out the difference in wording between Section 3(1)(c) permitting a legally striking union to picket to persuade anyone not to do business with "the employer," and Section 3(2)(c) forbidding persuasion directed towards the doing of business with "any person." The plaintiff claimed to be such a person. Because the picketing had resulted in his employees and sub-trades not doing, or refusing to do, business with him, it was therefore illegal.

Status Lacking

In the opinion of Mr. Justice Kirke Smith, the contractor had no status to apply for an injunction, as he had no proprietary interest in the land and premises in question. These were all owned by, and under the control of the School Board. The plaintiff's right as a contractor to go on the land gave him no interest that would enable him to say that his business, as that word is used in the Trade-unions Act, was affected. Whatever damage there was flowed, not from any intentional or tortious act by the union, but because the contractor happened to be doing work on the premises and property of an employer whose striking employees had a perfect right by statute to peacefully picket in the location chosen by them. Such coincidental and unintentional damage did not warrant the Court's interference by injunction in the right to strike and the collateral right to picket peacefully, as those rights are defined by statute.

Motion for Injunction Dismissed

The motion for injunction was dismissed. *Gadicke Construction Co. Ltd. v. Canadian Union of Public Employees, Local 398 et al.* (1966) 56 WWR, Part 11, p. 701; 66 CLLC, para. 14,142.

Recent Regulations under Provincial Legislation

Quebec raises general minimum wage rates

British Columbia issues new certification rules for five trades

Ontario Labour Relations Board reviews its Rules of Procedure

In Quebec, amendments to the general minimum wage order raised the minimum wage to $1 an hour in Metropolitan Montreal, and to 90 cents elsewhere in the province, effective November 1, 1966, with provision for further increases on April 1, 1967.

In British Columbia, new regulations were issued under the Apprenticeship and Tradesmen's Qualification Act respecting certificates of proficiency in the millwright, domestic radio and television servicing, plumbing, steam fitting and pipe fitting, and sprinkler fitting trades.

New regulations under the Manitoba Workmen's Compensation Act make full-time fire-fighters eligible for compensation if they suffer a heart attack or a lung injury in the course of their duties.

New Rules of Procedure were issued by the Ontario Labour Relations Board.

Alberta issued new apprenticeship regulations for tile setters.

ALBERTA

Apprenticeship Act

The Alberta Provincial Apprenticeship Board has issued special regulations for apprentices in the trade of tile setter. Previously, apprentices in this trade were subject to the same rules as apprentices in the trades of bricklayer, mason and terrazzo worker, but in 1964, it was listed as a separate trade when the schedule of designated trades was revised.

The minimum age for apprentices is 16, but no upper age limit is set. Previously, preference was given to persons under 24 years of age.

The minimum educational requirement is Grade 9, or its equivalent, instead of Grade 8, but a person with less education may be accepted if he is recommended by a local advisory committee and passes the prescribed examination.

The term of apprenticeship comprises four periods of 12 months each. Each period consists of at least 1,800 hours of employment, including time spent attending prescribed technical courses.

The ratio of apprentices to journeyman remains one to three.

The minimum starting rate for apprentice tile setters is now 55 per cent of the prevailing journeyman's rate. This must be increased to 65 per cent during the second period, to 75 per cent the third, and to 85 per cent in the fourth period of the apprenticeship.

Gas Protection Act

The latest edition of the Canadian Standards Association's Code for gas burning appliances (B. 149-1966) was adopted, with a few changes, as regulations under the Alberta Gas Protection Act, instead of the earlier edition previously used.

The new provisions were gazetted on August 15 as Alta. Reg 259/66 and 260/66 and went into force September 1.

BRITISH COLUMBIA

Apprenticeship and Tradesmen's Qualification Act

In British Columbia, new regulations have been issued under the Apprenticeship and Tradesmen's Qualification Act respecting certificates of proficiency in the millwright, domestic radio and television servicing, plumbing, steam fitting and pipe fitting, and sprinkler fitting trades.

To qualify for a certificate of proficiency in any of the five trades referred to above, an applicant must submit proof of having completed a period of qualifying time of at least 8,000 hours and must pass the prescribed examination. Until February 28, 1967, however, a person currently employed in the lumber industry, who is paid as a journeyman millwright, may apply for examination even though he does not have the required experience.

Holders of certificates of apprenticeship issued by the Province of British Columbia or any province participating in the Federal-Provincial Apprenticeship Agreement may, upon payment of the prescribed fee, be issued a certificate of proficiency in any of these trades without examination.

Commencing January 9, 1967, certificates of proficiency will be compulsory in certain parts of the province for tradesmen in four trades—domestic radio and television servicing, plumbing, sprinkler fitting, and steam fitting and pipe fitting. The only exceptions will be registered apprentices, persons employed during a probationary period, and persons employed under special permits from the Minister or the Director of Apprenticeship.

Certificates of proficiency will be compulsory in the domestic radio and television servicing trade in specified areas of Vancouver Island including Nanaimo, Esquimalt and Victoria. In the plumbing, sprinkler fitting, and steam fitting and pipe fitting trades, the new requirement will apply on Vancouver Island and in specified parts of the Lower Mainland area, including Vancouver.

The regulations were gazetted on October 13 as B.C. Reg. 197/66 to 201/66. Previous regulations for the radio, television and electronics trade were rescinded.

Factories Act

Regulations respecting elevating devices, the first to be issued under the revised Factories Act passed at the last session of the British Columbia Legislature, were gazetted on October 13 as B.C. Reg. 206/66 and went into force on January 1, 1967.

The latest edition of the Canadian Standard's Association Code for Elevators, Dumb Waiters and Escalators (B44-1966) has been adopted as regulations under the Act and made applicable to all elevating devices, effective January 1, 1967.

The regulations also set out requirements for certain elevating devices, including the submission of drawings and specifications of new installations or major alterations, specifications of inspections and tests to be carried out by departmental inspectors and by owners, and the licensing of elevating devices. There are also special provisions governing belt lifts.

Any manually-operated passenger elevator must be in charge of a licensed operator. A person applying for an elevator operator's licence must be at least 18 years of age.

MANITOBA

Workmen's Compensation Act

New regulations issued by the Manitoba Workmen's Compensation Board make full-time fire-fighters eligible for compensation if they suffer a heart attack or a lung injury in the course of their employment.

If the following conditions are met, a heart attack suffered by a full-time municipal fire-fighter while actually engaged in the fighting of a fire or in prescribed training involving substantial physical, mental or nervous strain, is now to be deemed to have been suffered in the course of his employment, unless the contrary is proved:

(a) the fire-fighter had been in continuous service as a member of the department during the preceding two years; and

(b) at the time of entering the service, he had undergone a physical examination, including an examination of the circulatory system, and had been approved for service as a fire-fighter.

A fire-fighter is not disqualified for benefit under this regulation by reason of having suffered a previous heart attack, whether compensable or not, if he was thereafter medically certified to be fit for service.

A fire-fighter who becomes disabled by reason of lung injury is, unless the contrary is proved, deemed to have incurred the disability in the course of his employment, if the type of lung injury is generally accepted in medical opinion as resulting from the inhalation of smoke, gases or fumes, or any two or more of these causes.

Disability due to inhalation of carbon monoxide is deemed to have been incurred in the course of employment, only if a medical ruling of disability due to carbon monoxide poisoning is made within 48 hours of exposure.

The new regulation was gazetted as Man. Reg. 98/66 on October 15.

ONTARIO

Labour Relations Act

New Rules of Procedure made by the Ontario Labour Relations Board were gazetted as O. Reg. 264/66 on September 10 and went into force on September 1, the same day as Sections 1 to 36 and 38 and 40 of the Labour Relations Amendment Act, 1966.

Some of the changes in the Rules of Procedure resulted from 1966 amendments to the Act such as those providing for the certification of a council of trade unions and empowering the Labour Relations Board to deal directly with jurisdictional disputes.

One new rule provides that, if a council of trade unions applies for certification, it must, at the same time, file the documents upon which it intends to rely to satisfy the Board that each of its constituent unions has vested appropriate authority in the council to enable it to discharge the responsibilities of a bargaining agent.

Under the new procedures with respect to jurisdictional disputes, a complainant or any person served with a notice of application must file the following with his reply:

(a) any union constitution;

(b) any collective agreement;

(c) any agreement or understanding between trade unions as to their respective jurisdictions on work assignment;

(d) any agreement or understanding between a trade union and an employer as to work assignment; and

(e) any decision of any tribunal respecting work assignment.

In addition, such a person must file any other document relating to the work in dispute upon which he proposes to rely to support his case, as well as a

statement as to any area or trade practic relating to the work in dispute, and pictures, diagrams or drawings of the disputed work.

If a strike is imminent or is already taking place because of a disagreement over work assignment, a request to the Board for an interim order respecting work assignment or for cease and desist directions may be made by telegram.

As before, there are special rules for the construction industry.

QUEBEC

Minimum Wage Act

General minimum wage order (No. 4, 1965) has been amended, increasing minimum rates by 10 and 15 cents an hour effective November 1, with provision for further increases on April 1, 1967.

The general minimum is now $1 an hour in Zone I, which comprises Metropolitan Montreal (The Island of Montreal, Île Jésus, Île Bizard and the Chambly and Taillon electoral districts). In Zone II, which takes in the rest of the province, the minimum wage is now 90 cents an hour.

On April 1, 1967, the general minimum will be increased to the levels recommended by the Minimum Wage Commission in October 1965 when rates were last revised, that is, to $1.05 an hour in Zone I and to $1 an hour in Zone II.

Lower minimums are again payable for a period of 60 working days to persons on probation. The new rates for probationers are 85 cents an hour in Zone I, and 80 cents in Zone II. These rates are to be increased by 10 cents on April 1, 1967.

Minimums for employees under 18 years of age have been increased by 10 cents an hour to 75 cents an hour in Zone I, and to 70 cents in Zone II. On April 1, 1967, these rates will be increased to 85 cents and 80 cents, respectively.

Weekly minimums are again set for watchmen provided with free lodgings. Rates for these employees have been increased by $5 to $50 a week in Zone I, and $45 in Zone II, with provisions for for further $5-increases next April.

The amending order was approved by O.C. 1848 on October 19 and was gazetted October 29.

Women's Engineering Society plans conference in Britain

Women scientists from five continents are planning to convene in Cambridge, England, July 1 to 9, 1967, for the Second International Conference of Women Engineers and Scientists, sponsored by the Women's Engineering Society, London. The first conference was held under sponsorship of the Society of Women Engineers (U.S.) in New York in 1964.

Supporting the sponsors will be professional associations of women engineers and scientists from France, Japan, the Philippines and the United States.

Technical sessions, of which 10 are scheduled, on the theme, "Enough for Everyone—The Application of Technology to World Food Problems," will include papers by representatives from Britain, Brazil, Ghana, Hong Kong, Iran, Japan, Nigeria, the Philippines, U.S.A., U.S.S.R., India, Italy, France, Scotland and Canada.

"The Woman Professional Engineer" is on the agenda for discussion in the course of the sociological sessions, which will be opened by Mrs. J. R. Webb of the U.S.A., who is collecting world-wide statistics on women in engineering.

Technical Note to "E" Tables

Under the Unemployment Insurance Act, contact between the claimant and the Unemployment Insurance Commission is achieved by means of a network of local offices. Tables E-2 to E-4 relate to local office operations, though Table E-3 includes data on regional office processing.

Upon separation from employment, a person wishing to file a claim for benefit applies either in person or by mail to the nearest local office of the Commission. An application for employment is completed—again, either in person or by mail—for a Canada Manpower Centre and, if a suitable vacancy exists, a referral is made. If suitable employment is not available, a claim for Unemployment Insurance benefit is filed with the local office. The claim will be either an "initial" or a "renewal" depending upon whether or not it is necessary to compute benefit rights. On an initial claim, the claimant's benefit entitlement is calculated, and this will be available for compensation of spells of proved unemployment during a period of one year,* unless used up prior to that time. When a claimant misses two successive scheduled reporting dates and subsequently files a claim, a renewal claim will serve to re-activate the claim, provided that there is still benefit available.

The total of initial and renewal claims (Table E-3) thus approximates the number of recorded separations from employment during a month. However, to the extent that an initial claim is taken from a person who has just exhausted benefit and seeks re-establishment of credits, the total would constitute an overstatement of the new cases of recorded unemployment. Claims in the category "entitled to benefit" include initial claims on which the contribution requirements were fulfilled and no disqualification was imposed, and renewal claims allowed, with no disqualification. Claims "not entitled to benefit" consist of failures on initial claims due to insufficient contributions, and in addition, disqualifications imposed on either initial or renewal claims. Claims not completely processed at the end of the month are shown as "pending."

Claimants are required to report every two weeks either by mail or directly to the nearest local office. Information on the number of claimants currently reporting to local offices is obtained by a count of individual unemployment registers in the currently active file at the month-end (Table E-2). Once a claim is taken, the document on which the record of activity is maintained (the unemployment register) is placed in the active file, and it becomes dormant only after the scheduled reporting pattern has been broken twice in succession or the claimant finds work. The count of weeks on claim represents the number of weeks of proved unemployment since the most recent separation from employment. When a new employment register is prepared, because the previous claim has terminated and a new entitlement has been computed, the number of weeks is calculated from the date of actual separation from employment. Information on the number of weeks on claim is based on examination of a 20-per-cent sample of unemployment registers.

Payment data are provided by Treasury Offices of the Unemployment Insurance Commission and relate to transactions during a month. In some cases, the compensated unemployment would have occurred in a prior month. Data cover partial as well as complete weeks.

Estimates of the insured population (Table E-1) are based on an estimate of persons either working in insured employment or on claim at June 1 each year. Monthly estimates of insured employment are projected from the June 1 figure, using employment indexes, for individual industry divisions as published in "Employment and Average Weekly Wages and Salaries" (Employment Section, Labour Division, DBS). The number of claimants recorded at the month-end, as described above, is added to provide the total estimate.

*When the "Training Allowance Act—1966" becomes operative, the benefit period may be as long as three years.

By Unemployment Insurance and Pensions Section
Labour Division, Dominion Bureau of Statistics

Month-end Claimants up 5 Per Cent From Total a Year Ago

Approximately 165,000 claimants reported to local offices at the end of September, a 5-per-cent increase from the 157,000 reporting at the same time last year, but almost 12 per cent, or 22,000, less than at the end of August.

Males, who over the past five years averaged about 60 per cent of September month-end claimants, accounted for more than 80 per cent of the month-to-month decline. Compared with a year ago, the percentage of males among month-end claimants was unchanged; and as this suggests, males and females contributed proportionally to the increase.

Approximately 116,000, or 70 per cent of all claimants were on claim for 13 weeks or less, but of these, slightly more than 60 per cent were on claim for a month or less. Women accounted for half of all persons on claim for 14 weeks or more, but less than 40 per cent of those on claim for less than 14 weeks.

Three quarters of the year-to-year increase occurred in British Columbia, with virtually all the change in that province taking place among males. An increased number of claimants were recorded in all provinces except Nova Scotia and the Prairie Provinces.

The following table presents in summary form, data concerning the more important elements arising from the operation of the Unemployment Insurance Act.

Summary Table

Activity	*Sept.*	*Aug.*	*Sept.*	*Cumulative Data 1966*	
	1966	*1966*	*1965*	*Jan. to Sept.*	*12 months ending Sept.*
			(000's)		
Insured population as at month-end	—	4,536	4,287	—	—
Initial and renewal claims filed:					
Total	73	84	72	1,057	1,554
Initial	52	63	48	801	1,174
Renewal	21	21	24	256	380
Claimants currently reporting at local offices	165	187	157	322*	311*
Beneficiaries (weekly average)	122	114	116	269*	239*
Weeks compensated	513	501	488	10,029	11,857
Benefit paid	$12,265	11,821	11,501	246,252	290,273
Average weekly benefits	$ 23.93	23.60	23.55	25.81	24.48

* Monthly average.

Beneficiaries and Benefit Payments

It is estimated that, each week during the month of September, about 122,000 beneficiaries were receiving an average of $23.93 each week, or a total of $12.3 million during the month. Last year, there were 116,300 beneficiaries to whom a total of $11.5 million was paid, or an average weekly payment of $23.55. Comparable data for last month show 113,800 beneficiaries receiving $11.8 million, or an average weekly payment of $23.60.

Initial and Renewal Claims

Initial and renewal claims filed in local offices across Canada during September numbered 73,000, virtually unchanged from the same period a year ago, but representing a decline of more than 10,000, or 13 per cent, from August 1966. Almost 95 per cent of the cases were on behalf of persons separating from employment during the month; the balance was from persons whose benefit rights terminated and who were seeking re-establishment of credits. This is identical with conditions at this same time last year, when 95 per cent of the claims emanated from new cases of unemployment.

A claimant's unemployment register is placed in the "live file" at the local office as soon as the claim is made. As a result, the count of claimants at any given time inevitably includes some whose claims are in process. "Claimants" should not be interpreted either as "total number of beneficiaries" or "total job applicants."

Decisions of the Umpire

Under the Unemployment Insurance Act

CUB 2587

The claimant filed a renewal claim for benefit effective the week of December 27, 1964. Benefit was paid for the weeks commencing December 27, 1964, and January 3, 1965. The claimant returned to work January 14, 1965.

Subsequently, a nominal roll from the employer showed that the claimant had received statutory holiday pay for New Year's Day, January 1, 1965, in the amount of $58.07. The claimant had reported no earnings for the week commencing December 27, 1964.

On August 23, 1965, in response to a local office request for his explanation of the reported earnings which he had failed to declare, the claimant said:

> Due to snow, was out of work from December 19th to January 14th and did not know when I would return to work. Had I not worked thirty days after "Statutory" Holiday, I would not have received pay, so how could I have claimed I received payment ahead of time, if I hadn't. And furthermore, no camp cheque is received until the following two weeks after work resumes.

On August 30, 1965, the insurance officer notified the claimant that his earnings for the week commencing December 27, 1964, were $58.07 (Statutory Holiday Pay).

On September 3, 1965, the claimant's union appealed this disqualification to the board of referees on the grounds that the claims officer had erred in respect to the interpretation of Regulations 172(2)(g), 173(7), 156(1)(2) . . .

The board's conclusion was that, because New Year's Day could not be considered other than as a statutory holiday, the earnings had been properly determined and allocated.

The decision of the insurance officer was sustained and the appeal dismissed, unanimously. On December 8, 1965, the Union appealed to the Umpire on the following grounds:

> . . . In the initial decision the claims officer relied on CUB 2390 (L.G. 1964, p. 1011) for precedent and in this decision we contend the original error respecting the disposition of the claim was committed.

CUB 2390 deals with a claimant who "while on claim" received one week's annual vacation pay, plus two days pay for statutory holidays which fell during the week for which the claimant received annual vacation pay.

The claims officer in this case was required to determine whether or not Regulation 173(6) applied in respect to vacation pay and pay for statutory holidays falling in that week for the purpose of determining "usual normal earning" as referred to in the said Regulation 173(6).

The claims officer so decided and allocated two days pay to the week commencing December 29, 1963, for purposes of determining earnings of the claimant in the benefit week commencing December 29, 1963.

The facts of the case as outlined in CUB 2390 clearly indicate that the Union agreement, covering the claimant in question, contains certain unique provisions in accumulating combinations.

These provisions may be outlined as follows:

> (a) An employee, while actively employed, may declare a vacation period and subsequently if he is at the time of the vacation period on laid-off status he is considered to be on vacation and eligible to receive vacation pay from his former employer for the declared vacation period.
>
> (b) A laid-off employee receiving vacation pay under the terms above is eligible to receive additional pay for statutory holidays which fall during a vacation period for which he is being paid while actually laid off.

CUB 2390 indicates also that the claimant in question did receive pay for the declared vacation period and for the two statutory holidays while he was actually on claim as a recipient of unemployment insurance benefits.

The decision of the claims officer was ultimately appealed to the Umpire and upheld by the Umpire. The decision of the Umpire clearly deals with the interpretation to be placed on Regulation 173(6).

We submit that in the [claimant's] case, Regulation 173(6) has no bearing and therefore the claims officer erred, relying on CUB 2390, and in so doing he likewise erred in his decision to deny unemployment insurance benefits to [the claimant] for the week commencing December 27, 1964. . . .

We submitted to the board of referees as we now submit that the decision in respect to entitlement to benefits by the claimant rests in the relative interpretation of Regulation 173(7) and Regulation 173(3). We contend that Regulation 173(3) is the applicable section and not 173(7). There appears to be a conflict of intent between Regulation 173(3) and 173(7) but only until the circumstances in respect to a claim are examined. . . .

Article IX statutory holidays of the current master agreement 1964-1965 . . . embodies two principles in respect to pay for a statutory holiday and by so doing establishes pay for a statutory holiday as such. This principle is to be found in Article IX, section 3(a)(ii) which provides that under circumstances where an employee is not employed by reason of the statutory holiday, and where he works his last regularly scheduled work day before and his first regularly [scheduled] work day after the holiday, then he is paid for the holiday. Regulation 173(7) covers such a situation as well as a situation where an employee receives pay for the statutory holiday by reason simply of being paid for such a day whether laid off or terminated prior to the statutory holiday in question. . . . If our reasoning is logical, then the claimant should not be disqualified by reason of Regulation 173(7).

Article IX, section 3(a)(iii) of the aforementioned master agreement qualifies pay for a statutory holiday to the degree that it becomes monies owing to an employee, who has been laid off, as consideration of his returning to employment with a specific employer (the employer who laid him off). This is further qualified to the

extent that the laid-off employee must return to such employment within 60 calendar days of the day on which he was laid off.

In the actual application of Article IX of the master agreement, an employee who meets the terms of Article IX, section 3(a)(i) and who is laid off prior to a statutory holiday, even though he has worked his last regularly scheduled work day before the statutory holiday, is not entitled to pay for the holiday, nor is he able to declare as a claimant for unemployment insurance benefits that he will become entitled.

The status of an employee under these circumstances (as is the case with the claimant) then changes. We submit that a claimant under these circumstances then comes within the scope of Regulation 173(3) in that he is the possible recipient of wages by reason of returning to work when called by his former employer, and [provided] that he reports for work on the first regularly scheduled work day that he is called to work, and [provided] further that this first regularly scheduled work day [on] which he is called to work falls within 60 calendar days of [the] last regularly scheduled work day that he worked prior to being laid off. . . .

Regulation 173(3) states that wages or salary earned in respect of the performance of services shall be allocated to the period for which earned. We submit that the claimant was required to perform a service, this being the commencing of work when called by his employer.

Regulation 173(3) continues further, and in the case of monies paid in consideration of a claimant's returning to or commencing work with a specific employer, they shall be allocated to the period for which payable.

We submit that the claimant meets these requirements of Regulation 173(3) in that he was required to return to and commence work for a specific employer, and that only by so doing did he become entitled to the monies which he received.

The question then develops as to what is the "period for which [benefit is] payable." We submit that the Regulation is met by the definition from Webster's New International Dictionary (second edition) which defines "payable" as "that may be discharged or settled by delivery of value."

We submit that the claimant met the requirements of Regulation 173(3) when he returned to work on Wednesday, (*sic*) January 14, 1965, and that the moneys accruing to him in the form of wages should be allocated to that period in which he delivered his services to his employer and by so doing met the terms of the master agreement.

We submit that the moneys accruing to the claimant as the result of meeting the terms of the said master agreement can not properly be allocated to a period prior to the date on which the claimant fulfilled the final terms of the master agreement viz.: returning to and commencing work January 14, 1965. . . .

In view of the foregoing, we submit that the decision of the board of referees dated November 3, 1965, should be set aside, and further that the claimant be declared to be entitled to receive unemployment insurance benefits for the week of December 27, 1964, the same being a week in which he did not receive and for which he did not receive wages or other moneys as an employee of the [company].

We, therefore, request that the appeal of the claimant be upheld.

On January 11, 1966, the insurance officer submitted the following observations:

1. The only point at issue in this case is the allocation of the earnings received by the claimant in respect of the statutory holiday occurring on January 1, 1965.

2. The union's appeal is based on the argument that because the payment of $58.07 was conditional upon the claimant returning to work with his former employer within a certain specified time, which condition he subsequently fulfilled, these earnings should be allocated to the week in which the claimant returned to work (week commencing January 10, 1965). The union contends that this allocation could be properly made under the provision of Regulation 173(3). This Regulation, however, provides that in the case of moneys paid in consideration of a claimant's returning to or commencing work with a specific employer, they shall be allocated to the period for which payable. It is submitted that in the present case the period for which the sum of $58.07 is payable is the week in which January 1, 1965 falls (week commencing December 27, 1964). . . .

3. It is further submitted that the insurance officer in allocating the earnings to the week commencing December 27, 1964 correctly applied Regulation 173(7) as that Regulation specifically deals with pay for a holiday observed as such by law, custom or agreement.

4. The board of referees upheld the insurance officer's determination and allocation of earnings in respect of the claimant's holiday pay, and it is submitted that its uanimous decision should be maintained.

5. It is respectfully submitted that the Umpire's decision in this case also [applies] to the case of [a man] whose circumstances are similar, with the exception that, as his claim was filed prior to Christmas Day, earnings for that day were applicable as well as for New Year's Day.

Considerations and Conclusions

Article IX(3)(a) of the master agreement referred to by the Union merely says that the claimant must retain his status as an employee after, as well as before, the statutory holiday if he is to be paid for the holiday. It does not convert the pay into a consideration for his returning to work.

Whether or not the receipt of pay for a statutory holiday is conditional on the employee's returning to work with a specific employer, once the pay is received by the employee, it becomes "pay for a holiday or non-working day observed as such by law, custom or agreement" within the meaning of Regulation 173(7) and, pursuant to that Regulation, is to be allocated to "that day"—in this case, to January 1, 1965.

As a consequence, I decide to disallow the Union's appeal.

CUB 2605

The claimant filed an initial application for benefit . . . on December 15, 1965, and gave the following reason for separation:

> I quit my job voluntarily because of dissension in the plant, and also because of union dispute; whereas I am not a member of the Union, I felt I could not do my best for the company or myself by staying there. I felt management was expecting too much of me to go through picket lines and remain at work under these conditions. Whereas I am not trained for foreman, I held down a foreman's position and also work required of a foreman. I have not any family. The picket line is still there on date of application of claimant. . . .

The employer stated that the claimant had "left voluntarily."

The labour dispute referred to by the claimant arose when the Union claimed that the Agreement worked with the employer included an undertaking by the employer to pay each employee a bonus of $25 in lieu of making the wage in-

crease retroactive. The employer denied commiting himself to such an undertaking, and a strike was started by 44 of the 71 production workers, who set up picket lines at the entrance to the employer's premises.

There were eleven non-union office and supervisory employees and the claimant belonged to this group, having been made a foreman about 9 months before the work stoppage.

The insurance officer reasoned that

> Although the claimant was not considered to be financing the dispute, or to have a direct interest in the dispute as her terms and conditions of employment would not necessarily be affected by any settlement, she was considered to have become a participant by the voluntary withdrawal of her labour, thereby lending strength to those actively participating in the dispute, and to be subject to disqualification under the provisions of section 63 of the Unemployment Insurance Act.

The claimant was notified that she was disqualified and benefit suspended from December 14, 1965.

The local office received the claimant's appeal to the board of referees, together with the following reasons for appeal:

> . . . While employed at T . . . I was given the position of foreman, which disqualified me from taking part in a union. Therefore, I was not affected by any labour dispute that arose. I did not pay any union dues, nor am I financing the Union in any way.
>
> As of December 14, 1965, I ceased to be employed by [the company] and therefore have no interest in the dispute or its outcome. While employed as foreman, my earnings exceeded those of what the Union hoped to gain for the workers, by the signing of a working agreement. Being foreman, I would have gained nothing through this dispute.
>
> When this dispute started, I spoke to management regarding walking through picket lines. I decided that rather than brave the picket lines, and being fair to management (as I was no good to them staying home) I felt that it would be better if I were replaced. All people in my class of work at the plant, are still working, and are taking no part, whatsoever in the dispute. I left my place of employment, at my own free will . . .

In reply to a local office query, the employer said that (the claimant) was a member of the Union by her own admission but that she was made a forelady and was therefore ineligible for membership. When the employees went out on strike, she quit her job because of her union connection. The employer also stated that the claimant's job was available if she wanted it.

A local office letter to the insurance officer provided additional information to the effect that the claimant, although included in the original bargaining agreement, was excluded as a member by the decision rendered subsequently that supervisory personnel on salary would be so excluded. The letter stated further that, because of her own convictions regarding unions, the claimant did not wish to work for this employer while a labour dispute was in effect and she left voluntarily on the first day of the dispute.

The board of referees heard the appeal and reached the unanimous conclusion that the claimant did leave her place of employment of her own free will, but not for the purpose of supporting or adding strength to the striking group, but rather because working conditions were disorganized and rendered unsatisfactory by inexperienced workers. The board also considered the evidence given in regard to her own personal convictions and fears.

The board noted also that when the claimant was appointed to the position of forelady, she was then ineligible for union membership and therefore uninterested in the dispute.

The claimant had proved to the board's satisfaction that she did not belong to a grade or class of workers who were involved in the labour dispute. They therefore concluded that the claimant did not lose her employment by reason of a stoppage of work attributable to a labour dispute.

The appeal was allowed.

The insurance officer appealed to the Umpire and argued that the board of referees erred when it allowed the appeal on the ground that the claimant's voluntary separation from employment was not for the purpose of supporting or adding strength to the striking group, but rather for the reason that working conditions were disorganized and she found it unsatisfactory to continue with inexperienced workers. It also considered the evidence given in regard to her own personal convictions and fears. Having decided that the claimant had voluntarily left her employment the board also erred in deciding that she had proved just cause for so doing. There is no evidence to show that the conditions were so intolerable after only one day's trial that she had no other alternative but to leave without first assuring herself of other employment. It is submitted that the claimant acted imprudently in taking the initiative to leave her work and that just cause has not therefore been established.

> It is immaterial whether the claimant left her employment to honour the picket lines because of her union convictions, or whether she left because the working conditions within the premises were disorganized due to the stoppage of work attributable to the dispute. . . The claimant's act in withdrawing her labour, which had for effect to support and add strength to the striking group, is an incident giving rise to her separation from employment, which would not have occurred but for the dispute, and her action can only be interpreted as participation. . . .

In reply, the claimant's representative made a further submission on which he emphasized the conclusion of the board of referees that the claimant was a forelady and was not eligible for union membership and therefore had no direct interest in the Union; and that she was not participating in, financing or directly interested in the labour dispute that caused the stoppage of work.

> The claimant submits that such evidence as was required in the above section was supplied to the board of referees at the time of appeal. The claimant further submits that it has been established that the reason for separation from employment was that the claimant found it impossible to provide supervision, and maintain production in the manner that she knew that she would be expected to, under the chaotic conditions existing at the plant. The claimant further submits that these matters were discussed with management to some degree at least and the claimant made her position clear. . . .

Considerations and Conclusions

As shown in the insurance officer's appeal, the jurisprudence has established that when, during a labour dispute, an employee voluntarily withdraws his labour by refusing to cross a picket line, his refusal raises the presumption that he is participating in the labour dispute.

After perusing the evidence on file in this case and hearing the claimant's representative, it is my opinion that the claimant left her employment because she did not wish to cross the picket line and, since she has not advanced sufficient evidence to rebut the resulting presumption of participation in the labour dispute, I hold that the insurance officer was correct in disqualifying her pursuant to section 63 of the Act.

As a consequence, I decide to allow the insurance officer's appeal.

Canadian Railway Office of Arbitration Releases Decision in Case No. 48

A dispute involving disciplinary action against a locomotive engineer charged with violation of the Uniform Code of Operating Rules was dealt with by the Canadian Railway Office of Arbitration at a hearing in Montreal on November 14, 1966.

The one-man tribunal of Magistrate J. A. Hanrahan disallowed the claim.

The claim and the award of the arbitrator in Case No. 48, is cited below:

> Dispute between the Canadian National Railway Company (Atlantic Region) and the Brotherhood of Locomotive Engineers over a six-month suspension given to an engineer for failing to acknowledge a yellow warning light and a red stop signal.

On the morning in question, a work train had been tied up in a back track at a siding. It was ordered to surface track between Estcourt and Tarte, and given authority for exclusive occupancy of the main track from 7:10 a.m. to 10:00 a.m. While riding on the leading track motor toward the Estcourt spring switch to clear the expiry time, the conductor observed an eastbound train coming toward him on the main track. The work equipment was immediately brought to a stop and Train 442 came to a stop approximately twenty car lengths from the work gang.

At the time of the incident it was noted by the chief train dispatcher and the signal supervisor that the CTC was functioning properly. A pen graph taken at the time indicated the authorized movement of other trains and the unauthorized movement of Train 442.

The locomotive engineer of Train 442 was charged with violation of the Uniform Code of Operating Rules and, following an investigation, was given a six-month suspension.

Rule 517 of the Uniform Code of Operating Rules reads: "If any part of a train or engine overruns a signal indicating stop, front of train or engine must be protected immediately as prescribed by Rule 99 for outside ABS territory, and members of crew must immediately communicate with train dispatcher and be governed by his instructions."

The brotherhood drew attention to the note of uncertainty in the train dispatcher's report, stating that the brakeman told him that the signal indicated "proceed." The dispatcher had replied that to the best of his knowledge it was supposed to be a "stop" signal, but that it could mean "proceed."

Rule 34 reads: "Crews on engines . . . must know the indication of train order signals . . . and when practicable, communicate to each other by its name the indication of each signal. . . ."

The arbitrator believed that the engineer was fully aware of the general nature of the complaint against him and that the difference in content between these two rules would not deter his making a full explanation of his actions.

In appealing the discipline, the brotherhood pointed out that when the engineer had informed the conductor over the radio telephone that the approach signal was "clear," the trainman and fireman-helper had concurred in this.

The brotherhood took exception to the fact that second statements were taken from those involved, and that, although the original statement forms were headed "an apparent breach of Rule 517," the final penalty was assessed against the engineer for four breaches of the operating rules. They protested that, although they had requested statements from all witnesses, they had not received a report made by the signal maintainer. They objected also to the fact that a pen graph introduced in evidence was first sent to them ten months after the incident occurred, and that the failure to send a copy of this to the general chairman was a violation of an article of the collective agreement.

In answering these objections, the company declared that the use of the word "apparent" indicated that, at that point in the investigation, no conclusion had been reached as to what violation, if any, had actually occurred. This was the purpose of the investigation.

The company explained to the arbitrator's satisfaction that the signal maintainer's report to the company could not be considered part of the official investigation because he was not a witness to the incident. And as far as the pen graph was concerned, the company pointed out that it was displayed to the general chairman at the first joint conference with an expert in attendance to explain its significance.

For these reasons, the arbitrator said, he could find nothing in the brotherhood's objections that would invalidate the action taken by the company.

The arbitrator was given a picture in depth of the movement of trains at the time of the incident, and of the signal system installed and operating in the area. An expert traced the movements of the train with the aid of a copy of the pen graph made at the time.

It was explained that with the blocking set up to protect the work train during the hours stated, the engineer of Train 442 would have encountered a yellow light on approaching the signal to Estcourt. This would involve Rule 285, reading: "Proceed, preparing to stop at next signal. . . ." The engineer would then have encountered a stop (red) signal at Estcourt.

The pen graph traced the westward movement of Train 405 past the governing signal at Estcourt at 7:04 a.m., and indicated the unauthorized movement of Train 442 past the stop indication at Estcourt at approximately 9:42 a.m. The graph also indicated that the first authority for movement beyond Estcourt after the blocking at 7:10 a.m. occurred at 10:20 a.m. when the signal was cleared for Train 406.

The company maintained that the evidence provided by the pen graph was "spectacular." They claimed that it indicated with remarkable accuracy that no authorization was given at 9:42 a.m. on the date in question when Train 442 entered the blocked territory between Estcourt and Tarte. They also pointed to the past record of the engineer, showing that, from 1941 to the present incident, he had 21 recordings of cautions, demerit penalties or suspensions. The brotherhood properly asserted that these could not be considered in deciding whether on this occasion his conduct was blameworthy, but it would have been taken into consideration had there been a plea for a reduction in the penalty.

The arbitrator was convinced that the unadorned statement made by the engineer and the two others in the cab must be considered insignificant against the convincing evidence produced by the pen graph. He said he was satisfied that on the morning in question all the signal equipment was functioning properly, and that the action against the engineer was justified.

The employee's claim was therefore disallowed.

Publications Received in the Department of Labour Library

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed by making application to the Librarian, Department of Labour, Ottawa, Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE.

Conference held October 13, 14 and 15, 1965.

Contents: Industrial relations in the next decade [by] David A. Morse. Automation and wage determination [by] James R. Bright. Collective bargaining in perspective [by] Frederick Harbison. Collective bargaining and the challenge of technological change [by] Arnold R. Weber. Challenge and response in the law of labour relations [by] Harry W. Arthurs. The individual in an organizational society [by] Wilbert E. Moore. Government and poverty [by] Maurice Sauvé. War on poverty [by] Tom Cosgrove.

25. INDUSTRIAL RELATIONS COUNSELORS, INC. *Facts on Europe; Economic and Labor Information for the U.S. Businessman.* New York [c1966] Pp. 118.

Provides geographical, economic and industrial relations information about the European Economic Community, Belgium, France, West Germany, Italy, Luxembourg, the Netherlands, and Great Britain.

This book is intended for American businessmen planning to invest in Western European countries. It contains information about the labour force (extent of the shortage of labour or of unemployment); use of foreign workers, wage and salary patterns, collective bargaining, trade unions, and "any unusual aspects of the country's labor-management relations which are pertinent to an American company's operations." An Appendix contains tables outlining the provisions of required fringe benefits and the cost of financing these benefits.

26. INDUSTRIAL RELATIONS RESEARCH ASSOCIATION. *Proceedings of the Eighteenth Annual Winter Meeting, New York, December 28 and 29, 1965.* Edited by Gerald G. Somers. Madison, Wis. [c1966] Pp. 390.

"Index of IRRA publications 1961-1965": p. 370-390.

Some of the topics discussed were labour force projections, manpower policies, management research, technological change, unemployment, pension funds, and labour history.

27. LABOUR-MANAGEMENT CONFERENCE ON ECONOMIC AND TECHNOLOGICAL CHANGE IN THE SIXTIES, UNIVERSITY OF BRITISH COLUMBIA, 1965. [*Proceedings*]. Edited by Noel A. Hall. [Vancouver] Institute of Industrial Relations, University of British Columbia [1965] Pp. 164.

Conference held May 19th and 20th, 1965, is the second Labour-Management Conference on Industrial Relations sponsored by the B.C. Department of Labour, the B.C. Federation of Labour, and the Institute of Industrial Relations, University of B.C.

Contents: Editor's introduction. Conference perspectives [by] Hon. L. R. Peterson (Minister of Labour, B.C.). Implications for manpower adjustment: Introductory statement [by] Dr. Gil Schonning. Discussion by Dr. S. M. Jamieson, John Oliver, Joe Morris, John Drew, and Dr. J. H. G. Crispo. Patterns of response to change: Introductory statement [by] Dr. George P. Shultz. Discussion [by] Dr. S. M. Jamieson, E. P. O'Neal, Dr. J. H. G. Crispo, and R. A. Butler.

International Labour Conference

28. INTERNATIONAL LABOUR OFFICE. *Information and Reports on the Application of Conventions and Recommendations.* Third item on the agenda. Geneva, 1966. 4 volumes. At head of title: Report 3(1)-(4). International Labour Conference. 50th session, Geneva, 1966.

Contents: Pt. 1. Summary of reports on ratified conventions (Articles 22 and 35 of the Constitution). Pt. 2. Summary of reports on unratified conventions and on recommendations (Article 19 of the Constitution). Pt. 3. Summary of information relating to the submission to the competent authorities of conventions and recommendations adopted by the International Labour Conference (Article 19 of the Constitution). Pt. 4. Report of the Committee of Experts on the application of conventions and recommendations (Articles 19, 22 and 35 of the Constitution).

29. INTERNATIONAL LABOUR OFFICE. *Questions concerning Fishermen: (a) Accommodation on Board Fishing Vessels; (b) Vocational Training of Fishermen; (c) Fishermen's Certificates of Competency.* Sixth item on the agenda. Geneva, 1965-1966. 2 Volumes. At head of title: Report 6(1)-(2). International Labour Conference 50th session, Geneva, 1966.

Part 1 contains the record of the Preparatory Technical Conference on Fishermen's Questions held in Geneva, October 18th to 28th, 1965, together with the texts of conclusions adopted by the Conference, as well as a questionnaire to be completed by member countries. Part 2 contains observations made by member countries and English and French versions of proposed conventions and a proposed recommendation.

Labour Organization

30. AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS. BUILDING AND CONSTRUCTION TRADES. *Report of Proceedings of the Fifty-third Convention held at San Francisco, California, December 1-3, 1965.* Washington, 1966. Pp. 394.

Contents: v. 1. Research report. v. 2. Action program. Describes the rehabilitation service program provided for the membership of the New York Joint Board of the Amalgamated Clothing Workers of America and their families by the Sidney Hillman Health Center of New York.

Labouring Classes

34. BURTON, JOHN FRANCIS. *Interstate Variations in Employers' Costs of Workmen's Compensation; Effect on Plant Location Exemplified in Michigan.* Kalamazoo, Mich., W. E. Upjohn Institute for Employment Research, 1966. Pp. 75.

"A study of the Institute of Labor and Industrial Relations, the University of Michigan-Wayne State University," evaluating the effect of workmen's compensation costs on plant location decisions.

". . . An abridged, revised, and updated form of [the author's] Ph.D. dissertation at the University of Michigan [1965]"

35. DENVER. UNIVERSITY. DENVER RESEARCH INSTITUTE. *A Method of Measuring Short-Term Impacts of Technological Change on Employment and Occupations, as tested in Selected Power Laundries.* Prepared by James F. Mahar and George E. Bardwell. Prepared for Office of Manpower, Automation and Training, U.S. Department of Labor. Denver, 1965. 1 volume (various pagings).

A study of "20 representative plants in the family power laundry industry . . . to develop a framework of analysis to forecast the total potential (short run) impact of automatic and technological change on the level and type of employment [and] within this framework, to construct estimates of the short-run impacts of technological change on the level and type of employment, considering impacts of (1) automation and mechanization, (2) internal variables which affect technological change, such as size of laundry, and productivity of existing equipment, and (3) a limited number of significant, external variables, namely prices and wage rates."

36. HERZBERG, FREDERICK. *Work and the Nature of Man.* Cleveland, World Publishing Company [1966] Pp. 203.

The author develops a motivation-hygiene theory which considers "man's total needs" in the world of work.

37. MORTON, J. E. *Analytical Potential of the Current Population Survey for Manpower and Employment Research.* Kalamazoo, Michigan, W. E. Upjohn Institute for Employment Research, 1965. Pp. 71.

An examination of the Current Population Survey of the U.S. Bureau of the Census as a source of information on manpower, labour force, employment and unemployment in the United States.

38. MOTT, PAUL E. *Shift Work; the Social Psychological, and Physical Consequences,* by Paul E. Mott [and others] Ann Arbor, University of Michigan Press, 1965. Pp. 351.

Report of research performed in the Institute for Social Research, University of Michigan, under grant M-3276 from the National Institute of Mental Health.

Partial contents: Shift work: the background of the problem. Work schedules and family roles. Shift work, marital happiness, and family integration. Shift work, social life, and solitary activities. The psychological reactions to shift work. Work schedules and physical health.

Women

39. CANADA. WOMEN'S BUREAU. *If I go to University.* [Ottawa, Queen's Printer, 1966] Pp. 36.

An account of 5 high school girls planning to go to university.

40. INTERNATIONAL COUNCIL OF WOMEN. *Women in a Changing World; the Dynamic Story of the International Council of Women since 1888.* London, Routledge & Kegan Paul, 1966. Pp. 360.

"Publications of national councils of women": p. 346-347.

Contains the story of the International Council of Women from its formation until 1963, biographical sketches of ICW presidents, histories of ICW standing committees, and histories of national councils of women.

41. M.I.T. SYMPOSIUM ON AMERICAN WOMEN IN SCIENCE AND ENGINEERING, 1964. *Women and the Scientific Professions.* Edited by Jacquelyn A. Mattfeld and Carol G. Van Aken. Cambridge, Massachusetts Institute of Technology Press [1965] Pp. xvii, 250.

Sponsored by the Association of Women Students, Massachusetts Institute of Technology.

The following topics were discussed: The commitment required of a woman entering a scientific profession. Who wants women in the scientific professions? The case for and against the employment of women; closing the gap.

42. RISCHBIETH, BESSIE MABEL. *March of Australian Women; a Record of Fifty Years' Struggle for Equal Citizenship.* Perth, Paterson Brokensha Pty., 1964. Pp. 177.

A history of women's activities in Australia between 1909 and 1963. The author was first Federal President of the Australian Federation of Women Voters (Non-Party) and was for twenty years an elected member of the Board of the International Alliance of Women.

43. YOUNG FABIAN GROUP. *Womanpower.* London, Fabian Society, 1966. Pp. [2] 29.

A brief look at potential reserve of workers among married women and the barriers which prevent these women from satisfying the demand. There is a chapter on the effects on children whose mothers work.

Miscellaneous

44. AMERICAN FOUNDATION ON AUTOMATION AND EMPLOYMENT. *Automation and the Middle Manager; What has happened and What the Future Holds.* [New York, c1966] Pp. 49.

Interviews with company and government officials and with university professors, all specialists in the computer field or students of the impact of computers on management, form the basis for this study. The study concludes that computers will be used more extensively in decision-making in the future but, as yet, most companies are not prepared for the computer.

Explanatory Note to "Classification of Labour Market Areas"

The system of classifying the labour market situation in individual areas is an analytical device whose purpose is to give a clear and brief picture of local market conditions based on an appraisal of the situation in each area. In considering each category, it is necessary to keep in mind the marked seasonal fluctuations in labour requirements in Canada. Labour surpluses are consistently highest in each year from December to March and lowest from July to October.

The criteria on which the classification system is based are as follows:—

Group 1: Labour Surplus. Areas in which current or immediately prospective labour supply exceeds demand in almost all of the major occupations. This situation usually exists when the ratio of applications for employment to estimated paid workers, including those looking for work, is more than 9.9, 11.9, or 13.9 per cent, depending on the size and character of the area. The former represents the total number of persons registered for employment at the Canada Manpower Centres (previously known as NES areas) of the Department of Manpower and Immigration, as of the close of business on the last working day of the month.

Group 2: Labour Surplus. Areas in which current or imediately prospective labour supply exceeds demand in about half of the major occupations. The situation usually exists when the ratio of applications for employment on file with Canada Manpower Centres to estimated paid workers, including those looking for jobs, is more than 5.9 or 6.9 per cent, but less than 10.0, 12.0 or 14.0 per cent, depending on the size and character of the area.

Group 3: Balanced Labour Supply. Areas in which current or immediately prospective labour demand and supply are approximately in balance for most of the major occupations. The situation usually exists when the ratio of applications for employment on file with Canada Manpower Centres to estimated paid workers, including those looking for jobs, is more than 1.9 or 2.4 per cent but less than 6.0 or 7.0 per cent, depending on the size and character of the area.

Group 4: Labour Shortage. Areas in which current or immediately prospective labour demand exceeds supply in most of the major occupations. This situation usually exists when the ratio of applications for employment on file with Canada Manpower Centres to estimated paid workers, including those looking for jobs, is less than 2.0 or 2.5 per cent, depending on the size and character of the area.

The classification of areas does not depend solely on the ratio of job applications to paid workers. All areas, and particularly those in which the ratio is close to the limits of the above-mentioned ranges, are examined closely in the light of other kinds of information to see whether they should or should not be reclassified. Information on labour market conditions at local areas is obtained mainly from monthly reports submitted by each of the Canada Manpower Centres. This information is supplemented by reports from field representatives of the Department of Manpower and Immigration who regularly interview businessmen about employment prospects in their companies, statistical reports from the Dominion Bureau of Statistics and relevant reports from other federal government departments, from provincial and municipal governments and from non-governmental sources.

The term "labour market" as used in this section refers to a geographical area in which there is a concentration of industry to which most of the workers living in the area commute daily. The term is not meant to imply that labour is a commodity and subject to the same kind of demand and supply factors operative in other markets.

To facilitate analysis, all labour market areas considered in this review have been grouped into four different categories (metropolitan, major industrial, major agricultural, and minor) on the basis of the size of the labour force in each and the proportion of the labour force engaged in agriculture. This grouping is not meant to indicate the importance of an area to the national economy.

The key to this grouping is: a "metropolitan" area is one with a labour force of 75,000 or more; a "major industrial" area is one with a labour force of from 25,000 to 75,000 of which 60 per cent or more are in non-agricultural occupations; a "major agricultural" area is one with a labour force between 25,000 and 75,000 of which 40 per cent or more are in agriculture; and a "minor" area is one with a labour force of 10,000 to 25,000.

The geographical boundaries of the labour market areas dealt with in this section do not coincide with those of the municipalities for which they are named. In general the boundaries of these areas coincide with the district serviced by the respective Canada Manpower Centres. In a number of cases, Manpower Centres have been amalgamated and the names used include several other Centres as follows: Farnham-Granby includes Cowansville; Montreal includes Ste. Anne de Bellevue; Lac St. Jean includes Chicoutimi, Dolbeau, Jonquière, Port Alfred, Roberval and Alma; Gaspe includes Causapscal, Chandler, Matane and New Richmond; Quebec North Shore includes La Malbaie, Forestville, Sept Iles and Baie Comeau; Sherbrooke includes Magog; Trois Rivières includes Louiseville; Toronto includes Long Branch, Oakville, Weston and Newmarket; Sudbury includes Elliot Lake; Niagara Peninsula includes Welland, Niagara Falls, St. Catharines, Fort Erie and Port Colborne; Vancouver-New Westminster includes Mission City; Central Vancouver Island includes Courtenay, Duncan, Nanaimo and Port Alberni; and Okanagan Valley includes Kelowna, Penticton and Vernon.

The 110 labour market areas covered in this analysis include 90 to 95 per cent of all paid workers in Canada.

*Revised. †Preliminary.

‡Includes post office wages and salaries. **Figures in this column are for total labour income, Canada, but are not totals of the figures in the remaining columns of this table, as figures for labour income in Agriculture, Fishing and Trapping are not shown.

Note: Monthly figures may not add to annual totals because of rounding. Source: *Estimates of Labour Income*, DBS.

C–Employment, Hours and Earnings

Tables C-1, C-2, and C-4 are based on reports from employers having 20 or more employees in any month of the year; at May 1966, employers in the principal non-agricultural industries reported a total employment of 3,517,926. Table C-3 gives estimates of total employment, by industry divisions, for the provinces and Canada, derived from the survey of establishments employing 20 or more persons and from a sample survey of establishment employing less than 20 persons. Tables C-5 to C-7 are based on reports from a somewhat smaller number of firms than Tables C-1, C-2 and C-4. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1, C-2 and C-4 relate to salaried employees as well as to all wage-earners in the reporting firms.

E–Unemployment Insurance

Unemployment insurance statistics emanate from the operations of the Unemployment Insurance Act, and relate to persons in contact with the Unemployment Insurance Commission, either as contributors or claimants. The data are compiled in the Unemployment Insurance and Pensions Section, Labour Division, DBS, from information supplied by the UIC. The source for Tables E-1 to E-4 is *The Statistical Report on the Operation of the Unemployment Insurance Act.* For further information regarding the nature of the data see Technical Note, page 48.

*St. John's index on the base June 1951 = 100.

NOTE: Indexes above measure percentage changes in prices over time in each city and should not be used to compare actual levels of prices as between cities.

G–Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Canada Department of Labour on the basis of reports from the Manpower Division, Department of Manpower and Immigration. The first three tables in this section cover strikes and lockouts that amount to ten or more man-days.

The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the union directly involved in the disputes leading to the work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For further notes on the series, see Aug. 1966, p. 492.

TABLE G-1—Strikes and Lockouts, 1961-1966

Month or Year	*Strikes and Lockouts Beginning During Month or Year*	*Strikes and Lockouts in Existence During Month or Year*			
		Strikes and Lockouts	*Workers Involved*	*Duration in Man-Days*

*Includes: (1) Trapping and hunting. (2) Quarrying and oil wells. (3) Storage, communication, electric power, gas and other utilities. (4) Insurance and real estate. (5) Community, business and personal service. (6) Defence.

†Includes: (a) Farm workers. (b) Related workers. (c) Trappers and hunters (d) Quarrymen and related workers. (e) Production process and related workers. (f) Unskilled workers (not agricultural, logging, fishing or mining). (g) Communication workers. (h) Technical occupations. (i) Recreation workers.

‡Includes: (j) Tools, vehicles, etc. (k) On same level and to different levels. (l) Wrecks, etc. (m) Machinery, vehicles, etc. (n) Contact, absorptions, ingestions and industrial diseases. (o) Temperature extremes and explosions. (p) Lightning. (q) Strains, hernia, etc. (r) Stepping on objects. (s) Violence, bites, stings, etc.

**Of these totals, 204 fatalities were reported by the various provincial Workmen's Compensation Boards; details of the remaining 73 were obtained from other sources.

Technical Note to "D" Tables

The registrations at Canada Manpower Centres appear in Table 5 and are comparable to the statistics that were shown for NES local offices in previous issues of the LABOUR GAZETTE. Because the reporting system for the Centres is designed for operational purposes, the statistics given must be interpreted in the light of the effect that operating practices have on statistical data.

The data are assembled by the Centres in two basic forms. The first is by broad industrial groups based on the Standard Industrial Classification Manual of the Dominion Bureau of Statistics, 1948. Statistics tabulated from this source reflect the total work load (vacancies notified, registrations for employment, placements, etc.) during a given reporting period, and Tables D-2 and D-3 are compiled from these data. The second is by broad occupational groups. These groups are based on the occupational classifications of the Dictionary of Occupational Titles (published by the United States Employment Service), and the Canadian Supplement.

Designed for personnel selection work, this classification system differs from other methods of grouping occupations, such as the one used in the Census. The Canada Manpower Centres prepare monthly inventories of unfilled orders for workers and applicants registered for employment. These inventories are compiled by occupational groupings, and they are the source from which the data in Tables D-1, D-4 and D-5 are derived. It is important to note that both the industrial and occupational groupings are very broad, some 20,000 occupations, for example, being condensed to 103 groups in the basic reports, and an even greater consolidation being effected in the "D" tables.

Users of these statistics should be aware of certain other features. First, vacancies and placements in these series do not make any distinction between regular, part-time or casual employment, the latter being employment for not more than six consecutive working days. Second, although Canada Manpower Centres coverage of persons looking for work is quite extensive, and a good over-all indicator of movements in total labour supply, the coverage in the various occupational groups (Table D-4) is not uniform, and data may not therefore be representative of labour supply within individual occupational groups.

Finally, there is no legal requirement for employers to notify Canada Manpower Centres of job vacancies, so the coverage of vacancies is far from complete. Thus, the "vacancies notified" series does not provide an accurate indication of the extent of labour demand. Although it is reliably estimated that Manpower Centres are notified of upwards of 30 per cent of all job vacancies, the actual percentage varies widely between different industries, occupations and geographic areas.

The following comments pertain specifically to Tables D-1 to D-5:

Table D-1

(a) Unfilled Vacancies represents an inventory of employers' vacancies unfilled at the close of business on the day indicated. Deferred vacancies—those on which employers are not prepared to accept referrals within 31 days—are excluded from this series. Canada Manpower Centres act on vacancies as soon as possible after they are received, so that unfilled vacancies represent only a proportion of the vacancies listed by the Centres and consist of three main groups: (1) those reported to the office shortly before the inventory is taken; (2) those on which applicants have been referred but on which employers have not yet confirmed placements; (3) those that are difficult to fill because of a local (or wider) occupational shortage, or because of particular working conditions.

Unfilled Vacancies is, consequently, a biased sample of vacancies notified.

(b) Registrations on Hand represents an inventory of applications for employment at the close of business on the day indicated, excluding certain categories such as persons who are employed but who are seeking other work, or those who have registered for employment in advance of their availability.

Table D-2

(a) Registrations Received consists of both new and renewal applications for employment received during the period. An individual may register more than once in a period, so the figures do not therefore reflect the total number of persons registering in a reporting period.

(b) Vacancies Notified is the total of job openings reported to Canada Manpower Centres during the period indicated.

(c) Placements Effected shows the total of job vacancies filled by workers referred by Canada Manpower Centres during the reporting period. As a proportion of the vacancies is for work with a duration of less than the reporting period, an individual worker may account for more than one placement.

Table D-3

This table presents a breakdown by broad industrial groups of the placements reported in Table D-2. Year-to-year changes do not necessarily reflect changes in total demand or employment, as such changes can result from seasonal shifts in hirings, variations in labour turnover rates, or even a difference in the number of working days in the month from one year to the next. Also, placement coverage varies considerably from industry to industry.

Table D-4

This table shows a breakdown by sex and broad occupational groups of the inventory of registrations on hand (see item (b) in note to D-1 above). As some 20,000 occupations are compressed into 28 general classifications, caution must be exercised in forming conclusions about any one group.

Table D-5

This table presents registrations on hand at Canada Manpower Centres. The figures do not relate exclusively to the municipalities concerned, but reflect the total registations on hand from the areas served by the Canada Manpower Centres shown in the Table.

Canada Department of Labour Publications

Annual Report of the Department of Labour (Covers fiscal year ending March 31). (English or French). Price $1.00, Cat. No. L1-1965.

Report of the Industrial Inquiry Commission on Canadian National Railways "Run-Throughs." Report of Hon. Mr. Justice Samuel Freedman, Commissioner. (English or French). Price $1.50, Cat. No. L35-965/1.

Supplements to Labour Gazette

Collective Bargaining Review. Prepared by the Collective Bargaining Section, Labour-Management Division, Economics and Research Branch, Canada Department of Labour. Obtainable from the Canada Department of Labour. Free to LABOUR GAZETTE subscribers.

Reports of Boards of Conciliation established under the Industrial Relations and Disputes Investigation Act together with reasons for judgment of the Canada Labour Relations Board. Obtainable from the Canada Department of Labour. Free to LABOUR GAZETTE subscribers.

Economics and Research Branch

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). Price 50 cents, Cat. No. L2-2/1966.

Industrial and Geographical Distribution of Union Membership in Canada, 1966 (English or French). Price 15 cents, Cat. No. L31-765.

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. Price 35 cents, Cat. No. L2-1/1965.

Wage Rates, Salaries and Hours of Labour, 1965. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance of service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. First year service including attractive binder with index tabs and paper-bound volume, $9.50; service without indexed binder, $7.00; individual tables, 15 cents. Paper-bound volume, $2.50. (Bilingual). Cat. No. L2-548.

Working Conditions in Canadian Industry, 1965. Price 75 cents, Cat. No. L2-15/1965.

Répertoire de termes et expressions utilisés en relations industrielles et dans des domaines connexes. A catalogue, in French, of terms currently in use in the labour relations field. Prepared by the Economics and Research Branch. Price $4.50, Cat. No. L31-967F.

Send remittance, payable to the Receiver General of Canada, to the Circulation Manager. BOUND VOLUMES—$5 per copy delivered in Canada, $7 per copy to other countries. CHANGE OF ADDRESS—Attach previous address label.

Canada Labour (Safety) Code

Primary purpose of the new law is to ensure safe working conditions for all employees in industries and undertakings under federal jurisdiction

The Canada Labour (Safety) Code, which was passed by Parliament at the end of 1966, is the first general safety act in the history of Parliament. Although there have been a number of laws and provisions that may affect employment safety, there has been no law whose primary purpose was to ensure safe working conditions for all employees in industries and undertakings under federal jurisdiction.

The first and most important purpose of the Safety Code is to reduce human suffering. It is reckoned that each year about 70,000 persons under federal jurisdiction are injured at their work, and on the average, one person is killed on the job every other working day.

Besides the human aspect of such accidents, the money cost, as measured by the amount paid out in workmen's compensation, is running at the rate of about $1,000,000 each working day for all Canadian industry. The total time lost in Canada in 1965 on account of injuries received at work is estimated at 7,000,000 man-days, a total about four times the average annual loss of time due to work stoppages during the period 1961-65. Even in 1966, a year in which the amount of time lost through work stoppages was unusually high, it will probably prove, when statistics are compiled, to be only about half that lost through accidents on the job.

The statement that, before the enactment of the new Code, there was no law whose primary purpose was to ensure safe working conditions for employees in industries under federal jurisdiction, does not mean that such employees have not been protected by any safety standards and inspection services. They have been protected in one of two ways.

First, a number of federal laws, such as those that regulate the main transportation systems, have dealt with safety in employment. The Railway Act, the Canada Shipping Act, and the Aeronautics Act, for example, together have applied to a large part of the employment that came under federal jurisdiction. But they are primarily concerned with the operation of trains, ships and aircraft; and, generally speaking, do not deal with the non-operational activities of the transportation companies. The new act was designed to close these and other gaps.

The second way in which employees under federal jurisdiction have been protected has been by the co-operation and help received from provincial safety authorities. In many federal premises, provincial officials have inspected boilers, elevators, electrical installations, and so on, as a matter of courtesy and without the power to enforce their recommendations. Provincial practices and regulations also vary widely and can be applied to federal undertakings in only a limited way.

"The Code will enable us to formulate and enforce appropriate standards and practices, and so regulate work places in accordance with the most advanced safety and health requirements," the Minister of Labour said in a recent statement about the enactment of the Code.

Support

Organized labour had taken a "very constructive interest" in the safety legislation and had heartily approved its principles and objectives, the Minister said. The Canadian Labour Congress, in its brief to the Parliamentary standing committee on labour and employment, had expressed the opinion that the proposed legislation was generally sound, and that many of its provisions would prove effective; and other trade union bodies had spoken in the same vein.

Some employers' associations, also, had shown an interest in the measure and had promised co-operation in the development of standards and practices.

These assurances were welcome because "the aims of the safety code are not self-implementing." The active support and interest of the people and organizations concerned was necessary. It was, in fact, necessary for both labour and management to "improve their performance in promoting safety consciousness and adhering to safe work practices."

Features of the Code

The following five features of the Safety Code may be pointed out:

1. Unlike many existing laws that relate only to certain hazards, equipment, industries or operations, the new code provides for all the elements of a complete industrial safety program, including research and safety education.

2. The Act does not itself go into details about safety standards and regulations. It sets out the general obligation of both employers and employees to carry out their respective functions and duties in a safe manner, and then authorizes the making of comprehensive regulations for dealing with the problems of occupational safety.

3. The Code complements other federal laws and also provincial legislation. It will not take anything away from these other authorities. On the contrary, it should help them by strengthening the safety movement in Canada generally.

4. While the regulations are being drawn up under the Code, and afterwards while they are being administered, almost continuous consultation will be going on among federal and provincial

government departments, and representatives of industry and organized labour. Full use will be made of advisory committees and special task forces.

5. The Code provides for research into the causes and prevention of accidents, and for an extended program of safety education.

The Department expects that a large federal field staff will not be needed to enforce the Code, but a number of regional offices will be created. It is hoped that arrangements can be made with the provincial governments for their safety officials to be empowered to act under authority of the Code and thus be employed to inspect federal premises and carry out other duties.

Industries Covered

The coverage of the Code is similar to that of the Canada Labour (Standards) Code. Subject to any other federal act or regulations, it will apply to employment in industries under federal jurisdiction and to certain crown corporations. But it will not generally apply to employment on, or in connection with the operation of ships, trains or aircraft, since this employment is already covered by the three acts mentioned early in this article.

The Code applies to employers and employees in works, undertakings or businesses connecting one province with another province or with another country. These are: interprovincial or international transport and communication systems, including railways (other than on trains), highway transport, pipelines, canals, ferries, tunnels and bridges, and telephone, telegraph and cable systems.

The Code furthermore applies to: services connected with shipping other than employment on ships; radio and television broadcasting; air transport and aerodromes, but not to employment in connection with the operation of aircraft; all banks; and primary fishing, when the fishermen work for wages.

The Code also covers employment in those works, undertakings, or businesses that, although wholly within one province, have been declared by Parliament to be "for the general advantage of Canada, or for the advantage of two or more of the provinces." Such undertakings include: uranium mining and processing; grain elevators; flour and feed mills; feed warehouses and seed cleaning mills; certain railways operating solely in one province; the Hudson Bay Mining and Smelting Company Limited (at Flin Flon, on the Saskatchewan-Manitoba border); the works and undertakings of the Yellowknife Telephone Company; and the works and undertakings of the British Columbia Telephone Company Limited.

Public Service of Canada

In a statement made to the Parliamentary Standing Committee on Labour and Employment during consideration of the bill, the Minister of Labour said, "The bill does not cover the public service of Canada because the people who pay the bill for the Government, namely, the Treasury Board, are treated more or less as another employer, and we come in to make sure that the standards that are adopted are enforced.

"With respect to working conditions generally, the Government, as they did in the case of the Canada Labour (Standards) Code, will take the necessary steps to ensure that all government employment comes within the principles of this bill, as is the case under the Labour Standards Code. . . . I think it is of the utmost importance that the Government, and all branches of Government, live up to the letter and the spirit of the bill if it becomes law; that is so for both humanitarian, and, I think, for economic reasons."

It has been indicated that, with respect to working conditions generally, the Government as an employer will take such measures as employers subject to the Code are required to take in order to safeguard the health and safety of their employees. Furthermore, the Government will carry out a continuing program designed to examine and deal with safety hazards in the public service.

In carrying out this policy, the Treasury Board will rely in the main on the technical and other services that will be established by the Canada Department of Labour to administer the new safety Code.

Regulations

Although, as already mentioned, the Code does not go into details about safety standards and regulations, it does give a general description of the kind of regulations that the Governor in Council is authorized to make.

Among other matters, the regulations may deal with: the structural design and maintenance of buildings and other works; the use, operation and maintenance of boilers and pressure vessels, elevators and other lifting devices; electrical equipment and gas or oil burning, or other heat-generating equipment; the guarding and fencing of machinery, equipment and places; the handling, transportation, storage and use of substances or devices dangerous to the safety or health of employees; and the adoption or implementation of appropriate safety codes.

Health and welfare matters that may be dealt with by regulation include: the ventilation, lighting and temperature of places of employment, including the minimum amount of space for employees; the provision and maintenance of supplies of drinking water, and of sanitary and other facilities for the well-being of employees.

Regulations may be authorized prescribing the age, health and physical requirements, and the qualifications of persons who may be employed in particular occupations.

Among other matters that may be prescribed by regulation are requirements with respect to protective clothing and devices, and first-aid facilities and first-aid training.

Any regulations issued may be made to apply to all federal works, or to one or more, or to a specified class of undertakings.

The Minister of Labour is responsible for the administration of the new Code, which will be implemented by the department's Accident Prevention and Compensation Branch. Besides being authorized to form consultative or advisory committees composed of representatives of employers and employees to assist in establishing safety standards, the Minister may institute inquiries into occupational safety problems or situations in any federal undertaking.

Safety officers may be appointed whose duties will be similar to those of provincial safety inspectors. The Minister is also empowered to appoint regional safety officers.

With the approval of the Governor in Council, the Minister may enter into an agreement with any province or provincial body specifying the terms and conditions under which a provincial employee may act as a safety officer under the Code.

In the exercise of his duties, a safety officer will have powers similar to those of safety officers in other jurisdictions. He may enter premises, question employees apart from the employer, inspect books and records, take extracts, and require employers to furnish statements respecting conditions of work affecting the safety or health of the employees.

In exceptional circumstances where there is some imminent danger to employees, the safety officer may issue a written directive requiring the employer to take remedial action within a specified time. In an emergency, the officer may prohibit the use of the place, matter or thing until his directions have

50 Years Ago

Coal was scarce, and railway passenger service had to be curtailed owing to a labour shortage

Letter carriers ask for a wage increase of 50 cents a day

A shortage of coal in many parts of the country, and a widespread curtailment of passenger traffic on the railways owing to a shortage of labour were frequently mentioned in the LABOUR GAZETTE of February 1917. The shortage of coal appeared also to be the result of a scarcity of labour, although it was reported that in Fernie, B.C., and in some mines in Alberta, a strike of about 6,000 miners had seriously curtailed production. The strike was settled at the end of January with the promise of a 9½-per-cent increase in wages.

The Nova Scotia coal mines were reported to be working steadily, except for a short strike at one mine over the alleged unfair dismissal of miners, and some complaints about working conditions. The Acadia Coal Company's mines were working steadily, but were able to fill only about two thirds of their orders. "Coal mines at Minto, N.B., were turning out a larger supply than usual, but were not working to capacity owing to the shortage of labour."

The curtailment of passenger service on the railways was said to be due to the priority that was being given to the movement of freight. Delivery of large quantities of Pennsylvania coal was being delayed by transport difficulties. In Montreal, the Grand Trunk Railway placed an embargo on local freight because of the congestion of traffic. Other industries were also being hampered by shortage of labour.

Wages continued to rise. Fifteen hundred longshoremen in Saint John got an increase of 5 cents an hour on January 1, making the new rate 35 cents an hour for day work and 40 cents for night work. Wages of motormen and conductors of the Halifax Tramway Company were voluntarily raised 10 per cent by the company. In Parry Sound, the British Carbide Company increased the wages of 1,000 carpenters by 10 cents an hour. Sergeants and police constables in Kingston got an increase in salary of $100 a year, and labourers employed by the Works Department of the City of Niagara Falls had their wages increased 25 cents a day.

At the annual submission of the Trades and Labour Congress to the Prime Minister and his cabinet in January, this journal reported that J. W. Bruce, representing the plumbers and steamfitters, urged assistance to settlers in the form of agricultural credits. He also put forward a proposal that election day should be made a statutory holiday, or alternatively that workmen should be given more time to vote. John W. Bruce, O.B.E., retired in January 1963 in his 88th year after 52 years of service as general organizer of the Plumbers' and Steamfitters union (L.G., 1963, p. 196).

One of the requests made at this meeting with the Dominion Cabinet was for a wage increase of 50 cents a day for letter carriers. It was presented by a spokesman for the Federated Association of Letter Carriers. In his reply to the deputation, Prime Minister Sir Robert Borden said that this request would be brought to the attention of the Postmaster General.

P. M. Draper, Secretary of the TLC, urged the enactment of an eight-hour day law for all industries, but the GAZETTE did not say whether the Prime Minister made any reply to this proposal.

A report on immigration to the United States published by the U.S. Department of Labor, which was summarized by the LABOUR GAZETTE, said that, during the 1914 fiscal year, 1,218,480 "aliens" had entered the country as immigrants. During the period 1905 to 1914, immigration had averaged 1,012,-194. In 1915, it had dropped to 326,700, and in 1916 only 298,826 aliens had entered the country.

The report of the Bureau of Immigration called attention to the question of Oriental immigration, and pointed out that when this immigration started again, the history of previous large immigrations would be repeated. The Bureau said that the matter demanded attention in advance, and that one matter that especially needed to be considered was that the machinery for the enforcement of the Chinese exclusion law was not adequate or well adapted to its object.

Attention was also drawn to the fact that, under the naturalization law of the United States, a person of the Mongolian race could not become a citizen no matter how long he resided in the country; yet a person of that race who born in the country was vested with American citizenship by the accident of birth.

Cigarmakers in Hamilton, London, and Montreal went on strike on November 16, 1916 for an increase in wages of $1 a thousand for making 10-cent cigars and 50 cents a thousand for making 5-cent cigars. A settlement of the strike that involved 268 employees in Hamilton, 106 employees in London, and 172 employees in Montreal was reached on January 11, and it resulted in the granting of the strikers' demands in full.

A short strike of 37 machinists and apprentices in Galt, Ont., early in January was caused by the objection of the workers to the employment at machine work of a certain employee known as a "handyman." The apprentices complained that this man was learning the trade under better terms than they were, and when they went on strike, the machinists also struck in sympathy. The strike ended after two days when the handyman "left the establishment."

At about the same time, 244 employees of the Algoma Steel Corporation in Sault Ste. Marie went on strike because they objected to working a 12-hour shift in what they said was an improperly ventilated engine house. They demanded an eight-hour shift, but the strike was settled after three days, when the company agreed to adopt a nine-hour shift.

Agreement with foremen ends strike at B.C. ports

A stoppage of work involving a number of stevedoring companies at British Columbia ports, caused by a strike of 190 longshore foremen that began on November 17, was brought to an end by agreement between the companies and the foremen. The settlement was announced in the Commons by the Minister of Labour on December 8, as the Government was preparing to introduce a bill that would have placed operations on British Columbia waterfronts under a public administrator.

The foremen went on strike after the Canada Labour Relations Board had rejected, for the second time, the application of Local 514 of the International Longshoremen's and Warehousemen's Union to be certified as their bargaining agent. The Board refused the application on the ground that the foremen were supervisory personnel, and as such were not eligible to be certified as a bargaining unit.

When the foremen set up a picket line, the longshoremen, who were members of the same union, refused to cross it. The British Columbia Maritime Employers' Association thereupon applied to the British Columbia Supreme Court for an injunction against picketing by the foremen, and the injunction was granted on November 21.

When the foremen's pickets were withdrawn in consequence of the injunction, the longshoremen returned to work, but engaged in what the employers contended was a slowdown.

In consequence, the companies finally refused to hire longshoremen unless the union gave its assurance that its 4,000 members would give "a good day's work for a good day's pay." This resulted in the suspension of all work on the waterfronts. The employers' association also announced that it would sue the union for damages in consequence of the slowdown.

Settlement Unexpected

The Minister of Labour and officials of his department tried for some time to bring about a settlement, but without success; and word of the final settlement came unexpectedly.

The agreement between the stevedoring companies and the foremen provided:

—for the establishment of a grievance procedure for foremen;

—for the appointment by the Minister of Labour of an industrial inquiry commission under Section 56(2) of the Industrial Relations and Disputes Investigation Act:

—that there should be no change in the conditions of employment of the foremen pending the report of the industrial inquiry commission;

—that all pending lawsuits and appeals by the parties arising out of the dispute should be immediately terminated and that no more lawsuits should be undertaken except against third parties:

—that no grievances concerning the dispute should be raised against the longshoremen under their agreement; and

—that port operations should be resumed forthwith.

The grievance procedure provided that a foreman might submit a grievance personally or through a representative, and that if the grievance were not settled to his satisfaction, it should be submitted to a single arbitrator to be chosen by agreement between the parties, or lacking such agreement, to be appointed by the Minister of Labour for Canada. The award of the arbitrator was to be binding on both parties, and the costs of the arbitration were to be paid by the employer if the foreman's case were upheld, or by the foreman if it were found to be without merit. It was also provided that the arbitrator might order the costs to be shared between the parties.

Industrial Inquiry Ordered

The Minister of Labour on December 15 announced that the industrial inquiry into the dispute would be conducted by Mr. Justice C. Rhodes Smith of the Manitoba Court of Appeal, a former Minister of Labour for Manitoba and a former chairman of the Canada Labour Relations Board. Mr. Justice Smith would be assisted by two assessors: H. J. C. Terry, Vancouver, former president of Northland Navigation Company; and Joseph Morris, Executive Vice-President of the Canadian Labour Congress.

Besides looking into the dispute, the commission was to make recommendations designed to prevent such disputes in future.

Parliament on December 12 passed an amendment to the Canada Labour (Standards) Code to ensure that all longshoremen would get eight paid holidays a year. Before being amended, the Code had stipulated that an employee was not entitled to a holiday with pay if it occurred during his first 30 days of employment with a certain employer, or if he had not worked at least 15 days during the 30 calendar days immediately preceding the holiday. Longshoremen, the Minister of Labour explained during debate on the amendment in the House, often worked for several employers during a 30-day period, and thus they might not have built up enough continuous employment with any one employer to qualify for pay on a general holiday. The amendment was intended to remedy this disability.

Airline strike settled and second walkout averted

Disputes with employees of Air Canada during the months of November and December, 1966, resulted in the grounding of the airline's planes across Canada from November 14 to 28, and threatened to ground them again on December 20.

On November 14, Air Canada planes were grounded when 5,200 members of the International Association of Machinists left their posts at the major airports across Canada. The second walkout, scheduled for December 20 by 800 members of the Air Traffic Controllers' Association, was averted when settlement of the dispute was reached on December 18 by negotiators, and approved by the controllers on December 19.

The settlement reached with the machinists gave them a wage increase amounting to about 20 per cent, spread over a 26-month contract. At the time of the walkout, the machinists were demanding a wage increase of 29 per cent for a one-year contract. In their settlement, the air traffic controllers received an estimated 13 per cent boost.

The new contract for the machinists, running from November 1, 1966 to December 31, 1968, gave ICM members a wage increase of 12 per cent, effective November 1, 1966; an additional 5 per cent, effective November 1, 1967; and a final 3 per cent on July 1, 1968.

Packinghouse workers' strike ends after 10 weeks

A wage increase of 55 cents an hour, spread over a three-year contract, and fringe benefits worth 13 cents an hour were gained in the settlement terms that brought to an end in October, the 10-week strike by United Packinghouse, Food and Allied Workers (AFL-CIO/CLC), against Canada Packers Limited in nine Canadian cities. H. Carl Goldenberg, QC, acted as mediator.

The new agreement provided for an immediate increase of 25 cents an hour, retroactive to April 1, 1966; a further 20 cents, effective April 1, 1967; and a final 10 cents, effective April 1, 1968. The increases brought the basic wage up to $2.37 an hour, the average working out to $2.40 for men and $2.35 for women. The 13-cent portion of the agreement provides for better pension benefits, a guaranteed work week of 37 hours, and other fringe benefits.

It was estimated that the increase is the equivalent of 27 per cent over the three-year period of the contract, which also contains a cost-of-living clause providing for an additional one cent an hour for every 1.6 rise in the living cost index between April 1, 1968 and October 1, 1968.

U.S. Labor Department re-defines unemployment

The United States Labor Department adopted in January a new definition of unemployment that will be tailored to meet the man-in-the-street's idea of the word. It will affect the figures in the Department's monthly unemployment statistics by no more than one tenth or two tenths of a percentage point, stated Arthur M. Ross, Commissioner of Labor Statistics, in announcing the revision.

Those no longer counted as unemployed are:

—part-time workers of 14 and 15 years of age;

—students and persons who are not currently available for work; and

—persons with a job but not currently working, i.e., those on strike, even though they may be looking for another job.

To be counted as unemployed, a person must have been engaged in some job-seeking activity such as answering want-ads during the preceding four weeks.

The revisions stem from a report of a committee named by the late President John F. Kennedy in 1962 to study the adequacy of the unemployment data. The committee, consisting of representatives from the labour, business and academic world, was headed by Prof. Robert A. Gordon of the University of California.

Uncertainty continuing in railway dispute

Mixed reaction to the tentative settlement reached by negotiators for Canada's railway unions and company officials, aided by federal Government mediator H. Carl Goldenberg (L.G., Nov. 1966, p. 630), was evident as mid-January reports began to accumulate.

The general conference committee of the residual non-ops, decided to accept the proposals made by the federal Government mediator for a 24 per cent pay increase spread over a three-year period. The committee indicated it would issue a "strong recommendation" to its 55,000 members to accept the proposals.

The 23,000 members of the federated shop craft unions turned down the Goldenberg proposals, and planned to take its dispute to arbitration, as provided for in Bill C-230, which brought to an end the railway strike that began at noon, August 26, 1966, and ended on September 1, 1966.

Earlier, the 20,000 members of the Canadian Brotherhood of Railway, Transport and General Workers (CLC), decided that they would go to compulsory arbitration.

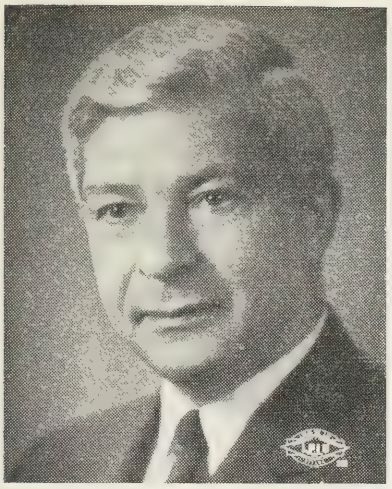
Mr. Goldenberg, commenting on the latest developments, said he was pleased to learn that the general committee of the residual non-ops had approved the settlement, and would submit it to the membership with a strong recommendation for approval.

Of the shop craft union decision, Mr. Goldenberg said it "fortified the position of those who favour compulsory settlement of labour disputes, that the trade union movement so vigorously opposes throughout the free world."

Criticism was levelled at the Canadian Brotherhood of Railway, Transport and General Workers (CLC) by Mr. Goldenberg for their reception of the proposed settlement. He said, "I cannot for the life of me see how they can expect to get more from arbitration than has been negotiated by the representatives of the remaining 100,000 railway workers through collective bargaining." His statement was made prior to the time when the federated shop craft union rejected the settlement offer.

At press time, indications were that arbitration proceedings for the two groups that have requested them might not get under way for three or four months.

PARLIAMENT



Bill C-251 to amend the Old Age Security Act to provide for the payment of a guaranteed income supplement to ensure a minimum monthly income of $105 to recipients of old age security, was introduced after lengthy debate and given first reading on December 5 (*Hansard*, p. 10747). The bill passed second reading on December 13 (p. 11085), and third reading on December 20 (p. 11432). Two attempts by the opposition to amend the bill were defeated. It was given the Royal Assent on December 21 (p. 11512).

Bill S-35, respecting the prevention of employment injury in federal works, undertakings and businesses—Canada Labour (Safety) Code (L.G., Aug. 1966, p. 429, Dec. 1966, p. 711)—was given third reading on December 21 (p. 11510) and received the Royal Assent on the same day (p. 11512).

Bill C-227, to authorize the payment of contributions by Canada toward the cost of insured medical care services incurred by the provinces pursuant to provincial medical care insurance plans (L.G., Sept. 1966, p. 499, Dec. 1966, p. 711) passed third reading on December 8 (p. 10882) and received the Royal Assent on December 21 (p. 11512).

Bill S-54, to amend the Canada Labour (Standards) Code to provide that an employee who works for more than one employer during a 30-day period shall be entitled to any paid holiday to which he would have been entitled if he had worked for only one employer during the period (L.G., Jan., p. 6) passed second (p. 10988) and third reading (p. 10994) on December 12. It received the Royal Assent on December 14 (p. 11147).

The appointment of Mr. Justice C. Rhodes Smith of the Court of Appeal of Manitoba as the industrial inquiry commissioner to inquire into the causes of the stoppage of operations in British Columbia ports was announced by the Minister of Labour on December 15 (p. 11149). He also announced that the commissioner would be assisted by two assessors: Capt. H. J. C. Terry, Vancouver, former president of Northland Navigation Company Limited; and Joseph Morris, Ottawa, Executive Vice-President of the Canadian Labour Congress.

Kalmen Kaplansky

—Photo by Thomas Studio (Ottawa) Ltd.

New director appointed to Canada Branch ILO

The appointment of Kalmen Kaplansky as Director of the Canada Branch of the International Labour Office, and special adviser to the Director-General, was announced in December by the Director-General of the ILO, David Morse. The appointment became effective on January 1. As Director of the Canada Branch, Mr. Kaplansky succeeds Arthur H. Brown, who retired in August 1965.

Mr. Kaplansky was until recently a worker member of the Governing Body of the ILO, and Director of the International Affairs Department of the Canadian Labour Congress. He became a member of the Governing Body in 1960, and has served three years as deputy member and three years as a titular member. His association with the ILO began in 1957, when he was a member of the Canadian Worker Delegation to the International Labour Conference.

Mr. Kaplansky has also been secretary of the CLC's National Committee for Human Rights. Other positions held by him include substitute membership of the Executive Board of the International Federation of Free Trade Unions, and substitute membership of the Canadian National Committee for UNESCO.

B.C. Government to eliminate overtime

Premier W. A. C. Bennett of British Columbia announced during a press conference at the end of September that his Government was taking steps toward doing away with overtime for the province's labour force.

All Government departments and crown agencies had been ordered to stop overtime, he said. Future contracts with the Government, including highway work, would have no-overtime clauses. Mr. Bennett stated that he was seeking the co-operation of labour leaders and of industry in eliminating overtime.

The action was taken after the federal Government had asked the provinces to show restraint as a means of helping to offset such manifestations as unemployment, tight money and inflation. The decision to eliminate overtime was "based on knowledge" gained after thorough study, the Premier said, but he refused to give details of the information gained by the study.

The Minister of Labour, he said, had been told to stop issuing overtime permits required by industry under provincial law. The Hours of Work Act makes it illegal for a long list of businesses and industries to work employees more than eight hours a day or 44 hours a week. Exemptions are, however, granted, by the Board of Industrial Relations.

After the Premier's announcement was made, businessmen expressed apprehension about its effects, but according to a press report that appeared about a month later, it seemed that although the Government's move had caused some confusion, its effects on the economy and on the normal operations of business and industry had been slight.

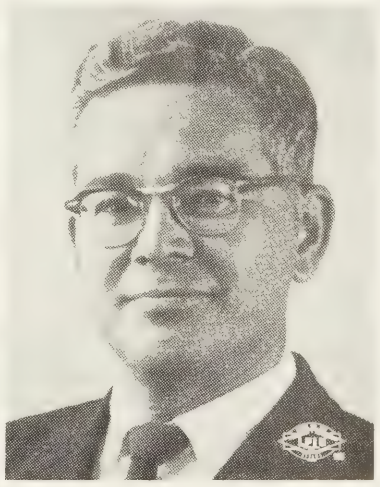
"The Premier seems to be asking us not to do something we seldom did anyway," one industrialist said. W. H. Sands, Deputy Minister of Labour, who is also head of the Board of Industrial Relations, said that permits to work overtime would continue to be granted "in extreme emergencies," but that the new order was being followed. The effect of the order on the lumber industry was reduced by the depression in the lumber market, which made it unnecessary to work overtime.

Organized labour generally approved of the order against overtime.

Labour-Management Council in P.E.I. names chairman

Rev. Malcolm McCuaig, minister of the Kirk of St. James, Charlottetown, P.E.I., has been appointed chairman of the newly-formed provincial Labour-Management Council, J. Elmer Blanchard, Minister of Labour, announced in November.

Mr. Blanchard said the Council will serve as a forum for the discussion of labour-management problems. It will study existing labour legislation and make suggestions for new legislation. In addition, the Council will study labour-management problems in other parts of Canada, and recommend and carry out educational and informational programs.



Industrial relations director appointed at McGill University

Dr. William A. Westley was appointed Director of the Industrial Relations Centre of McGill University on September 27. A professor of sociology, and former chairman of the University's Department of Sociology and Anthropology, he succeeds Prof. H. D. Woods, who was named Dean of the Faculty of Arts and Science in 1964.

Dr. Westley has done extensive research and has published several articles on the social effects of automation, military and police organizations, the behaviour of crowds, family organization and emotional health, and the use and abuse of violence.

As well as being a social science consultant for the Organization for Economic Co-operation and Development, and the Department of Psychiatry of the Jewish General Hospital, he is a research adviser to the Montreal Council of Social Agencies, Chairman of the Social Science sub-committee of EXPO's Advisory Committee on Science and Medicine, and a member of the Canadian Association of Sociology and Anthropology, and the American Sociological Association. He received his Ph.D from the University of Chicago.

At the time of making the announcement, the principal and vice-chancellor of the University, Dr. H. Rocke Robertson, said that Dr. Westley's appointment marked the introduction of a vigorous program of research into the problems of business and labour and the nature of modern industrial society.

Dr. W. A. Westley

Interest rate on NHA loans to fluctuate with bond yield

A new formula that will allow the maximum interest rate on National Housing Act loans to fluctuate in accordance with changes in the yield on long-term federal Government bonds was announced in the House of Commons by the Minister of Labour on November 22.

At the time of the announcement, the maximum interest rate on NHA loans was 6¾ per cent, and the Minister said that this rate was obviously "unrealistic under present monetary conditions, and an adjustment in the rate is required if approved lenders are to resume their leading role under the National Housing Act."

Under the new formula, according to the Minister's statement, "the NHA rate will be 1½ per cent above that applicable to federal securities, and adjustments to the nearest one quarter per cent will be made quarterly if bond yields increase or decline. Initially, and effective immediately, the rate of interest on home ownership and rental loans is established at 7¼ per cent."

The new rate will remain in effect until March 31, 1967, and after that the rate will be reviewed at the end of each subsequent quarter and will be set in accordance with the above-mentioned formula.

Mr. Nicholson said that under the old 6¾ per cent rate, there had been a "virtual withdrawal of private investment funds from the residential mortgage sector," and that this was seriously impeding the purchase of houses. Borrowers who had been able to obtain loans on the conventional market were being forced to pay 8 per cent or more. The Government had already provided more than $500,000 for direct lending by the Central Mortgage and Housing Corporation this year, and it could not "take up all the slack."

After the new rate was announced, the president of the Toronto Metropolitan Home Builders' Association said that a house financed by a 7¼ per cent, 25-year NHA loan would cost the buyer nearly $3,000 more than the same house would have cost before the change.

Lists French terms used in industrial relations

A comprehensive listing in French, with English supplements, of terms and expressions used in the field of collective bargaining, industrial relations and related fields in Canada, titled *Répertoire de termes et expressions utilisés en relations industrielles et dans des domaines connexes* (Index of Terms and Expressions Used in Industrial Relations and Similar Fields) has been compiled by the Economics and Research Branch of the Canada Department of Labour and is available from the Queen's Printer. (Price $4.50, Cat. No. L-31-967F).

Loans made for purchase of existing houses

Under an amendment to the National Housing Act, given third reading in the House of Commons on November 17, loans may be obtained for the purchase of existing houses, provided that the borrower spends a certain minimum amount on repairs or renovations.

During the debate on the bill, the Minister of Labour suggested that a minimum expenditure on such improvements might be about $1,000, and the maximum between $2,000 and $3,000. He said that at first the regulations governing such assistance would limit the amount of a loan by establishing a ceiling. Such loans were intended to help those who were not prepared to buy new houses costing $14,000 or $15,000.

The Minister said that loans under the amendment would be restricted to people who both occupied and improved the houses they bought. "We are not going to make national home loans for the purpose of assisting people in buying existing housing for resale," he said.

Economic ills studied at Maritime conference

An increase in productivity, use of computers, and better qualified top-level management, were suggested as possible answers to Maritime economic problems at a productivity conference in Halifax October 24 and 25, 1966.

John J. Deutsch, Chairman of the Economic Council of Canada, told more than 200 delegates attending the two-day conference on "Productivity Through New Technology" that, although all regions in Canada have benefited from the prolonged business expansion that began in 1961, the incomes gap between the Atlantic region and the rest of Canada has not been narrowed.

"If incomes in the Atlantic provinces are to reach the national average, productivity advances in this area must be even more rapid than in the economy as a whole, and this faster rate of progress will have to be sustained for quite some years to come."

Gerald G. Fisch, a partner in a management-consultant firm of P.S. Ross and Partners, said that Maritime firms had "a long way to go" to catch up with current management techniques. He blamed the narrow outlook and regional thinking of Maritime firms, especially the smaller businesses, and said that they had to develop a global outlook to attract new industries and to survive. A lack of top-calibre management, apathy, and an unwarrented sense of complacency were also cited as factors inhibiting growth.

In the field of computers, Kenneth R. Lavery, another partner of the Ross firm, said that "the new breed of manager" is prepared to use every modern technique available to meet the challenge of the changing world.

Co-chairmen of the conference were A. R. Harrington, chairman of the Nova Scotia Voluntary Planning Board, and Dr. L. Shemilt, chairman of the New Brunswick Research and Productivity Council.

Two groups merge to form Public Service Alliance

At a special convention of the 33,000-member Civil Service Association of Canada, held in Ottawa early in November, delegates voted in favour of a merger with the 80,000-member Civil Service Federation of Canada to form the Public Service Alliance of Canada; and a few days later the merger became an accomplished fact.

One of the first acts of the delegates at the founding convention of the new organization was to vote almost unanimously to apply for affiliation with the Canadian Labour Congress. Only one delegate out of the 350 who voted opposed the measure. For their affiliation, members of the PSAC will pay a contribution to the CLC of 10 cents per capita. It was reported that the accession of the PSAC to the Congress would swell the latter's membership from 1,300,000 to 1,415,000.

The founding convention also supported a budget that was expected to necessitate an increase in the dues, which under the CSAC had been $1.50 a member a month, to about $3 a month for each member of the new body. The salary of the national president was fixed at between $20,500 and $24,750 a year. Salary ranges for the two executive vice-presidents were set at $17,270 to $20,802. One of the items in the budget provided for the setting up of a $120,000 reserve fund to meet "unexpected" expenses that might crop up in connection with the new collective bargaining process.

Lloyd Merritt, 65, heads Toronto teamsters

Lloyd Merritt was elected President of the 5,300-member Toronto Local 938 of the International Brotherhood of Teamsters on November 23. He succeeds Kenneth McDougall, who was president for nine years. Other officers elected were: Charles Thibault, Vice-President, and Bernard Cummings, Secretary-Treasurer.

Mr. Merritt, whose first union association was as a member of the One Big Union when he was a logger in British Columbia in the early 1920s, started as a truck driver and later headed his own dry-cleaning business. His first contact with the Teamsters came when he returned to Canada from California in 1955 to take a job as a battery builder at Kingsway Transports Ltd. He became a shop steward and, in 1958, was appointed to fill a vacancy on the executive board during a major shakeup within Local 938. That same year he was elected secretary-treasurer.

B.C. rail strike ends after 25 days

A 25-day-strike by 387 union employees of British Columbia's provincially-owned Pacific Great Eastern Railway, which affected 1,600 non-striking employees, ended late in October. Representatives of the Federation of PGE Employees entered into an agreement that will provide wage parity with employees of the national railways, and will guarantee a 50-cent-an-hour minimum wage increase for tradesmen and a 40-cent hourly raise for non-tradesmen. A provincial grievance procedure will be established also, and there will be a study of contract welfare benefits.

Conference proceedings now published

Collective Bargaining and the Professional Employee, a compilation of the proceedings of a conference that took place in Toronto, December 15 to 17, 1965 (L.G., Mar. 1966, p. 82), is now available in book form.

Included in the book are "Arguments for and Against Collective Bargaining by Professionals," "Current 'Collective Bargaining' Practices in the World of the Professionals," "Collective Bargaining and the Professional Employee in Quebec," and some "Problems and Pitfalls from the Legal Point of View."

Published by the Centre for Industrial Relations, University of Toronto, the book may be obtained from there for $2.50 a copy. Prof. John H. G. Crispo, Director of the Centre, edited the volume.

Marriage bar lifted in Australian Civil Service

Women in the Public Service of the Commonwealth of Australia who marry will henceforth be allowed to retain the status of "permanent" employee. The marriage bar was lifted in October when Parliament adopted Public Service Bill (No. 2) 1966.

Until passage of the Bill, married women—totalling about one third of all women workers in the Public Service—were classified as "temporary" employees. From now on, the woman who marries will not have to forgo her "permanent" status, and married women will be eligible for appointment to the Service.

Granting "permanent" status to married women, although designed to guarantee equality between male and female employees, necessitated establishing special leave for childbirth. To safeguard the efficient operation of the Public Service, therefore, regulation-making power was included, and provision made for obligatory maternity leave of a minimum of twelve weeks, the period specified in International Labour Organization Convention 103 on Maternity Protection (Revised 1952), with further allowance for absence of up to six months at the option of the employee. At her own discretion, the woman may use any accumulated sick leave, recreation leave or furlough entitlements to cover the absence or some part of it.

Superannuation benefits were simultaneously extended to permit married women to commence or continue as contributors. Amendments to the Superannuation Act will enable married women workers to participate equally with male contributors in provisions for retirement benefits and benefits for dependants. The only distinction between benefits for male and female contributors will be that the widower of a deceased female contributor will qualify for pension only if he was wholly or substantially dependent upon her at the time of her death.

Formerly, a section of the Public Service Act provided for a "marriage allowance" to be paid to any female retiring after five to 15 years of permanent service. The new legislation provides for continuance of payment of this allowance to a woman who retires upon marriage. Having been conceived as a form of compensation for the loss of a career, however, the allowance will, with the lifting of the marriage bar, be eliminated for those who remain in the Service.

Canada Labour Department opens consultation office

News that a labour-management consultation office would be opened by the Canada Department of Labour in Edmonton on January 1, 1967 was announced by Bryce S. Mackasey, Parliamentary Secretary to the Minister of Labour, at the opening session of a two-day Alberta labour-management conference in that city in November. Mr. Mackasey said that Ron Mattey, previously attached to the Winnipeg office of the Labour-Management Consultation Branch of the Department, would be the head of the new Edmonton office.

Offices of the Labour-Management Consultation Branch will also be opened in Saskatoon, North Bay, Halifax, Saint John, and Chicoutimi. The opening of the new series of offices will make it necessary to double the staff of the branch.

"This branch of the Canada Department of Labour is dedicated to bringing labour and management together to discuss any problems of mutual concern, and to exchange ideas on this continuing basis, preferably between top management and the union executive," Mr. Mackasey told the Edmonton meeting.

Collective Bargaining Review bound volume available

All monthly issues in 1966 of the LABOUR GAZETTE supplement, *Collective Bargaining Review,* are to be made available in a plastic-coil-bound volume, *Collective Bargaining Review 1966.*

The volume may be obtained at a cost of $2.50 from the Publications Division, Information Services Branch, Department of Labour, Ottawa. Make remittance payable to the Receiver General of Canada.

Representation vote wins 8,000 members for CUPE

In a key representation vote that gave it sole bargaining rights for Quebec Hydro employees, the Canadian Union of Public Employees (CLC) defeated the Quebec-based Confederation of National Trade Unions in October and won an additional 8,000 members. CUPE, with its 108,000 members, is the second laregst body in the Canadian Labour Congress. The loss is the first major upset for the CNTU in its attempt to become the main voice of labour in Quebec.

Prices, Productivity and Employment

Economic Council of Canada says the most pervasive and recurrent conflict in modern industrial economics is that between the goals of full employment and reasonable stability of prices

The most pervasive and recurrent conflict in modern industrial economics has proved to be that between the goals of full employment and reasonable stability of prices, the Economic Council of Canada says in its Third Annual Review, "*Prices, Productivity and Employment*," published in November.

The Council calls reconciling reasonable price stability with high employment and other basic economic goals "the fundamental challenge." Many countries, it says, "have grappled with the problem; none as yet appears to have arrived at a definitive solution. We have not ourselves any magic cure or simple formula to propose, but only a combination of tried and new approaches, shaped as far as possible to what seem to be the significant peculiarities of the Canadian economy."

The main measures for keeping control of prices and employment, or the "big levers," are fiscal and monetary policy. The fundamental reason for serious inflation is the excessive pressure of total demand for goods and services, and heavy unemployment is the result of a substantial deficiency of total demand.

"Regardless of the nature or size of the problems being experienced by the Canadian economy, they must always be related to what is happening to total supply and demand, and the setting of the main policy levers. Thus, the correct management of the supply of money in relation to the over-all state of the economy is at all times a matter of central importance. There is no substitute for it, and it remains *par excellence* the classic defence against severe inflation. Similarly, there is no substitute for broad fiscal policy, defined as the management of total government revenues and expenditures with a view to influencing aggregate demand in the economy.

"There are no other policies that can take the place of a well co-ordinated use of these two instruments; their proper setting is always of basic significance. We shall, in due course, be advocating certain complementary policies, but these are to be seen as allies and auxiliaries rather than substitutes."

External Influences

In the consideration of basic demand and supply conditions, and the operation of monetary and fiscal policies affecting such conditions, the crucial importance of external economic influences must be recognized. "International economic developments have a powerful, and sometimes overwhelming influence on Canadian economic developments." This is particularly true of what is happening in the economy of the United States, the influence of which is so strong as to limit seriously the measures that Canada can take to moderate the effect on the Canadian economy of unfavourable developments that take place in the neighbouring country.

The records of the past 50 years, for example, show that there has been little divergence between the movement of prices in Canada and the movement of prices in the United States. "Given these conditions, it is clearly not realistic for Canada to aim at a price performance that is very different in either an upward or [a] downward direction from the parallel performance in the United States. . . .

"It must certainly not be concluded, however, that Canada is in any position to let nature take its course in the matter of prices and costs." The forces that in the long run keep prices in Canada broadly in conformity with those in the United States may operate smoothly or roughly, "with periodic balance-of-payments crises and harsh corrective measures. Policies for price stability are needed to ensure that price-level conformance takes place as much as possible by the first route, i.e., smoothly.

"Moreover, even if parts of the general Canadian price level are largely determined abroad, and are thus not very susceptible to influence from domestic policy, other parts are much more susceptible. On them, domestic policy has real potential bite."

Foreign Trade

The importance of foreign trade to the Canadian economy renders it an "open" one; and, although "life is not simple in an open economy . . . there are valuable compensations. In the field of manufactured goods especially, where world prices do not gyrate as they do in many primary commodity markets, the pressure of foreign competition is perhaps the greatest single long-run force working in favour of reasonable stability in the general Canadian price level. The strength of this international discipline is indicated in the greater stability of prices of goods moving in international trade in relation to other prices. . . . It is clear that

nothing quite compares with foreign competition as a limitation on the exercise of market power."

This dependence of Canada on foreign trade makes it specially important that Canadian industry should remain competitive with foreign industries and that her foreign trade should be kept approximately in balance. But "the concept of Canadian competitiveness is not something which can be tied to a particular target figure for the external balance on current account, for . . . fluctuations in this balance have at times a highly desirable adjusting role to play in the Canadian economy—e.g., by expanding or contracting the new flow of foreign goods and services into Canada in such a way as to exert a corrective influence on situations of overabundant or deficient demand.

"A good state of international competitiveness for Canada means rather that, over the long run, the growth and development of the Canadian economy should, to a considerable extent, be built around a large 'exposed' sector of industry, well capable of meeting the disciplines of international markets.

"Every effort should be made to ensure that the interests of this sector are not endangered by persistently greater inflationary pressures in Canada than in the United States and other industrial countries, or by a kind of price and cost performance in 'unexposed' parts of the economy that puts a significant and persistent squeeze on the position of industries facing substantial foreign competition. The avoidance of such tendencies will promote simultaneously the goals of reasonable price stability and a viable balance of external payments."

Growth of Productivity

The Council gives a warning against seeing in increased productivity—real output per person employed—the whole answer to the problem of how to reconcile high employment and rapid economic growth with reasonable price stability. It is a mistake to suppose that all that is needed to maintain price stability and international competitiveness is to keep down costs by ensuring that the rise of wages, profits and other incomes does not exceed the growth of productivity. This view takes no account of the way in which prices of Canadian exports are to a greater or lesser extent fixed in international markets.

For example, if the world price of copper increases sharply, and the Canadian price with it, "someone's income will have to rise in excess of the relevant productivity gain, whether this be computed on a nationwide or an industry basis. If many of these irresistible breakouts occur, they will be disturbing, to say the least, to those whose incomes are being kept in step with productivity gains.

"Other embarrassments emerge in sectors such as education [teaching], where rapid and sustained productivity gains, at least as conventionally measured, are virtually impossible to obtain."

Price Stability

A rigid notion of a connection between prices and productivity also leaves out of account the function of prices "as an allocator of resources in the economy." Although it is recognized that the price system of actual performance falls short of the ideal, yet "with all its lags and imperfections . . . and with its persisting virtues, including the very pragmatic ones of administrative decentralization and semi-automaticity, the price system continues to be the principal resource-allocation mechanism over much the larger part of the Canadian economy.

"This being the case, it remains highly important to conceive the goal of reasonable price stability in a way that makes full provision for the movement of relative prices and the best possible performance of the allocative function. Indeed, as will be argued, improving the discharge of this function is basically one of the most reliable ways in which greater price stability at high employment can be promoted."

In referring to the need for reasonable flexibility in prices, and to the way in which this meant that some incomes would out-distance productivity gains, the Council touched upon the question of shifts in the general sharing-out of industrial income between wages and salaries, on the one hand, and profits on the other. Although the movement of the incomes of groups and individuals might deviate from the general trend, "over-all conditions are not to be denied either," it said.

Although shifts in the broad distribution of income between labour and capital do take place, "it is a most intriguing and relevant phenomenon that in the long run the broad sharing-out of industrial income between wages and salaries on the one hand and profits on the other exhibits a fair degree of stability. This has been observed and commented upon in a large number of countries, including Canada. Over the course of the short-term business cycle, the struggle visibly ebbs and flows, with the share of profits retreating as economic expansion approaches a peak and gives way to recession, then advancing again as a trough is reached and general expansion resumes; but over the longer run, the battle for income shares turns out to be much more of a saw-off than the tumult and the shouting might lead one to expect. . . . But while the full explanation remains debatable, the empirical fact is well established that longer-run shifts in wage/salary and profit shares, to the extent that they occur at all, tend to be small and slow."

Long-Term Stability

This long-term stability in the distribution of income leads to the important conclusion "that neither labour nor management need feel its position *vis-à-vis* the other threatened by a pattern of expansion in the Canadian economy characterized by a closer relationship between the growth of productivity and the growth of money incomes than has typically prevailed in the past. . . ."

This conclusion is related to the "much discussed question of 'parity' between incomes paid for similar kinds of work in similar industries in Canada and the United States. . . .

"Given the fundamental nature of the factors accounting for the income gap, it should be clear that a great deal remains to be done, on a variety of fronts, before the Canadian economy as a whole can be expected to enjoy effective parity of average *per capita* income with the United States. A general attempt to bypass or leapfrog essential parts of the catching-up process would be bound to lead to an offsetting adjustment of some kind through the balance of external payments and the domestic price level. If one could imagine parity of money income for every Canadian citizen being decreed by order in council at 10 o'clock in the morning, one could equally well imagine parity of real incomes being effectively repealed in the foreign exchange market before three o'clock the same afternoon."

This general statement, however, is not inconsistent with the fact that there are some people in Canada whose incomes are about on a par with corresponding incomes in the United States. "It need not be a cause for undue alarm if parity sometimes figures as an argument in wage negotiations and in the publicity surrounding them. Arguments are one thing, actual settlements another. . . . The important thing to realize is that, for the Canadian economy as a whole, income parity with the United States cannot possibly be achieved through collective bargaining alone. Many other things have to be accomplished—above all, a productivity gap has to be closed, and this will not be done overnight. . . ."

Regarding the effect of unions and collective bargaining on the level and

structure of wages, the Council says that, although this effect might seem to be obvious, "when it has been carefully examined in the light of all the relevant and available statistical data, the independent influence of unions and collective bargaining on wages has proved surprisingly elusive and difficult to distinguish from the broader economic forces affecting costs of the types discussed in [the report]. Neither in Canada nor elsewhere have scholars achieved a broad consensus of view concerning this subject."

On Essential Control

In spite of what has been said about the limitations of the connection between changes in prices and productivity, the Council says, "A rapid and sustained increase in productivity does many good things. It damps down price increases, it maintains or improves international competitiveness, and it is the essential basis for a strong and continued growth of real income per head.

"It is nevertheless difficult to lay down broad generalizations about the inherent relationship between economic growth and the rate of change in the general price level. . . ." The historical experience of industrialized countries shows that rapid and well sustained economic growth may occur under conditions of strongly rising prices, moderately rising prices, comparative price stability, or moderately declining prices (as in the United States during much of the nineteenth century.)

"It is, however, possible to say a good deal, on a much more particular and down-to-earth basis, about the relationship between economic growth and price and cost developments as it exists today in Canada—an unusually open, North American economy, making its way through the latter half of the 20th century.

"Such an economy, more subject than most to the winds of change that periodically sweep the broad landscapes of world trade and investment, has a special interest in staying out of unnecessary, self-generated trouble of a type likely to upset the balance of its policy goals and produce a serious downgrading of its growth objective. This, it seems to us, is the essence of the growth case for aiming at reasonable price stability and strong international competitiveness for Canada. . . ."

In Canada, the main threat to sustained economic growth is the occurrence of periodical crises that lead to a violent shift in the emphasis of policy on one or two objectives only. "There is always the danger of an excessive and exclusive emphasis, at one time on employment and at another time on price stability. This is why, in the interests of economic growth as well as for the other important reasons which we have stated, we believe that the pursuit of reasonable price stability and strong international competitiveness—not to the exclusion of all else, but subject to the more challenging requirements of a balanced and continuing relationship with other economic goals—merits the best effort and attention of all Canadians."

Construction Industry

The Council singled out the construction industry for special attention on account of its "unique status as a de-stabilizing element."

"Under post-war conditions, construction spending has shown special and unique potential for aggravating, or even inducing instability in the Canadian economy, with consequent repercussions on general costs and prices. . . ."

Several features of the industry contribute to its instability and its disturbing effect on the economy: its great size; the extreme volatility of the demand for construction; and the great swings in spending on construction by governments.

Regarding the disturbing effect of wide variations in government spending, the Council said, "It is striking to observe that direct construction outlays by all levels of government rose by only 1 per cent between 1963 and 1964, but in the period 1964 to 1965 the rise in government construction outlays was no less than 30 per cent. More generally, in each of the three periods of major expansion in construction activity since 1950, government construction outlays have reinforced and aggravated the excessive demand pressures on construction.

"Only during the short-lived 1958-60 cyclical expansion, when residential and non-residential construction outlays were declining, did government construction outlays move counter to the trend in the other two areas of construction demand. Moreover, through each of the recession phases since 1950 (1953-54, 1957-58, 1960-61), government construction outlays have declined, adding to the weakness of demand in other sectors of the economy. . . .

"It is at the federal and provincial government levels that such instability has been most pronounced. The longer-term rise in municipal government construction has been relatively steady. These conclusions apply to new construction both by government departments and by government-owned enterprises. . . ."

One of the Council's main conclusions was:

"The problem of periodic strains, excess demand, and strong price and cost pressures in the construction sector calls for special treatment. A major requirement is for a smoothing of the hitherto needlessly de-stabilizing growth pattern of construction spending by governments and other public bodies. This will necessitate, among other things, the development of better procedures for longer-term planning and co-ordination of government capital outlays, and the provision of a lead and an example by the federal Government both in the handling of its own capital programs and in whatever grants and shared-cost capital development programs are undertaken with the provinces and their municipalities."

"Extremely rapid increases in construction demand cannot easily be matched by a correspondingly rapid adjustment in supply. In these circumstances, certain types of supply bottlenecks are especially likely to appear—for example, in skilled labour. . . ."

"It is also significant, in the context of cost and price performance, that the construction industry is not subject to any important degree of foreign competition. Generally speaking, the final product of the construction industry cannot be moved across international boundaries. . . . Pricing practices therefore tend to be less affected by international influences than those of many other Canadian industries. It is domestic demand and supply forces that, by and large, set prices and costs in construction in Canada.

"In this situation, it is not surprising that the construction industry sometimes experiences greater-than-average cost and price increases. This raises the danger that it may sometimes act, at least partially, as a 'pattern setter' for other industries. . . ."

Food Prices

The cost of food does not bulk as large in the family budget as it did in earlier periods, when most of the population "lived much closer to the subsistence line." But, in recent years, it has accounted for about 22 per cent of all consumer expenditure in Canada, and it remains "a highly important category of consumer expenditures, especially for low-income families and individuals."

Food prices in September 1966 had risen 48 per cent since 1949, compared with a rise of 45 per cent in the consumer price as a whole; but the increase in the cost of food to the consumer has risen considerably more than the prices received by the farmer. The share of the consumer's dollar spent on food that went to the food-processing industries (including wages, salaries, packaging, advertising and certain other expenses) in-

creased considerably between 1949 and 1959, but declined slightly from 1959 to 1963.

As a result of this, "the share of the retail food cost accounted for by the basic farm product has declined from nearly 60 per cent in 1949 to about 40 per cent in 1965. Retail food prices in 1965 were 36 per cent above their 1949 level. Farm prices on the other hand, were at a level only about 10 per cent above 1949. Thus, it is clear that, over this period, most of the rise in retail food prices was occasioned by increases in costs beyond the farm. Since early 1965, however, an important factor in the 6 to 7 per cent rate of rise in food prices has been rising prices at the farm."

Consumer Services

Since 1949, the cost of consumer services has risen much more than the general consumer price index. "It has often been suggested that prices in this sector are related to limited opportunities for productivity improvement, but serious problems of measurement of both output and input in this sector make it difficult to come to a decisive assessment of this matter at this time. A further factor of some importance is that the production of most services, in contrast to that of many goods, is not subject to any great degree of foreign competition. Indeed, the markets for some services, being localized, fragmented and regulated, are not highly competitive even on a domestic basis.

"Service prices have risen more rapidly in Canada than in the United States in recent years. However, the average level of such prices still appears to be below the corresponding U.S. level."

Collective Bargaining

The Council's comments on the influence of unions and collective bargaining on wages have already been mentioned, but it also dealt briefly with some other aspects of collective bargaining.

Agreements between a single union and a single employer continue to dominate the collective bargaining scene in Canada, and agreements of this kind affected about two thirds of all employees covered by a recent study by the federal Department of Labour, in which the Council participated. "There has been no strong shift, on balance, towards more centralized types of bargaining—for example, between associations of unions on the one side and associations of employers on the other. . . .

"One very noticeable trend has been a lengthening of the term of collective agreements, which now run more than two years on average, compared with one and one third years in 1953-55. This lengthening has occurred in periods of economic expansion; in recession periods such as 1957 and 1960, the average term of agreements has declined or flattened out."

In commenting on wage increases obtained under collective bargaining, the Council said, "The peak rate of increase in base rates for the whole of the period since 1953 was reached in the second quarter of 1966. The figures for this quarter include the unusually large settlements on behalf of Seaway workers and St. Lawrence River longshoremen. To a greater extent than in previous economic expansions, large settlements in the public sector of the economy have played a prominent role in the general evolution of collective bargaining during 1965 and 1966.

Normally, bargaining in Canada is not characterized by strong national pattern setting. . . . But large, highly publicized settlements to which governments are parties inevitably have somewhat more impact on the climate of collective bargaining across the country."

Public Sector Wages and Salaries

"The rapid expansion of the public sector, together with the rapid development of collective bargaining in that sector in recent years, have considerably enlarged the role of governments in wage settlements. These developments make it mandatory that governments as employers become clearly aware of the influence which wage decisions to which they are a party may have on the economy, especially at a time of rising prices and costs. . . .

"The constraints of the market place which require a private employer to maintain competitive costs so as to ensure the very existence of his firm do not apply to governments. This distinction becomes important, particularly when a senior government is involved in a wage settlement that may come to be regarded as a pattern-setter for wage settlements in private sectors of the economy. This may be especially true of the federal Government, which is by far the largest employer in Canada.

"It is imperative that governments, and particularly the federal Government, should develop and adhere to certain basic principles and criteria relating to wage and salary policies and collective bargaining in the public sector. . . ."

The Council takes the view that an incomes policy for Canada involving the use of "guidelines" of the kind that the Government of the United States has tried to apply would be unlikely to meet with much success in Canada. It does not, in fact, attribute to such policies any great effectiveness in other countries, although it says that "Foreign experience generally suggests that incomes policy may in certain circumstances have some beneficial effect, if only a temporary one, on the reconciliation of price and employment goals."

Such policies have the best chance of success in a "unitary state with strong central powers and a tradition of considerable governmental intervention in the detailed functioning of the economy," in which there are few constitutional or other impediments to the government's resorting, if necessary, to direct controls. It would also be necessary for private economic power to be fairly concentrated within the country and in both union and management institutions, and there would have to be a general willingness on the part of such institutions to co-operate in making such a policy effective.

"It will be seen that, by these criteria, Canada is very far indeed from being a favourable environment for incomes policy," the Council remarked. But, having recommended against a formal incomes policy as a means of bringing about "an improved reconciliation of high employment and reasonable price stability in Canada under normal peacetime conditions," it went on to discuss "a more effective framework of policies and programs than now exists to accomplish the same end." Although these proposals might lack the "initial surface glitter of an incomes policy, they will wear better in the long run."

The measures recommended by the Council included:

—properly co-ordinated use of fiscal and monetary policies, which has already been referred to as being, in the Council's opinion, of fundamental importance;

—manpower and other supply policies to improve resource allocation and open economic bottlenecks, policies to stabilize the growth of construction expenditures, and so reduce the pockets of excess demand that periodically develop in that sector;

—policies to achieve better co-ordination of expenditure planning and fiscal policy by all three levels of government;

—the laying of a groundwork for a fresh policy approach to the problem of market power;

—policies to improve productivity growth and facilitate adjustment to technological and other change;

—and policies relating to the government's increasingly important role as

Continued on page 118

Industrial and Geographic Distribution of Union Membership in Canada in 1966

Union membership in Canada at the beginning of 1966 totalled 1,736,000 according to survey returns received by the Economics and Research Branch of the Department of Labour from national and international union headquarters, central labour congresses and independent labour organizations.

The 1966 membership represents an increase of 147,000, or more than 9 per cent, over the 1965 figure; this was the highest percentage increase in union membership in any year since 1952.

The data obtained from the survey were published in the 1966 edition of *Labour Organizations in Canada,* a handbook that contains statistical tables on union membership and a comprehensive directory of labour organizations, with names of their principal officers and publications, and the distribution of their locals. The statistical data contained in the handbook are Canada-wide totals, broken down by congress affiliation, and by type and size of union.

The tables on the following pages supplement the information contained in *Labour Organizations in Canada* by showing the distribution of union membership in Canada by industry, by province, and by labour market area. The tables are based on information obtained in a separate survey of individual local unions. This survey, carried on at the same time as the survey of union headquarters, requests individual local unions across the country to report the total number of their members, and the industry and location in which all or most of them are employed.

Distribution By Industry

Table 1 gives a distribution of union membership by industry on the basis of the DBS Standard Industrial Classification (1960). The data deal primarily with the "major group" level of industry. In those classifications for which additional useful detail was provided, care has been taken to adhere to combinations of recognized industrial sub-groups. For the railway industry, which is not further sub-divided in the standard classification, sub-totals are provided to show how union membership is divided between the operating and non-operating sectors.

The information in Table 2 supplements that provided in the first table. It lists, in alphabetical order, the names of international and national unions, and independent local organizations that account for more than one-tenth of the total union membership within the industry groups. All organizations active within any particular industry group are thus not necessarily shown, but only those having more than 10 per cent of the organized workers in the group.

Geographic Distribution

In Table 3, union membership is shown on a provincial basis, and in Table 4, by labour market area. The boundaries of the labour market areas dealt with in Table 4 are broader than those of the centres for which the areas are named. In general, labour market areas correspond to the areas served by Canada Manpower Centres. In some cases a labour market area corresponds to the area served by two or more Canada Manpower Centres. These composite areas are identified by an asterisk, and the areas they comprise are listed in the Appendix to Table 4.

Nine per cent of total union membership in Canada was reported by local unions whose members were dispersed throughout several locations in different areas or provinces. These locals and their membership have been classified under "two or more provinces" or "two or more areas" in Tables 3 and 4.

There were active in Canada at the beginning in 1966 more than 7,600 local unions with a total membership approaching one and three quarter million. Survey returns were received from a large proportion of these locals; the relatively small number which did not reply to the survey is shown in Tables 1 and 3. No corresponding entry for these locals is given in the membership column, since their membership is not known. An adjustment entry indicates the difference between the total membership based on the union headquarters survey, and the membership reported by the responding locals.

The uneven quality of the basic source data, and the practical difficulties inherent in the processing of the returns, necessarily reduce the accuracy of the results. Therefore the statistics presented here indicate only in a broad and approximate way the industrial and geographic distribution of organized labour in Canada.

The information for this article was obtained by the Labour Organizations Division of the Economics and Research Branch from local union secretaries. Their co-operation is gratefully acknowledged.

Labour Relations Legislation in 1966

Parliament enacts two emergency statutes

Six provinces amend their labour relations laws

In 1966, Parliament enacted two pieces of emergency legislation—the St. Lawrence Ports Working Conditions Act, and the Maintenance of Railway Operation Act, 1966.

Six provinces—Newfoundland, Prince Edward Island, New Brunswick, Ontario, Manitoba and Saskatchewan—amended their general labour relations laws, with Saskatchewan, Ontario and Manitoba making the most extensive changes.

Ontario also amended the sections of the Public Service Act dealing with negotiating procedures for government employees, and Saskatchewan passed the Essential Services Emergency Act, 1966.

FEDERAL

St. Lawrence Ports Working Conditions Act

The enactment of the St. Lawrence Ports Working Conditions Act resulted from a contract negotiation dispute between the Shipping Federation of Canada Incorporated and the Montreal, Trois-Rivières, and Quebec City Locals of the International Longshoremen's Association.

The previous agreement between these two parties had expired on December 31, 1965. During the negotiations for a new agreement, the matters in dispute concerned not only monetary items, but the question of job security. A conciliation officer was appointed on April 4, 1966 and reported to the Minister on April 15 that there was considerable unrest in the port of Montreal, and that there was the likelihood of a wildcat strike. He recommended that a conciliation board be established immediately. That same day, the Minister notified the parties of his intention to appoint a conciliation board, and he asked them to nominate their representative members to the board.

On April 19, a wildcat strike occurred in the port of Montreal and lasted two days. In his statement to the House, the Minister said that this strike was "ostensibly over the automobile parking privileges granted the longshoremen at that port." He added, "In fairness, Mr. Speaker, I might say that there probably were other reasons, such as the delay factor in making progress with the negotiations."

The Shipping Federation nominated its member on the conciliation board on April 20, the ILA nominated its representative on April 25, and the two representative members were formally appointed on April 29. On May 10, the representatives of the two parties agreed upon Mr. Justice Claude Prevost as the third member and chairman. That same day, a second wildcat strike took place, after which the Shipping Federation took the position that the union members should call off the illegal strike as a condition precedent to the continuation of the conciliation proceedings.

Because of the attitudes of the parties, the conciliation board was not able to deal with any of the issues in dispute, and so reported to the Minister on May 17.

On the following day Judge René Lippé was appointed as a mediator, held several meetings with the parties, and submitted interim reports between May 18 and June 13. A wage settlement was negotiated on June 14 after several Cabinet Ministers and the Prime Minister had intervened.

In his final report, submitted on June 23 and tabled in the House on July 4, Judge Lippé recommended that, in view of the basic problem at the root of the negotiations between the Shipping Federation and the ILA—the money package offered by the Federation, and the increased productivity that it expected in return—an Industrial Inquiry Commission should be established to inquire into working conditions at the three ports, and that the conclusions of this Commission should be implemented by legislative enactment at the earliest possible date.

The first step taken by the Government to implement Judge Lippé's recommendations was taken on June 23, when Dr. Laurent Picard, associate director of Ecole des Hautes Etudes Commerciales of the University of Montreal, and Director of the Business Administration Department, was appointed Commissioner to examine the changes in working conditions proposed by the Federation, and the job security issue put forward by the union.

Further implementing Judge Lippé's recommendations, Parliament passed the St. Lawrence Ports Working Conditions Act on July 14. The Act provides that, when copies of the report of the Commission are furnished to the Shipping Federation and the Union, each collective agreement between them is to be amended by the incorporation of the conclusions of the Commission respecting the following matters:

(a) the size and make-up of work gangs employed in longshoring and related trades at the Port to which the collective agreement applies, the sling loads used in loading and discharging operations at the Port, the strapping of cargo at the Port, and the use of other equipment and methods affecting productivity in loading and discharging operations at the Port, including receiving and delivering cargo, consistent with the health and safety of longshoremen and other persons engaged in such operations;

(b) the calling up and recalling of men employed in longshoring and related trades at the Port; and

(c) the safeguarding of job security, having regard to other changes recommended in the Commission's report, of members of the ILA in good standing on June 1, 1966 who qualify in the calendar year 1966 for welfare benefits under the Shipping Federation of Canada—ILA Health and Welfare Plan, and who earn their livelihood wholly or mainly in longshoring and related operations at the Port, and other members of the ILA in good standing who, in the opinion of the Commission, specially merit the safeguarding of their job security.

The Act makes it quite clear that the Commission's conclusions are to be set out in such form as will enable their

incorporation into each of the applicable collective agreements. The parties will, however, have the right to vary or amend any of the terms and conditions of the agreement.

The Maintenance of Railway Operation Act, 1966

The Maintenance of Railway Operation Act, 1966, was passed by Parliament to bring to an end a legal strike called by the unions representing the non-operating employees of the railways, and about 15,000 operating employees represented by the Brotherhood of Railroad Trainmen, (L.G., Nov. 1966, p. 630).

Collective agreements covering these employees had expired on December 31, 1965. Negotiations for new contracts were not successful, and five conciliation boards were established. Three dealt with the non-operating employees who had previously bargained as a single unit; two, presided over by Mr. Justice F. Craig Monroe, were concerned with two groups of non-operating employees representing about 72 per cent of the total; one, presided over by the Hon. J. C. A. Cameron, was concerned with about 20,000 workers represented by the Canadian Brotherhood of Railway Transport and General Workers. The two other boards, both with Judge Walter Little as chairman, were concerned with the dispute between the Brotherhood of Railroad Trainmen and the Canadian National Railways and the Canadian Pacific Railway Company.

The reports of the first two boards were received on July 4; the third board reported on August 10, and the other two boards on August 12.

The decision to strike was reached on August 22, and the strike was called for August 26, causing a complete stoppage of railway and subsidiary services. Parliament was recalled from summer recess to meet on August 29.

Introducing the emergency legislation, the Prime Minister stated:

> Two alternatives faced the Government, as they faced the country. We as a Government could have abided by by the ordinary law and allowed the strike to continue until the parties finally came to an agreement on their own with all the assistance the Government could give them. Or Parliament could be asked to intervene on the ground that a promulgation of the strike would do such great harm to the public interest, including the interest of the parties to the dispute, as to constitute a national emergency which justified a departure from ordinary practice and law.
>
> We had no difficulty in deciding that it was our duty as a Government to follow the latter course as now being necessary to restore an essential public service with the least possible delay, and to get the railways moving again with the least possible interference with the process of free collective bargaining. For this purpose, we hope that, by agreement, immediate consideration can be given to a bill which is now ready and which, it is hoped and expected, will bring the strike to an end on terms which will be just and fair to all concerned, and which will protect the national interest.

The Act received Royal Assent on September 1. It required the 13 struck railways listed in the Schedule to resume operations immediately, and directed the unions to advise their members that the strike was now illegal and to order them to return to work. Employees were assured that no one would be discharged or disciplined in any way for having participated in the strike.

The Act also extended the collective agreements that were in effect on December 31, 1965 until a new agreement is entered into, or until the end of 1967, if no agreement is reached before that date.

The parties were directed to resume negotiations immediately on the issues in dispute, with the assistance of a mediator named by the Minister of Labour. The Act required the mediator to report on the progress of negotiations by November 15, with provision for a continuation of mediation after that date if favourable progress was being made.

The Act also guaranteed certain wage increases to all employees affected by the legislation, whatever the outcome of the negotiations. It provided for progressive increases until a maximum of 18 per cent is reached by July 1, 1967. The basic wage rates in effect on December 31, 1965 were increased by 4 per cent, effective January 1, 1966; an additional 4 per cent effective July 1, 1966; an additional 4 per cent January 1, 1967; and a further increase of 6 per cent on July 1, 1967.

These were the wage increases proposed as a basis for settlement by Mr. Justice F. Craig Monroe and the Hon. J. C. A. Cameron, the two Chairmen of the conciliation boards dealing with the dispute of the non-operating employees. The Bill as introduced would have amended the agreements only with respect to 1966, and would have left the question of further increases for 1966 and 1967 to be decided by negotiation. Government amendments introduced during passage spelled out also the minimum wage increases for 1967, and provided that these rates were not to be reduced by a decision of the board of arbitrators.

Any issues unresolved at the end of the mediation period are to be referred to a board of three arbitrators appointed by the Governor in Council. If a board is established, it will consider matters related to the revision of the collective agreement that the parties agree to refer to it, and such other of these matters as the Government deems expedient. A decision of the board of arbitrators is to be implemented through the collective agreement. The agreement to which the decision applies will be deemed to be amended by incorporating the decision in it. The parties will be free to agree to vary or amend the agreement as so amended.

A regulation setting up a board of arbitrators is to be tabled in the House of Commons. The regulation will become effective on the tenth sitting day of Parliament after the day the regulation is laid before the House of Commons, unless before that day the regulation is revoked by the House.

The mediator, H. Carl Goldenberg, Q.C., reported favourable progress, and he was directed to continue mediation and to report not later than December 17.

SASKATCHEWAN

Trade Union Act

The 1966 amendments to the Saskatchewan Trade Union Act implemented recommendations made by the Labour-Management Legislative Review Committee.

This Committee was appointed in July 1965 to study the Trade Union Act and make recommendations for changes in the legislation. Altogether, it received 25 briefs, some from individuals and others from employers' associations, unions and other organizations. It also received letters expressing support for positions taken by organizations that had submitted briefs. The Committee held public hearings in Regina in October, and in Saskatoon in November, at which oral submissions were made in "amplification and support of a large number of the briefs presented." In addition to studying the briefs and hearing the submissions made at public hearings, the Committee studied labour legislation in the other jurisdictions in Canada.

In its report, the Committee stated that it had had two important considerations in mind in its approach to the task of making recommendations for changes in the Act. One was that, as far as

possible, labour negotiations should be left to management and the trade union, with a minimum of outside interference. It expressed the hope that both management and labour would approach the bargaining table in a spirit of good-will and co-operation, in an earnest endeavour to resolve any differences that might arise between them without resort to either a strike or lockout. Its opinion was that it is "only in those areas where the public interest places a duty on Government that any interference with this process can be justified."

The second consideration was that the Trade Union Act should be designed to give the maximum protection and freedom to the individual worker. The report stated that the aim of the Committee was "to endeavour to see that the individual employee had his rights protected so far as it is possible, and to ensure the continuance of those rights."

In addition to the 14 recommendations for amendments to the law, most of which were implemented without change, the Committee made two further proposals. In recognition of the fact that the construction industry and the craft unions representing construction workers faced special problems, as they do in other areas, it strongly recommended that the Government give consideration to a further study of these special problems. It also suggested that the regulations of the Labour Relations Board were in need of substantial revision, and that, in making new regulations, consultation should be had with both labour and management groups.

Unfair Labour Practices

There were a number of changes in the section on unfair labour practices. One was that the provision making it illegal for an employer or his agent to interfere with, restrain or coerce an employee in the exercise of his statutory rights was extended to include any other person acting on behalf of the employer.

An "employer free speech" clause was added, giving an employer the right to express his views to employees, as long as, in the Board's opinion, this does not in itself amount to coercion, a threat, a promise, or undue influence.

The so-called "reverse onus" clause, under which the burden of proof that an employee has been dismissed for proper cause rather than for union activity rests with the employer, was amended. The clause now provides that, if an employer or employer's agent discharges or suspends an employee, and it is shown to the satisfaction of the Board that the employee exercised a right under the Act, there shall be a presumption in his favour that he was discharged or suspended because he had exercised such a right, and that the burden of proof that the employee was discharged or suspended for good and sufficient reason shall rest with the employer.

Another amendment is intended to protect employees against unilateral changes in working conditions during the period between certification and the making of a collective agreement. If no agreement is in force, it is now an unfair labour practice for an employer to change rates of pay, hours of work, or conditions of employment without bargaining collectively respecting the proposed changes with the union representing the majority of employees in the unit concerned.

Two new employee unfair practices have been added. One forbids an employee, a person acting on behalf of a labour organization, or any other person, to fail or refuse to bargain collectively with the employer. The other makes it illegal for an employee, a person acting on behalf of a labour organization, or any other individual to declare, authorize, or take part in a strike until after a strike vote has been taken by a secret ballot of the employees who would be called out in the proposed strike, and the majority of employees eligible to vote have voted in favour of a strike.

Under the amended Act, an employer may not be found guilty of an unfair labour practice for refusing to bargain with a representative of a majority of his employees, or for refusing to negotiate concerning grievances during working hours, or for deducting pay for time so spent, or for making unilateral changes in wages, hours and working conditions when no agreement is in force, unless:

(a) the Board has made an order determining that the union making the complaint represents the majority of the employees in the unit; or

(b) it is shown that the employer knew, or had reasonable grounds for believing that the union represented the majority of the employees in the unit when he committed the complained-of acts.

Certification

One amendment to the certification provision raised the percentage of support required for a certification vote. The Saskatchewan Labour Relations Board is now obliged to take a representation vote if satisfied that not less than 40 per cent and not more than 60 per cent of the employees in an appropriate unit have indicated that a named trade union is their choice of bargaining agent, or that they no longer wish to be represented by the incumbent union. Previously, the percentage of support required for a certification vote was 25 per cent.

If a union has been certified, and a rival union files an application to replace it as bargaining agent, the Board is now obliged to conduct a vote if the applicant union is able to show that, within the past six months, 25 per cent or more of the employees in the unit have indicated that they want it, rather than the incumbent union, to be their bargaining agent. The Board may, however, refuse to direct a vote, if satisfied that another union represents a clear majority of the employees in the unit, or if it has already conducted a vote within the preceding six months on the application of the same union.

All votes directed by the Board are to be by secret ballot, and supervised by the Board or a person appointed by it. The Act further provides that "an employee who has voted in a vote under the Act shall not be competent or compellable to give evidence as to how he voted in a court or in any proceedings whatsoever."

The Board is now authorized to exclude professional employees from a bargaining unit, or to grant a separate certification to a professional association unit. If there is an application for an order determining the appropriateness of a unit, or whether a union has a majority, or requiring an employer or union to bargain, the Board may, upon the application of an employee who is a member of a professional association, exclude from the proposed unit all employees who are members of that association, if satisfied that a majority of the members of the professional association are in favour of being excluded.

An order determining the appropriateness of a unit may also be amended to exclude members of a professional association, upon the application of an employee who is a member of a professional association, provided that a majority of the members of the professional association in the unit supports the application, and that the application is made within the prescribed period.

In the amended Act, "professional association" is broadly defined to include: The Law Society of Saskatchewan, the College of Physicians and Surgeons of the Province of Saskatchewan, The Saskatchewan Land Surveyors Association, The Saskatchewan Psychiatric Nurses Association, the Institute of Chartered Accountants of Saskatchewan, The Association of Professional Engineers of Saskatchewan, the College of Dental Surgeons of Saskatchewan, The Saskatchewan Pharmaceutical Association, The

Saskatchewan Registered Nurses' Association, the Saskatchewan Veterinary Medical Association, the Saskatchewan Physical Therapists Association, and the Saskatchewan Institute of Agrologists.

A member of a professional association includes not only a member in good standing of the association who is employed in his professional capacity, but also a person who is a graduate of a recognized professional school at university level, and who (a) is a student, apprentice or trainee of a professional association; (b) is registered with that association with a view to becoming a member in good standing; and (c) is subject to restrictions of that association respecting discipline and conduct.

The Board is also given discretionary authority to exclude from a bargaining unit a person who objects to joining or belonging to a union, or to paying dues and assessments to a union, as a matter of conscience based on religious training or belief. Such a conscientious objector may be excluded, if during such a period he pays an equivalent amount to a charity mutually agreed upon by the employee and the union representing a majority of employees in the unit, or where there is no agreement, to a charity designated by the Board.

Term of Collective Agreements

Every collective agreement will remain in force for the term provided, and thereafter from year to year. If an agreement does not specify the termination date, or provides for an unspecified term, or for a term of less than one year, the minimum duration of the agreement will be deemed to be one year from its effective date.

If an agreement is for a term in excess of three years, its expiry date will be deemed to be three years from its effective date, if either party gives notice of a desire to terminate the agreement or to negotiate a revision. As in the case of other agreements, such a notice must be given 30 to 60 days before the expiry date, and bargaining must commence immediately.

If, on the date that the Board amends or rescinds a previous order and determines that another union represents a majority of employees in a unit, there is a collective agreement with more than one year of its term remaining, the successor union may give notice to terminate or to revise the agreement 30 to 60 days from the first anniversary date of the Board's order.

The Board no longer has authority to specify a common termination date in cases where a union has two or more collective agreements with the same employer, all with different termination dates.

Binding Arbitration

A new feature concerns arbitration of disputes arising out of an agreement. Unlike other Canadian labour relations laws, the Saskatchewan Act never has, and still does not prohibit strikes during the term of collective agreement; nor does it require a collective agreement to contain a provision for final settlement of disputes arising out of an agreement. In practice, most agreements do, however, contain grievance arbitration clauses.

The amended Act now provides for the enforcement of arbitration clauses voluntarily included in collective agreements. It states that, if a collective agreement contains a provision for final settlement by arbitration, without a work stoppage, of all differences concerning its meaning, application or violation, the findings of the arbitrator or arbitration board are final and binding upon the parties, and enforceable in the same manner as an order of the Labour Relations Board—that is, by filing in an office of the Court of Queen's Bench.

If the collective agreement provides for arbitration of grievances, but does not spell out the procedures to be followed, the statutory arbitration provisions will apply. In such cases, if a violation of an agreement is alleged, or if a dispute arises concerning the meaning or application of the agreement, including any question regarding arbitrability, a party to the agreement may, after exhausting any grievance procedure established by the agreement, set the arbitration procedures in motion by notifying the other party that he wishes to submit the matter to arbitration, and by naming his representative to the arbitration board.

If the other party fails to nominate its representative within the prescribed time, or if the two members cannot agree on the appointment of the chairman, any judge of the Court of Queen's Bench must, upon request of a party to the agreement, appoint the member or chairman, as the case may be.

A conflict-of-interest clause is also included. The Act prohibits the appointment of any person who has a pecuniary interest in a matter before the arbitration board or who has, within the previous year, acted as a solicitor, counsel or agent of any of the parties to the arbitration.

Labour Relations Board

In addition to the amendments referred to above, the Act made other changes in the powers of the Labour Relations Board. The clause giving the Board full power to determine any question of fact necessary to its jurisdiction before it, has been deleted.

Also, the Board no longer has discretionary authority to refuse to accept or consider evidence concerning any fact, matter or event that transpired after the filing of an application for an order determining the appropriateness of a unit, or whether a union had a majority, or requiring an employer or union to bargain collectively.

There were also changes in the provisions respecting the Board's power to rescind or amend its orders.

If court proceedings have not been initiated, an order of the Board determining the appropriateness of a unit, or whether a union has a majority, or an order requiring an employer or a union to bargain may be amended at any time, if (1) there is a collective agreement and the parties agree to the amendment; or (2) the Board considers the amendment necessary for clarification purposes. If, on the other hand, court proceedings concerning such an order are pending, the order can be rescinded or amended only if an application is filed during the prescribed period, that is, 30 to 60 days before the anniversary date of the agreement, or the anniversary date of the original order, depending on whether or not a collective agreement is in force.

Union Security

The section on union security, which contains a modified maintenance-of-membership clause that must be included in a collective agreement upon the request of a union representing a majority of employees in the unit, has been amended. New provisions designed to protect against dismissal certain employees who have been expelled from or denied membership in a union have been added.

They provide that, if membership in a union or labour organization is a condition of employment and membership is not available to an employee on the same terms and conditions generally applicable to other members, or if he is denied membership, or his membership is terminated for reasons other than nonpayment of dues, assessments and initiation fees uniformly required to be paid as a condition of acquiring or retaining membership, the employee will be deemed to maintain his membership if he pays the usual dues, assessments and initiation fees.

Further, an employee will not lose his membership for failure to pay any dues,

assessments or fees that are not uniformly required of all members, or that in their application discriminate against any member. It will be an unfair labour practice for an employee, a person acting on behalf of a labour organization, or any other person to try to have an employee discharged contrary to the above provisions or for an employer to discharge a person under such circumstances.

The above provisions do not apply, however, to an employee who has engaged in activity against the incumbent union, or on behalf of another union, if the employer or employers' association has instigated the activity, or participated in it, or contributed financial or other support to it.

Secrecy of Information

A new provision states that information obtained by a member of the Labour Relations Board or a conciliation board or a conciliation officer in the course of his duties is not open to inspection by any person or any court, nor can such a person be compelled to give evidence relative to such information.

Penalties

An individual found guilty of an unfair labour practice is, as before, liable to a fine of from $25 to $200 for a first offence, and to such fine and to imprisonment for up to one year for a subsequent offence. The minimum corporate fine, however, has been reduced from $200 to $25, but the maximum penalty remains $5,000.

The provision empowering the Lieutenant-Governor in Council, upon the application of the Labour Relations Board, to appoint a controller to operate the business of an employer who had defied an order of the Board has been repealed.

Essential Services Emergency Act

The Essential Services Emergency Act, 1966, passed at a special session of the Saskatchewan Legislature, provides for compulsory arbitration of labour disputes in certain essential services in times of emergency.

The special session of the Saskatchwan Legislature was called on September 7 to deal with an emergency the Government feared would develop if a strike of gas supply workers of the Saskatchewan Power Commission represented by the Oil, Chemical and Atomic Workers International Union were allowed to continue. The strike began on September 2 in support of demands for an eight per cent wage increase. The emergency legislation received Royal Assent on September 8 and was proclaimed in force on September 12, thereby making the strike illegal and compelling the employees to return to work.

As the name indicates, the Act applies only to workers in certain essential services. It is confined to labour disputes involving employees engaged in supplying water, heat, electricity or gas service to the public or any part of the public, or employees engaged in the provision of hospital services, including services in any nursing home, geriatric centre or similar institution.

The emergency procedures provided in the Act to settle disputes involving such workers become operable only upon a proclamation by the provincial Cabinet. The Act provides that if, in the opinion of the Lieutenant-Governor in Council, a state of emergency exists in the province or in any area of the province in such circumstances that life, health or property could be in serious jeopardy by reason of a labour dispute involving workers in any of the essential services specified, it may declare by proclamation that, after a date fixed in the proclamation, all further action and procedures in the dispute are to be replaced by the emergency procedures provided in the Act.

Unless the dispute is settled by the date fixed in the proclamation, a three-member board of arbitration is to be established to settle the matters in dispute. The board is to be made up of an appointee of each party and, as chairman, a judge of one of the courts of the Province to be named by the two representative members. The Government may name a member if a party fails to make an appointment, or if a member appointed is unable or unwilling to act, and may appoint a judge as chairman if the appointees do not agree. The parties are to name their appointees within five days of the date fixed in the proclamation, and the selection of the chairman is to be made within five days of the appointment of the second member.

The arbitration board is to hear the evidence of the parties relating to the matters in dispute, and the argument of the parties or their counsel, and make a decision on the matters in dispute. The chairman of the arbitration board is given the powers of a commissioner under the Public Inquiries Act. The board may determine its own procedure, but must give full opportunity to both parties to give evidence and make representations. Where there is no majority decision, the decision of the chairman is the decision of the board. The decision of the arbitration board is binding on the employer and the trade union, and on the employees on whose behalf the union is entitled to bargain with the employer.

On receipt of the decision of the arbitration board, the employer and the trade union are required to put it into effect within 30 days, and to consummate a collective bargaining agreement incorporating the terms of the decision.

A decision of a board of arbitration, exclusive of reasons, filed in the office of the registrar of the Court of Queen's Bench, is to be entered as an order of the Court and is enforceable in the same way as an order of the Court. Each party is to assume its own costs of the arbitration and will share equally the cost of the chairman and other general expenses of the arbitration board.

Once a proclamation is made fixing a date when the emergency provisions come into effect, employees are forbidden to strike or to remain on strike; the trade union is forbidden to call or authorize a strike or the continuation of a strike; and the employer is forbidden to call or authorize a lockout. An officer, official or agent of either the employer or the trade union must not counsel or encourage a lockout or a strike.

From the date of the proclamation to the day the arbitration decision is given, the employer may not alter the rate of wages or any other term or condition of employment of the employees in effect on the day before the proclamation was made.

When a proclamation is made, the trade union is required forthwith to give notice to its members that any strike authorization is revoked and that, if they fail to return to work immediately, the employer may dismiss them. Every person who, on the date of the proclamation, was authorized to call a strike, or who had called a strike, or who is an officer or employee of the trade union (other than an employee engaged to perform duties of a clerical, accounting or stenographic nature only), is required to see that such a notice is given. The burden of proving that the notice was given, or that an employee of the trade union is in an exempted category, shall be on the person charged.

Under a proclaimed state of emergency, a union may be decertified if the employees involved remain on strike or go on strike within the next 12 months. If, in its opinion, the trade union or any officer or employee of the union has not done everything reasonably possible to end or prevent the strike, the Lieutenant-Governor in Council may by order rescind a certification order made by the Labour Relations Board, pursuant to the Trade Union Act, determining

that the trade union represented a majority of employees in the unit.

Such action may be taken: (1) if the employees concerned are on strike on the date of the proclamation, or go on strike thereafter and do not return to work within 10 days after the date fixed in the proclamation; or (2) if they go on strike at any time within the period commencing nine days after the date fixed in the proclamation and ending 12 months thereafter; or (3) if they have gone on strike after the proclamation, have returned to work, and then go on strike again within 10 days after the date fixed in the proclamation.

If the Government decertifies the trade union, these are the consequences:

(1) any arbitration proceedings will cease, and any decision of the arbitration board is null and void and of no effect;

(2) for a period of one year from the date of the order: (a) the decertified trade union "shall cease to represent the majority of the employees" in the unit affected, and will not be eligible to represent any of the employees of the employer; (b) no other local or emanation of the parent union is eligible to represent such employees or any of them; (c) it is no longer a condition of employment that an employee of that employer be a member of that trade union; (d) the way is opened for another trade union to replace the union decertified, notwithstanding the protection of bargaining rights afforded to a representative trade union under the Trade Union Act; (e) the decertified union, its officers and members continue to be liable to any penalty provided under this Act in respect of offences committed prior to decertification.

Penalties

Anyone who calls or authorizes or counsels a strike or lockout, or fails to give the required notice revoking a strike authorization, is guilty of an offence and, on summary conviction, is liable to a fine of up to $1,000 for each day or part of a day during which the strike exists. The Attorney General may file a copy of the order of conviction in the office of the local clerk of the District Court, and the order becomes enforceable as an order of the Court.

No prosecution may be instituted under the Essential Services Emergency Act without the consent of the Attorney General. A prosecution for an offence under the Act may be brought against a trade union in the name of the trade union, and, for the purposes of the prosecution, a trade union shall be deemed to be a person.

If it appears that any person, trade union or association of persons "is acting or is likely to act in violation of any provision of the Act," the Attorney General may seek an injunction to restrain such violation, and the Court of Queen's Bench "has power to grant an injunction, interim injunction or such other relief as it deems just." No injunction or other relief may be granted *ex parte,* however.

ONTARIO

Labour Relations Act

Altogether, the Labour Relations Amendment Act, 1966, which was proclaimed in force on September 1, 1966, made 40 changes in the general labour relations law of Ontario. It repealed the section that enabled municipalities to opt out of the Act; provided for the certification of a council of trade unions; extended the "closed season period" during which a union is prohibited from challenging the bargaining rights of another union; gave employees greater protection against discriminatory practices by trade unions; and authorized the Labour Relations Board to deal with jurisdictional disputes. To encourage greater use of mediation, it also provided for the payment of mediators by the provincial Government.

The Minister of Labour said that the amending legislation embodied one overriding principle, namely, that it would enable the parties to make more effective use of the provincial collective bargaining machinery.

Council of Trade Unions

The Labour Relations Board is now empowered to certify a council of trade unions as bargaining agent, an amendment that is of particular interest to both employers and employees in industries such as printing and construction.

The Minister of Labour said this change would allow for greater stability in the collective bargaining relationship. He stated further, "If it is exercised, as I expect it will be, it will encourage bargaining on a broader and more coherent basis."

Before certifying a council of trade unions, however, the Board must be satisfied that "each of the constituent unions has vested appropriate authority in the council to enable it to discharge the responsibilities of a bargaining agent."

A collective agreement between a certified council of trade unions and an employer is binding on each of the members. Conditions under which a certified council of trade unions may be dissolved or a constituent union may withdraw are also set out in the Act.

If a certified council of trade unions has entered into a collective agreement, the council cannot be dissolved, or a constituent union may not withdraw, until the collective agreement ceases to operate. Also, a copy of the relevant document must be sent to the employer and, in the case of a withdrawal, to the constituent members and the council at least 90 days before the expiry date of the agreement.

If a certified council of trade unions has not entered into a collective agreement, a resolution to dissolve the council, or a constituent union to withdraw, will not take effect until 90 days after a copy of the relevant document is delivered to the employer or the employers' organization, or to the other constituent members and the council, as the case may be.

A collective agreement between an uncertified council of trade unions and an employer will continue to be recognized. Before bargaining begins, such a council must, as before, provide the employer with a list of the unions on whose behalf it is bargaining. Any agreement reached between them is binding on each member or affiliate of the council, except one that has given advance notice that it will not be bound by the agreement.

Certification and Decertification

Formerly, the bargaining rights of a union could be challenged by a rival union in the twenty-third and twenty-fourth months of a collective agreement, regardless of its duration. To protect both the union and the employer, and to ensure stability, the "closed season" has been extended up to the end of the thirty-fourth month of a three-year agreement. If the agreement is for a longer term, a rival union may apply for certification only during the thirty-fifth and thirty-sixth months of its operation, and during the last two months of each year that it continues to operate, or during the last two months preceding its expiry date, as the case may be. The Minister said this amendment recognized the current trend toward longer-term agreements.

A new provision protects a union against decertification proceedings for a period of six months after the commencement of a legal strike or lockout. If the union has given the required notice of intention to bargain and a lawful strike or lockout is in progress, a rival union may not apply for certification or for a declaration that the union has lost its right to represent the employees in that unit until: (1) six months from the date the strike or lockout commenced; or (2) until seven months have elapsed after the Minister has released the report

of the conciliation board or mediator, or notified the parties that he is not going to appoint a conciliation board, whichever occurs first.

If a union has been certified but has not entered into an agreement with the employer, and no declaration of loss of bargaining rights has been issued, a rival union may apply for certification after the expiration of one year, provided that conciliation proceedings are not in progress.

If a trade union has not made a collective agreement within one year of certification, and the Minister has appointed a conciliation officer or mediator, an application for certification or for a declaration of loss of bargaining rights may not be made until: (a) 30 days after the release of the report of the conciliation board or mediator; or (b) 30 days after the Minister has notified the parties that he is not going to appoint a conciliation board; or (c) six months after the Minister has notified the parties that the conciliation officer has reported that differences concerning the terms of a collective agreement have been settled.

Conciliation

To encourage greater use of the mediation procedure, the Act now empowers the Minister to appoint a mediator at any time during the conciliation officer stage, and also provides for the payment of the mediator by the provincial government rather than by the parties. If a mediator is appointed after a conciliation officer, the appointment of the conciliation officer will be terminated.

The conciliation board stage has been retained, but the Minister said that it was his intention "to follow a policy of greater selectivity in respect of the disputes in which conciliation boards are appointed—to appoint boards only where it is likely that they will be of real service to the parties in resolving their dispute."

Other amendments to the conciliation provisions are intended to give the Minister greater leeway in dealing with negotiations for a collective agreement after the conciliation officer stage when no conciliation board has been appointed. The ban on strikes and lockouts and changes in working conditions during conciliation has been extended from 7 to 14 days after the Minister has notified the parties that he is not going to appoint a conciliation board.

Conciliation board procedures were also simplified. Each member of a board will, as before, be required to take an oath on the prescribed form, but the oath may be now administered by another member of the board. Other amendments enable the chairman and one other member to constitute a quorum, and to proceed with the hearing of the matters in dispute. The two members of the conciliation board may also constitute a quorum with the written consent of the chairman.

The provisions respecting extension of time limits for submission of conciliation board reports has also been changed to give the Minister greater control over them. As before, a conciliation board is normally required to submit its report within 30 days. Under the amended Act, this period may be extended for a further period of 30 days by the Minister at the request of the chairman or by agreement of the parties. Any further extension must be agreed upon by the parties and approved by the Minister.

In the construction industry, the normal time limit for the conciliation board's report remains 14 days, but this may be extended for an additional 30 days by agreement of the parties, or for such further period as may be agreed upon by the parties and approved by the Minister.

Union Security

Another amendment permits union security provisions established under a collective agreement to be continued during the period when a new agreement is being negotiated. When a business has changed hands, the same rule applies during the period when the successor employer and the union representing his employees are bargaining.

Unfair Practices

Employees are now given additional protection against intimidation and coercion. The amended Act makes it quite clear that it is unlawful for any person, trade union or employers' organization to seek by intimidation or coercion to compel any person to become or refrain from becoming, or to continue to be or to cease to be a member of a trade union or of an employers' organization, or to refrain from exercising any other rights or from performing any obligations under this Act.

Another amendment is intended to ensure that a member of a trade union who refuses to take part in an unlawful strike will not be deprived of union benefits for going so. The Act now expressly forbids a union to suspend, expel or penalize in any way a union member for refusing to engage in an illegal strike. A person who feels that he has been penalized by a union contrary to this section may file a complaint with the Board. As in the case of other unfair practice charges, there will be an investigation by a field officer, followed, if necessary, by a further inquiry by the Board. If satisfied that the complainant has been suspended, expelled or penalized for refusing to participate in an illegal strike, the Board must declare the suspension, expulsion or penalty void.

Section 89—the section that gave a municipality, including a local board, school board, commission or other local authority, the right to declare that the Labour Relations Act and its protections and obligations did not apply to it and its employees—has been repealed.

The Minister said that henceforth municipal employees would be "treated on the same basis as the employees of any other employer in regard to union representation." He stated further:

> It must be acknowledged that the operation of a municipality, and the work of its employees, has many aspects which are different from the functioning of an ordinary business enterprise. There is, above all, the essential services aspect of employment with a municipality, local board or authority. An employer and a trade union in the municipal field have a very great responsibility to the public interest when compared with an ordinary industrial labour-management relationship. As far as the public is concerned, work stoppages in essential services are unacceptable. Contrary to some public opinion, the fact is that Section 89 does not prevent strikes. Its existence precludes all of the parties involved obtaining the benefits of the conciliation process, of the assistance of the Department itself, and of the procedures which are available under The Labour Relations Act. Accordingly, the public will expect a close scrutiny to be maintained of the course of collective bargaining in fields involving local boards or authorities and municipalities, so that if experience indicates that collective bargaining is not proceeding responsibly, appropriate steps can be taken to uphold and protect the public interest.

The Labour Relations Board is authorized to decide any representation issues that arise after a municipal reorganization. If two or more municipalities are amalgamated, or part of one municipality is annexed by or added to another, the employees of the municipalities concerned are deemed to have been intermingled, and the new or enlarged municipality has the same rights and obligations as a successor employer when a business changes hands and the employees of one of his businesses are intermingled with those of another. Similarly, any trade union concerned has the same rights and obligations it would have

in the case of the intermingling of employees in two or more businesses.

Jurisdictional Disputes

To provide a more effective means of dealing with jurisdictional disputes between trade unions, the Labour Relations Board has been empowered to deal directly with work-assignment disputes. Jurisdictional disputes commissions were first established in 1960 and have operated mainly in the construction industry.

The Minister said that he had received numerous representations asking for changes in the provisions relating to jurisdictional disputes, and that the leaders of one segment of the trade union movement had asked for the repeal of these provisions and to "leave it up to the unions to make agreements with employers to establish and use alternative arrangements for the settlement of jurisdictional disputes."

The amended Act gives unions and employers the right to make their own arrangements by agreement, but continues to provide machinery for the settlement of work assignment disputes if the parties cannot agree. The responsibility for dealing with such disputes has been transferred to the Labour Relations Board, which has been granted wider enforcement powers than those possessed by the former jurisdictional disputes commissions.

If there is no private arrangement, and a complainant alleges that a strike is imminent or is taking place because of a dispute between unions over an assignment of work, the Board may issue an interim order respecting the work assignment, after consultation with any employer, employers' organization, union or council of trade unions concerned.

Cease-and-desist directions may be included in the Board's interim order, or may be issued at any time after the making of such an order. The Board may direct any person, employee, employer, employers' organization, union or council of trade unions and their officers, officials or agents to cease and desist from doing anything to interfere with the terms of the interim order.

If the Board makes an interim order or direction, all persons affected must comply with it, notwithstanding any provisions of the Act or of any collective agreement.

The Board is required to file a copy of an interim order or direction in the office of the Registrar of the Supreme Court. After being entered, it is enforceable by any person, employee, employer, employers' organization, union or council of trade unions affected, as an order of the Court on the day after the day fixed for compliance in the interim order or direction. A complaint made under this section may be withdrawn only upon terms fixed by the Board.

As indicated by the foregoing, unions and employers are still free to make their own arrangements for the settlement of jurisdictional disputes. If a trade union and an employer or employers' organization have made an arrangement to resolve any differences between them respecting work assignments, the Board may postpone its inquiry until the differences have been dealt with in accordance with the arrangement.

A complaint concerning a work assignment may not be made to the Board if there is a provision in a collective agreement requiring the referral of any difference arising out of work assignment to a tribunal selected by the parties. In such cases, the parties are obliged to do or to abstain from doing anything required of them by the decision of the tribunal.

So that there may be no inconsistencies, the Board has been empowered to alter the bargaining unit determined in a certificate or defined in a collective agreement, after the release of its interim order. Upon application of an affected person or party, it may also alter a bargaining unit to enable the parties to conform to the decision of a tribunal. If an employer is bound by two or more collective agreements, and there appears to be a conflict in the description of the bargaining units, the Board may, upon the application of the employer or any of the trade unions concerned, alter the description of any bargaining unit in any agreement. Before disposing of any application to alter a bargaining unit, the Board may make such inquiries as it considers proper, including a representation vote.

Public Service Act

The Public Service Amendment Act, 1966, made some changes in the provisions dealing with negotiating procedures for employees of the Ontario government.

Since 1963, negotiations between the Ontario government and its employees have been carried on by the Joint Council. The Council has been composed of eight members—four public servants appointed by the Lieutenant-Governor in Council, who represented the "official side"; and three public servants and an officer of the Civil Service Association of Ontario appointed by the Lieutenant-Governor in Council on the recommendation of the Association, who represented the "staff side." The Council has been authorized to negotiate any matter concerning the terms of employment of public servants not excluded by the regulations. In case of a stalemate in negotiations, the Act provides for a referral to the Civil Service Arbitration Board whose decision is binding on the parties.

In his statement to the Legislature, the responsible Minister (the Provincial Treasurer) said that it had been decided to amend this section of the Act to "simplify the bargaining procedures by reducing the size of the Council, the formality for preparing agenda, and the requirements for regular meetings." He also said that the amendments had been discussed with the representatives of the Civil Service Association and that they were "in agreement with the principles of the Bill."

Joint Council

The Joint Council has been reconstituted. Instead of eight members, it is now composed of six—three Crown employees appointed by the Lieutenant-Governor in Council, to be known as the "official side"; and three members or two members and one employee, or one member and two employees of the Civil Service Association of Ontario appointed by the Lieutenant-Governor in Council on the recommendation of the Association, to be known as the "staff side." (In the Act, "Crown employee" is defined as any person employed in the service of the Crown or any agency of the Crown, except an employee of the Hydro-Electric Power Commission of Ontario, the Workmen's Compensation Board or the Ontario Northland Transportation Commission.)

Chairman

As before, the chairman is not a member of the Joint Council and does not have the right to vote. The provision providing for the appointment of a vice-chairman has been deleted.

Instead of requiring a minimum of four meetings a year, the Act now makes it mandatory for the chairman of the Joint Council to convene a meeting at the request of the official side or of the staff side, or of both of them.

Agenda of Joint Council

Another amendment concerns the agenda of the Joint Council. The chairman is now required to put on the agenda, in accordance with the rules of the Joint Council, at the request of either the official side or of the staff side, or of both of them, any matter concerning the terms of employment of Crown employees, including working conditions, remuneration, leaves and hours of work that is not excluded by the regulations.

Previously, only matters respecting the terms of employment of public servants could be put on the agenda.

The Minister said that, as a result of the change, matters respecting terms of employment of employees of the Ontario Hospital Services Commission, the Ontario Water Resources Commission, and the Niagara Parks Commission could now be placed on the agenda of the Joint Council, since the Association had substantial membership and was the only association representing employees in these three agencies.

The management of these agencies would be consulted by the director of staff relations on the methods and procedures of negotiation they wished to adopt. Employees of the Liquor Control Board and the Liquor Licence Board would be excluded by regulation because the Civil Service Association of Ontario was not the only organization with members among these employees, the Minister said. (Regulations issued in October established special negotiation and arbitration procedures for employees of the Liquor Control Board and the Liquor Licence Board.)

Agreements

Agreements reached by the official side and the staff side must be put in writing, and three copies signed by the senior member of each side. One copy must be sent to the chairman of the Joint Council, who is required to transmit it immediately to the appropriate authority to be implemented.

Mediation

An important new feature is the provision for the appointment of a mediator, if the two sides of the Joint Council are unable to reach agreement upon any matter. In such cases, the chairman is obliged to refer the dispute to the Minister of Labour who may, within 15 days, appoint a mediator to confer with the representatives of the two sides and try to bring about a settlement. There is no time limit for the mediator's report. In explanation of this, the Minister said:

> Such time limits are very difficult to establish, as the dispute could be a minor one or a major one, and the time involved will vary. The best procedure would seem to be to provide no requirement on time limits to report, and to leave the matter with the parties and the mediator.
>
> I would assure this House, however, Mr. Speaker, that if any difficulties are experienced in regard to undue delays, the legislation will be reviewed and some appropriate amendments made next year. . . .

If the Minister does not appoint a mediator within the prescribed time, or if the mediator fails to bring about agreement, the chairman of the Joint Council will then refer the matter to the Civil Service Arbitration Board for settlement.

The decision of the Arbitration Board will be sent to the chairman of the Joint Council, who will transmit it immediately to the appropriate authority to be implemented.

MANITOBA

Amendments to the Labour Relations Act of Manitoba empowered the Manitoba Labour Board to deal with unfair labour practice complaints, abolished the government-supervised strike vote, and provided for the payment of mediators from public funds.

Other amendments clarified the section on unfair practices, and provided for the continuation of arbitration procedures during the period when a new agreement is being negotiated.

Most of the changes were based on recommendations made in the 1965 report of the Labour-Management Review Committee, commonly known as the Woods Committee.

Permitted and Prohibited Acts

The section entitled "Unfair Labour Practices" has been replaced by one titled "Permitted and Prohibited Acts." This change was recommended by the Woods Committee, which said that the former title was unsatisfactory because it implied wrong-doing unnecessarily.

Some of the prohibitions have also been clarified. In its report, the Woods Committee stated that there was not sufficient protection of the employee in his freedom of choice regarding union membership, or from possible undesirable acts by unions. There was also some doubt regarding the issue of freedom of speech of employers and union officers and representatives, the report stated.

In the amended Act, interference by employers in union activities is again proscribed. As before, an employer or an employers' organization is forbidden to interfere with the formation, selection or administration of a trade union, or to contribute financial support to it.

Discrimination against union members continues to be prohibited. No employer or person acting on his behalf may discharge any person, or refuse to employ or to continue to employ, or otherwise discriminate against any one in regard to employment or any term or condition of employment because that person is a member of a union or is participating in union activities or is involved in organizing a union. No person may impose any condition in a contract of employment seeking to restrain an employee from exercising his rights under the Act.

The prohibition against intimidation or threats has been strengthened. An employer, union or person acting on behalf of himself, an employer, a trade union or any other person is forbidden to seek by intimidation or coercion, or by threat of dismissal or loss of employment or any other kind of threat, or by the imposition of a pecuniary or other penalty, or by undue influence, or by other means, to compel an employee to become, or to refrain from becoming, or to cease to be, a member or officer or representative of a union, or to deprive him of his rights under the Act.

The amended Act guarantees freedom of speech to all parties. It makes it quite clear that an employer, a union representative, or any other person, has the right to express his views, as long as he did not use intimidation, coercion, threats or undue influence. The Minister said that the amendment would give employers "the right to freely express their views and particularly their views about union organization at the time that unions are in the process of organizing."

A "free speech" provision was also introduced in Saskatchewan this year, and similar provisions are contained in the labour relations legislation of Ontario and Nova Scotia.

A new method of enforcing the unfair practices provisions has also been introduced, with the emphasis on investigation and mediation rather than sanctions. An aggrieved person, however, retains the right to resort to prosecution with the consent of the Minister.

The amended Act has empowered the Manitoba Labour Board to deal with unfair practice charges. Procedures are similar to those in Ontario, with an initial investigation by a field officer, followed, if necessary, by an inquiry by the Board.

Upon receipt of a complaint that a person has been refused employment or discharged, discriminated against, or otherwise dealt with contrary to the Act as to his employment, opportunity for employment, or conditions of employment, the Board may assign a field officer to investigate the matter and try to effect a settlement. Upon receipt of the field officer's report, the Board may either terminate the inquiry after notifying the parties concerned, or it may investigate the complaint itself.

If, on investigation, the Board finds the complaint a valid one, it may issue an order requiring the offending party to cease the discriminatory act, which may include the hiring or reinstatement in employment of the person concerned,

with or without compensation for loss of earnings or other employment benefits. The employer must comply with the Board's order, notwithstanding the terms of any collective agreement.

Arbitration

Another amendment provided for the continuation of arbitration provisions after the expiration of a collective agreement. Such provisions will now remain in force until the parties concerned have the right to take a strike vote or to engage in a strike or lockout.

Strikes and Lockouts

The section setting out the conditions precedent to a strike vote or a lockout have also been re-worded to take into account the Minister's absolute discretion to appoint or not to appoint a conciliation officer or a conciliation board. A union may not take a strike vote, no employee may strike, and no employer may declare a lockout unless one of the following conditions has been met:

(1) either party has requested conciliation services, and seven days have elapsed since the Minister has received the request, and during that time has not instructed a conciliation officer to confer with the parties;

(2) a conciliation officer has been appointed, and seven days have elapsed after the date on which his report was received by the Minister, and within that time the Minister has not notified the parties that he intends to appoint a conciliation board;

(3) a conciliation board or a mediator has been appointed, and seven days have elapsed from the date on which the report of the conciliation board or mediator has been received by the Minister.

The government-supervised strike vote —a 1962 amendment that was strongly criticized by unions—was abolished.

One of the other changes respecting strike votes is intended to guarantee secrecy. The Act now stipulates that every strike vote must be by written ballots cast in such manner that the voter cannot be identified with the ballot cast and no one may tell whether a person has voted for or against a strike.

The voting constituency in every strike vote is the bargaining unit represented by the union concerned. The Labour Board will intervene only if there is a dispute concerning the conduct of the vote or the voting constituency. Its decision is final and binding on the parties.

The amended Act makes it clear that the mere taking of a strike vote does not commit a union to a particular course of action. It expressly states that the result of a strike vote does not bind a bargaining agent or a union to a course of action in accordance with the result of the vote. This amendment was introduced because of a 1965 court decision, *Contractors Equipment and Supply (1965) Ltd. v. Building Material Drivers, Warehousemen and Helpers Local 914, (1965)* 53 WWR Part 8 p. 495 (L.G., Mar. 1966, p. 104).

In this case, the judge held that a union which had called a strike after a majority of the employees in the unit had voted against strike action was bound by the result of the vote, and that any strike following a vote which did not authorize strike action was illegal.

Mediation

To encourage more use of mediation in labour disputes, the Act authorized the payment of the expenses and remuneration of a mediator from out of the Consolidated Revenue Fund.

PRINCE EDWARD ISLAND

Amendments to the Industrial Relations Act of Prince Edward Island redefined the term "employer," gave the Labour Relations Board discretion in the matter of representation votes, and provided arbitration procedures for disputes involving policemen, firemen and hospital workers.

The coverage of the Act was extended to employers with one or more employees. Previously, the Act did not apply to employers with fewer than three employees.

The exemption for seasonal businesses was also changed. The only employers now excluded are those operating a business of a seasonal nature that does not require general employment for more than four continuous months in any calendar year. Previously, seasonal businesses operating for six months or less were outside the scope of the Act.

It is now discretionary, rather than mandatory, for the Labour Relations Board to take a representation vote after it has determined that a unit is appropriate for bargaining, and that a majority of the employees are members in good standing of the applicant union.

If a representation vote is taken, all employees employed for 30 calendar days or more prior to the date of the vote are now eligible to vote. Formerly, employees were not entitled to vote unless they had been employed for 60 consecutive working days prior to the vote.

The Act continues to deny members of a municipal police force, full-time employees of a fire department, and essential hospital workers the right to strike, but now provides for binding arbitration of disputes involving such employees.

If a certified bargaining agent has complied with the prescribed bargaining procedures, and a conciliation officer has failed to bring about a settlement, the Minister of Labour must, if he thinks an arbitration board should be appointed, initiate arbitration proceedings by requiring each of the parties to nominate its representative within seven days of the notice. If either party fails to nominate its representative within the prescribed time, or if the two nominees do not agree on a chairman, the Minister will appoint the member or chairman, as the case may be.

An arbitration board will have the same powers as a conciliation board. It will be required to submit its report within 14 days after the appointment of the chairman, or within such longer period as may be agreed upon by the parties or allowed by the Minister.

The decision of the arbitration board will be final and binding on the parties. If the dispute involves persons required for the maintenance of essential hospital services (the term is not defined), the award will also be binding upon the Hospital Services Commission of Prince Edward Island for the fiscal year next following the date of the report.

NEWFOUNDLAND

One 1966 amendment to the Newfoundland Labour Relations Act reworded the prohibition against changing working conditions during certification proceedings without the consent of the employees. It now provides that, once an employer has been notified by the Labour Relations Board that a union has applied for certification as a bargaining agent of a group of his employees, the employer may not—without the consent of the Board or unless a collective agreement has been made which is binding on the employees concerned—alter the rates of wages or other terms of employment until the application has been granted, refused or withdrawn.

Another amendment seeks to ensure a period of stability of bargaining rights after certification. It provides that the Board will not be required to accept or deal with an application for decertification within a period of six months from the date of certification of the incumbent union, the date a previous application to revoke certification was refused, or the date when notice to commence bargaining was given. The Board is, however, given discretionary power to deal with such an application at any time.

NEW BRUNSWICK

The section of the New Brunswick Labour Relations Act defining the status of a municipal corporation in relation to its police officers for the purposes of the Act was clarified. The amendment provides that, where a municipality or a board or commission, of which one or more members are appointed by a municipality, is empowered to prescribe any term or condition of employment for police officers, the municipality is deemed to be the employer in relation to the police officers, and the police officers are deemed to be employees in relation to the municipality.

This provision is to come into force on proclamation.

Technical Note to "G" Tables

Statistical information on work stoppages in Canada is compiled by the Economics and Research branch of the Canada Department of Labour on the basis of reports from the Manpower Division, Department of Manpower and Immigration. The first three tables in the section cover strikes and lockouts which amount to ten or more man-days.

The developments leading to work stoppages are often too complex to make it practicable to distinguish statistically between strikes on the one hand and lockouts on the other. However, a work stoppage that is clearly a lockout is not often encountered.

The data on workers involved include all workers reported on strike or locked out, whether or not they all belonged to the unions directly involved in the disputes leading to work stoppages. Where the number of workers involved varied in the course of the stoppage, the maximum number is used for monthly totals, but adjustments are made for changes reported in the number of workers involved in work stoppages extending over two or more months. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included in the data on workers involved. Their number, however, if any, is shown in parentheses for the major work stoppages listed in Table G-4. The data in parentheses are those reported at an early stage of the work stoppage, and they refer only to the plant or premises at which the stoppage occurred.

Duration of strikes and lockouts in man-days is calculated by multiplying the number of workers involved in each work stoppage by the number of working days the work stoppage was in progress. Where the number of workers involved varied significantly in the course of the stoppage, an appropriate adjustment is made in the calculation as far as this is practicable. The duration in man-days of all stoppages in a month or year is also shown as a percentage of estimated working time, based on the corresponding monthly figure or annual average figure for non-agricultural paid workers in Canada. The data on duration of work stoppages in man-days are provided to facilitate comparison of work stoppages in terms of a common denominator; they are not intended as a measure of the loss of productive time to the economy. For convenience of expression, however, duration in man-days is on occasion referred to as "time loss" in reviews based on this series.

The data on the distribution of work stoppages by industry in Table G-2 follow the Standard Industrial Classification, DBS (1960).

In Table G-3 work stoppages are classified according to jurisdiction, whether federal or provincial. This is done on the basis of the government agency that intervened in the dispute. Where there was no such intervention the classification is, wherever possible, on the basis of the agency that previously dealt with labour matters in the establishment involved.

Work stoppages involving 100 or more workers are listed in Table G-4, which shows in each instance the employer(s) and the location of the premises at which the work stoppage occurred, the union(s) directly involved or concerned in the dispute, number of workers involved, duration in man-days, starting date (the first day on which normal operations were affected) and termination date. For work stoppages that are terminated by mutual agreement, the termination date is usually the day on which work was resumed. Work stoppages that have not been resolved in this way are as a rule considered terminated, for statistical purposes, at the date by which it was established that two-thirds or more of the workers involved had either returned to work, or had found work with other employers, or had been replaced by new employees; or the date by which it was reported that the operations affected by the work stoppage would not be resumed. Also shown in Table G-4 are the major issues, as far as known, that led to work stoppage, and the result, i.e., the terms of settlement of major issues where a settlement was reached when the work stoppage terminated, or the circumstances in which the work stoppage came to an end.

While the methods used to obtain data on work stoppages preclude the likelihood of major omissions, it is not always possible, particularly on a preliminary basis, to obtain precise information in detail. Consequently the information in this section may not be accurate in all respects.

Wage Schedules Prepared In November

During November the Department of Labour prepared 232 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition, and certain services. In the same period, 163 contracts in these categories were awarded.

In addition, 104 contracts that contained the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation, Defence Construction (1951) Limited, The St. Lawrence Seaway Authority, and the Departments of Defence Production, Post Office, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned, or to others who have a *bona fide* interest in the execution of the contract.

Contracts awarded in November for the manufacture of supplies and equipment were:

Department	*No. of Contracts*	*Aggregate Amount*
Defence Production	108	$422,079.00
Post Office	9	747,555.40
RCMP	3	266,846.00

During November, the sum of $7,189.40 was collected from 16 contractors for wage arrears due their employees as a result of the failure of the contractors, or their subcontractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for the distribution to the 151 workers concerned.

Provincial Federations of Labour:

The 1966 Conventions

NOVA SCOTIA

Criticism of legislative and court actions, and the role of automation in labour-management relations, marked the opening of the 11th annual convention of the Nova Scotia Federation of Labour in Halifax, September 28 to 30.

Federation President John Lynk, New Glasgow, termed the use of court injunctions, compulsory arbitration and the outlawing of strikes as "restraints" on the free trade union movement, "the beginning of a police state and the end of the democratic society."

Court injunctions and compulsory arbitration were also condemned by Claude Jodoin, president of the Canadian Labour Congress, who told the convention that they simply provide a method of preventing picketing and interfering with freedom of speech.

He said that it was the right of trade unionists to demonstrate peacefully and present their views, and urged the Federation to do everything in its power to prevent injunctions being used in connection with labour-management relations. British Columbia now held the record for injunctions, he said, having had 296 during the past three years; and this practice served only to destroy the possibility of balance between the two parties in collective bargaining.

No One Suggesting Violence

Mr. Jodoin asserted that no one was suggesting legalized violence; but he said it is unfair, injust and undemocratic to put more hurdles in the way of workers seeking higher wages. Despite Canada's affluent position in the world, he said, at least one-fifth of the population is existing below reasonable standards of comfort and decency.

He pointed out the disparity between the increase in corporation profits and the increase in average weekly wages, and said that, from 1961 to 1965, corporation profits after taxes had risen 57 per cent compared to a 16-per-cent hike in the same period in weekly wages and salaries. "When is the time for the free trade unionist to get a piece of the cake?"

Other Reports

The annual conventions of the Quebec, Newfoundland and Ontario Federations of Labour were reported in previous issues of the LABOUR GAZETTE: March 1966, p. 80; Dec. 1966, p. 709; and Jan., p. 12.

It was the old, old story, said Mr. Jodoin. Profits went up, prices increased, but when workers wanted more money, the propaganda balloon went up, warning inflation. Doubting the inevitability of inflation in this country, the labour leader commented, "A little bit of inflation hasn't killed anyone yet." He declared that Canadian workers would not accept a wage freeze.

Mr. Jodoin was concerned also about the 6,000,000 Canadians with no medical insurance and those with only partial coverage. He said that the federal Government has been promising the Canadian people a health insurance program since 1919—"almost half a century."

Boon, Blessing or Curse?

The delegates, representing 92 locals of a wide variety of unions and a membership of 35,000, heard Federation Vice-President Gordon Smith, Halifax, stress the importance of automation's role in future labour-management relations. He said that no one seemed to know whether automation and technical changes generally were "boon, blessing or curse to labour." Automation, concerned only with increasing corporate profits, "doesn't help the working man," he said.

One of the many resolutions passed urges the federal Government to re-route the shipment of Canada-West Indies trade goods from American to east coast ports. The resolution condemns the current practice as detrimental to eastern Canadian seaports, particularly Halifax.

The decline of the Canadian merchant marine was traced by Federation Secretary-Treasurer J. K. Bell, who said that only one ship is now registered as Canadian. He said it was a mistake for Canada to depend on foreign carriers, many of whose owners were in direct competition with Canadian firms in other lines.

Vice-President Smith was in concurrence. "It is a disgrace for a country with our natural resources not to have a merchant marine."

Constructive Approach

Premier Robert Stanfield urged that organized labour, agriculture, business and industry, work together to find a solution for what he termed Nova Scotia's "greatest problem," the economic development of the province. There was a need for developing thousands of new jobs, he said, and praised the "constructive approach" of organized labour to the problems confronting the area.

Other recommendations and resolutions:

—asked the CLC to press the federal Government to increase the old age pension to $125 a month for persons 60 years of age and over without a needs or means test;

—urged the federal Government to raise unemployment insurance benefits to a basic $40 a week with an additional $5 a week for each dependent;

—encouraged the federal Government to include all workers in the unemployment insurance commission provisions;

—urged amendment of the Unemployment Insurance Act to allow for the payment of benefits as soon as employment was lost for any legitimate reason;

—opposed the use of *ex parte* injunctions in the settlement of labour disputes;

—condemned the practice of compulsory arbitration in negotiation in any form of service and resolved that the Federation executive oppose any such moves by government;

—resolved that the convention call upon the provincial Government to amend the Trade Union Act to provide for a time limit of 30 days from the date on which the arbitrator or chairman

of an arbitration board has been appointed until a decision is handed down;

—urged the provincial Government to enact legislation to provide for effective rent control;

—pressed the provincial Government to keep liquor stores open until 10 p.m. in all towns in Nova Scotia;

—recommended provincial legislation to guarantee the Negro and other minorities an equal opportunity for jobs and living accommodations;

—called for a boycott of South African products, and recommended that Nova Scotians be asked to support the Federation in this cause;

—resolved to ask the provincial Government to investigate tobacco prices and also to introduce legislation requiring a warning label to be attached to each cigarette package, pointing out the danger of contracting cancer through the use of cigarettes;

—urged provincial and federal Conservative parties to help implement the national Medicare plan;

—recommended a Board of Inquiry to investigate the "recent and unwarranted" increase in the cost of living and to consider effective price controls, and recommended the establishment of a consumer's division to provide information and to establish standards of quality and packaging;

—recommended a government-sponsored car insurance plan, similar to that of Saskatchewan, and urged respective provincial labour federations in the Maritimes to ask their provincial Governments to implement the plan; and

—resolved to petition the provincial Government to provide collective bargaining rights for Nova Scotia employees of police departments under the Trade Union Act.

Unification of Federations

John F. MacMillan, president of the New Brunswick Federation of Labour, and guest speaker at the Nova Scotia convention, predicted in a special interview in Halifax that labour will be strangled within 20 years in provinces where it has become the practice to bargain with outside industrial concerns for new industries. Tempting new industries to low-wage areas like the Maritimes could only worsen depressed areas, he said.

Earlier in a speech before the convention, he called for a unification of the four Atlantic federations. "We can no longer operate as separate entities."

There was an immediate need for a highly qualified technical research office for organized labour in the Atlantic area, he said, sponsored either completely by the four federations, or jointly with the Canadian Labour Congress. It was necessary for statistical material to be available to all federation members and their affiliates.

Mr. MacMillan urged a reassessment of the value of labour federations, with a view to providing better services to members.

During the closing session, the 1966 officers noted in their report that although a five-cent-an-hour increase in the minimum wage rates had become effective June 1 of this year, "we can see no narrowing of the wage gap with the Upper Canadian provinces."

New officers elected included John Lynk, President; J. K. Bell, Secretary-Treasurer; Tom Mombourquette, Vice-President for Cape Breton; Don Murphy, Vice-President for Pictou County; William Noiles, Vice-President for Colchester-Cumberland County; Charles Parker, Vice-President for the Annapolis Valley; Gordon Smith, Vice-President for Halifax; and Clarie Webber, Vice-President for the South Shore area.

PRINCE EDWARD ISLAND

Delegates to the annual P.E.I. Federation of Labour Conference at Charlottetown on September 17, heard Hon. Elmer Blanchard, Provincial Minister of Labour, discuss plans for the formation of a management-labour relations committee. "We are convinced that if this proposed commission can function effectively, it will produce undreamed-of results in the field of management-labour relations," he said.

He stressed the fact that, if the province is to develop its full industrial potential, "management, labour and government must put an end to the strange and senseless idea of separation, and move toward a new era of co-operation and communication."

At an evening banquet, the guest speaker, William Dodge, Executive Vice-President to the Canadian Labour Congress, elaborated on the danger of wildcat strikes. He mentioned that well-organized strikes are more likely to be successful. "The public are frightened of wildcat strikes and there is no need to take unauthorized or illegal action," he stated.

William M. Shields, who served as Vice-President of the Federation since it was organized three years ago, was elected President. Other officers elected were: Everett Baker, Sherwood, Secretary-Treasurer; Everett MacLeod, Borden, Vice-President in Prince County; J. C. Carroll, Parkdale, and Lloyd White, Charlottetown, Vice-Presidents in Queen's County; and Dennis Thibodeau, Georgetown, Vice-President.

NEW BRUNSWICK

Speaking at the opening of the New Brunswick Federation of Labour convention, September 26 to 28, Minister of Labour K. J. Webber, told delegates that, to meet the changing demands in New Brunswick industry, crash courses to provide worker-training will be set up under a new branch of the provincial labour department. He said that the new industrial training branch will encompass the labour department's industrial manpower training programs by supplementing its present apprenticeship training system.

Mr. Webber pointed out that, the provinces' manpower needs are changing swiftly. "We realize there is a need for courses of shorter duration that will provide training in occupational and specialist fields of industry.

"A greater demand for more highly trained, competent and productive workers is prevalent. While many more skilled jobs are developing, many unskilled jobs are disappearing, and all of these changes have resulted in the expansion of the industrial, technical and vocational training programs."

Canadian Labour Congress representative, Joe Morris, Ottawa, blamed the rising cost of living on "the large and continued growth in profit-taking by major Canadian industries." Mr. Morris said that profit gains in recent years had been nothing short of spectacular, and "the ability of Canadian industry to pay higher wages is obvious to everyone."

A Small Price

Mr. Morris said that strikes sometimes cause inconvenience and often cause suffering, but it was a small price to pay for the democratic right of workers to lay down their tools. There are countries where they are denied that right, he said.

Clifford A Scotton, Federal Secretary of the New Democratic Party, said that "employers have a responsibility to discuss and negotiate technological change with their employees. If they fail to do so, then governments must introduce legislation compelling them to do so." He told the convention that the people of New Brunswick and of the Atlantic provinces generally "have to run harder than their fellow citizens in other parts of Canada just to maintain their relatively lower standards of living."

The Federation voted to ask the New Brunswick Government to abolish the Garnishment Act. The resolution said that the Act is imposing hardships on

workers and their families, especially in cases when it is beyond their control to meet their obligations.

One of the principal resolutions passed asked that no injunctions be granted in labour disputes, until both parties had been given an opportunity to be heard.

Other Resolutions

Other resolutions called for:

—the establishment of a prices review board "which would determine whether or not there was a legitimate need for the price of the commodity to be increased;"

—an Atlantic union of the four Maritime provinces;

—an investigation by the provincial government into the implementing of a government-operated car insurance program comparable to the one in the province of Saskatchewan;

—the establishment of an office of ombudsman to aid individual citizens who encounter problems with an administrative branch of the provincial Government;

—the federal Government to amend its small loans act to allow for a maximum interest on loans of more than $1,500;

—provincial consideration of sweepstake lotteries to lessen the tax burden.

Other resolutions in brief called for prohibiting the use of "give-away gimmicks," open fishing rights to the public at a standard license fee, investigation of provincial medical services, and the setting up of a manpower program in the province.

MANITOBA

Manitoba provincial labour minister Obie Baizley considers the right to strike an essential part of a good labour movement. In an address at the opening of the Manitoba Federation of Labour annual convention, October 14-16, Mr. Baizley said that "free collective bargaining with the right to strike is essential to the growth and development of a strong and responsible labour movement."

He believes also that a healthy and responsible labour movement is not only the best way to establish equitable wages and to develop fair wages standards, but that it "has much to contribute to the preservation of those freedoms upon which our whole way of life is based."

Canada is one of the most prosperous nations in the world, he said, but the wealth is poorly distributed. "We are not going to find the equitable distribution by shouting, by demonstrating, or blaming the government, by denouncing the 'profiteers' or by glibly excusing ourselves with some popular cliché."

Organize and Build

William Dodge, an Executive Vice-President of the Canadian Labour Congress, told delegates that the only way to a better standard of living was to "organize, build your unions, build your labour councils, and build your Federation." The reason Manitoba workers get poor wages, he said, is that too few of them belong to labour unions.

"Unorganized employees have no power to bargain with wealthy corporations, and are generally underpaid, underprivileged and thoroughly exploited."

Without giving a source, Mr. Dodge said average weekly wage figures in Canada for May 1966 showed that the average manufacturing worker in Manitoba was paid $77.17 a week in that month. This was $14.19 below the "national average," he said, and $2.06 less than "his fellow worker in Newfoundland, a province hardly known in the past for its high wage levels." He told the delegates that Newfoundland had shown higher wage and salary levels than Manitoba since February 1966 and that although Winnipeg is the fourth largest city in Canada, it has the lowest wage scale.

Court Injunctions

Assuring the 300 delegates that the CLC is continuing its fight against court injunctions. Mr. Dodge said, "The tendency of management to use the courts as a weapon in the centuries-old battle to weaken trade unions has destroyed the confidence of workers in the rule of law and the impartiality of our courts."

Compulsory arbitration will never do away with strikes in vital industry, he said. "The threat of compulsory arbitration, and the struggle against court injunctions limiting mass picketing during strikes, will spur the Canadian labour movement into a new area of militancy and solidarity."

Mr. Dodge said that the labour movement realizes its collective bargaining techniques are imperfect. "But we have to bear in mind that no better way of settling wage and work condition questions has even been devised."

New Attitudes

The president of the Manitoba Federation of Labour, R. J. Henderson, said that a new approach to labour-management relations can only come about through new attitudes on both sides of the bargaining table.

"The key word must be co-operation," he said. "Unions have a greater role to play in modern society than just that of an economic agent for employees. We are ready to accept a larger share of the responsibility for increased productivity and efficiency in administration. In return, unions demand a more equitable share in the resulting increase in productivity."

The Federation president said there were things unions must aim for in future negotiations: gaining back purchasing power lost through the erosion of inflation during recent years; assessing labour's position in relation to productivity in a given plant; and striving for automatic wage hike clauses in future agreements to become effective when living costs rise.

Mr. Henderson criticized Canadian corporations for helping cause inflation by taking too large a profit slice. "Between 1961 and 1965 corporation profits in Canada, after taxes, rose 67 per cent. In the same period average wages and salaries went up by only 16 per cent," he said. "It is folly to blame unions for the increase in living costs and for inflationary pressures on the economy."

Two Controversial Issues

The two most controversial issues in Canadian trade unionism, court injunctions and compulsory arbitration, were condemned in resolutions. The resolution on injunctions:

—urges federation officers to seek a change in provincial legislation to outlaw injunctions in labour disputes in Manitoba; and

—calls on the provincial committee on labour relations and employment standards, headed by Prof. H. R. Woods, McGill University, to give the matter top priority during its current deliberations.

Delegates also passed several technical resolutions calling for changes in the regulations of the Manitoba Workmen's Compensation Board and urging the Manitoba labour board to help fight unfair labour practices in cases where workers fired for union activities do not have sufficient money to carry their cause to success.

Union delegates showed their disapproval of a proposal made by the provincial Government to place Medicare on a voluntary basis in July, 1967. Area representative Joe Wilford, United Packinghouse Workers of America, said, "we want free, tax supported Medicare for everyone and should do everything in

our power to let everyone know about it." The medical resolution was passed by a unanimous standing vote of the 300 delegates attending the three-day convention.

Medicare

Stanley Knowles, (NDP—Winnipeg North Centre) told delegates that the party will fight for Medicare, higher old age pensions and civil servant bargaining rights. Old age pensions would have to be raised by at least $30 to $105 a month as quickly as possible, and preferably by as much as another $20 to $125, he said.

Mr. Knowles assured delegates that the days of the indignities and trouble of means tests were over. "We are not going to turn the clock back half a century just to get our senior citizens the added means they so desperately need."

Turning to collective bargaining for federal civil servants, Mr. Knowles said that the fight is against compulsory arbitration clauses contained in legislation now before Parliament. "It won't be collective bargaining unless both sides have equality in the negotiations. The Bill now before Parliament is simply not good enough."

The Federation re-elected R. J. Henderson, Winnipeg representative of the Canadian Union of Public Employees, to a second one-year term as President. Also elected were Joe Wilford, United Packinghouse Workers of America, as first Vice-President, and John Pullen and Gordon Ritchie, Electricians and Department Store Employees, Winnipeg, Vice-Presidents.

SASKATCHEWAN

It is up to labour and management to establish and maintain smooth relations if they do not wish government interference, Lionel P. Coderre, Minister of Labour for Saskatchewan, told delegates to the 11th annual convention of the Saskatchewan Federation of Labour, October 6 to 8. "Time and again, labour organizations have made it clear that they do not like government interference in collective bargaining. This is something I fully understand", he said "[but] it is up to them not to upset the apple cart and not to create the circumstances where government action becomes necessary, regardless of personal feelings."

He congratulated the delegates on the excellent record that Saskatchewan has maintained with regard to labour-management relations. "The time lost due to strikes and lockouts in our province has remained at a very low level, which indicates that both labour and management are becoming increasingly conscious of their responsibilities to the nation as a whole."

Mr. Coderre mentioned the number of new jobs created in Saskatchewan since 1964. He said that, in a new publication started by the Dominion Bureau of Statistics two years ago, one could find information on employment in establishments in Saskatchewan that employ approximately 40 per cent of the non-agricultural force. "According to this publication, 12,000 more people were employed in the summer of 1966 than two years before. If we bring this estimate up to 100 per cent we may estimate the over-all increase in employment since 1964 at some 30,000." And he added that, with the June census, it could be higher.

Guaranteed Income

Joe Morris, Vice-President of the Canadian Labour Congress, told the conference that one of the main items on the agenda at the CLC executive meeting in Ottawa, October 13 to 15, would be policy with regard to injunctions. Whereas the CLC is opposed to compulsory arbitration, he intimated, it is felt that arbitration has a definite place on the Canadian labour scene, especially "where differences occur in agreements within the framework of the contract, wrongful dismissals, or violation of contracts."

In an interview Mr. Morris prophesied that a guaranteed income would come within 10 years. He said that automation and advanced technology would rule out the possibility of everyone's having a job. "The government will have to take steps to provide a guaranteed income for every citizen, and the development of a socialist state will be inevitable."

Automation may result in obsolete skills, but it cannot be permitted to result in obsolete people, averred Stirling McDowell, Assistant Secretary of the Saskatchewan Teachers' Federation. Mr. McDowell believes that although technical competence is necessary in the face of automation and technological advances, it is actually less important than training people to adjust to modern-day trends.

W. G. Gilbey, President of the Saskatchewan Federation of Labour, criticized the Essential Services Emergency Act passed by the Saskatchewan Legislature in September by calling it a piece of "ham-stringing and union-busting legislation."

"The introduction of compulsory arbitration in many disputes, in particular the ESE Act and the increased use of injunctions, promotes the aim of the employers across the nation to destroy full and free collective bargaining.

"The trade union movement can only meet this challenge with the utmost unity and activity, in order to restore the full right to strike and to gain the right of bargaining on all issues affecting security."

Executive Report

Despite obvious setbacks, labour in Saskatchewan seems to have moved into a brighter situation and an awareness of the need for labour to be united has developed, according to the Saskatchewan Federation of Labour's executive report. The report said that, looking back over the last two years, labour's new position has risen basically from two contradictory factors—the buoyant North American economy that was given full employment, and the backward swing in Government policy against the wage and salary earner both in Canada and in Saskatchewan.

"It has become abundantly clear," the report continued, "that there exists what is hard to avoid calling a 'conspiracy' by big business through their helpers in Government to blame wages for what is really profit inflation. Saskatchewan itself is a prime example of a province whose income distribution discriminates against labour. The figures show that Saskatchewan was the only province in Canada, except Newfoundland, where there was no average hourly earnings increase whatever in 1965."

The wage figures contrast sharply with the latest government White Paper which shows that the average income for Saskatchewan citizens rose by more than 16 per cent in 1965. The discrepancy can only mean that the Saskatchewan employee was severely short-changed in that year, the report said.

The Federation re-elected all officers of the executive council. The executive officers included Mr. Gilbey, Regina, President; W. A. Ferguson, Moose Jaw, first Vice-President; Mike Germann, Saskatoon, second Vice-President; Len Wallace, Regina, third Vice-President; and I. E. Moore, Regina, Treasurer.

ALBERTA

Introduction of a 30-hour, five-day work week; an increase in the provincial minimum wage to $1.50 an hour for all workers; extensive changes in the Alberta Workmen's Compensation Act; an increase in old age security payments to $100 a month without a means test; and three weeks paid vacation for all employees in the province—these were among the measures urged in resolutions approved by the Alberta Federation of

Labour at its annual convention, held in Calgary October 26 to 28.

Among the principal speakers were Hon. Raymond Reierson, Minister of Labour of Alberta and Donald MacDonald, Secretary-Treasurer of the Canadian Labour Congress.

When it was first introduced, the resolution urging the introduction of a 30-hour week, aroused considerable opposition, and was finally referred back to the resolutions committee for study. One delegate said that giving unemployment as a reason for the shorter week was "malarkey"; and another described the proposal as "ridiculous," adding that "no government would do it," and that the only way to win a shorter week was by negotiation in individual cases.

On the other side, one of the delegates affirmed that there was still a quarter of a million unemployed in Canada. Another said that, at the present time, talk about unemployment was "purely emotional," but he argued, "We want this for protection in the future."

When the resolution was brought back in an amended form the next day, it was passed with little objection. The original motion had demanded "immediate enactment," but the amended resolution called for a 30-hour week "in the near future."

Amendments

Amendments to the Workmen's Compensation Act that the Federation wanted were:

—compensation benefits to be raised from 75 per cent of regular earnings to 100 per cent;

—disability pensions, now based on wages, to be made uniform and brought into line with the higher wages of recent years;

—the allowance to a dependent widow or widower to be raised to not less than $125 a month;

—the ceiling for compensation for disability, now $5,000, to be raised to at least $7,000.

The delegates defeated a resolution that urged the making of a search for an alternative to work stoppages, which, it said, were "not in the best interests of labour, management or the public." The resolution asked the Federation to consider the advisability of setting up a board composed of workers, industry, government and the public to seek equitable wage settlements.

Other Resolutions

Other resolutions approved by the convention called for:

—the taking over by the federal Government of the Canadian Pacific Railway system, including all its operations besides that of the railway, and setting it up as a crown corporation;

—public ownership of utilities, including hydro and gas resources, railways and telephones;

—abolition of ownership of property as a condition of nomination for public office;

—redistribution of seats in the provincial legislature to provide fair representation for urban voters;

—department and chain stores to be required by the provincial Government to remain closed on statutory holidays;

—a clearer definition of the term "employee" under the Alberta Labour Act, the present definition being alleged to restrict union membership by calling some employees supervisors, which the Federation called "union-busting;"

—the provincial Government to provide funds to enable mental hospitals to raise the "deplorable" and "starvation" wages paid to employees;

—the provincial Government to raise the fee for jury duty to $25 a day;

—more speed in retraining labourers, and laws to require the management of any establishment of reasonable size to establish retraining programs for their own employees.

Medicare Delay

The convention also condemned the federal Government for delaying the inauguration of its medical care scheme until July 1968, and Premier Manning's opposition to medicare "on what he calls principle."

An emergency resolution presented by the executive and approved by the delegates, criticized the Saskatchewan Government for taking away the collective bargaining rights of gas and clerical workers during a strike period, and condemned as "undemocratic" the legislation that provided for compulsory arbitration during the strike.

Another adopted resolution accused the employers, and forces opposed to labour, of having misused the Criminal Code of Canada by obtaining unnecessary injunctions to restrain legal strikers.

The convention approved a resolution calling for systematic disarmament by Canada, and asking the federal Government to exert its influence in the United Nations to seek a disarmament agreement among the nations of the world.

The delegates condemned a section of the Alberta Labour Act that forbids "informative picketing" for the purpose of obtaining union membership and certification.

Reierson Urges Restraint

Hon. Raymond Reierson, Alberta Minister of Labour, urged the AFL to restrain its demands in order to help Alberta to enjoy the country's "finest standard of living." Industry should recognize its responsibility also to the public interest in connection with the setting of prices and profit levels, he said.

The Alberta Pension Benefits Act, which is to come into effect on January 1, was designed with portability in mind, the Minister told the delegates. Answering labour complaints that benefits would become "locked in" under the terms of the Act, he explained that this would be true of only half the employees' contributions. This was in accordance with the Government's aim of attaining "the greatest possible degree of uniformity" in provincial pension regulations across the country.

Little Progress

Canada has shown very little progress in industrial relations in the first hundred years of her existence, Donald MacDonald, Secretary-Treasurer of the Canadian Labour Congress, said in his address to the convention. In two important ways, the degree to which management has accepted labour and the extent of labour's participation in solving economic problems, the Canadian record was shameful.

Progress in this field must rest on greater maturity on both sides and on a recognition that each partner in the economy has its proper role and a full right to existence, Mr. MacDonald said.

Election of Officers

Roy Jamha, Edmonton, was unanimously elected president in succession to the retiring president, Doug Murdoch, who declined nomination after the passage of a resolution that excluded a full-time employee of the Federation from seeking elective office in the body. Mr. Murdoch was appointed earlier this year as the first full-time organizer of the AFL.

Frank Bodie, Edmonton, was re-elected Secretary-Treasurer without opposition, and the following were elected unanimously: Keith Johnson, First Vice-President; Pat Lenihan, Calgary, Second Vice-President; and Peter Uganecz, Third Vice-President.

BRITISH COLUMBIA

At the opening of the B.C. Federation's annual convention in Vancouver, October 31 to November 4, President

Al Staley condemned "the instant economics of the provincial Government," and asked for greater economic planning.

In a keynote speech, he called for two major proposals: creation of a B.C. economic council to work with federal agencies and the Economic Council of Canada in research on the state of the national and provincial economy; and establishment of a three-party commission, representing labour, management and the public, to study ways of improving labour legislation.

Mr. Staley condemned the Government's attempt to limit overtime as a measure introduced without proper thought or planning. "If any evidence is needed, there is the spectacle of the Government's prosecuting the Lenkurt strikers for refusing to work overtime at the same time as the overtime ban was announced," he said.

"What we need and what we have advocated is an end of patchwork, stopgap measures, and their replacement with realistic, forward economic planning. While the Government has been demanding restraint, cutbacks and austerity, it has itself refused to provide any guidelines on prices and profits, but has tried to place the whole blame on wages."

Re-write Laws

Mr. Staley said political and economic restrictions and fear of injunctions could only embitter labour-management relations. "We need an economic council to provide us with the tools of an economic policy and the re-writing of our labour laws to provide for constructive labour relations."

The executive council warned unions that it may withhold strike support if certain steps in Federation policy are ignored. Ray Haynes, Secretary-Treasurer of the Federation, said the Federation policy of arranging meetings with unions contemplating strike action has been instrumental in some cases in getting settlements without strike action. "Unfortunately there are still a few instances where unions fail to notify the Federation prior to taking strike action," he said.

Mr. Haynes believes that present labour laws and regulations represent a roadblock to union's attempts to organize workers. He declared that the onus at present is on a union to prove that one of its members has been fired because of unfair labour practices by the employer, whereas "the onus should be on the employer to prove he fired for good cause."

Delegates approved a recommendation that employers be given stiff fines for violation of labour disputes and regulations. Convention approval came after the Federation's legislative committee submitted a report showing that offences against labour laws increased to 3,384 in 1965 from 3,300 the previous year.

Nine-Point Program

Major points in the legislative committee's nine-point program for the fight against injunctions are:

—the Federation executive would appoint themselves certain delegates and other affiliated trade unionists to lobby all legislature members on the issue and publish MLAs views;

—a defence fund would be built up by an assessment of $2 a member to support the fight;

—the Federation would continue to press for meetings with the provincial Cabinet;

—a broad education program would be undertaken to acquaint union members and the public with what the Federation viewed as the evils of the use of injunctions.

Tilco Plastics

At a public meeting sponsored by the YM-YWHA and the Canadian Civil Liberties Association, David B. Archer, president of the Ontario Federation of Labour, told a panel discussion on "Respect for the Law" that society is "very close to a situation where the right to protest is being taken away by the courts in an attempt to justify an injust position."

He said he was referring specifically to the case of the 25 men jailed as a result of demonstrations outside the Tilco Plastics Limited Plant in Peterborough (L.G., Jan., p. 15). Trade unions are "in the position of trying to demonstrate against a decision of a court—and it was an unfair decision. As a result we find 25 of our people in jail." Mr. Archer contended that there should be no restriction on the number of persons on a picket line.

Delegates approved other resolutions calling for:

—legislative amendments to make technological and other changes in working conditions introduced during the life of a union agreement subject to negotiations, with the workers having the right to strike if necessary;

—appointment of a provincial ombudsman to help citizens who require redress when in dispute with judges or any agencies of the government;

—establishment of $1.75 minimum hourly wage for men and women in B.C.;

—jurors' pay of $25 a day;

—provincial legislation to ensure house-to-house voters' enumeration;

—abolition of the government-supervised strike vote (delegates felt a vote conducted by the unions should be sufficient);

—reduction of the voting age to 18; (it is now 19 provincially and 21 federally);

—a law to ensure that a union certification should automatically extend to new companies owned by the company covered by the original certificates;

—a law forbidding use of strike-breakers by a company facing a legal strike.

Inter-union rivalry is one of the biggest obstacles confronting labour's fight to sign up unorganized workers, the convention was told. A report, submitted by the Federation's organizing committee and adopted by the convention, said that the biggest stumbling block to organizing is the multiplicity of unions with conflicting jurisdiction. "In many cases, while one union is organizing at the front door, another one is at the side door."

Central Labour Voice

Charles Stewart, business agent for the Amalgamated Transit Union, said that unions outside the CLC are doing their members a disservice. His comments followed a debate on a resolution calling on the CLC to do everything in its power to make itself the central labour voice in Canada for all trade unionists. Mr. Stewart said that the growth of the Confederation of National Trade Unions, a Quebec group, has been based on organized labour's inability to service and speak for labour in that province.

Roy Smith, a delegate from the Longshoremen's Union, said organized labour can do a better job of correcting errant unions who flout the CLC's policies, program and platform by including them within the official family of labour. "I am not suggesting that in some cases there was not good reason for getting rid of some of the unions at present outside the CLC," he said, "but it is much better to have them in the family than to ostracize them and be involved in a continual battle."

A proposal that labour endorse the principal of "banking" overtime attracted interest but no action at the convention. In effect it would mean that when a man worked overtime he would be paid only straight time rather than premium time. The remainder of the overtime pay would then be banked and would be paid to the employee if at some future date he wanted time off or was laid off.

Sydney Thompson, president of the Vancouver local of the International Woodworkers of America, led the opposition to the resolution by arguing that construction workers who normally work a considerable amount of overtime in the summer could build up a sizable backlog of banked pay. "If [they] have this bank of overtime pay, they might not be able to draw unemployment insurance," he said. After a lengthy debate, delegates voted to withdraw the resolution and subject it to a year's study by Federation officers.

During a debate on a three-part economic resolution, Patrick O'Neal, a Pulp and Sulphite Worker delegate, charged that Canada's combines legislation "is the poorest in the world." Mr. O'Neal contended that the legislation gives firms a license to manipulate, manoeuvre and administer prices of goods across the country. He said a small group of companies control the meat, automobile, electrical and other industries in Canada, and that charges against these companies under the present combines law have no effect.

Mr. O'Neal described the regulations controlling air pollution in British Columbia "as a joke." The maximum fine in most B.C. municipalities for polluting the air is $100. "Compare this with Ontario where the first offence draws a fine of $5,000 and the second offence $10,000."

Mr. O'Neal's report was passed by the convention. Its key point calls for the labour Federation to press for a provincial pollution control board with adequate staff and finances to carry out the powers designated under the Pollution Control Act. The program also calls on the Federation to consider giving financial aid to prevent Western Mines Limited from dumping waste into Buttle Lake, and to support the policies of the B.C. Wildlife Federation.

Incomes Policy

The three-part economic resolution passed by the convention urges a rollback of interest, more home construction funds at lowered interest rates, and effective restraints on costs, prices, profits, dividends and corporate executive compensation to secure a balanced incomes policy for economic expansion and full employment.

The delegates agreed to a resolution which urged that a committee meet with members of senior citizens' groups and other bodies to learn more about the problems and needs of pensioners and retired members of society. The resolution said that automation and mechanization make it necessary for people to retire earlier and live on an inadequate pension.

The convention also approved resolutions calling for a provincial Government automobile insurance plan, free school supplies for all elementary and secondary students, free nursery schools, kindergarten and university education, and government regulation of used car safety standards.

Delegates approved an education committee report which recommended that a seminar be held for representatives of the B.C. Teachers' Federation on the principles and operations of trade unionism. The report also recommended establishment of a permanent speakers panel to be available to schools, universities and other groups to explain labour's position on various issues.

Manpower Proposals

Proposals adopted on manpower included:

—creation of a government-management-labour committee to study apprenticeships and their relation to technical and vocational schools;

—re-examination of government expenditures so that the predicted slack in the economy can be taken up quickly before widespread unemployment develops;

—free job training and retraining programs by federal and provincial Governments, and establishment of a fund to provide financial aid for workers forced to move to get work or to train.

Resolutions also called for nuclear arms to be removed from storage in Canada, abolition of the Senate, appointment of a full-time Minister of Labour for British Columbia, increased tax exemption, a probe of the National Hockey League, and nationalization of the Canadian Pacific Railway.

Delegates want the Federation to press for shorter working hours in the forest industry as a means of combating mechanization and automation, and to expand its efforts to provide an over-all reduction in the workweek for all unions. They also asked for a retirement age of 60 with adequate pensions.

Other Resolutions

In other resolutions the convention urged:

—the Canadian Labour Congress be asked to press for a guaranteed annual wage;

—inclusion of persons on coroners' juries who are familiar with industries where fatal mishaps occur;

—Federation support for action to give French-Canadians equality with English-Canadians;

—CLC action to obtain loans for persons in low-income brackets at no more than three-per-cent interest;

—the CLC lead a nation-wide campaign to have a comprehensive, medical care insurance plan in operation by 1967;

—a compulsory government car insurance program;

—improved car safety standards through government regulation and highway improvements;

—inclusion of dental care in medical insurance plans;

—all materials such as hydro machinery used in public projects be manufactured in British Columbia whenever possible;

—clearing of all land in British Columbia flooded as a result of construction of the Libby Dam in Montana;

—a continued labour fight against exploitation of parks, by mining, logging and other industrial interests.

Other resolutions passed at the closing session sought:

—establishment of an independent commission to administer all private hospitals in British Columbia;

—fencing off of all provincial highways to end the traffic hazard created by wandering cattle;

—abolition of the provincial sales tax;

—greater autonomy for locals of international unions in Canada;

—deepening of the Fraser River;

—Federation support of the postal workers in their fight against Bill C-170, which postal employees have branded as restrictive, anti-labour legislation;

—implementation of Mr. Justice C. W. Tysoe's recommendations on workmen's compensation;

—improved payments for workers disabled by injury;

—amendment of the constitutions of international and national unions to provide that all local unions affiliate with provincial labour federations and councils in their areas.

Delegates re-elected President Al Staley of the Carpenters' Union, first Vice-President Jack Moore, International Woodworkers of America; and second Vice-President George Johnson of the Meat Cutters. Len Guy, International Typographical Union, was moved up from fourth Vice-President to third Vice-President. Delegates elected also Ray Haynes, who had been acting as secretary for about six months on executive council authority.

Technological Change and Security of Employment

The reaction of the labour movement to technological change has varied between outright opposition and acceptance of change with an attempt to mitigate its adverse effects on individual workers

Technological change has been defined by Dr. George Saunders, Director, Economics and Research Branch, Canada Department of Labour, as any innovation affecting the production and distribution of goods and services. Speaking at a Toronto conference on Law and Industrial Relations last May, he went on to say that the new technology could take any one of the following forms: changes in the character of old products, the development of new products, new materials, new sources of power, increased mechanization or automation of productive processes, the use of computing machines, and changes in communication, plant organization and layout.

"Generally, most of these changes result in fewer employment opportunities for unskilled and semi-skilled workers, and more employment opportunities for skilled and a few semi-skilled workers."

Mr. Saunders said that, historically, the reaction of the labour movement to technological change has varied between outright opposition and acceptance of change with an attempt to mitigate its adverse effects on individual workers. In the past, attempts to soften the harsh effects of technological change usually took the form of restrictive work rules governing the use of materials, work methods, work assignments and the size of work crews. Although these methods still exist, he said, there is a growing evidence of a more enlightened approach by both labour and management to meet the human problems of technological change.

"The transition to this period of enlightenment was not an easy one," he pointed out. "It was preceded by long negotiations and some of the longest strikes in North American history." Mr. Saunders cited as an example the 116-day strike in the U.S. steel industry, and the long strike in Canada involving the Metal Trades Federation and the Quebec Iron and Titanium Company in 1963. These strikes resulted in a new concept in collective bargaining—the human relations committee. He explained that this committee functions as a supplement to collective bargaining by discussing problems of industrial relations and technological change in an atmosphere free from the crisis nature of traditional collective bargaining.

Turning Point

The turning point came in 1957 and reflected a change in the economic environment, he said. In Canada, unemployment rose and, from 1957 to 1964, hovered between 5 and 7 per cent of the labour force. At the same time, increasing international competition gave new impetus to the search for more efficient and mechanized means of production, and new technology was introduced in highly unionized industries. "These two facts—high unemployment and the introduction of new technology in heavily unionized industries—exerted new pressures on collective bargaining, thus making the recent period difficult for industrial relations."

He told the conference that the Economics and Research Branch recently began an analysis of its collective agreement files to see what has been happening in collective bargaining since the early part of this decade, and to identify provisions that are important for technological change. It examined the recent collective agreements in three industries: printing and publishing, trucking, and iron and steel. And also a sampling of agreements in such industries as pulp and paper, textiles, clothing, food, and non-ferrous metals.

Mr. Saunders believes that the first three heavily unionized industries are good examples of industries that are undergoing technical change, and that a study of their collective bargaining could be indicative to collective bargaining in Canada.

He said that the examination of collective agreements of major manufacturing establishments negotiated and signed before January 1962 revealed little direct reference to technological change, but an analysis of recent collective agreements of the three major industries showed that 299 of them directly or indirectly referred to technological change.

Variety of Provisions

Mr. Saunders drew attention also to the variety of the new provisions. They include a range of simple, limited protection provisions; guarantees of wages or employment; joint labour-management arrangements to study a specific problem, administer a particular provision, or discuss matters usually reserved for the bargaining table.

There were also provisions providing some degree of protection to workers adversely affected by technological change including severance or dismissal pay designed to help those laid off until new employment is found; extended vacations and early retirement plans; refund of tuition fees and provisions for training and re-training; re-location and transfer schemes which pay some or all of the moving expenses and provide varying degrees of protection of workers' seniority and equity rights.

Several of the agreements examined make provision for various forms of wage or employment guarantees for workers whose jobs are affected by technological change. For example, agreements in the trucking industry provide that employees would not lose their jobs through the introduction of piggyback operations. In printing and publishing, several agreements provide that permanent employees will not be laid off for reasons of economy or because of new

processes or equipment. Other agreements provide for no loss of income as a result of job downgrading.

Of even greater significance, Mr. Saunders believes, is the growing number of provisions for advance notice and union-management consultation. Their end result could be the modification of the collective bargaining relationship. Advance notice provisions signify management's willingness to divulge its future plans to the union, he said, and although it has little material benefit for the worker, he and his union, with the help of management, can plan for his displacement or change in job status before it happens.

Joint Consultation

Indicative of the deep human problems posed by change are the collective agreement clauses providing for union management consultation, or other joint action, to administer specific provisions, and discuss or research the problems of technological change. "The growing number of these clauses in recent years foreshadows potentially major changes in the collective bargaining relationship," he said.

The agreement of a large iron and steel company with plants across the country provides for a series of Human Relations Committees to discuss or study different aspects of job security and make recommendations on the basis of their findings. Recently signed agreements in the pulp and paper industry have established committees or joint consultative groups to discuss problems arising out of technological change.

Other agreements in the three industries provide for union-management clauses on a more limited basis. In most of these agreements, provision is made for union-management committees or groups to discuss specific problems such as those dealing with training and placement of workers, or for the establishment of formal joint committees to administer particular provisions in collective agreements, particularly training and re-location clauses. Mr. Saunders cites, for example, printing and publishing agreements that provide for the parties to meet and agree on the manning, pay and classification of employees with respect to new machinery or processes introduced during the term of the agreement.

Joint Approach to Training

"A particularly interesting agreement in a large steel company with plants in central Canada provides for a co-operative approach to experiment with different training programs," he said. "A training program found successful and acceptable to both parties would then be incorporated into the collective agreement."

Mr. Saunders said that it is too early to tell how these new provisions are working out in practice, but that the Economics and Research Branch is planning a field program to examine them. "In the meantime, it is worth noting that the importance of these new provisions for collective bargaining is not so much how well they are working, but that they are indicative of the parties' capacity to experiment with new approaches. Given time and the continued pressures of change, workable solutions are bound to be found so long as the parties are willing to continue to experiment."

He believes that governments have an important task in helping to solve the problems confronting labour and management by providing technical advice to the parties; publishing and disseminating solutions to different collective bargaining problems; providing incentives to encourage a problem-solving, joint-research approach to matters of mutual interest; and providing aid where solutions are beyond the scope of collective bargaining, such as establishing and maintaining training schools.

"In Canada, the federal Government and other levels of government, have been moving in these directions in recent years."

Economic Council Report

Continued from page 93

an employer and as a participant in collective bargaining.

"All these policies relate directly, via one channel or another, to the price performance of the Canadian economy."

"A second group of 'background' policies whose impact on price and other aspects of economic performance is less immediate and direct, but is likely to be significant in the longer run, is also advocated. These include policies for the improvement of basic research and statistics, and of public information and education."

The Council's report proceeded to enlarge upon these recommendations under the following heads:

—dealing with pressure points and bottlenecks;
—importance of greater stability in construction activity;
—greater stability in government expenditures on construction;
—better co-ordinated federal-provincial fiscal planning;
—programs for productivity improvement and adjustment to technological and other change;
—market power and consumer protection;
—criteria for wage and salary determination in the public sector, and food prices.

The following subjects were also discussed under the general heading, "Improved Economic Information and Research": The need for more basic economic research, for new and better statistics, and for better analysis and understanding of current economic developments.

Insurance registrations and other UIC statistics

On October 31, 1966, insurance books or contribution cards had been issued to 5,020,425 employees who had made contributions to the Unemployment Insurance Fund since April 1.

On the same date, registered employers numbered 346,260, an increase of 662 since September 30.

Enforcement Statistics

During October, 9,467 investigations were conducted by enforcement officers across Canada. Of these, 6,447 were spot checks of claims to verify the fulfilment of statutory conditions, and 900 were miscellaneous investigations. The remaining 2,120 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 365 cases, 129 against employers and 236 against claimants.* Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 695.*

Unemployment Insurance Fund

Revenue received by the Unemployment Insurance Fund in October 1966 totalled $35,908,298.83, compared with $34,981,469.09 in September and $34,132,103.34 in October 1965.

Benefits paid in October totalled $12,336,003.05, compared with $12,264,891.19 in September and $10,223,036.61 in October 1965.

The balance in the Fund on October 31, 1966 was $249,462,697.83. On September 30, it was $225,890,402.05; and on October 31, 1965, it was $126,822,111.41.

* These do not necessarily relate to the investigations conducted during this period.

PRICE INDEXES

Consumer, December 1966

The consumer price index (1949=100) advanced 0.3 per cent to 145.9 at the beginning of December from 145.5 at the beginning of November. The December index was 3.6 per cent higher than the level for the corresponding month a year earlier when it stood at 140.8.

The three main component indexes for food, health and personal care, and tobacco and alcohol remained unchanged; three others for housing, transportation, and recreation and reading showed increases, and the clothing component recorded a slight decrease.

The food index at 144.7 was unchanged from November. Price decreases were recorded for bread, sugar, infants' food, instant coffee, most fats, some vegetables including lettuce, pork, lamb, and all cuts of beef, except sirloin steak, round steak and blade roast.

The housing index advanced 0.4 per cent to 147.2 from 146.6 as a result of increases in the shelter and household operation components. Rents and property taxes edged up, and price rises for repairs, fuel, some furniture items, textiles, and most utensils and equipment, were also recorded. Prices were slightly lower for household supplies and floor coverings.

The clothing index decreased 0.1 per cent to 129.7 from 129.8. December sale prices were reported for several items of men's, women's and children's wear, with higher prices for footwear and piece goods. In clothing services, increases in prices for laundry and shoe repairs were offset by lower prices for dry cleaning.

The transportation index rose 1.0 per cent to 152.6 from 151.1 in November, reflecting an increase in the automobile operation component. Initial prices of new 1967 passenger car models were higher than year-end prices of 1966 models. Slight price increases were also shown for gasoline, motor oil and chassis lubrication.

The health and personal care index remained unchanged from November at 184.5.

The recreation and reading index rose 0.1 per cent to 161.5 from 161.3, reflecting a general rise in the price of toys, and an increase in two cities in the price of newspapers.

The tobacco and alcohol index was unchanged at 126.5.

Group indexes a year earlier (December 1965) were: food 139.6, housing 142.4, clothing 123.8, transportation 148.8, health and personal care 177.9, recreation and reading 155.4, and tobacco and alcohol 122.3.

City Consumer, November 1966

The consumer price indexes advanced in seven of the ten regional cities, declined in two and remained constant in one between October and November 1966. Movements range from an increase of 0.7 per cent in Montreal to a decrease of 0.4 per cent in Vancouver.

Mixed price movements occurred throughout the regional cities. Food indexes were higher in three cities and lower in seven. Housing indexes were higher in eight, lower in one and constant in one. Clothing indexes advanced in seven cities, declined fractionally in one and remained unchanged in two.

Transportation indexes edged down in six cities, up in one and remained steady in three. Health and personal care indexes displayed upward trends in all cities with increases ranging from a high of 2.4 per cent in Montreal to a low of 0.1 per cent in Ottawa. Recreation and reading indexes advanced in all but one city where they remained unchanged. Tobacco and alcohol indexes were up in four cities, down in three and remained constant in three.

Regional consumer price index point changes between October and November were: Montreal +1.0 to 143.6; St. John's* +0.8 to 127.3; Ottawa +0.6 to 145.5; Edmonton-Calgary +0.3 to 136.5; Halifax +0.2 to 139.2; Saskatoon-Regina +0.2 to 137.1; Winnipeg +0.1 to 140.7; Saint John −0.2 to 141.5; Vancouver −0.5 to 139.5. Toronto remained unchanged at 148.1.

Wholesale, November 1966

The general wholesale index (1935-39=100) was 260.7 in November, unchanged from October and 2.8 per cent higher than the November 1965 index of 253.7. Five major group indexes were higher and three declined.

The non-ferrous metals products group index rose 1.9 per cent in November to 232.6 from 228.2 in October. An advance of 0.6 per cent to 227.2 from 225.9 in the vegetable products group index reflected price increases for unmanufactured tobacco, and grains. The chemical products group index advanced 0.4 per cent to 212.2 from 211.3 on higher prices for soap and detergents, organic chemicals, and prepared paint.

The textile products group index rose 0.3 per cent to 252.7 from 252.0, and the non-metallic mineral products group index increased 0.1 per cent to 194.9 from 194.7.

The animal products group index declined 1.2 per cent in November to 295.0 from 298.7 in October, on lower prices for fresh and cured meats, and livestock. A decrease of 0.4 per cent to 340.6 from 342.0 in the wood products group index was mainly due to price decreases for cedar and fir. The iron products group index moved down slightly to 268.5 from 268.6.

The price index of residential building materials (1935-39=100) increased in October to 346.5 from 346.4 in September, and to 152.0 from 151.9 on the base 1949=100. The price index of non-residential building materials (1949=100) advanced 0.1 per cent to 150.9 from 150.8.

U.S. Consumer, November 1966

The United States consumer price index (1957-59=100) rose by one-tenth of 1 per cent to 114.6 in November from 114.5 in October. A year ago in November the index was 110.6.

Declines were registered in many fresh fruits, nearly all beef and pork items, poultry and eggs. These more than offset increases for some fresh vegetables, bread, and some dairy products. Restaurant meals again rose slightly.

Medical care services, including drugs, continued to show increases. In November the index for these services, including doctors' fees and hospital charges, was 131.3, the highest for any category.

With food left out, the index rose four-tenths of 1 per cent in November. The main causes were men's and boys' apparel, domestic services, furniture, home repairs, new cars, medical care, gasoline, fuel oil, and rents.

British Retail, October 1966

The British index of retail prices (Jan. 16, 1962=100) advanced to 117.4 at mid-October from 117.1 at mid-September. A year ago in October the index was 113.1.

Increases in the average prices of tomatoes, fresh fruit and candy, were partly offset by reductions in the prices of meat. The index for foods rose by more than 1 per cent to 110.9, compared with 109.6 in the previous month.

The index for housing, durable household goods, and services increased. Declines were registered in the transport and vehicles and the miscellaneous goods indexes.

* On base June 1951=100.

Employment and Unemployment in November

An estimated 7,190,000 persons were employed in November, compared with 7,324,000 in October and 6,939,000 in November 1965. The labour force, at 7,428,000 in November, was 269,000 or 3.8 per cent higher than a year earlier.

Unemployment, at 238,000, was 18,000 higher than a year ago, and 43,000 higher than the October figure of 195,000.

The unemployment rate in November was 3.2 per cent of the labour force, compared with 3.1 per cent in November 1965 and 3.7 per cent in November 1964. Seasonally adjusted, the November 1966 unemployment rate was 3.7 per cent.

The labour force, at 7,428,000 in November, was 269,000 or 3.8 per cent higher than a year earlier. Employment was up 251,000, or 3.6 per cent, during the year.

Unemployment was 18,000 higher than a year earlier.

Employment

About three-fifths of the October-to November employment decline was in agriculture. The drop in non-farm employment was in community, business and personal service, manufacturing and construction. Employment in trade showed a seasonal increase of 25,000 during the month.

This review, including the classification of labour market areas and the table on labour market conditions, has been prepared by the Manpower Information and Analysis Branch, Department of Manpower and Immigration.

Total employment in 1966 was up 251,000, or 3.6 per cent, compared with a year earlier. Non-farm employment increased by 292,000, or 4.6 per cent. Most of the advance was distributed between manufacturing and community, business and personal service.

All regions shared in the year-to-year advance in employment, the largest percentage increases being in British Columbia and Quebec.

Unemployment

Unemployment increased by 43,000 to 238,000 between October and November. The November estimate was 18,000 higher than a year earlier.

About four fifths, or 188,000 of the total unemployed had been out of work for three months or less. Some 24,000 had been seeking work for from four to six months, and 26,000 for seven months or more.

Improving the Position of Household Workers

An acute shortage of domestic workers in wartime Britain led to the establishment of the National Institute of Housecraft, which for the past 20 years has been offering training and issuing a national diploma to household workers. In setting up the Institute in 1946, the Government said that its first and most important task would be "to raise the status of domestic employment and to attract more workers into the profession."

The Institute works closely with the Ministry of Education, the Ministry of Health, the Home Office and the Scottish Departments of Education and Health. Residential training is given at the Institute's headquarters, Boston Manor House. The curriculum includes demonstrations, discussions and practical work in household routine, laundry, cookery, needlework, mending, health education, first aid, home nursing, social studies and English. Similar NIH training centres operate regionally in Leeds, Wales and Scotland.

The national diploma is awarded to candidates who satisfy the Institute's examining board as to their qualifications and fitness for domestic employment. Diploma holders, designated Associate Members of the NIH, include: adults with 6 months' full-time training; juvenile students between the ages of 15 and 17 (pre-diploma workers) with 8 months' full-time training, followed by a year of practical experience in paid employment; and housekeepers, over 25 years of age, who have completed 13 weeks' full-time training for employment in a household, small hotel or restaurant.

Working Conditions

A joint consultative committee, representing employers and associate members has been established to raise the status of domestic work and to promote good working conditions in private household employment. The committee is concerned with wages, working conditions, and satisfactory employer-employee relations. A booklet, recently revised by the committee, sets out wages and conditions of employment and defines the responsibilities of workers and employers.

U.S. Shortage

Persistent shortages of household workers in the United States were brought to light by the 1963 report of the Committee on Home and Community to the President's Commission on the Status of Women. Women had continued in household employment only until other opportunities had presented themselves during World War II.

In 1940, 18 per cent of all employed women in the United States were household workers, but by 1950 the proportion had dropped to 8 per cent. The report pointed out that such workers had been traditionally low paid, without standards of hours and working conditions, and without collective bargaining or the protective legislation normally applicable to other workers.

On the other hand, the need for household assistance had been growing steadily with the increased participation of women, especially married women, in the labour force. Many qualified women were being prevented from pursuing their careers because they could not find adequate help to maintain their homes.

The Committee on Home and Community expressed the belief that "ways can and should be found to serve more effectively and constructively the needs of both household workers and household employers." Working in this direction, representatives of several women's organizations, and the United States Government Departments of Health, Education and Welfare, and Labor, twice met under the chairmanship of Mary Dublin Keyserling, Director of the Women's Bureau of the Department of Labor, to discuss the employment of private household workers.

After hearing of the work being done by government and non-government agencies in this area, the non-governmental participants formed a National Committee on Household Employment (NCHE) to effect needed co-ordination of efforts. The goals of the committee are: to upgrade the status of private household employment; to provide leadership in establishing and promoting standards for private household work; to serve as liaison with government agencies; and to stimulate the development of additional jobs and training opportunities, in line with the President's Job Development Program.

Participants from some 16 national women's groups, professional organizations, social welfare organizations and service groups, representing about 25,000,000 men and women, constitute the committee.

Plans include experimenting with a variety of techniques to stimulate the institution and expansion of training opportunities for both traditional and new specialized skills. Managerial training is being considered with a view to introducing and testing placement techniques such as: promoting workers' co-operatives or small businesses owned or managed by the workers that would classify, place and supervise the employees, and provide fringe benefits and work for the legislative protection from which other workers benefit.

The United States Government, under its Manpower Development and Training Act, has made a grant of $105,000 to the committee, and additional funds have come from interested commercial corporations and organizations.

An International Assessment of Vocational Rehabilitation

"Vocational Rehabilitation Assessment" was the subject of an international seminar held in Berlin in September 1966. The seminar was organized by the World Commission on Vocational Rehabilitation in conjunction with the Tenth World Congress of the International Society for Rehabilitation of the Disabled. It was attended by vocational rehabilitation workers from 26 countries and by representatives of the International Labour Organization and the United Nations.

Among the Canadians who participated in the Congress were: Ian Campbell, National Co-ordinator, Civilian Rehabilitation, Department of Manpower and Immigration; J. L. Amos, Provincial Co-ordinator of Rehabilitation, Province of Ontario; Bruce J. Legge, Q.C., Chairman of the Ontario Workmen's Compensation Board; and Miss Jean B. Sutherland of the Toronto Rehabilitation Centre.

During the first day of the seminar, participants were given the opportunity to visit rehabilitation schools and sheltered workshops for orthopaedically handicapped, mentally retarded and deaf persons.

Seminar Themes

Major topics discussed during the seminar were:

—principles of assessment in vocational rehabilitation;
—early preparation of youth and adults for vocational training;
—counselling in the assessment process;
—the work situation—practical assessment; and
—coordination, integration and control of assessment.

Each subject was studied in a plenary session where two papers were presented, one by a representative of the host country, the other by a person from another country. The subjects were then studied in small work groups which in turn reported recommendations and suggestions to the entire seminar.

During the seminar, a working committee developed a glossary of 75 vocational rehabilitation terms in English, French, German and Spanish. The glossary is a working tool for practical reference in international exchange and conferences.

International Definition

The participants also developed the following international working definition of assessment in the vocational rehabilitation of disabled persons:

> Vocational assessment is that part of the rehabilitation process concerned with the evaluation and determination of the individual's ability and capacity for work.
>
> It entails the appraisal of medical, psychological and emotional, educational, social and vocational factors with the object of ensuring employment of the disabled person in a specific occupation at the highest possible level and, wherever possible, opportunity for advancement.
>
> For this purpose, factors to be considered are medical diagnosis and prognosis, physical performance in terms of work capacity, intellectual ability, educational level, attitude, stability, socio-economic and family background, occupational ability and preferences, training potential and degree of skill.

Recommendations

At the closing session, the seminar adopted a number of recommendations that included the following:

> Acknowledging that vocational rehabilitation is neither necessary nor desirable for all disabled persons, vocational rehabilitation should, however, be available as a right to those disabled individuals who need or require such services and for those unemployed or underemployed handicapped who may need training or retraining.
>
> All necessary and practicable measures should be taken to establish or develop vocational assessment services for disabled persons making the fullest possible use of any existing medical, psychological and vocational testing facilities. Such services should be provided according to the particular needs and circumstances of the country concerned in one or more of the following forms: in a special workshop; by a rehabilitation team; by a vocational guidance officer; or by a special placement officer only. In the absence of these facilities and specialists, practical trial periods on specific jobs may be undertaken.
>
> In view of increasing difficulties in rehabilitating severely disabled persons, it is recommended that more systematic studies and demonstration projects be conducted in the various areas of work assessment dealing with the very severely disabled.
>
> This seminar wishes to emphasize the importance of vocational assessment as a prerequisite for and an integral part of the vocational guidance process as outlined in ILO Recommendations 87 and 99.

Commission's Background

The World Commission on Vocational Rehabilitation was established in 1960 by the International Society for Rehabilitation of the Disabled. Its purpose is to extend and increase knowledge in employment of disabled persons through: research programs; educational and information programs; assistance to specialists and fellows; liaison with international organized labour, employer and non-governmental organizations interested in the handicapped; dissemination of information to the general public; implementation of seminars, courses of instruction; and provision of technical information and films.

Other seminars and study sessions sponsored by the World Commission since its inception include the following:

—International Training in Vocational Rehabilitation, New York, May 1962;
—sessions in conjunction with the Fifth Inter-American Conference on Rehabilitation, Mexico City, August 1962;
—Pan-Pacific Seminar on Vocational Rehabilitation, November 1962;
—International Seminar on Vocational Rehabilitation, Copenhagen, June 30-July 3, 1963;
—International Seminar on Sheltered Employment Policies and Practices, Stockholm, September 1964; and
—sessions in conjunction with the Third Pan-Pacific Conference on Rehabilitation, Tokyo, April 1965.

Man in His Working Environment

A review of *Ergonomics—Man in His Working Environment,* by K. F. H. Murrell, published in the U.S. by Chapman and Hall, 1965

Although working conditions in industry have been improved, stresses and strains, unseen, long-term and in many cases unknown, still exist. Amelioration of these stresses and strains is of benefit to all workers, but especially to those of middle age and older. The organized study of the effects of working conditions on man's performance began at the end of World War I, when men trained in human sciences entered industry to study men at work. Their scientific contribution gave a factual basis for executive action.

During the thirties, however, interest waned, as there was widespread unemployment, and men were readily available. It was not until the outbreak of World War II, with its rapid developments in the military field, that men were subjected to such stresses that they either failed to get the best out of the equipment, or they suffered complete operational breakdown. Various programs of research were undertaken, and after the war much of this was continued, although it was highly specialized and largely concerned with military usage.

K. F. H. Murrell, the author of a recent book, *Ergonomics—Man in His Working Environment,* was instrumental in bringing together into a society, persons of many disciplines who were interested in human performance. The name chosen was, The Ergonomics Research Society. Later, an international association was formed.

Mr. Murrell points out that ergonomics is not new, "but rather the logical outcome of many years of gradual development (L.G. 1964, p. 778). What is new is its interdisciplinary character. . . . The importance of ergonomics in industry is that technological developments can produce effects on operatives that may not always be foreseen. These can have two important consequences. First, stresses to which the human body is unwittingly subjected over a long period may cause loss of efficiency, or disability, later in life. Secondly, failure to match the requirements of a task with the capabilities of the operator may cause reduced output and, in the extreme case, disaster."

A Shift to Controllers

As automatic and semi-automatic processes become more prevalent, men shift from "doers" to "controllers," giving rise to problems that current managerial techniques are ill-equipped to solve, and to factors that are not fully understood. The author continues: "Ergonomic research must be able to suggest the answers to these and other related problems, but at the same time engineers and managers should on their part acquire some knowledge of the structure, functions and capabilities of man; armed with this basic knowledge, the reasons for many of the suggestions made as the result of research will be more clearly appreciated."

Mr. Murrell stresses the point that it is not feasible for the ergonomist—whatever his basic training—to present a "packaged deal on a platter." Principles exist, but their application must be determined by a management that is fully conversant with the whole spectrum of industrial activity.

This book, then, is a compendium of all the factors affecting human performance, compiled from research, and presented in a usable manner for the benefit of all those persons who are interested in, or have occasion to deal with human performance. It necessarily represents a compromise between the scientific data required by the professional—be he anatomist, physiologist, psychologist, industrial medical officer, industrial hygienist, design engineer, work study engineer, architect, illuminating engineer, or other professional—and those whose main interest is the optimum use of manpower and equipment in a plant.

It is implied throughout the book that if the physical requirements of an operation are within the capabilities of the operator, then the function can be performed adequately. If, on the other hand, any of the requirements exceed the capabilities of the operator, then the human element will break down. This, of course, will necessitate training a replacement operator, with the attendant expense and loss of production. Implied too, is the fact that everyone, from management to individual operator, regardless of age, benefits from the proper application of ergonomic principles.

Man and His Senses

The book is divided into two parts, with very complete references, author index and subject index. In Part 1, "The Elements of Ergonomic Practice," the author says, "Man's knowledge of what goes on around him is obtained prinpally through his two main senses of sight and hearing. Take these away from him and he is left in a world that can be defined, with regard to the information that reaches him from his environment, in terms of touch, smell, taste and sensations of heat or cold. These two primary senses, and in part the sensation of heat, are dependant on transmission by waves of information from the environment. To avoid repetition, therefore, it seems appropriate at the outset to discuss some of the properties of these waves."

And so he covers light, heat and sound with their characteristics, and methods and terms of measurement. As the use of these terms occurs frequently throughout the book, this is a very important section. The balance of Part 1 is concerned with the human body—its general construction, bones, muscles, nervous system, etc. Included also is information about the ranges of movements, and the forces that may be exerted by the various joints.

Part II is named "Practical Ergonomics," and covers design, environmental and organizational factors. The author states, "Ideally, equipment design should start with the operator, who should have his equipment laid out around him in positions which will ensure that his posture is adequate, that he can see what

Emphasis on the Pursuit of Knowledge

There undoubtedly are few employee-management groups in Canada as keenly aware of the value of increasing one's personal knowledge, or more enthusiastically determined in the pursuit of knowledge than the employees of Kearney National Canada Limited at Guelph, Ont. The company builds high-voltage switches for hydro-electric projects. It recently completed a 735,000 volt switch—one of the biggest ever made in the world.

Representatives of management and union point out that a great number of highly trained and highly skilled persons are required in the manufacture of such products. Practice has shown that the best way of acquiring personnel with appropriate qualifications is to have them specifically trained for the job requirements.

In conjunction with the education department of the Province of Ontario, a program of standards was worked out that would qualify personnel for the company's specific needs. Courses were prepared, and these are attended regularly by employees. In the beginning, workers were reluctant to participate, but now they are always looking for new courses that will qualify them to do their jobs more skilfully, raise their standard of performance, and increase their benefits, which accrue from greater knowledge.

On-the-job training, correspondence courses, high school and technical training are not new at the company. Plant Manager R. W. Mann stressed that training in all forms began at the company more than 10 years ago. At the present time, many of the firm's employees are receiving training under the terms of the federal-provincial Technical and Vocational Training Program 4.

In 1960, the company and the union agreed to the establishment of a formal union-management committee; they had been meeting informally since 1956. Union members of the committee are also members of the grievance committee. Membership of the committee is made up of two representatives from management and five or six union members.

Employment at the plant fluctuates between 85 and 110 employees. The workers are represented by Local 558, International Union of Electrical, Radio and Machine Workers (AFL-CIO/CLC), whose President is "Meff" Ridi.

Speaking about education, Mr. Ridi noted that many precision instruments, such as verniers, micrometers, and other highly technical equipment, are in constant use at the plant. The courses available provide the workers with the knowledge required to use such instruments and equipment, as well as read blueprints and other technical data, "and it is gratifying to know that the employees feel themselves that they need the training that will make them competent in their chosen fields, and that they miss no opportunity to get it."

* * *

More than 20 years of useful, uninterrupted service to union and management employees of UNIROYAL (1966) Ltd., (formerly Naugatuck Chemicals), is the record established by the Labour-Management Production Committee, formed in 1946, five years after the company began operations in Elmira, Ont.

The committee was dedicated primarily to developing mutual respect for the problems of management and labour as they affected the efficient operation of the plant, and to organize and assume responsibility for providing recreational and social activities for all employees of the company. Today, the purposes of the committee are much broader in scope; its members discuss education, production, safety—in fact, anything that is not exclusively in the sphere of labour-management negotiations at the collective bargaining table.

The trend towards higher education in all fields, which is so vital these days, is encouraged by labour and management at UNIROYAL. Employees wishing to attend courses at university, high school, technical and vocational training schools, or learn through correspondence courses, are given encouragement by the labour-management committee. The company's Education Assistance Program provides a refund of 50 per cent of the cost on successful completion of the course. At present, there are 10 employees taking extension courses at the University of Waterloo. Many are taking high school and correspondence courses. On-the-job training, leading to promotion, is carried on constantly.

A major activity of the labour-management committee is the operation of the plant canteen. Picnics, dances, Christmas parties for the adults and their children, and a variety of other functions of plant-wide interest, are financed with the proceeds from the plant canteen.

The labour-management committee has a membership of 10—four from management and four from the union, plus a permanent secretary and a permanent treasurer. The company's monthly magazine, "Naugatalk", which is very well accepted by the employees, is written, edited and published on the company premises by members of the labour-management committee. A suggestion award plan has been in operation at the plant for many years. Many employees have received large and small awards for their ideas for better processing and production.

It is of interest to note that the co-operative, understanding spirit that is apparent in the labour-management committee is evident in the fact that in the 25-year history of the company at Elmira, it has never been necessary to take a grievance to arbitration.

Plant workers are represented by Local 13691, District 50, United Mine Workers of America.

Certification and Other Proceedings Before the Canada Labour Relations Board

By the Employee Representation Branch

The Canada Labour Relations Board met for four days during November. The Board granted nine applications for certification, rejected five such applications, ordered two representation votes, and granted, in part, one request for review. During the month, the Board received 12 applications for certification, one application for revocation for certification and one request for the review of an earlier decision. It allowed the withdrawal of two applications for certification and directed that two such applications be considered to have lapsed.

Applications for Certification Granted

1. Seafarers' International Union of Canada on behalf of a unit of employees of Three Rivers Boatman Ltd., Trois-Rivières, Que. (L.G., July 1966, p. 589). (Reasons for Judgment issued).

2. United Electrical, Radio and Machine Workers of America (UE) on behalf of a unit of employees of Western Cablevision Limited, New Westminster, B.C. (L.G., Nov. 1966, p. 658).

3. Seafarers' International Union of Canada, on behalf of a unit of unlicensed personnel employed by North Shipping & Transportation Ltd., Quebec, Que. (L.G., Dec. 1966, p. 740).

4. Canadian Marine Officers' Union, on behalf of a unit of deck officers and marine engineers employed by North Shipping & Transportation Ltd., Quebec, Que. (L.G., Dec. 1966, p. 740).

5. Shaft & Development Workers, Local 1037 of the International Union of Mine, Mill and Smelter Workers (Canada) on behalf of a unit of employees of Lanky Explorations & Development Limited, Yellowknife, N.W.T. (L.G., Dec. 1966, p. 741).

6. Canadian Brotherhood of Railway, Transport and General Workers on behalf of a unit of unlicensed personnel employed by North Pacific Towing and Salvage Limited, Vancouver, B.C. (L.G., Dec. 1966, p. 741).

7. General Truck Drivers' Union Local 879, Teamsters, Chauffeurs, Warehousemen and Helpers Local Union 91, Teamsters, Chauffeurs, Warehousemen and Helpers Local Union 141, General Truck Drivers' Union Local 938, and Transport Drivers, Warehousemen and Helpers Union Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America on behalf of a unit of employees employed at terminals of Finch & Sons Transport Limited, Brantford, Ont. (L.G., Jan., p. 40). The Canadian Transportation Workers' Union No. 196, NCCL had intervened (see also applications for certification rejected, Item 4).

8. International Association of Machinists and Aerospace Workers on behalf of a unit of pilots employed by Quebecair, Rimouski, Que. (L.G., Jan., p. 40).

9. Truckers, Cartagemen, Construction and Building Material Employees, Local Union 362 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers employed by Shorty's Transport Ltd., Edmonton, Alta. (L.G., Jan., p. 41).

Applications for Certification Rejected

1. Seafarers' International Union of Canada, applicant, and St. Maurice Dredging (1966) Ltd., Notre-Dame de Pierreville, Que. (L.G., Nov. 1966, p. 657). The application was rejected because it was not supported by a majority of the employees affected in a representation vote conducted by the Board.

2. Brotherhood of Locomotive Engineers, applicant, National Harbours Board, Montreal Railway Traffic Dept., Montreal, Que., respondent, and Brotherhood of Locomotive Firemen and Enginemen, intervener (L.G., Nov. 1966, p. 658). The application was rejected because it was not supported by a majority of the employees affected in a representation vote conducted by the Board.

3. A.A. Murphy & Sons Ltd. Employees' Association, applicant, and A.A. Murphy & Sons Ltd., Saskatoon, Sask., respondent (L.G., Nov. 1966, p. 658). The application was rejected because the evidence of membership did not meet the requirements of the Board's Rules of Procedure and was accordingly not acceptable to the Board, and because the proposed unit was not appropriate for collective bargaining.

4. Canadian Transportation Workers' Union, No. 196, NCCL, applicant, Finch & Sons Transport Limited, Brantford, Ont., respondent (affecting employees at the company's Montreal terminal), and Transport Drivers, Warehousemen and Helpers' Union Local 106 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, intervener (L.G., Nov. 1966, p. 658). The application was rejected because the unit applied for was, in the circumstances, not appropriate for collective bargaining (see also applications for certification granted, Item 7 above).

5. CFRN Radio and Television Employees' Association, applicant, and Sunwapta Broadcasting Limited, Edmonton, Alta., respondent (L.G., Dec. 1966, p. 741). The application was rejected because, on the evidence, the Board is not satisfied that the applicant association has a majority of the employees concerned as members in good standing.

Representation Votes Ordered

1. *Syndicat National des employés de Cargill Grain CSN*, applicant, Cargill Grain Company Ltd., Winnipeg, Man., respondent (grain handlers, Baie Comeau, Que.), and International Brotherhood of Pulp, Sulphite and Paper Mill Workers and Baie Comeau Elevator and Dock Workers' Union, Local 977, intervener (L.G., Dec. 1966, p. 740). The Board directed that the names of the

---

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the functions of the Canada Labour Relations Board, for which the Employee Representation Branch of the Department is the administrative agency.

Syndicat national des employés de Cargill Grain CSN, and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers and Baie Comeau Elevator and Dock Workers, Local 977, appear on the ballot (Returning Officer: R. L. Fournier).

2. Seafarers' International Union of Canada, applicant, *Agence Maritime Inc.,* Quebec, Que., respondent, and International Union of District 50, United Mine Workers of America, intervener (L.G., May 1966, p. 237). The Board directed that the names of the Seafarers' International Union of Canada and the International Union of District 50, United Mine Workers of America, appear on the ballot (Reasons for Judgment issued).

Request for Review Granted in Part

The Board granted, in part, a request for review made by the Ontario Northland Railway, North Bay, Ont., and directed that the order of certification issued by it on February 7, 1966 to the Canadian Brotherhood of Railway Transport and General Workers, be amended by excluding from the coverage thereof the employee in the applicant employer's stores department at North Bay classified as general foreman. The request of the applicant was denied in respect of the track material foreman in the same department (L.G., May 1966, p. 236).

Applications for Certification Received

1. *Syndicat National des Employés de la Banque Canadienne Nationale CSN,* on behalf of a unit of employees of *Banque Canadienne Nationale,* Montreal, Que. (Investigating Officer: Miss M.-P. Bigras).

2. National Association of Broadcast Employees and Technicians on behalf of a unit of producer-directors and directors employed by Baton Broadcasting Limited, Toronto, Ont. (Investigating Officer: S. Emmerson).

3. International Union of Operating Engineers, Local 115, on behalf of a unit of employees in Yukon Territory employed by Poole Engineering Company Limited, Edmonton, Alta. (Investigating Officer: D. H. Cameron).

4. Canadian Air Line Pilots' Association on behalf of a unit of pilots employed by Central Airways/Wing Aviation Limited, Toronto, Ont. (Investigating Officer: S. Emmerson).

5. Canadian Brotherhood of Railway, Transport and General Workers on behalf of a unit of traffic department employees of B.C. Airlines Limited, Vancouver, B.C. (Investigating Officer: J. D. Meredith).

6. Seafarers' International Union of Canada on behalf of a unit of unlicensed personnel employed by Chembarge Ltd., Point Edward, Ont. (Investigating Officer: S. Emmerson).

7. *Association Internationale des Débardeurs,* Local 1846-B (International Longshoremen's Association), on behalf of a unit of employees of Somavrac Inc., Trois-Rivières, Que. (Investigating Officer: Miss M.-P. Bigras).

8. Seafarers' International Union of Canada on behalf of a unit of employees of Steltner Development & Manufacturing Company Limited, St. Catharines, Ont. (Investigating Officer: S. Emmerson).

9. Seafarers' International Union of Canada on behalf of a unit of unlicensed personnel employed by the Pelee Shipping Company, Limited, St. Thomas, Ont. (Investigating Officer: S. Emmerson).

10. Association of Canadian Television and Radio Artists on behalf of a unit of employees of the Canadian Marconi Company, Montreal, Que. (Investigating Officer: R. L. Fournier).

11. Driver Salesmen, Plant, Warehouse and Cannery Workers, Union Local 987 of the International Brotherhood of Teamsters, Chauffeurs, Ware-

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Conciliation and Arbitration Branch. The Employee Representation Branch acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944 and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for controlling applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements—that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and Other Proceedings Before the Canada Labour Relations Board and (2) Conciliation and Other Proceedings Before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's Newfoundland. The territory of the officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; officers resident in Toronto confine their activities to Ontario; officers in Montreal are assigned to the province of Quebec; and officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Conciliation and Arbitration Branch and the Employee Representation Branch are in Ottawa.

housemen and Helpers of America, on behalf of a unit of drivers and repairmen employed by Central Alberta Dairy Pool, Red Deer, Alta. (Investigating Officer: D. H. Cameron).

12. International Brotherhood of Electrical Workers on behalf of a unit of plant department employees of the Bell Telephone Company of Canada, Montreal, Que. (Investigating Officer: S. Emmerson).

Applications for Revocation Received

North Canada Air Ltd., Prince Albert, Sask., applicant, and Canadian Brotherhood of Railway, Transport and General Workers, respondent. The application is for the revocation of the Board's order of March 16, 1966 verifying the respondent union as bargaining agent for a unit of employees of the company. (L.G., June 1966, p. 306).

Request for Review under Section 61(2) of Act

Request by the Association of Radio and Television Employees of Canada for review of the certificate issued by the Board on June 25, 1953, which certified it as bargaining agent for a unit of certain employees of the Canadian Broadcasting Corporation (L.G. 1953, p. 1154).

Applications for Certification Withdrawn

1. Association of Canadian Television and Radio Artists, applicant, and Canadian Marconi Company, Broadcast, Division, CFCF Radio and TV, Montreal, Que. (L.G., Oct. 1966, p. 589).

2. International Union of Operating Engineers, Local 115, applicant, and Humphrey Construction Ltd., North Vancouver, B.C., respondent (Clinton Creek Project, Y.T.) (L.G., Jan., p. 41).

Applications for Certification Lapsed

1. Shaft & Development Workers, Local 1037 of the International Union of Mine, Mill and Smelter Workers (Canada), applicant, Mount Nansen Mines Limited, Vancouver, B.C., respondent (employees at Carmacks, Y.T.), and Tunnel and Rockworkers' Union, Local 168 of the Labourers' International Union of North America, intervener (L.G., Oct. 1966, p. 456).

2. Tunnel & Rockworkers' Union, Local 168 of the Labourers' International Union of North America, applicant, Mount Nansen Mines Limited, Vancouver, B.C., respondent (employees at Carmacks, Y.T.), and Shaft & Development Workers, Local 1037 of the International Union of Mine, Mill and Smelter Workers (Canada), intervener (L.G., Aug. 1966, p. 456).

Conciliation and Other Proceedings Before the Minister of Labour

By the Conciliation and Arbitration Branch

During November, the Minister of Labour appointed Conciliation Officers to deal with the following disputes:

1. Bristol Aviation Services, Montreal International Airport, and Lodge 869 of the International Association of Machinists and Aerospace Workers (Conciliation Officer: C. E. Poirier).

2. MacCosham Van Lines Limited, Kingston, and Local 91 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: T. B. McRae).

3. Cronkwright Transport Limited, Simcoe, Ont., and Local 879 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: T. B. McRae).

4. The Cumberland Railway Company (Sydney and Louisburg Division), and Brotherhood of Locomotive Firemen and Enginemen (Conciliation Officer: D. T. Cochrane).

5. Canadian Pacific Railway Company, B.C. Coast Steamship Service, and Canadian Merchant Service Guild (deck officers and engineers) (Conciliation Officer: J. D. Meredith).

6. New Imperial Mines Ltd., Whitehorse, Y.T., and Local 924 of the International Union of Mine, Mill and Smelter Workers (Canada) (Conciliation Officer: J. D. Meredith).

7. Canadian National Steamship Company Limited, Vancouver, and Seafarers' International Union of Canada (Conciliation Officer: J. D. Meredith).

8. Radio Saguenay Limitée (CKRS and CKRS-TV) Jonquière, Que., and National Association of Broadcast Employees and Technicians (Conciliation Officer: C. E. Poirier).

Settlements by Conciliation Officers

1. Canadian Pacific Railway Company, British Columbia Coast Steamship Service, and Vancouver C.P.R. Shipyard Workers' Union Local 1522, CLC (Conciliation Officer: D. S. Tysoe) (L.G., Jan., p. 41).

2. Canadian National Hotels Limited (MacDonald Hotel, Edmonton), and International Union of Operating Engineers, Local 857 (Conciliation Officer: J. D. Meredith) (L.G., Jan., p. 41).

3. Quebec North Shore and Labrador Railway Company, Sept-Iles, Que., and Brotherhood of Railroad Trainmen (Conciliation Officer: C. E. Poirier) (L.G., Jan., p. 41).

4. Alaska Cruise Lines, Ltd., Vancouver, B.C., and Canadian Merchant Service Guild, Inc., and Local 425 of the Canadian Brotherhood of Railway, Transport and General Workers (Conciliation Officer: D. S. Tysoe) (L.G., Nov. 1966, p. 659).

5. Canadian Marconi Company (Broadcasting Division, CFCF-TV and CFCF-Radio), and National Association of Broadcast Employees and Technicians (Conciliation Officer: C. E. Poirier) (L.G., Aug. 1966, p. 457).

Legal Decisions Affecting Labour

Supreme Court of Canada confirms that an interprovincial company is not subject to the provincial Minimum Wage Act

British Columbia Supreme Court rules that a purchaser of company's shares is not bound by a collective agreement

On October 4, 1966 the Supreme Court of Canada, in a unanimous decision, dismissed an appeal of the Quebec Minimum Wage Commission from the judgment of the Quebec Court of Queen's Bench (Appeal Side) (L.G., Aug. 1966, p. 460), and held that the Bell Telephone Company of Canada, being an interprovincial undertaking, fell into that class of subjects reserved to the exclusive legislative authority of the Canadian Parliament, and that no provincial legislation can be applied to employers who are within that exclusive control.

The Court ruled that the word "undertaking" means not only the physical structure, but all matters that form a vital part of the operation, including hours of work and rate of wages. Consequently, although the subject matter of wage rates is generally within the competence of provincial legislatures, this authority does not extend to the regulation and control of the scale of wages to be paid by an interprovincial undertaking.

Summary of Facts

Mr. Justice Martland, rendering the judgment for the Court, noted the following circumstances of the dispute.

The Quebec Minimum Wage Commission, the appellant in the case at bar, claimed the sum of $53,473.64, which was the amount of a levy which the Commission sought to impose upon the Bell Telephone Company of Canada in respect of the year 1959, pursuant to By-Law B1, 1947, enacted by the said Commission by virtue of the powers conferred upon it by the Quebec Minimum Wage Act. The sum claimed was one tenth of 1 per cent of the wages paid to the company's employees purportedly governed by an ordinance of the Commission. The authority to enact the ordinance is contained in Section 13 of the Quebec Minimum Wage Act, which provides that:

> The Commission may, by ordinance, determine, for stated periods of time and for designated territories, the rate of minimum wage payable to any category of employees indicated by it, the terms of payment, working hours, conditions of apprenticeship, the proportion between the number of skilled workmen and that of apprentices in any stated undertaking, the classification of the operations, and the other working conditions deemed in conformity with the spirit of the Act.

Submissions and Issues Involved

The Bell Telephone Company contended that it is not subject to the levy because the provisions of the ordinance, and of the statute pursuant to which the ordinance was enacted, cannot apply to it, because the company is an undertaking of the kind described in subsections 10(a) and (c) of Section 92 of the British North America Act. The matter to be determined by the Court was whether the Quebec Minimum Wage Act could apply to an undertaking that is within paras. (a), (b) or (c) of subsection 10 of Section 92 of the British North America Act.

Three of the judges of the Court of Queen's Bench held that the fixing of a minimum wage, and the regulation of the other matters provided for in the Minimum Wage Act could, in relation to the employees of such an undertaking, be effected only by the Parliament of Canada. The other two members of the Court, although maintaining that the provincial legislation would be applicable in the absence of legislation by the federal parliament, were of the opinion that the key section of the Act, s. 13, did, in fact, conflict with the provisions of the federal Industrial Relations and Disputes Investigation Act.

The Commission's submission was that the legislation in question did apply to the Bell Telephone Company until the federal parliament occupied the field, and that this was not done until the enactment, on March 18, 1965, of the Canada Labour (Standards) Code.

Provisions of the B.N.A. Act

The relevant provisions of the British North America Act are as follows:

> 91. ". . . it is hereby declared that (notwithstanding anything in this Act) the exclusive Legislative Authority of the Parliament of Canada extends to all matters coming within the classes of subjects next hereinafter enumerated; that is to say, . . .
>
> (29) Such classes of subjects as are expressly excepted in the Enumeration of the classes of subjects by this Act assigned exclusively to the Legislatures of the Provinces.
>
> 92. In each Province the Legislature may exclusively make Laws in relation to Matters coming within the Classes of Subjects next hereinafter enumerated; that is to say, . . .
>
> (10) Local Works and Undertakings other than such as are of the following classes:
>
> (a) Lines of Steam or other Ships, Railways, Canals, Telegraphs, and other Works and Undertakings connecting the Province with any other or others of the Provinces, or extending beyond the limits of the Province;

(b) Lines of Steam Ships between the Province and any British or Foreign Country;

(c) Such works as, although wholly situate within the Province, are before or after their Execution declared by the Parliament of Canada to be for the general advantage of Canada or for the Advantage of Two or more of the Provinces.

Undertaking under Federal Control

Mr. Justice Martland noted that the Quebec Minimum Wage Act is a statute which, *inter alia,* purports to regulate to an extent the wages to be paid by the Bell Telephone Company to its employees. If the regulation of the wages paid to its employees by an undertaking within the excepted classes in S. 92(10) is a "matter" coming within those classes of subjects, then, by virtue of S. 91(29), it is within the exclusive legislative authority of the Canadian Parliament.

The question was, therefore, What "matters" are within the classes of legislative subjects defined in that paragraph? In the opinion of Mr. Justice Martland, these "matters" extend beyond the mere physical structure of, e.g. a railway or a telegraph system. The words "works" and "undertakings" are to be read disjunctively (*Attorney-General for Ontario v. Winner,* (L.G. 1954, p. 559)) and the word "undertaking" has been defined in re *Regulation and Control of Radio Communication in Canada,* (1932) A.C. 304 at 315 in the following way:

> "Undertaking" is not a physical thing, but is an arrangement under which, of course, physical things are used.

In the opinion of Mr. Justice Martland, all matters that are a vital part of the operation of an interprovincial undertaking as a going concern are matters that are subject to the exclusive legislative control of the federal parliament within S. 91(29) of the BNA Act. Consequently, the regulation and control of the scale of wages to be paid by an interprovincial undertaking, such as that of the Bell Telephone Company, is a matter for exclusive federal control.

Mr. Justice Martland adopted the following statement made by Mr. Justice Abbott of the Supreme Court of Canada in the *Reference as to the Validity of the Industrial Relations and Disputes Investigation Act,* (L.G. 1955, p. 952):

> The right to strike and the right to bargain collectively are now generally recognized, and the determination of such matters as hours of work, rates of wages, working conditions and the like, is in my opinion a vital part of the management and operation of any commercial or industrial undertaking. This being so, the power to regulate such matters, in the case of undertakings which fall within the legislative authority of Parliament, lies with Parliament and not with the Provincial Legislatures.

In reviewing various authorities Mr. Justice Martland referred to two decisions of the Supreme Court of Canada that in his opinion, bore a close relationship to the circumstances of the case at bar.

In the *Reference re the Minimum Wage Act of the Province of Saskatchewan* (L.G. 1948, p. 631), the question was whether the Act in question applied to one Leo Fleming, who had been hired temporarily and paid by a postmistress of a revenue post office at Maple Creek, Saskatchewan. It was held that it did not apply, even though Parliament had not dealt with the subject by legislation. In the opinion of Mr. Justice Martland, the conclusion in this case was properly stated in the headnote, as follows:

> The employee became employed in the business of the Post Office of Canada and therefore part of the Postal Service. His wages were, as such, within the exclusive legislative field of the Parliament of Canada, and any encroachment by provincial legislation on that subject, must be looked upon as being *ultra vires,* whether or not Parliament has or has not dealt with the subject by legislation.

Mr. Justice Martland saw no difference in principle between the position of an employee hired and paid, not by the Crown, but by an individual, but who was engaged in the Postal Service, S. 91(5), and an employee of an interprovincial undertaking, S. 91(29) and S. 92(10), in relation to the exclusive power of the federal parliament to legislate regarding his wage rate.

In the *Reference as to the Validity of the Industrial Relations and Disputes Investigation Act,* referred to above, the Court had to consider the validity of federal legislation in the field of labour relations applicable to businesses within the legislative authority of the Parliament of Canada. The Act in question was held to be within the federal power, and the decision, in Mr. Justice Martland's view, did recognize that that field constituted an essential part of the operation of such an undertaking.

Appeal Dismissed

Mr. Justice Martland agreed with this view. In his opinion, regulation of the field of employer and employee relationships in an undertaking such as that of the Bell Telephone Company, as in the case of the regulation of the rates that they charge to their customers, is a "matter" coming within the class of subject defined in S. 92(10)(a), and being so, is within the exclusive legislative jurisdiction of the Parliament of Canada. Consequently, any provincial legislation in that field, although valid in respect of employers not within exclusive federal legislative jurisdiction, cannot apply to an employer who is within that exclusive control.

The Supreme Court of Canada dismissed the appeal and upheld the decision of the Quebec Court of Queen's Bench (Appeal Side). *Commission du Salaire Minimum v. Bell Telephone Company of Canada,* 66 CLLC, para. 14,154.

B.C. SUPREME COURT

On May 25, 1966 Mr. Justice Munroe of the British Columbia Supreme Court ruled that when the shares of a company that was subject to a collective agreement had been bought by another company, but this transaction was not the sale, lease or transfer of "business," the purchasing company is not bound by the collective agreement.

Summary of Facts

On July 2, 1965 the Retail, Wholesale and Department Store Union, Local 580, was certified under the British Columbia Labour Relations Act as bargaining agent for certain employees of Reitmier Truck Lines Limited. On July 8, 1965 a collective agreement was entered into between the Reitmier Company and Local 580. The agreement contained the following provision:

> In the event the business or part thereof is sold, leased, transferred, taken over by sale, lease assignment, receivership or bankruptcy proceeding, or where the business or part let out to a contractor; or where the stock or equipment of a business is sold, leased, transferred, out of the usual course of the business, the purchaser, lessee, transferee, contractor or subcontractor shall continue to be subject to the terms and conditions of this Agreement for the life thereof, as if no changes had occurred as if it had been signed by him.

Company's Shares Sold

On October 1, 1965 D.S. Scott Transport Limited purchased all the issued shares of the Reitmier Company and took over its management. At that time the Scott Company was a party to a collective agreement made with the General Truck Drivers and Helpers Union,

Local No. 31, which required the employees of the Scott Company, as a condition of employment, to become members of Local 31 within 14 days of obtaining employment with the Scott Company, and to remain as members of the said union.

Employees Hired by Purchaser

On October 16, 1965, 26 employees of Reitmier were informed at a meeting that the Scott Company had purchased all the issued shares of the Reitmier Company and that hereafter Reitmier would have no employees. All Reitmier employees were invited to apply for a job with the Scott Company the same day, and were informed that only those who applied the same day would be given a job and have the seniority preserved *vis-a-vis* Scott employees. Also, Reitmier employees were informed at that meeting that Local 31 had agreed to admit all of them into membership without payment of any initiation fee, if they joined the union within 14 days.

Reitmier employees accepted this offer, applied to Scott for employment, and joined Local 31 of the General Truck Drivers and Helpers Union. Thus, the effect of certification granted to Local 580 was apparently nullified and became of no practical value since it covered no one.

The Reitmier Company remained in business as a common carrier with the assets that it owned at the time of purchase by the Scott Company. These assets included 13 tractors, 15 trailers and the license granted to it by the public utilities commission of British Columbia. It has retained its good will. It continued to carry on its business in the same manner as it did prior to the purchase. It solicited business and kept its own books of account. It continued to send invoices to its customers, and collected its accounts receivable and was paying its debts. Its trucks continued to carry freight. Its corporate entity remained intact, separate and apart from the Scott Company. Its operations remained indistinguishable from those carried on by it before the day of purchase, save in one respect—it had claimed to have no employees at all.

Those who drove vehicles owned by Reitmier and bearing its name, like those engaged in administering and managing its affairs, drew their wages and salaries not from Reitmier, but from the Scott Company. The Reitmier Company had no payroll. Everyone was on the Scott Company's payroll. The Reitmier Company was supposed to compensate the Scott Company for all such services by a formula not explained in detail.

Injunction Sought

Local 580, which had a collective agreement with the Reitmier Company before the Company's shares were sold to the Scott Company, brought an action against the Reitmier Company, the Scott Company and Local 31 for declarations and an injunction based upon the said collective agreement.

The defendants claimed it could not be said that any breach of the collective agreement entered into with Local 580 had occurred. The Reitmier Company conceded that this collective agreement would be still in full force and effect, and that the Reitmier Company would be bound to honour its commitments thereunder if it had any employees—but it alleged that, since the purchase of its shares by the Scott Company, it had no employees.

Section 12(11) of the British Columbia Labour Relations Act reads as follows:

> Notwithstanding the provisions of subsection (10), where a business or part thereof is sold, leased, or transferred, the purchaser, lessee, or transferee is bound by all the proceedings under this Act before the date of the sale, lease, or transfer, and the proceedings shall continue as if no change had occurred; and if a collective agreement was in force, that agreement continues to bind the purchaser, lessee, or transferee to the same extent as if it had been signed by him.

The Reitmier Company had been incorporated under the British Columbia Companies Act. The Scott Company had been incorporated under the Companies Act (now the Corporations Act) of Ontario and had been registered as an extra-provincial company in the provinces of British Columbia and Quebec, and had been licensed as a common carrier in every province through which it travels from British Columbia to New Brunswick, and in some of the United States of America. Its head office is in Ontario.

The relations between the Scott Company and its employees are governed not by any provincial statutes but by the federal Industrial Relations and Disputes Investigation Act, because it is an undertaking connecting the provinces. The federal Act contains no such provision as S. 12(11) of the British Columbia Act.

Plaintiff Submission

Mr. Justice Munroe, in his reasons for judgment, summarized the arguments submitted by Local 580 in the following way:

(1) The drivers of vehicles who prior to October 16, 1965 (when they applied to the Scott Company for employment) belonged to Local 580, and who since then had driven vehicles belonging to the Reitmier Company, are still employees of Reitmier for the purposes of the Labour Relations Act and collective bargaining.

(2) Alternatively, if they had not since October 1, 1965 (when Reitmier's shares were sold to the Scott Company) been employees of Reitmier, they are still covered by the collective agreement between Local 580 and Reitmier, and this agreement is still binding upon Reitmier and Scott by virtue of Section 12 of the B.C. Labour Relations Act.

(3) Reitmier has remained a provincial undertaking, and its business has not been integrated with that of Scott so as to transform it into an interprovincial undertaking falling under federal jurisdiction.

Identity of Employer

Dealing with the first submission, Mr. Justice Munroe had to answer the question, By whom are the 26 drivers in question now employed, for purposes of the Labour Relations Act? He noted that the 26 employees in question had been, since October 16, 1965 the employees of Scott and not of Reitmier. Since then, only the Scott Company had had the authority to terminate their services, and it had been exercising full and complete control over them, despatching them as it saw fit.

Then there was the question as to whether such employment is a sham or subterfuge on the part of Reitmier or Scott to circumvent the collective agreement made between Local 580 and Reitmier, or to circumvent the Act. Is the Scott Company a mere service agency of Reitmier?

In the opinion of Mr. Justice Munroe, if it was such a subterfuge, it was one to which the employees themselves were parties. They acquiesced in the termination of their employment with Reitmier, and entered into contracts of employment with the Scott Company and elected to join Local 31. None of them appeared at the trial to complain of coercion or other impropriety. They were now employed by the Scott Company with their consent.

It could not be said, Mr. Justice Munroe pointed out, that industrial peace or the other purposes of the Labour Relations Act referred to in *Oil, Chemical and Atomic Workers Int. Union v. Imperial Oil Ltd. and Atty.-Gen. of B.C.* (L.G. 1964, p. 41) would be served by

directing that these employees should cease to be members of Local 31 and that they reinstate themselves into Local 580, in the absence of any evidence that such is the desire of the employees concerned. Mr. Justice Munroe held that the employees in question had been, since October 16, 1965 the "employees" of the Scott Company for all purposes.

No Sale of Business

Regarding the submission that Section 12(11) of the B.C. Labour Relations Act, quoted above, governed the transaction in question, Mr. Justice Munroe reached the conclusion that the transaction was simply a sale of shares and was not the sale, lease or transfer of "a business or part thereof," and that the Scott Company was not the purchaser, lessee or transferee of a business or part thereof.

Mr. Justice Munroe maintained that the sale of shares of a company is not the sale of a business within the meaning of Section 12(11) of the Labour Relations Act. Accordingly, he declared that the collective agreement between Reitmier and Local 580 was not binding upon the Scott Company by statute, and that, in the absence of any contractual obligation, the Scott Company was not bound by its terms.

This conclusion Mr. Justice Munroe reached after considering the authorities including *Amalgamated Lithographers of America Local 44 v. Nat. Paper Box Ltd. and Burnaby Paper Board Ltd.* (1964) 48 W.W.R. 547; *Re Parkhill Furniture & Bedding Ltd.* (L.G. 1961, p. 158; 1961, p. 477); *Reg. v. Ont. Labour Relations Board; Ex parte Kitchener Food Market Ltd.* (1966) 54 D.L.R. (2d) 219.

A Provincial Undertaking

Mr. Justice Munroe found, upon the evidence, that the Reitmier Company had not become an integral part of or necessarily incidental to the Scott Company's operations so as to bring its activities respecting labour relations under federal jurisdiction. It is true, he noted, that Reitmier's fleet of vehicles operating within British Columbia generated freight business for Scott, and was therefore a valuable supplement to Scott's interprovincial business.

But that fact alone did not justify a finding either that it is an integral part of, or is necessarily incidental to the work and business of the Scott Company in the face of the evidence that the Reitmier Company's vehicles are not licensed to haul freight elsewhere than in British Columbia except on an irregular, and infrequent single-trip permit basis. Mr. Justice Munroe found their undertakings separate and divisible.

Certification Inapplicable

In the opinion of Mr. Justice Munroe, there was one final reason why Local 580 could not succeed in its action—it was certified as bargaining agent for certain employees of the Reitmier Company employed at the address stated in the certificate. Since October 16, 1965 no employee had been employed at that address, having been moved to the business premises of the Scott Company in another municipality. Unless and until the certification of Local 580 was amended by the Labour Relations Board, it could not apply to the employees in question in any event.

Action Dismissed

The action for declarations and an injunction based upon a collective agreement was dismissed.

Retail, Wholesale and Department Store Union, Local 580 v. Reitmier Truck Lines Ltd., D.S. Scott Transport Limited and General Truck Drivers and Helpers Union, Local No. 31 (1966) 57 W.W.R., Part 2, p. 104; 66 CLLC, para. 14,141.

Recent Regulations, Federal and Provincial

Special holiday provisions for longshoremen issued by the federal Government

Nova Scotia raises minimum wage rates

New regulations under the Canada Labour (Standards) Code established special general holiday provisions for longshoremen who customarily work for a number of employers in a month.

In Nova Scotia, amendments to the minimum wage orders increased almost all rates by 5 cents an hour.

In Ontario, new regulations were issued for the radio and television service technician trade. Special negotiating procedures were established for employees of the Liquor Licence Board and the Liquor Control Board.

FEDERAL

Canada Labour (Standards) Code

Under an amendment to the Canada Labour (Standards) Code, regulations were made on December 15 dealing with general holidays with pay for longshoremen.

The amendment, which received Royal Assent on December 14, adds a new part, Part IV-A, to the Code to deal with "multi-employer employment." "Multi-employer employment" means employment in an occupation or trade in which, by custom, any or all of the employees would, in the usual course of a working month, ordinarily be employed by more than one employer. The term may be defined more specifically by regulations. Such employees, because of the custom of their work, would not usually be able to meet the employment and service requirements set out in Parts III and IV of the Code. The effect of the amendment is that, where regulations are made under Part IV-A, the rules governing general holidays and annual vacations set out in those regulations will take the place of the general rules in Part III and Part IV of the Code.

The regulations (SOR/66-573 gazetted December 28) deal with general holidays with pay for longshoremen in multi-employer employment. They provide for two situations—one when employees are paid through a "multi-employer unit" designated by the Minister of Labour, and the other when employees are paid by the individual employers for whom they work from time to time.

To be designated as a multi-employer unit, an association of employers must satisfy the Minister that it has set up a central pay office to keep employment records and to pay wages, including general holiday pay, as required by the regulations, on behalf of the members.

A longshoreman employed by a member of a multi-employer unit is entitled to pay for a general holiday if he was entitled to wages for at least 15 days or 120 hours in the 30 calendar days immediately preceding the holiday. Pay for the general holiday is to be not less than eight times his basic hourly wage rate, defined to exclude any premium or bonus rates.

In the second case, where there is no multi-employer unit, a longshoreman is entitled to a specified percentage of his earnings in lieu of general holidays. On each pay day, he must be paid by his employer an amount equal to 3 per cent of his basic rate of wages multiplied by the number of hours he has worked for that employer in the pay period.

In both cases, an employee who is required to work on a general holiday is to be paid at not less than one and one half times his basic rate of wages for the time worked by him on that day.

ALBERTA

Tradesmen's Qualification Act

New regulations under the Tradesmen's Qualification Act governing the trades of steamfitter, plumber and sheet metal mechanic amended the definitions of these trades.

In particular, the definitions of the trades of steamfitter and plumber have been expanded, effective April 1, 1967.

The amendments were gazetted as Alta. Reg. 375/66 to 377/66 on November 15.

BRITISH COLUMBIA

Apprenticeship and Tradesmen's Qualification Act

The special regulations respecting certificates of proficiency in the plumbing, steamfitting and pipefitting, and sprinkler fitting trades have been amended with respect to the period of qualifying time required for an applicant for a certificate of proficiency. The minimum number of hours of experience required in any of these trades is now 10,000 hours instead of 8,000.

The amendment, B.C. 238/66, was gazetted on November 24.

NOVA SCOTIA

Minimum Wage Act

In Nova Scotia, amendments to the general minimum wage order, and the three occupational orders gazetted on November 30, increased almost all minimum rates by 5 cents an hour, effective from January 1, 1967.

In the general order and the order for beauty parlours, where rates are fixed on a zone basis, there were also a few changes in zone boundaries. New Glasgow and the surrounding area within a radius of 10 miles were removed from Zone IB and placed in Zone IA. This zone now comprises Halifax-Dartmouth, Sydney and New Glasgow and all surrounding area within a 10-mile radius of each of these cities. Zone IB now consists of Truro, Amherst, and Yarmouth and surrounding area (5-mile radius). Zone II consists of all parts of the province not included in Zone IA and Zone IB.

As a result of this re-zoning, increases in minimum rates were higher for employees in the New Glasgow area than those for workers in other places. Rates for employees subject to the general order were increased by 10 cents. In beauty parlours in this area, the minimum for experienced employees was increased by 15 cents, and the minimum for inexperienced employees by 10 cents.

In Zone IA of the general order, rates remain unchanged, except for the inclusion of New Glasgow. Minimums for Zone IB and for Zone II were increased by 5 cents an hour.

The amendments to the beauty parlour order increased minimum rates by 5 cents an hour and, at the same time, reduced the overtime standard. The minimum now payable for hours in excess of 48 in a week is now one and one half the minimum hourly rate, instead of one and one half the regular rate.

Rates for time workers in logging and forest operations and for employees in road building and heavy construction were also increased by 5 cents an hour.

The minimum rates now in effect in Nova Scotia are summarized below.

General Minimum Wage Order

ZONE IA

	Rate an Hour Male	Female
Experienced		
17 years of age and over	1.10	.85
Inexperienced		
17 years of age and over; and persons from 14th birthday until 17th birthday	.95	.70

ZONE IB

	Rate an Hour Male	Female
Experienced		
17 years of age and over	1.05	.80
Inexperienced		
17 years of age and over; and persons from 14th birthday until 17th birthday	.90	.65

ZONE II

Experienced		
17 years of age and over	.95	.70
Inexperienced		
17 years of age and over; and persons from 14th birthday until 17th birthday	.80	.55

Order for Beauty Parlours

ZONE IA

	Rate an Hour
Experienced	.90
Inexperienced	
First 3 months	No set rate
Second 3 months	.40
Third 3 months	.65

ZONE IB

	Rate an Hour
Experienced	.80
Inexperienced	
First 3 months	No set rate
Second 3 months	.35
Third 3 months	.60

ZONE II

Experienced	.70

First 3 months	No set rate
Second 3 months	.35
Third 3 months	.50

Order for Logging and Forest Operations

Time workers	$1.10 an hour
Guards, kitchen help, etc.	$210 a month

Order for Road Building and Heavy Construction

All employees	$1.15 an hour

ONTARIO

Apprenticeship and Tradesmen's Qualification Act, 1964

The first regulations to be issued in Ontario for the trade of radio and television service technician were gazetted as O. Reg. 336/66 on November 19.

In these regulations, the radio and television service technician trade is designated a certified trade, which means that a certificate of qualification is now compulsory in this trade. An exception is, however, made for persons already engaged in the trade.

An apprenticeship training program has been established and all newcomers to the trade must register as apprentices within three months. The training program consists of four periods of 2,000

hours each. It will include full-time educational day classes at a Provincial Institute of Trades, or an equivalent course of training and instruction approved by the Director of Apprenticeship, and practical training and instruction by an employer in the courses contained in the schedule to the regulations.

As provided in the Act, time credits may be allowed for approved training courses. If an apprentice holds a Secondary School Graduation Diploma, his term of apprenticeship will be reduced to four periods of 1,500 hours each.

An apprentice who has completed an electronics course approved by the Director will be granted two hours credit for each hour of instruction and training completed at the trade school up to a maximum of two periods. The balance of his apprenticeship is to be completed in two periods of practical training and instruction provided by the employer.

During his first period of training, an apprentice whose term of apprenticeship consists of four periods of 2,000 hours each must be paid not less than 40 per cent of the hourly wage payable to a journeyman employed by the same employer. This must be increased to 50 per cent during the second period, to 60 per cent during the third, and to 80 per cent during the fourth. If an apprentice holds a Secondary School Graduation Diploma, the corresponding percentages are 50, 60, 70 and 80.

An apprentice whose term has been reduced because he has completed an electronics course must be paid at least 60 per cent of the journeyman's rate during the first period and 80 per cent during the second.

Liquor Control Act

Special negotiation and arbitration procedures have been established for employees of the Liquor Control Board of Ontario and the Liquor Licence Board of Ontario by new regulations under the Liquor Control Act. These employees had been excluded from the negotiating procedures previously established for the majority of employees of the Ontario government.

In the new regulations (O. Reg. 318/66 gazetted October 29), the Liquor Control Board of Ontario and the Liquor Licence Board of Ontario Employees' Association is recognized as the Association representing the majority of the employees in these two agencies.

Procedures are to be similar to those already established for other employees of the provincial government. There is to be a Negotiating Council composed of three Crown employees appointed by the Lieutenant-Governor in Council, who will represent the "official side," and three members of the Association who will represent the "staff side." The chairman, also appointed by the Lieutenant-Governor in Council, will not be a member of the Council nor will he have the right to vote.

The Council is authorized to negotiate concerning terms of employment—including working conditions, remuneration, leaves and hours of work—that may be put on the agenda at the request of either side.

In case of a stalemate, the chairman must refer the matter to the Minister of Labour, who has discretionary authority to appoint a mediator within 15 days. If a mediator is appointed, he must report to the chairman of the Council within 30 days.

If a mediator is not appointed, or if the mediator is unable to bring about an agreement, the matter will be referred to the Liquor Control and Liquor Licence Arbitration Board. This Board will be composed of one member designated from time to time by the official side of the Negotiating Council, and one person nominated by the staff side, with a neutral chairman appointed for a renewable term of two years.

Any decision of the Arbitration Board is to be sent to the Chairman of the Negotiating Council, who must transmit it immediately to the appropriate authority to be implemented.

Older Workers

Continued from page 125

he has to do, and can operate his controls in the most effective manner."

Design Factors

The section on design factors includes layout, seating, instrument displays, compatibility of controls and displays, and design of controls. Examples, both good and bad, have been freely used. One of special interest concerns a production line that was lowered, with the operatives seated. These relatively small changes resulted in greater productivity, a saving of working space, and a greater satisfaction on the part of the labour force. A large section is devoted to design characteristics of controls, with discussion on the various types, such as cranks, handwheels, knobs, levers, joysticks, pedals and push buttons, together with the normal forces available in various positions and the degree of accuracy obtainable.

Environmental factors covered include temperature and humidity, noise, visability and vibration. Each is dealt with in detail, and its effects discussed.

Organizational factors include the organization of work, inspection, shift work and age. There are also reported results of experiments to determine the best work and rest period relationships for various types of operation, to give the greatest output. On the subject of age, the author points out that in 1958, some 52 per cent of those employed in British manufacturing industry were 40 years of age or over, and that in spite of much research on the effects of aging, industry generally is only now beginning to take note of the problem.

Labour (Safety) Code

Continued from page 83

been complied with. In such cases, however, the employer has a right of appeal.

Penalties are provided in the Code for violations of the legislation. An employer may be fined a maximum of $5,000, with the alternative of a maximum of one year's imprisonment, or he may be both fined and imprisoned. An employee who fails to take the prescribed precautions for his own safety, or that of his fellow workers, may be guilty of an offence punishable on summary conviction. Proceedings against an individual employee may not, however, be taken without the consent of the Minister.

If an employer is convicted of an offence, every person responsible for the breach will be liable, on summary conviction, to a fine of up to $100, or one month in jail, or both.

The passage of this act completes the Canada Labour Code. The act provides for the assembly and consolidation as one act, under that title, of the following five acts: the Canada Labour (Standards) Code, the Canada Labour (Safety) Code, and Female Employees Equal Pay Act, the Canada Fair Employment Practices Act, and the Industrial Relations and Disputes Investigation Act.

Alcan employees accept record wage increase

The President of the National Federation of Metal Trades (CNTU), Adrien Plourde, described the pay increase received by the 9,000 Quebec employees of the Aluminum Company of Canada in October as the highest in the metal industry in North America. The increase will give workers an average $1,169 to $2,001 raise over a two-year period.

By the Unemployment Insurance
and Pensions Section
Labour Division, Dominion Bureau of Statistics

Number of Claimants Higher at End of October Than Total of 165,000 at End of September

Claimants for unemployment insurance benefit at the end of October 1966 numbered 184,000, which was nearly 12 per cent higher than the total of 165,000 at the end of September, and about 14,000, or 8 per cent higher than the number of claimants a year earlier. Males made up the greater part of the increase compared with both the previous month and the previous year, and consequently there was a slight increase in the proportion of males in the total at the end of October.

Half the claimants at the end of October had begun to claim during the month, and about two out of every three of these were males. Among those on claim for more than four weeks, men and women were about equal in numbers. In both groups of claimants, however, women outnumbered men in Ontario and the Prairie Provinces.

As happened last month, most of the increase compared with 1965 occurred in British Columbia, and it was concentrated among the males. This was largely due to layoffs in the forest industry because of a drop in the demand for wood products. In the Prairie Provinces, there were some 1,000 fewer claimants than a year earlier, but most of the decline was in male claimants in Manitoba. In all other provinces, the number of claimants increased.

October was the fifth successive month in which the number of claimants was higher than in 1965. This was in direct contrast to the first half of the year, when the numbers were consistently lower than in the year before. The turning point occurred in June, although in that month the change was slight.

During the first five months of 1966, between 85 and 90 per cent of the decline from the previous year was among male claimants. In the next five months, however, females began to account for more of the increase, and they amounted to between 20 and 30 per cent of it between July and October.

The adjacent table shows the changes in numbers and percentages between the total claimants at the end of each month in 1965 and 1966 respectively. Changes in the percentage of males in the increase for each month are shown in the fifth column.

Count of claimants at month-end, 1965 and 1966, showing absolute and percentage changes and proportions of the absolute change attributable to males.

Month	*1966*	*1965*	*Absolute Change*	*Per cent Change*	*Per cent Males in col. (3)*

Average weekly benefit	$ 23.82	23.93	23.70	24.52	24.48

*Monthly average.

Initial and Renewal Claims

There were about 86,000 initial and renewal claims during October, compared with 73,000 in September and 83,000 in October 1965. More than 95 per cent of the claims in October 1966 were made by persons who were separated from employment during the month, and about 4 per cent were by persons whose benefit rights had terminated and who were seeking an extension of rights.

Beneficiaries and Benefit Payments

The average weekly number of beneficiaries was estimated at 130,000 in October, 122,000 in September and 108,000 in October 1965.

Benefit payments totalled $12,336,000 in October, $12,265,000 in September and $10,223,000 in October 1965.

The average weekly payment was $23.82 in October, $23.93 in September and $23.70 in October 1965.

Decisions of the Umpire Under the Unemployment Insurance Act

CUB 2592

The relevant facts of this case are set out fully in the insurance officer's appeal to the Umpire:

> On September 3, 1965 the claimant made a renewal claim stating that he was laid off due to a work shortage on September 2, 1965. He advised that he received vacation pay in an amount of $366.80. The evidence on file when the claim was first reviewed by the insurance officer indicated that the claimant was placed on holidays by his employer from August 8 to 14, 1965. He worked from August 16, 1965 to September 2. The general plant holiday period occurred from August 16 to August 28, during which time the claimant was required to work.
>
> There was no evidence on file to indicate that the claimant was placed on holidays by his employer for any period following his last day worked on September 2, and the moneys received for vacation pay had apparently no effect on the claim made on September 2, as no general continuous holiday was scheduled to commence within 6 weeks after the reported layoff on September 2. The insurance officer consequently allowed the claim.
>
> On November 12, the local office became aware that the claimant had been placed on paid holidays [from] September 5 to 11, so that his contract of service was continuing, and he had received his usual remuneration for that week. The evidence now indicated that the claimant was placed on holidays [from] August 8 to 14, worked from August 16 to September 2 and earned $106, $125.88 and $101.76 respectively for the three-week period, and was then placed on holidays [from] September 5 to 11.
>
> On the basis of this new information, the insurance officer reviewed the claim and disqualified the claimant from September 5 to 11. . . . In his opinion, the contract of service continued during the period the claimant was placed on holidays by his employer, and [he] received his usual remuneration for a full working week.
>
> The claimant appealed on the ground that he was on a designated holiday period commencing August 8, and [that] the vacation pay should have been allocated to the consecutive weeks of August 8, 15, 22 and 29. According to his Union representative, the claimant based his appeal on the Umpire's decision CUB-2475. The board upheld the appeal on the ground that the holiday pay had to be allocated to consecutive weeks under Regulation 173(6) in accordance with CUB-2475. . . .

In reply to a query made after the hearing before the board of referees, the employer stated that the claimant's designated weeks of vacation were August 8 to August 14, and September 5 to September 12. Vacation pay allocated to the latter week of vacation amounted to $104.80, and the employee returned to work on September 13.

In his appeal to the Umpire the insurance officer contended that the board erred in concluding that the jurisprudence established in CUB-2475 applied to the present case, and that the claimant's vacation pay should be allocated to the weeks commencing August 8, 15, 22 and 29.

He further contended that the board apparently did not give adequate consideration to the evidence that all employees required to work during the general plant holiday period were assigned a definite vacation period to be liquidated before or after the general holiday period. The claimant had been designated holidays of one week from August 8 to 14, and one week commencing September 5.

Evidence before the board of referees established that the claimant's contract of service continued during these particular weeks, for which he received his usual weekly remuneration, said the insurance officer, and was further confirmed by additional statements from the employer.

The insurance officer concluded that the claimant had failed to prove he was unemployed from September 5 to 11, a period during which he was placed on actual holiday with pay while his contract of service continued and he received his usual weekly remuneration.

On March 14, 1966 the claimant's union, the United Automobile Workers of America, requested a hearing, which was held in Toronto on April 14.

Considerations and Conclusions

In decision CUB-2039 (L.G. 1962, p. 1294), the Umpire said:

> The primary condition [that] a claimant must fulfill to be "entitled to be paid benefit in respect of his unemployment" during any week in his benefit period is, according to section 54(1) of the Act, to prove that he was unemployed during that week. Consequently, if he fails to do so, he is not entitled to be paid any benefit, and it is self-evident that when a claimant is not entitled to be paid any benefit, the question of whether "earnings" should be deducted therefrom (section 56 of the Act) does not and cannot arise. . . .

In view of the foregoing, it is obvious that the first question to be examined in the [present] case is whether the claimant has proved that he was unemployed during the week commencing September 5, 1965, and in that respect, I consider that the insurance officer's grounds of appeal are well founded in fact and in law.

As I have reached that conclusion, the question of whether the claimant's holiday pay should be allocated to consecutive weeks under Regulation 173(6) does not and cannot arise.

As a consequence, I decide to allow the insurance officer's appeal.

CUB 2626

The claimant filed an application for benefit and was registered for employment as a labourer. He had been employed as a bottler from December 7, 1964 to January 16, 1965 at an hourly rate of $2.53.

The claimant gave as his reason for separation: "Laid off—shortage of work. Capable and available for full-time work. Re-call indefinite." He filed renewal applications for benefit on March 16, 1965, and September 14, 1965, indicating employment with the same employer from February 8, 1965 to March 12, 1965, and May 10, 1965 to September 10, 1965. All three claims were allowed.

On December 14, 1965, the claimant was interviewed by an officer of the

Commission, at which time he affixed his signature to the following statement:

"I, . . . do solemnly declare that: I have had part-time employment . . . during my claim period. I have had no National Employment Service referrals. I have attempted to gain employment . . . but declined the offered employment because I did not wish to leave my employment at . . . I am available for full-time employment only when not required by . . . and would accept employment as factory labourer or any employment I am capable of performing.

"I would accept part-time employment, but only if it did not interfere with my being recalled for part-time work. . . . I would not accept the prevailing rate of pay unless at $2.63 [an] hour. I am 46 years of age, married, have two children age 13 and nine years. I have read and understood the Information for Claimant's booklet and know what I sign on the weekly report. I have not been ill or absent . . . during my claim period excepting today when I am off because of a sore back."

Commenting on the statement made by the claimant the placement officer stated that the part-time or starting rate in factories was not much more than $2.00 an hour, and that there was very little part-time work available.

The claimant was disqualified and benefit suspended from December 5, 1965 because he had failed to prove himself available for work. He made a further statement to the local office:

"I do not agree with the indefinite disqualification imposed. I would accept full-time employment at any place other than . . . at the prevailing rate of pay, but I would leave as soon as . . . called. I believe I would be allowed a few days to work a notice before going back to . . . but if I did not report within a few days because of being employed elsewhere, I would be through at. . . . I have worked there for nine years and I do not feel that I would like to give it up, unless I found another job [that] would be steady and [a] rate of pay [that] was comparable to what I am now earning."

On January 4, 1966, the company reported that the claimant had worked for them as follows: 2 days in October, 9 days in November and 15 days in December 1965.

The claimant appealed the disqualification to the board of referees, and the case was heard on January 26, 1966. The claimant attended and was represented.

The majority of the board found that a prospective employer would not accept the services of the claimant knowing that his employment might be of a very short duration. This factor would restrict the claimant's employment, the board said, so he would not be available within the meaning of the Act. . . .

The dissenting member stated that, according to the evidence presented, the claimant had more than nine years seniority as a full-time employee and that he had every reason to believe that he would be recalled on a full-time basis.

He further stated that the claimant was within his rights to do everything he could to maintain that employment, and that he was also within his rights, when seeking other employment, to state that he would be leaving that employment when recalled to his former employment.

For these reasons, said the dissenting member, the insurance officer's decision should be rescinded and the appeal allowed.

On March 22, 1966, the claimant's union filed a notice of appeal to the Umpire. It stated that the board of referees erred in deciding that the claimant was not available for work.

> The claimant has over nine years' seniority as a full-time employee. . . . He is [currently] an employee on layoff, subject to recall on a seniority basis. Considering these facts, and that the claimant will lose many earned benefits if he totally severs his employment, it is submitted that the claimant was within his rights under the Act to do everything in his power to maintain his employment . . . and when seeking other employment, was also within his rights . . . to state that he will return to his former employment when recalled.
>
> The claimant was available for work on December 5, 1965 within the meaning of the Act and is unable to find suitable employment. He is therefore entitled to the prescribed benefits under the Act. The board of referees' decision would work a severe hardship on all persons in the claimant's position, and the Umpire should reverse the board's finding.

Considerations and Conclusions

When a worker is laid off temporarily from his regular occupation, it is natural that he should wish to preserve his seniority and other similar rights with his regular employer, and the jurisprudence has established that, in such cases, a claimant's availability depends on his willingness to accept short-term employment during his layoff and not on the duration of such layoff (CUB 2215). This rule will apply provided [that] the claimant imposes no undue restriction on his acceptance of temporary employment (CUB 1366).

In the [present] case, the claimant's restriction to temporary work should not in itself be considered an undue restriction in view of the fact that he applied for work as a labourer, a field in which temporary work is a common thing. However, the claimant's original restriction of wages to $2.63 an hour was clearly an undue restriction, and he cannot be said to have been available for work so long as that restriction existed—that is, until he removed the restriction in his statement to the local office on December 29, 1965.

As a consequence, I decide to allow the union's appeal, effective December 29, 1965.

Conciliation Proceedings

Continued from page 129

Board Reports Received

1. The Bell Telephone Company of Canada, Directory Sales Department, Eastern Region, Montreal, and Local 57 of the Office & Professional Employees' International Union (Bell Unit) (L.G., Nov. 1966, p. 659).

2. Transcanada Communications Limited (Station CKCK-TV) Regina, Sask., and National Association of Broadcast Employees and Technicians (L.G., Nov. 1966, p. 659).

3. Rod Service Ltée, Montreal, and *Le Syndicat National des Employes de Rod Service (CSN)* (L.G., Jan., p. 42).

4. The Hamilton Harbour Commissioners (harbour patrol group), and Local 958 of the Canadian Union of Public Employees (L.G., Dec. 1966, p. 742).

Settlements After Board Procedure

1. Canadian Pacific Air Lines, Limited, Vancouver Airport, B.C., and Canadian Air Line Pilots' Association (L.G., Nov. 1966, p. 659).

2. The Hamilton Harbour Commissioners (harbour patrol group), and Local 958 of the Canadian Union of Public Employees (see above).

Settlement After Strike Action

Air Canada, and International Association of Machinists and Aerospace Workers, Lodges 714 and 1751 (L.G., Jan., p. 42).

Publications Received in Department of Labour Library

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE.

12. ROPKE, WILHELM. *Welfare. Freedom and Inflation.* London, Pall Mall Press, 1957. Pp. 70.

Contents: Unfreedom and inflation; an introductory essay by Graham Hutton. Facing the future. Reflections on the Welfare State. Keeping money honest. Creeping inflation: the managerial disease of the public economy.

Employment and Management

13. AMERICAN MANAGEMENT ASSOCIATION. *The Systems Approach to Personnel Management.* New York, 1965. Pp. 24.

Contents: The swinging pendulum of management control. The total-system approach. The personnel systems concept. The impact of technology on manpower demand and supply.

14. BUREAU OF NATIONAL AFFAIRS, WASHINGTON, D.C. *Training First-Line Supervisors.* Washington, 1966. Pp. 13.

Contents: Introduction. Scope & purpose of supervisory training. In-plant training of supervisors. Training methods (in-plant training). Duration & cost of in-plant training. Out-plant supervisory training. Evaluation of training program.

15. U.S. BUREAU OF LABOR STATISTICS. *Digest of 50 Selected Pension Plans for Salaried Employees, Summer 1965.* Washington, GPO, 1966. Pp. 53.

Describes the principal features of 50 selected pension plans in effect in the summer of 1965 covering salaried employees. Information is given in tabular form about the following: company, participation requirements, age requirement and benefits under normal retirement, illustrative monthly pensions, age requirement and benefits under early retirement, normal and early retirement benefit options, age requirement and benefits under disability retirement, vesting, involuntary retirement, death benefits, financing, and medium of funding.

16. U.S. BUREAU OF LABOR STATISTICS. *Supplementary Compensation for Nonproduction Workers, 1963; Employer Expenditures, Employer Practices.* Washington, GPO, 1966. Pp. 110.

"This bulletin analyzes major supplements, considering both employer expenditures for the supplements and the practices for which the payments are made."

Industrial Relations

17. CONFERENCE ON COLLECTIVE BARGAINING FOR PROFESSIONAL AND TECHNICAL EMPLOYEES, UNIVERSITY OF ILLINOIS, 1965. *Collective Bargaining for Professional and Technical Employees, Conference Report, May 20-21, 1965.* [Champaign, Ill.] University of Illinois, Institute of Labor and Industrial Relations [and] Division of University Extension [1966?] Pp. 53.

Speakers at the conference, representing engineers, nurses, teachers, and government employees considered such questions as: "1. What factors persuaded your members to work for collective bargaining? 2. How did you appeal to your members to persuade them of the value of collective bargaining? 3. What issues do you raise in collective bargaining negotiations?. 4. Does your organization concentrate on the problems of your members' economic and physical well-being, or do you discuss employer policy-making in other problem areas as well? 5. Why does your organization not affiliate with the AFL-CIO, if it is not affiliated?"

18. FORM, WILLIAM HUBERT, Ed. *Industrial Relations and Social Change in Latin America.* Edited by William H. Form and Albert A. Blum. Gainesville, University of Florida Press, 1965. Pp. 177.

"Based on a series of lectures sponsored by the School of Labor and Industrial Relations at Michigan State University [during 1962-63 academic year]." Examines industrial management, labor unions, industrial relations, and social conditions in Latin America.

19. O'DEA, RAYMOND. *Industrial Relations in Australia.* Sydney, West Publishing Corporation Pty. ltd., 1965. Pp. 234.

Partial contents: The conciliation and arbitration power. The Conciliation and Arbitration Act, 1904-1961. State industrial arbitration. Special forms of industrial regulation. The basic wage. The role of the Executive [the Government] in industrial relations. Master and servant. The status of trade unions. Government employment. A new development in arbitration.

Labour Party (Australia)

20. CALWELL, ARTHUR AUGUSTUS. *Labor's Role in Modern Society.* [Rev. ed., Melbourne]. Cheshire-Lansdowne [1965]. Pp. 192.

Mr. Calwell is leader of the Australian Labour Party. He outlines his party's policies.

21. CHILDE, VERE GORDON. *How Labour governs; a Study of Workers' Representation in Australia.* [2d ed., Melbourne]. Melbourne University Press [1964] Pp. 193.

An account of the political and industrial organization of the labour movement in Australia during the first 20 years of this century. The author, the distinguished archeologist, had been private secretary to John Storey, Labour Premier of New South Wales, from 1919 to 1921. This edition is reprinted from the first edition of 1923, with some slight corrections.

Labour Supply

22. ISRAEL. MANPOWER PLANNING AUTHORITY. *Manpower in Israel; Annual Report, 1964.* [Jerusalem, 1966?] Pp. 141.

23. LESTER, RICHARD ALLEN. *Manpower Planning in a Free Society.* Princeton, N.J., Princeton University Press, 1966. Pp. 227.

"A joint project of the Industrial Relations Section, Princeton University and the Program of Unemployment and the American Economy of the Institute of Industrial Relations of the University of California (Berkeley)."

This book examines manpower programs in the United States, Great Britain, West Germany, and Sweden and makes recommendations to improve manpower operations in the United States.

24. U.S. BUREAU OF LABOR STATISTICS. *Employment and Earnings Statistics for States and Areas, 1939-65.* Based on the 1957 Standard industrial classification as amended by the 1963 Supplement. Washington, GPO, 1966. Pp. 740.

Labouring Classes

27. FELT, JEREMY POLLARD. *Hostages of Fortune; Child Labor Reform in New York State.* [Syracuse, N.Y.] Syracuse University Press, 1965. Pp. xv, 276.

A history of child labour in New York State from the 1830's till recent times.

28. HAYS, PAUL RAYMOND. *Labor Arbitration: a Dissenting View.* New Haven, Yale University Press, 1966. Pp. 125.

Judge Hays, who has had 23 years' experience as a labour arbitrator, was Professor of Law at Columbia University before being appointed a judge. He says that law should "get out of labor arbitration and leave the procedure exclusively to the voluntary action of the parties." He presented these views at Yale Law School in 1964 in the Storrs Lectures on Jurisprudence.

29. SOVERN, MICHAEL I. *Legal Restraints on Racial Discrimination in Employment.* New York, Twentieth Century Fund, 1966. Pp. ix, 270.

"Underlying this whole work is the premise that the law can and should be invoked against racial discrimination in

employment." This book examines U.S. federal and state legislation dealing with racial discrimination in employment, with particular reference to Negroes.

30. STURMTHAL, ADOLF FOX, Ed. *White-Collar Trade Unions; Contemporary Developments in Industrialized Societies*. Urbana, University of Illinois Press, 1966. Pp. xv, 412.

Contains studies of white-collar trade unionism in Australia, Austria, France, Germany, Great Britain, Japan, Sweden, and the United States, written by authorities in each country.

Nova Scotia

31. JUDEK, STANISLAW. *Manpower Training Requirements for Nova Scotia, 1970 and 1975*. Halifax, Economics and Research Division, Department of Labour, 1966. Pp. 100.

Study undertaken for the Nova Scotia Department of Labour. "[This study] consists of an analysis of the historical trends in the growth of the Nova Scotia labour force and its main characteristics." Population and labour force projections are given for 1970 and 1975.

32. NOVA SCOTIA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH DIVISION. *Collective Agreements, a Pilot Survey: Union Security, Employees Security, Economic Factors*. Halifax, 1966. Pp. 62.

An analysis of 150 collective agreements on file with the Nova Scotia Department of Labour's Industrial Relations Division.

33. NOVA SCOTIA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH DIVISION. *Cosmos Imperial Mills: a Case Study in Labour Force Recruitment and Training*. Halifax, 1965. Pp. 12.

A study of company policy for recruiting and training personnel in the Yarmouth (Nova Scotia) plant of Cosmos Imperial Mills Limited, a manufacturer of industrial fabrics.

34. NOVA SCOTIA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH DIVISION. *Labour Market Area Survey*. Halifax, 1966. Pp. 126.

The statistics in this report on population, labour force, and employment in Nova Scotia, were compiled for National Employment Service.

Taxation

35. GREAT BRITAIN. DEPARTMENT OF ECONOMIC AFFAIRS. *Investment Incentives*. London, HMSO, 1966. Pp. [19].

"Presented to Parliament by the First Secretary of State and Secretary of State for Economic Affairs, the Chancellor of the Exchequer, and the President of the Board of Trade by command of Her Majesty, January 1966."

Discusses the British government's plan to make investment grants, administered by the Board of Trade, to the manufacturing and extractive industries so they can buy new equipment and machinery for use in Great Britain.

36. GREAT BRITAIN. TREASURY. *Selective Employment Tax. London,* HMSO, 1966. Pp. 11.

The British Selective Employment Tax was intended to correct the tax balance between services and manufacturing and to encourage economy in the use of labour in services so as to make more labour available for the expansion of manufacturing.

Wages and Hours

37. MORTON, HERBERT CHARLES. *Public Contracts and Private Wages; Experience under the Walsh-Healey Act*. Washington, Brookings Institution, 1965. Pp. x, 140.

The U.S. Walsh-Healey Public Contracts Act of 1936 provided that on federal government contracts exceeding $10,000 the use of convict labour and child labour was outlawed, hours of labour were limited to 8 in a day and 40 in a week (unless time-and-one-half rates were paid for overtime), the maintenance of safe and sanitary working conditions were required, and no one was to be paid less than the prevailing minimum wage as determined by the Secretary of Labor. This account studies the historical background of the act and assesses its effect since its passage.

38. U.S. BUREAU OF LABOR STATISTICS. *Major Collective Bargaining Agreements; Deferred Wage Increase and Escalator Clauses*. Washington [GPO, 1966] Pp. 64.

"Deferred or 'installment' clauses guarantee one or more wage increases during the term of the agreement." Escalator clauses refer to cost-of-living adjustments which relate wage levels to living costs. This study is based on an analysis of 1,800 collective agreements covering 7.6 million workers.

39. U.S. WOMEN'S BUREAU. *Equal Pay Facts*. Rev. ed. Washington, GPO, 1966. Pp. 6.

40. U.S. WOMEN'S BUREAU. *State Minimum Wage Laws*. Rev. ed. Washington, GPO, 1966. Pp. 8.

Women—Employment

41. BAKER, ELIZABETH (FAULKNER). *Technology and Woman's Work*. New York, Columbia University Press, 1964. Pp. xvi, 460.

The author is Professor Emeritus of Economics at Barnard College, Columbia University and an authority on technological change and its effects upon employment. The book deals with the status of working women from 1900 to the present time.

42. McKIEVER, MARGARET F. *The Health of Women Who Work*. Washington, U.S. Dept. of Health, Education, and Welfare, Public Health Service, 1965. Pp. 62.

Contents: Health and safety status. The worker and the workplace. Standards and laws governing employment. Health services in industry. Pregnancy.

43. U.S. WOMEN'S BUREAU. *Future Jobs for High School Girls*. Rev. ed. Washington, GPO, 1966. Pp. 67.

Includes up-to-date information on job opportunities, training programs, loans, and scholarships for girls with high school education.

Miscellaneous

44. INTERNATIONAL LABOUR OFFICE. *How to read a Balance Sheet*. Geneva, 1966. Pp. 124.

This programmed manual "first teaches the structure and language of a balance sheet and then goes on to illustrate some of the ways in which it can be used to assess a company's position."

45. KINGSTON, ONT. QUEEN'S UNIVERSITY. COMMERCE CLUB. *The Commerce-man, 1966. Feature: The Next Ten Years*. Kingston, 1966. Pp. 51.

Partial Contents: The next ten years: an economic forecast [by] D. J. Daly. The future of management education in Canada [by] James Gillies. Collective bargaining in the next ten years [by] William Mahoney. Canadian industry [by] Robert McKeown.

46. U.S. BUREAU OF THE CENSUS. *U.S. Census of Population: 1960. Final Report PC(2)-6C. Subject Reports. Labor Reserve: Age, Education, Occupation, and Other Characteristics of Former Members of the Labor Force*. Washington, GPO, 1966. Pp. 199.

*Revised. †Preliminary.

‡Includes post office wages and salaries. **Figures in this column are for total labour income, Canada, but are not totals of the figures in the remaining columns of this table, as figures for labour income in Agriculture, Fishing and Trapping are not shown.

NOTE: Monthly figures may not add to annual totals because of rounding. SOURCE: *Estimates of Labour Income*, DBS.

Tables C-1, C-2 and C-4 are based on reports from employers having 20 or more employees in any month of the year; at June 1966, employers in the principal non-agricultural industries reported a total employment of 3,628,408. Table C-3 gives estimates of total employment, by industry divisions, for the provinces and Canada, derived from the survey of establishments employing 20 or more persons and from a sample survey of establishments employing less than 20 persons. Tables C-5 to C-7 are based on reports from a somewhat smaller number of firms than Tables C-1, C-2 and C-4. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1, C-2 and C-4 relate to salaried employees as well as to all wage-earners in the reporting firms.

D–Manpower Division

Statistics presented in the following tables relate to registrations for employment and vacancies received from employers at Canada Manpower Centres (formerly NES offices). These data are derived from reports prepared in the Department of Manpower and Immigration, and processed in the Unemployment Insurance, Pensions and Manpower Section, Dominion Bureau of Statistics. Data are not comparable with previously published reports. See also Technical Note, Page 80, January issue.

TABLE D-1—Vacancies and Registrations on File

Period	Vacancies†			Registrations on File		
	Male	Female	Total	Male	Female	Total

E–Unemployment Insurance

Unemployment insurance statistics emanate from the operations of the Unemployment Insurance Act, and relate to persons in contact with the Unemployment Insurance Commission, either as contributors or claimants. The data are compiled in the Unemployment Insurance and Pensions Section, Labour Division, DBS, from information supplied by the UIC. The source for Tables E-1 to E-4 is *The Statistical Report on the Operation of the Unemployment Insurance Act.* For further information regarding the nature of the data see Technical Note, page 48, January issue.

TABLE E-1—Estimates of the Insured Population under the Unemployment Insurance Act

Edmonton-Calgary	131.5	136.2	136.5	136.4	131.1	138.7	136.4	189.2	153.9	122.2
Vancouver	135.7	140.0	139.5	139.2	138.1	131.2	152.6	163.8	157.6	125.3

*St. John's index on the base June 1951 = 100. NOTE: Indexes above measure percentage changes in prices over time in each city and should not be used to compare actual levels of prices as between cities.

G–Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Canada Department of Labour on the basis of reports from the Manpower Division, Department of Manpower and Immigration. The first three tables in this section cover strikes and lockouts that amount to ten or more man-days.

The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the union directly involved in the disputes leading to the work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For Technical Note, see page 109.

TABLE G-1—Strikes and Lockouts, 1961-66

Month or Year	Strikes and Lockouts Beginning During Month or Year	Strikes and Lockouts in Existence During Month or Year			
		Strikes and Lockouts	Workers Involved	Duration in Man-Days	
				Man-Days	Per Cent of Estimated Working Time
1961	272	28,	97,959	1,335,080	0.11
1962	290	311	74,332	1,417,900	0.11

labour gazette

PERIODICALS READING ROOM
(Humanities and Social Sciences)

Canada Department of Labour/March 1967

Canada Department of Labour Publications

Annual Report of the Department of Labour (Covers fiscal year ending March 31). (English or French). Cat. No. L1-1966.

Report of the Industrial Inquiry Commission on Canadian National Railways "Run-Throughs." Report of Hon. Mr. Justice Samuel Freedman, Commissioner. (English or French). Price $1.50, Cat. No. L35-965/1.

Supplements to Labour Gazette

Collective Bargaining Review. Prepared by the Collective Bargaining Section, Labour-Management Division, Economics and Research Branch, Canada Department of Labour. Obtainable from the Canada Department of Labour. Free to LABOUR GAZETTE subscribers.

Reports of Boards of Conciliation established under the Industrial Relations and Disputes Investigation Act together with reasons for judgment of the Canada Labour Relations Board. Obtainable from the Canada Department of Labour. Free to LABOUR GAZETTE subscribers.

Economics and Research Branch

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). Price 50 cents, Cat. No. L2-2/1966.

Industrial and Geographical Distribution of Union Membership in Canada, 1966 (English or French). Price 15 cents, Cat. No. L31-765.

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. Price 35 cents, Cat. No. L2-1/1965.

Wage Rates, Salaries and Hours of Labour, 1965. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance of service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. First year service including attractive binder with index tabs and paper-bound volume, $9.50; service without indexed binder, $7.00; individual tables, 15 cents. Paper-bound volume, $2.50. (Bilingual). Cat. No. L2-548.

Working Conditions in Canadian Industry, 1965. Price 75 cents, Cat. No. L2-15/1965.

Répertoire de termes et expressions utilisés en relations industrielles et dans des domaines connexes. A catalogue, in French, of terms currently in use in the labour relations field. Prepared by the Economics and Research Branch. Price $4.50, Cat. No. L31-967F.

Labour-Management Research Series

Shiftwork and Shift Differentials in Canadian Manufacturing Industries. Price 35 cents, Cat. No. L2-22/2.

Vacations with Pay, 1951-61: An Examination of Vacation Practices in Canadian Industries (English or French). Price 35 cents, Cat. No. L2-22/4.

Collective Agreement Provisions in Major Manufacturing Establishments, 1964. Price 35 cents, Cat. No. L2-22/5.

SUBSCRIPTIONS—Canada: $3 per year, single copies 50 cents each; all other countries: $5 per year, single copies 50 cents each. Send remittance by cheque or post office money order, payable to the Receiver-General of Canada, to The Queen's Printer, c/o Superintendent of Government Publications, Ottawa. All subscriptions payable in advance. SPECIAL GROUP SUBSCRIPTION OFFER—Five or more annual subscriptions, $1.50 per subscription (Canada only). Send remittance, payable to the Receiver-General of Canada, to the Circulation Manager. BOUND VOLUMES—$5 per copy delivered in Canada, $7 per copy to other countries. CHANGE OF ADDRESS—Attach previous address label.

Research in the Department of Labour

The Department is continuing its studies of collective bargaining, wage determination, labour standards and related areas, and their interaction with the industrial relations system in the attainment of economic and social objectives

In a paper presented at a meeting of the Canadian Industrial Relations Research Institute in Toronto last summer, Dr. George Saunders, Director of the Economics and Research Branch of the Department of Labour, gave an outline of the research work being done by his branch.

The speaker explained that in consequence of the re-organization of Government departments, the branch had lost almost half of its staff to the new Department of Manpower and Immigration (L.G., Jan.-Feb. 1966, p. 2); and as a result of this division, the work being done by the branch in the field of manpower research had been transferred to the new department. The Economics and Research Branch, which Mr. Saunders described as "the research arm of the federal Department of Labour," was, however, continuing and expanding its research work connected with industrial relations and labour standards, he said.

The branch had a permanent program of studies of wages, working conditions, union organization, collective bargaining and industrial disputes. The results of these studies were put at the disposal not only of the federal Government, but also of labour and management, international agencies, and the general public by means of regular reports issued by the branch in articles published in the LABOUR GAZETTE.

To perform these services, the activities of the branch were divided into three main functions: statistical, current analysis or information, and basic research.

To carry on this work, the branch had a staff of about 70, of whom more than 30 were professional or technical persons, and the remainder were engaged in clerical or stenographic work. Most of the professional persons were general economists or labour economists—including industrial relations specialists—and statisticians. The speaker went on to review the work of the branch in each of its three main functions.

Before describing the branch's work in basic research, on which he said he would place the main emphasis for the purpose of the paper he was presenting, Mr. Saunders gave a résumé of what was being done in the fields of statistics and current analysis.

Statistical Function

"The statistical activities of the Branch include the annual surveys of wages, working conditions and labour organizations in Canada; the survey of strikes and lockouts; and the monthly reports on collective bargaining settlements," he said. "The annual surveys of wages and working conditions cover all establishments with 15 or more employees in the areas and industrial sectors surveyed, and smaller establishments in certain industries such as retail trade, printing and publishing, and machine shop products.

"The survey of labour organizations, which obtains information on union membership and union officials, covers all trade unions as defined in the annual report on *Labour Organizations in Canada;* and the monthly reports on collective bargaining settlements cover all negotiating units with 500 or more employees, exclusive of construction. The results of these surveys are made available in published reports.

"Attached to this statistical function is a continuing developmental research activity. The purposes of this activity are to maintain the surveys on a sound statistical basis and to ensure the continued production of useful information both for current use by government officials and the public, and for use in research. The most important activity in this developmental research is assessing survey methodology. Because of the growing size of the survey operation and the increasing complexity of the Canadian economy, this activity has been increased during the past year.

"For example, we are currently exploring more manageable methods of conducting our surveys of wages and working conditions. These two surveys, which are held in October for wages and in May for working conditions, each cover more than 30,000 employers. The surveys are based on mailed questionnaires sent to each employer. An example of the magnitude of the task is illustrated in the wages survey, which is a survey of wage rates by occupation. In this survey, close to 1,000 separate occupations in 85 different industries, yielding information on more than half a million wage rates, are reported and processed each year.

"Another developmental activity currently underway is an investigation of ways of making statistical information available closer to the survey date than now is the case. In this respect we are investigating the possibility of publishing preliminary information from the October 1 wage survey before December 1. Examples of other research activities related to the survey operation now under way are: revision and expansion of the index of wage rates, which is designed to measure wage changes by industry in

50 Years Ago

From the Labour Gazette, March 1917

Report by the United States Board of Mediation and Conciliation on strikes and lockouts on railways examines the methods used by a number of countries for dealing with such disputes

The question of how to deal with strikes on railways apparently was as much alive 50 years ago as it is today. The LABOUR GAZETTE of March 1917 contained a 7-page article about a report on the subject that had been issued a short time before by the United States Board of Mediation and Conciliation. This report on Railway Strikes and Lockouts, according to the GAZETTE, consisted of "an analysis and digest of legislation relative to strikes and methods of adjusting disputes as to wages and working conditions in the public-utility service in the principal commercial and industrial countries.

"The report also contains the text of existing and proposed legislation; and, wherever available, statistics as to the operation of the different laws have been added. The laws selected for a comparative analysis were those of Canada, New Zealand and the Commonwealth of Australia. Laws of the United States and Great Britain were also taken as showing the differences existing between them and the more elaborate and far-reaching laws of the states named.

"In only one or two cases was it found that one nation had adopted the plan of another. Every country or section seemed to have worked out its own system from its own experience. It was evident, however, that two factors have been responsible for anti-strike legislation and legislation for the orderly settlement of industrial disputes.

"One group of countries such as Canada, France, Italy, Russia, Roumania, Spain and Portugal, and also the railway administration of Germany, have had in mind the protection of the public against the injurious effects of industrial warfare. On the other hand, the preservation of industrial peace and the advancement in economic welfare of certain classes have been primarily considered in framing the legislation of Australasian countries, and the prevention of industrial conflicts in the railway service has been incidental to this broader purpose."

The GAZETTE goes on to say, "The report . . . indicates that among Australasian countries the general tendency is to place a limitation—[in fact, a] prohibition upon the right to strike upon railway, and practically all other classes of industrial workers. Complete machinery, however, has been provided for the settlement of controversies.

"Another group of countries, on the other hand, such as Canada, the Transvaal, Spain and Portugal, have not denied the employees the right to strike, but have made the exercise of this right contingent upon certain conditions—notification to the government of intention to strike, or after a governmental investigation and report."

This journal then goes on to quote directly from the report of the United States Board of Mediation and Conciliation:

"In the case of other countries such as Russia and Roumania, the right of railway workers or other public utility employees to strike is absolutely prohibited, and no machinery is provided for ventilating grievances. Belgium and Holland also prohibit strikes, but have devised methods for employees to take up grievances or requests with railroad managers.

"Strikes are not formally prohibited in Germany or Austria among railway workers, but are practically prevented by the control of the authorities over the trade union affiliations of employees. In Germany, however, administrative machinery has been provided through which transportation workers may have a vent for their grievances. Strikes are not prohibited by formal legislative enactment on French railways, but are practically impossible, because of the policy of the Government in calling employees to the colours and placing them under military orders in the event of a strike.

"Italy depends upon the same policy to prevent industrial conflict on her railways. In Great Britain and the United States there is no abridgment of the right to strike. Both countries have provided official machinery for the adjustment of wage and other difficulties between the railroads and their operating forces. In Great Britain, the opportunities for conciliation and arbitration under the conciliation act of 1896 have also been supplemented by a general agreement between railway officials and employees which makes provision for compulsory conciliation of matters in dispute."

The report of the United States board described in some detail the laws of various countries governing disputes between railways and their employees, beginning with the Canadian Industrial Disputes Investigation Act, and then going on to deal with legislation in the United States, beginning with an act passed in 1888, next to the Erdman law passed in 1898, and then to the Newlands law, approved in 1913.

The Newlands law created the offices of Commissioner, and Assistant Commissioner of Mediation and Conciliation, and it empowered the President to set up a board "to be known as the United States Board of Mediation and Conciliation."

The American laws seem to have been designed, by means of conciliation and mediation machinery and by providing for arbitration boards without making arbitration compulsory, to put pressure on the parties to reach a settlement. By one means or another, it appeared that the measures taken had been effective, because the GAZETTE said that from the time the act was approved on July 15, 1913 until May 15, 1916, the Board of Mediation and Conciliation had adjusted 56 controversies. A threatened strike of transportation employees in August 1916, however, led to proposals to amend the law.

NEWS BRIEFS

New Director of Women's Bureau Appointed

Mrs. Jock Findlay

Miss Marion V. Royce

—NFB Photo

Mrs. Jock Findlay has been appointed new Director of the Women's Bureau of the Canada Department of Labour, to succeed Miss Marion V. Royce, who has retired. Mrs. Findlay assumed her new duties early in February.

Miss Royce was the first Director of the Bureau (L.G. 1954, pp. 939, 1113). She was appointed to the position when the Bureau was formed in September 1954 to promote an informed approach to the problem of women's employment.

A native of Westmount, Que., Mrs. Findlay is the widow of Flying Officer Jock Findlay, who was killed while serving with the 1st Canadian (406) Night Fighter Squadron.

During the early war years Mrs. Findlay, a graduate of McGill University, was engaged in placement work with the Civil Service Commission in Ottawa and subsequently toured Newfoundland, the Maritimes and the West recruiting female labour to work in war plants.

At the same time, Mrs. Findlay was president of the Women's Personnel Association of Montreal, and while serving on the McGill Alumnae Board helped start the McGill Placement Bureau.

After the war she became active in voluntary and social work in Ottawa, working for the Red Cross and the United Appeal, and was elected first chairman of the local branch of Marina Creations, a voluntary association connected with the Rehabilitation Foundation for the Disabled.

A member of many other organizations, Mrs. Findlay is at present Director of Volunteers at the Children's Aid Society in Ottawa.

In her capacity as Director, Miss Royce has acted as Adviser at meetings from 1958 to 1960 of the United Nations Commission on the Status of Women, held in Geneva, New York and Buenos Aires. In 1963, she was appointed a member of the International Labour Organization's panel of consultants on the problems of women workers.

Miss Royce is an honorary life member of the National Council of Women of Canada, and of the Canadian Association of Adult Education. Her professional life in education and social welfare has included four years as National Girls' Work Secretary of the Religious Education Council of Canada, and 10 years in international work as Consultant for Social and International Questions (relating especially to the status, education and employment of women) on the staff of the World YWCA, with headquarters in Geneva.

Miss Royce has also represented the World YWCA on the Churches' Commission on the International Affairs of the World Council of Churches.

Women in U.S. unions

Nearly one in every five women workers in the United States held union membership in 1964. They numbered 3,143,000, or 19 per cent of the total union membership. More than 500,000 were members of needle trades unions, and women members were in the majority in 26 unions.

In Canada, women made up 15.4 per cent of the total membership in 1962 and numbered 233.249 (L.G., Jan.-Feb. 1966, p. 31).

Transitional assistance benefit plan amended

The federal Government's Transistional Assistance Benefit plan (L.G. 1965, p. 788 and p. 1013) was amended in December 1966 to provide that workers who were displaced subsequent to April 2, 1966 as a result of the Canada-United States Automotive Agreement, and who have exhausted or depleted their Supplementary Unemployment Benefits provided for in agreements between companies involved and their unions, will be entitled to receive Transistional Assistance Benefits during future layoffs. The plan applies to automobile and automobile parts workers affected by the Agreement.

Under the T.A.B. plan, benefits including unemployment insurance benefits range from 62 to 75 per cent of a worker's weekly salary. The duration of benefit payments is based on the amount of employment in the industry within the two years preceding the layoff.

As a result of the amendment to the plan, even though employers do not contribute, a worker's T.A.B. entitlement will remain in existence until it is exhausted through payment, or until July 26, 1969 (the expiry date of the T.A.B. regulations), whichever is sooner.

An important feature of the amendment is that any worker who is laid off as a result of the Agreement may draw upon his T.A.B. entitlement at any time up to July 26, 1969 in respect of any future layoff from any type of employment. The basis for establishing the period in which T.A.B. is payable remains unchanged.

A folder describing the main features of the revised program is being issued by the Canada Department of Labour and will be made available to anyone requesting it.

Bonuses being paid for bilingual ability

The establishment of 7-per-cent premium pay for secretaries, stenographers and typists who are required to use both French and English in their work was announced in November by Minister of National Revenue E. J. Benson.

The pay differential is to be paid only to employees who actually make use of both official languages in their work, using a second language at least 10 per cent of the time, and who have attained Civil Service Commission standards of competence in the use of the second language.

Prime Minister Pearson said in the Commons on January 17 that the Government had begun paying the bonus, retroactive to October 1, 1966.

Canadian labour legislation report available from Department of Labour

A 67-page report, *Developments in the Enactment and Administration of Labour Laws in Canada,* prepared by the Legislation Branch of the Canada Department of Labour as a discussion paper for the Conference of the Canadian Association of Administrators of Labour Legislation, in Fredericton, N.B., October 3 to 7, 1966 (L.G., Dec. 1966, p. 711), has been duplicated and is available from the Legislation Branch.

The discussions included in this report are dealt with under four main headings: Labour Relations, Labour Standards, Industrial Safety and Workmen's Compensation, and Industrial Training and Manpower.

The report, which covers the period from August 1965 to September 1966, shows that significant advances were made in most spheres of activity covered by Departments of Labour across Canada.

During the 12 months, minimum wages were revised upward in six provinces, with the result that most provinces have either reached, or are approaching a minimum rate of $1 an hour. This is now the general legal minimum rate in British Columbia, Alberta, Manitoba, Ontario, and the Metropolitan Montreal district of Quebec.

In April, the Quebec minimum will become $1.05 in the Metropolitan Montreal area, and $1 elsewhere in the province. In Prince Edward Island, the general minimum rate for men is $1.10 an hour.

The interim minimum rates prescribed under the Canada Labour (Standards) Code for feed mills, feed warehouses and seed-cleaning mills, beginning at $1.05 on April 1, 1966 and increasing to $1.15 on October 1, expired on December 31, and the $1.25 rate became effective for this industry as well as for all others subject to the Code.

In the field of labour relations, the right to bargain collectively was extended to new groups of employees in several provinces. These included civil servants in the provinces of Quebec, Alberta and Manitoba, and large numbers of municipal public service employees in Ontario. At the same time, the bill providing for a system of collective bargaining in the public service of Canada was before Parliament.

Two provinces enacted new anti-discrimination laws. Alberta adopted a Human Rights Act prohibiting discrimination in employment, trade union membership, and in public accommodation, on grounds of race, religious beliefs, colour, ancestry or place of origin. Ontario passed the Age Discrimination Act, which makes it an offence for employers or unions to discriminate against persons between 40 and 65 years of age solely because of their age. This made Ontario the second province, after British Columbia, to forbid discrimination of this nature.

British Columbia passed legislation intended to ensure that a working woman has a right to maternity leave, and does not lose her employment because of it.

During the same 12-month period, workmen's compensation benefits were increased in several provinces, including British Columbia, Manitoba, Nova Scotia and Prince Edward Island. Of particular significance was the British Columbia provision—the first of its kind in Canada—that ties pension increases to increases in the cost of living.

OECD paper outlines needs of older workers

A short paper by the OECD on the conclusions of its Manpower and Social Affairs Committee on policies for the employment of older workers was published early in January.

The paper discusses the problems of older workers, and proposes a number of measures for alleviating these problems. Member countries are advised to consider measures seeking to prevent older workers from being forced into unemployment, less remunerative employment, and premature retirement, and to extend the opportunities for their productive employment.

It is suggested that general programs for health, education and vocational training should be available to workers of all ages to promote mental and physical adaptability to changing job requirements and social needs. "A comprehensive and efficient employment service is essential for dealing effectively with special hard-to-place individuals."

Training methods should be adapted to the learning needs of older persons, employers should be discouraged from imposing general maximum age limits in engaging new employees, and pension systems should allow for flexible retirement from work except when job requirements indicate otherwise.

The paper advocated special job development programs to open up job opportunities suitable to older workers' abilities, and research into the capacities, performance and methods of extending the productive employment of older workers.

PARLIAMENT

A proclamation extending to December 31, 1967 the Maritime Transportation Union Trustees Act, under which a board of trustees was set up with respect to certain maritime unions (L.G. 1963, p. 1090), was tabled in English and French by the Prime Minister on January 16 (p. 11807). Mr. Pearson said that the chairman of the board of trustees, Judge René Lippé, and the other two members, Charles Millard and Joseph Mackenzie, had agreed to continue to serve during the extended term.

Federal Government extends maritime trusteeship

During December, the federal Government took necessary steps to continue until the end of 1967 its trusteeship over a number of martime unions, established in October 1963 (L.G. 1963, p. 1090). The trusteeship could be lifted before the end of the year if prevailing conditions warrant such action, Hon. John R. Nicholson, Minister of Labour, said when announcing the extension.

Extension of the trusteeship followed receipt by Mr. Nicholson of a report from Judge René Lippé, chairman of the board of trustees, which indicated that encouraging progress was being made in ironing out the problems of the maritime unions and their relations with the Great Lakes shipping companies.

Federal minimum wage universally applicable

All employers in business and industry under federal jurisdiction must be paying their employees $1.25 an hour after January 1, 1967, the Minister of Labour announced.

Exceptions to the minimum wage provisions established by the Canada Labour (Standards) Code effective July 1, 1965 (L.G. 1965, p. 697), will be applicable only to employees under 17 years of age, for whom the minimum is $1, and for some employees engaged in training programs.

In his announcement the Minister emphasized that significant progress had been made in the application of the hours of work provisions of the Code. Under it, the regular working day must not exceed eight hours and the regular work week 40 hours, with a maximum of eight hours overtime.

Initially, a number of deferments to the provisions of the Code were granted. The Minister noted that all deferments would expire on December 31, 1966.

Federal Government medical care bill passed

A measure covering federal Government participation in nationwide medical care insurance, beginning by July 1, 1968, passed the Commons early in December. The bill passed the Senate about a week later and received the Royal Assent just before Parliament recessed for the Christmas holiday.

Under the legislation, the federal Government will contribute to the cost of provincial medical care schemes that meet four conditions.

These are:

—at the outset, the plans must cover at least all services of physicians and surgeons, both in doctors' offices and at home;

—a plan must cover at least 90 per cent of the population of the province at the outset, increasing to at least 95 per cent in the third year;

—a plan must be portable, so that a person who is covered remains covered if he moves to another province;

—a plan must be publicly administered; that is, it must be administered by the province, or by a provincial agency, or by an agency designated by the province, the books of which must be open for public audit.

An important amendment made to the bill in the latter stages of its passage makes it possible for the federal Cabinet to authorize the payment of federal contributions in the future for a variety of health services performed by persons other than physicians and surgeons. Such services may include those of dental surgeons, optometrists, psychologists, physiotherapists, chiropractors, osteopaths, naturopaths, podiatrists, and possibly others.

The eight-page bill leaves the administrative arrangements to the provinces, including the negotiation of scales of fees with members of the medical profession who agree to participate.

Once the four basic conditions have been met, the federal Government's part will be limited to contributing to each participating province a *per capita* amount equal to half the average medical cost *per capita* in all the participating provinces put together. The federal subsidy is therefore not a flat 50 per cent of the cost to each province. Provinces whose medical costs are low will get more than 50 per cent. Those whose medical costs are high will get less than 50 per cent. The formula is designed to give the greatest assistance to the poorer provinces that are least able to stand the cost of medical care insurance.

Because it does not know how many provinces will participate by July 1, 1968, the Government cannot tell what the cost of the program will be; but it estimates that if all 10 provinces were to participate, the cost to the federal treasury in a full year would be about $340,000,000. The provinces would have to pay a like amount as their share.

The estimate of $680,000,000 as the total cost is arrived at by putting the *per capita* cost at $34 a year for a population of 20,000,000.

OECD studies rural workers in urban areas

The conclusions of the Manpower and Social Affairs Committee of the Organization for Economic Co-operation and Development on the adjustment of rural workers to non-agricultural employment and urban areas, were recently published.

The committee says that the combination of diminishing opportunities for employment and low incomes in many rural districts will continue to cause a significant movement of people to towns and cities. It expresses the view that assisted movement, in which the individual's decision to move is based on full knowledge of the advantages and disadvantages of such a step, is to be preferred to unguided movement, in which there is a lack of such foreknowledge.

An effective system of aids to occupational and geographical mobility, the committee says, besides calling for information on prospects for employment in the receiving community and other matters, requires "varied measures and a co-ordinated program, covering the different groups of interests in migration, either from one rural community to another, or from agricultural and rural communities to urban centres and non-agricultural work places."

Local authorities and organizations in the communities to which the migrants are bound must also help the newcomers to adapt themselves to their new situation and prepare the local inhabitants to accept them. National policies regarding movement of populations should provide for the adjustment of the migrants and their dependents, "particularly where the size of this migrant population is significant, and where the size of the social and economic distance between the migrants and the receiving groups tends to aggravate the adaptation problems. . . ."

The public authorities, local as well as central, should assume responsibility for the organization of mobility assistance programs and the operation of agencies and services, but they should delegate parts of the program to semi-public and private agencies, the committee said.

Canadian coal mines report 1965 operating costs

The average operating cost for the Canadian coal-mining industry as a whole in 1965 was $6.55 per marketable ton produced, a decrease of 60 cents from the corresponding figure of $7.15 for 1964. The largest decreases were in labour, 36 cents, and distribution, 14 cents, the Dominion Coal Board has reported.

Average costs increased in Nova Scotia by 67 cents a ton in comparison with 1964, and in the Alberta Mountain-British Columbia-Yukon region by 92 cents. In other producing regions, costs decreased since 1964 by 22 cents a ton in New Brunswick, 11 cents in Saskatchewan, 22 cents in Alberta Domestic Underground mines, and 38 cents in Alberta Domestic Stripping.

All reporting mines taken together showed an average loss of 14 cents a ton, compared with a loss of 10 cents a ton in 1964. The greatest deterioration occurred in the Alberta Mountain-British Columbia-Yukon mines, where there was a drop from a profit of 19 cents a ton in 1964 to a loss of $1.01 in 1965. Improved results were obtained in New Brunswick, from a loss of 55 cents to a profit of 5 cents; for Alberta Domestic Underground, from a loss of 32 cents to a profit of 12 cents; and for Alberta Domestic Stripping, from a profit of 7 cents to a profit of 34 cents.

The number of tons produced per manday ranged from 7.41 for Alberta Domestic Underground to 5.25 for Alberta Mountain-British Columbia-Yukon, 4.21 for New Brunswick, and 2.75 for Nova Scotia.

ILO will publish code for forestry workers

As the result of a meeting in Geneva, sponsored by the International Labour Organization in December 1966, the "Code of Practice on Safety and Health in Forestry Work" will be published this year.

After a request by a joint committee on forest workers, the ILO prepared a draft code based largely on existing relevant regulations and recommendations of a number of European countries, Canadian provinces and U.S. states.

The new code has been prepared to serve as a guide, and to supplement but not replace existing national laws or regulations and accepted standards.

Leonard A. Aitken, safety adviser, Accident Prevention Division, Canada Department of Labour, represented Canada at the meeting, and acted as chairman for the discussions.

Paper examines agreements in iron and steel industry

An examination of 29 collective agreements in the Iron and Steel Products industry, and 151 provisions in the Printing, Publishing and Allied industries in Canada was the subject of a paper compiled by Félix Quinet, Chief, Collective Bargaining Division, Economics and Research Branch, Canada Department of Labour.

To emphasize certain characteristics, the author divided the provisions into three categories. The first category contains those clauses which, in the event of technological change, assure certain classes of workers that they will not be laid off, and provide conditional security for other types of workers. Mr. Quinet calls the first clause in this category "total employment security" and the second clause "an element of employment security." The latter clause agrees to labour-management consultations, discussions and negotiations, and suggests that the worker may benefit from retraining, rehabilitation and readjustment programs.

The second category contains those clauses which, in the event of technological change, provide for "an element of employment security" only. Mr. Quinet states that these provisions are diverse because there are many types of labour-management consultations, discussions and negotiations that could be considered under this label.

The third category contains provisions Mr. Quinet calls "cushioning provisions." These clauses provide a certain amount of protection for a worker who has lost his job through technological innovation. "A frequent provision in this respect is severance pay, generally defined as a special payment made to workers who lost their jobs through no fault of their own, and who are not expected to be rehired." The survey discovered that, in certain collective agreements, only provisions of the cushioning type were found, whereas in other agreements, there were provisions falling within all three categories.

The author said that a fourth category had been set up for clauses that he would have called "sharing provisions." These were clauses that would permit workers to benefit from a share in any additional company profits resulting from technological change. But no such provision was found within the scope of the Canadian survey, he said.

He cited the example of the Long-Range Sharing Plan put into effect on March 1, 1963 in a Kayser Steel Corporation plant in Fontana, California (L.G. 1963, p. 6). The American plan has among its provisions a formula under which economic gains through higher productivity resulting from technological change and a more economical use of materials would be shared between the workers and the company.

Mr. Quinet said that "the survey has made us aware that a number of collective agreements in effect in the two industrial sectors covered by our analysis contain provisions resulting from the introduction of technological change, or from the expectation of such change."

He believes that observing the results of the various provisions should provide a better knowledge of technological change and prove the effectiveness of the provisions in providing the best security for the workers and maximum efficiency for the industries. He concluded that the knowledge gained "would facilitate the adoption of adequate measures in this very important field of our economic life."

Director of organization appointed by CUPE

The appointment of J. F. MacMillan, Saint John, N.B., Atlantic Regional Director of the Canadian Union of Public Employees (CLC), as Director of Organization of the 105,000-member union, was announced in November. The position had been vacant since the death of William Buss in January 1966. Mr. MacMillan had been Atlantic Regional Director of the CUPE since the union's formation in 1963; and he had held the same post in the former National Union of Public Employees, one of the two unions that merged to form the CUPE.

AFL-CIO membership increases in Canada

The American Federation of Labor-Congress of Industrial Organizations estimates that during the years 1963 to 1966, it increased its active membership by approximately 1.1 million, bringing the total membership to 13,500,000. In Canada during the same period, it is estimated that the membership in AFL-CIO-affiliated unions increased by 173,668, a growth of some 19 per cent.

Taking into account all Canadian unions, the increase in membership for the period amounted to 286,659—about 20 per cent. By comparison, the AFL-CIO increase, exclusive of Canadian membership, amounted to an increase of 9 per cent.

Comparison of the respective figures shows that AFL-CIO membership in Canada is increasing at a faster rate than it is in the United States.

Saskatchewan issues restaurant code of ethics

"The Girl with the Smile" is the title of a leaflet emanating from the Women's Bureau, Saskatchewan Department of Labour. The leaflet, a code of ethics for employers and waitresses, emphasizes the employee's responsibility in such matters as attendance, punctuality, co-operation, teamwork and willingness to learn.

Legislative provisions of labour standards applying to waitresses, which the employer must observe, are outlined. They cover: minimum wages and overtime; paid vacation leave; paid public holidays; pay statements and termination of employment procedures; supply of uniforms; hours to be worked; charge for meals and lodging if provided by the employer; meal periods; rest periods; the right to join or organize a union; the right to employment without discrimination because of race, religion or colour; and equal pay for equal work.

Hints on courtesy, manners and grooming, and suggestions as to the manner of handling difficult guests are also included to help the employee improve her efficiency on the job.

Publication of the leaflet followed a study of assessments ordered and collected by the Labour Standards Branch of the Saskatchewan Department of Labour on behalf of women, as a result of either a routine inspection, or a complaint received by the Branch. The leaflet has been distributed to graduates of a pilot training project for professional dining room attendants, sponsored by the Department of Education, the Women's Bureau, and the Hotel and Restaurant Association. Similar distribution is planned for future students participating in this program, and co-operation of the Canada Manpower Centres is being sought to provide every prospective employee in the food industry with a copy of the leaflet.

Two states admitted to ILO membership

Two states that had recently been admitted to the United Nations also became members of the International Labour Organization in October. Botswana became the 117th, and Lesotho the 118th member state of the ILO. M. P. K. Nwado, Botswana's Minister of State for External Affairs, formally accepted on behalf of his country the obligations of the ILO constitution, with effect October 18. The same obligations were accepted by Leabua Jonathan, Prime Minister of Lesotho, on behalf of that country, with effect October 31.

U.S. labor act works well—Professor

In a study that covered more than 1,000 cases closed by the United States National Labor Relations Board in the five years that ended June 30, 1962, by Dr. Phillip Ross, University of Pittsburgh Graduate School of Business, concluded that the law requiring employers to bargain with labour unions works "remarkably well." He discovered that an "overwhelming majority" of employers abide by their legal duty to bargain, and that "a substantial majority" of the violators adjust cases in an informal manner that often leads to stable collective bargaining. More than 70 per cent of all cases were closed before the Board's trial examiner issued a report, and only 18 per cent required a board or court order.

Other findings were:

—about 58 per cent of employers settled violations before a complaint was issued; only 1.5 per cent exhausted every avenue of review and appeal;

—about 67 per cent of the cases that were closed before a complaint was issued resulted in a labour contract, and nearly 90 per cent of the resultant contracts were later renewed;

—violations of the legal duty to bargain were "usually clear, forthright and flagrant" attempts by small employers with little or no bargaining experience to weaken unions or end a bargaining relationship;

—employers in more than 74 per cent of the cases had a bargaining history of three years or less, and 58 per cent of all employers had no bargaining history at all;

—only 14 per cent of all violators had bargained with unions for 10 or more years;

—about 3 per cent involved bargaining units with 1,000 or more employees, whereas nine workers or less constituted 12 per cent of the cases; and

—about 95 per cent of all cases occurred in units of less than 500.

Most of the violations were based upon a rejection of the principles of collective bargaining, Dr. Ross said. The most common violations were bypassing the union, 51 per cent; "bad faith" bargaining, 34 per cent; and a failure to recognize the majority union, 32 per cent.

Answering management's chief complaint that NLRB policies represent government encroachment and that the Board is used as a tactical weapon by unions, Dr. Ross, a former union official admitted that some unions do try to use the Board as a weapon, but the Board was aware of this and had "a propensity for deciding adversely to the charging union in marginal cases."

Much of labour's criticism of the National Labor Relations Act is directed against the tactics used by anti-union employers to frustrate unions in their efforts to organize a plant, but this aspect of the law did not come under the study by Dr. Ross.

As an alternative to labour's suggestion that the Board be given the power to seek federal court injunctions to block employer violations during the processing of complaints, he suggested that:

—the Board be empowered to send an agent to inform employees of their rights, and the employer's illegal actions;

—the union be allowed to have a bulletin board in the plant to provide union representatives with opportunities to talk to workers in the plant; and

—an employer be required to adopt a model procedure for handling grievances under the contract.

Alberta Deputy Minister of Labour honoured

Kenneth A. Pugh, Deputy Minister of Labour for Alberta, and chairman of the provincial Board of Industrial Relations, was doubly honoured by the University of Alberta on November 19, 1966 when he received an honorary Doctor of Laws degree and was chosen to deliver the Convocation Address.

Mr. Pugh joined the Alberta Department of Trade and Industry (which later became the Department of Industries and Labour) in 1938. He served as chief inspector of the Board of Industrial Relations and as a conciliation commissioner; and from 1947 to 1960 he was chairman of the provincial Apprenticeship Board. In 1948 Mr. Pugh became chairman of the Board of Industrial Relations, a position he still holds; and in 1959, when a separate Department of Labour was created in Alberta, he was appointed Deputy Minister of Labour.

A recognized authority on labour law and labour-management relations, Mr. Pugh has on several occasions undertaken special assignments for the Canadian Government. During 1957-1958 he served as an ILO expert on labour-management relations to the Philippines Government, and in the fall of 1965 he was chairman of a board set up to inquire into the feasibility of establishing labour standards legislation in the Northwest Territories. Early in 1966 Mr. Pugh represented the Canadian government at an ILO Preparatory Technical Conference in Geneva on the maximum permissible weight which may be carried by a workman.

Mr. Pugh has served as president of the Canadian Association of Administrators of Labour Legislation, and on the executive board of the International Association of Governmental Labor Officials of the United States and Canada.

The degree was conferred on Mr. Pugh in recognition of the fact that he had "assisted so greatly in the cause of workingmen throughout the world, and promulgated laws in aid of workers."

McGill conference proceedings published

The publication *Domination or Independence?*, containing full reports of the proceedings at the McGill Industrial Relations Centre Conference held at Montreal in September 1965 (L.G. 1965, p. 899), is now in print. Copies may be obtained at $2.75 each, or at $2.50 each for orders of four or more, by writing to The Industrial Relations Centre of McGill University, 1009 Sherbrooke Street West, Montreal 2, Quebec.

Contributors were: Prof. Neil Chamberlain, Anthony Balloch, Michael Barkway, Prof. John H. G. Crispo, Bryan Downie, William Mahoney, Pierre Vadboncoeur, and William Dodge.

Topics covered in the publication are: The Concept of Economic Sovereignty in Relation to Business; The Locus of Decision-Making in Displacement Problems; Is Canadian Sovereignty Possible?; Relationships of the Central Labour Federations; International Union Influence on Collective Bargaining in Canada; and, A New Era in Labour Relations?.

New Minister of Labour appointed in Ontario

Dalton Bales, a newcomer to the Ontario Government, recently succeeded Hon. Leslie Rowntree as Minister of Labour. Mr. Bales is a lawyer whose practice has been mainly in commercial law. He was elected to the Legislature in 1963 for the riding of York Mills, and he has served as chairman of the Standing Committee on Legal Bills and Labour, and also of the Select Committee on Election Law.

Mr. Rowntree relinquished the post of Minister of Labour to take over the newly created portfolio of Financial and Commercial Affairs, which was carved out of the Department of the Attorney-General. It will deal with the administration of legislation governing business and finance, and will administer the Government's new consumer-protection legislation, that was expected to come into force either on January 1 or April 1.

Manpower department names new director

The general secretary of the Engineering Institute of Canada, Garnet T. Page, 46, was appointed Director of the Pilot Projects Branch, Department of Manpower and Immigration in October. He was formerly general manager and secretary of the Chemical Institute of Canada.

Mr. Page, a native of Halifax, Nova Scotia, is bilingual. He graduated from the University of Saskatchewan in 1940 with a BA in chemistry, and served with the Canadian Army from 1940 to 1946. Since 1946, he has worked with the federal Government on problems related to the education and utilization of Canada's scientific and engineering manpower.

In May 1965, he was appointed chairman of the National Advisory Council on Technical and Vocational Education (L.G. 1965, p. 495). He served also as chairman of the National Advisory Committee on Technological Education, a subcommittee of the Council, from its inception in June 1961 to 1965 (L.G. 1961, p. 546 and p. 550).

Mr. Page has worked with several Canadian provinces in the planning of teacher recruitment and training, and is an active member of many professional organizations concerned with education. Recently he was elected to the Board of Governors of Sir George Williams University in Montreal.

He has been honoured by several European universities and governments. As consultant on mathematics teaching for engineers, he assisted the Organization for Economic Co-operation and Development and has served as a Canadian delegate to a number of OECD specialist conferences. He served also on a special Senate committee on manpower, was Canadian delegate to many of the early general conferences of UNESCO, and is a member of the executive committee of the Canadian National Commission for UNESCO.

The Branch that Mr. Page directs forms a part of the Department's Program Development Service, and will include a Technical Support Centre that will assist in the development of pilot training projects in designated areas. These pilot projects, jointly sponsored with the provinces, will pioneer new training programs to qualify disadvantaged adults for continuing employment. As successful methods of training are developed, they will be implemented by the provinces on a continuing basis.

Three additions made to labour task force

Three professors of labour relations have been added to the Task Force on Labour Relations established last September to "look into this whole question of labour disputes, and the procedures and provisions of the current laws that we have to deal with them, and to recommend to Government changes that may be required" (L.G., Nov. 1966, p. 631). It is headed by Dean H. D. Woods of McGill University.

The three new appointees announced in December by Prime Minister Pearson are: Dean A. W. R. Carrothers of the University of Western Ontario, Abbé Gérard Dion of Laval University, and Prof. John Crisco of the University of Toronto.

At the same time, George Saunders, Director of the Economics and Research Branch, Canada Department of Labour, was named Chief Executive Officer of the Task Force.

Manitoba minimum wage board

When the Manitoba Minimum Wage Act was passed nearly 50 years ago in 1918, it was said by the LABOUR GAZETTE (1918, p. 283) to be the first of its kind in Canada.

The Act, which was published verbatim in the LABOUR GAZETTE of August 1918 (p. 681), provided for the establishment of a minimum wage board "to investigate and fix in accordance with conditions in Manitoba standard minimum wages and standard conditions of labour for female workers employed in shops, factories and mail order houses in cities in Manitoba."

Since the purpose of the Act was to protect the interests of female employees, when the first Minimum Wage Board was appointed a few months after the Act was passed, two of the five members were women (L.G. 1918, p. 537). Mrs. Claude Nash was one of the employer representatives and Miss Lynne Flett was one of the members who represented the employees. Mrs. Nash remained on the Board for many years.

Another woman, Mrs. Eva MacFie, was appointed during the 1930s and she continued to be a member until the early 1940s. During the early 1940s, a fourth woman member, Mrs. Dora Rocklin, was appointed.

Recently, two more women, Donalda MacDougall and Margaret Sykes, were appointed members of the Board, one representing the employers and one the employees (L.G., Dec. 1966, p. 710). The LABOUR GAZETTE's statement that this was the first time that women had been appointed was, however, incorrect.

The Manitoba Minimum Wage Act was amended to extend coverage to men as well as women in 1934.

Determination of bargaining units subject of new report

A new report, *Determination of the Appropriate Bargaining Unit by Labour Relations Boards in Canada,* by Edward E. Herman, has just been published by the Economics and Research Branch of the Department of Labour as No. 5 in the Occasional Papers series.

This report contains the results of extensive research into the certification practices of Canadian labour relations boards and the problems encountered by them in the course of their duties.

The preface to the book points out that determining the appropriateness of bargaining units in Canada is the responsibility of labour relations boards, of which there are 11—one federal and one in each of the 10 provinces. Hitherto no detailed comparative study has existed of the practices of these boards, the author says.

"The composition, type and scope of bargaining units, as well as the principles, criteria and logic applied by the various boards in different cases have all been considered here," the preface continues. "The investigation of the certified bargaining structure in Canada may also be of some significance as a foundation for further studies on the impact of the Labour Relations Boards' practices on the collective bargaining structure now emerging in this country."

The report is in two parts. Part I describes the methods and background of the research; deals with public policy, legislation, definitions and general discussion of the problems affecting collective bargaining; and assesses the eligibility of groups of employees for certification as bargaining units. Part II details the practices of the labour relations boards in certifying bargaining units, including craft, office, security, hourly paid, seasonal and part-time employees' units; units in the construction industry; and multi-plant, multi-location and multi-employer units.

Separate sections of reference notes, appendices and bibliographical data provide comprehensive background information relating to the whole subject of collective bargaining units.

The publication is available from the Queen's Printer, Ottawa (Cat. No. L2-26/5, price $3.50), or from Queen's Printer bookstores in Ottawa, Toronto, Montreal, Winnipeg and Vancouver.

Mine-Mill Union in U.S. merges with Steelworkers

The merger proposed in January of the 28,000-member International Union of Mine, Mill and Smelter Workers with the United Steelworkers of America (AFL-CIO) would mark the re-entry of Mine-Mill into the mainstream of organized labour in the United States after an absence of some 16 years. The merger did not affect the 15,000-member International Union of Mine, Mill and Smelter Workers (Canada), operating in Canada as an independent union.

Meeting in Tucson, Ariz., more than 200 Mine-Mill delegates to the special merger conference voted by acclamation to affiliate with the one million-strong Steelworkers.

The Mine-Mill union was expelled in 1950 by the Congress of Industrial Organizations, which charged that the union had Communist ties (L.G., 1950, p. 51).

Under the merger agreement, officials of Mine-Mill will become international representatives of the Steelworkers, a step below executive board members. The Mine-Mill union will cease to exist when the affiliation is complete.

Currently, the Steelworkers will issue temporary charters to the 65 Mine-Mill locals. It is expected that permanent charters will become effective July 1, 1967.

In Canada, William Mahoney, Canadian director of the United Steelworkers of America (AFL/CIO-CLC), expressed pleasure with the merger, and said: "I hope that similar developments can take place in Canada." Kenneth Smith, president of the Canadian section of the International Union of Mine, Mill and Smelter Workers (Canada), stated that the national executive will recommend against merging with the Steelworkers in Canada.

CLC announces nine appointments

Between December 15, 1966 and January 3, 1967, the Canadian Labour Congress announced nine appointments.

Roy Laberge, former Director of Public Relations for the Canadian Union of Public Employees, is the new Editor of *Canadian Labour*, the CLC's official monthly publication. He succeeds Clifford Scotton, who resigned from the CLC to become federal secretary of the New Democratic Party (L.G., Oct. 1966, p. 561).

Another position previously held by Clifford Scotton went to Henry Rhodes, the former Assistant National Director of Organization. He is now Director of Labour Federations and Labour Councils.

A. L. Hepworth, who previously held the position of Assistant Director of Legislation and Government Employees, is the new Director of International Affairs, succeeding Kalmen Kaplansky, who joined the staff of the International Labour Organization (L.G., Feb., p. 87).

Frank Chafe, former Regional Director of Education for the Prairie Region, and Denis Coupland from the Treasury Board of the federal Government, are both Assistant Directors of Legislation and Government Employees, the position vacated by A. L. Hepworth.

It was also announced on December 15 that Larry Wagg, representative in the Ontario education offices, would move to Regina as Director of Education for the Prairies.

On January 1, Dr. Eugene Forsey, the CLC's Director of Research, who has been writing a history of the Canadian labour movement as a centennial project, was appointed Director of Special Projects. Succeeding Dr. Forsey as Director of Research is John Fryer, former Assistant Director of Research. And on February 1, John Simonds, International Representative of the Bakery and Confectionery Workers' International Union, officially became the Assistant Director of Organization.

Commission to investigate causes of B.C. strike

A three-man inquiry commission to investigate the causes that led to a strike of waterfront foremen that tied up shipping in British Columbia ports for three weeks has been appointed by Hon. John R. Nicholson, Minister of Labour.

Mr. Justice C. Rhodes Smith, Manitoba Appeal Court, Winnipeg, will head the commission. He will be assisted by two assessors, Joe Morris, Executive Vice-President of the Canadian Labour Congress, Ottawa, and H. J. C. Terry, Vancouver, former president of Northland Navigation Company.

Mr. Nicholson had promised that the commission would be set up as part of the settlement formula that brought to an end the tie-up at the ports. The strike was the result of a dispute centred on demands by foremen for the right to form their own collective bargaining unit.

In addition to investigating the dispute involving the foremen, the commission will make recommendations that would prevent recurrence of similar disputes in the future.

Mr. Justice Smith is a former Manitoba labour minister, and a former chairman of the Restrictive Trade Practices Commission, and of the Canada Labour Relations Board.

Guaranteed salary plan replaces hourly rates

A provision for the introduction on October 3, 1966 of a guaranteed salary in place of payment on an hourly basis was included in the collective agreement reached this year between the Aluminum Company of Canada, Kingston, Ont., and the United Steelworkers of America. During negotiations, the company offered a guaranteed salary plan that converted hourly rates to weekly salaries, and the union accepted.

The two-year agreement covers 1,200 employees. A similar agreement was reached with the International Association of Machinists at the same plant.

Canada Manpower Centres replacing NES offices

From coast to coast in Canada, the National Employment Service Office is disappearing—but in name and function only. It is being replaced in each instance by a Canada Manpower Centre (L.G., Jan.-Feb. 1966, p. 2).

The NES offices have been given the new name because it is thought that it more accurately reflects the emphasis that the service is placing on counselling, training, labour force mobility, skill upgrading, research, and labour market information.

Henceforth, whether workers are seeking work or employers seeking workers, the place to look for help will be the Canada Manpower Centre nearest them.

Collective bargaining in the U.S. Public Service

The proceedings of the 1966 annual spring meeting of the U.S. Industrial Relations Research Association at Milwaukee, Wisconsin, May 6 to 7, is now available in a publication titled *Collective Bargaining in the Public Service.*

A paper delivered by Edward E. Herman, State University of New York, Plattsburgh, on "Collective Bargaining by Civil Servants in Canada," is included in the series. The 140-page report was edited by Gerald G. Somers, University of Wisconsin, and may be obtained by writing to the Industrial Relations Research Association, Social Science Building, Madison, Wisconsin 53706. The price is $2.

Collective Bargaining In an Altered Environment

Industrial relations in Canada are in a state of flux that will require a certain amount of bold experimentation by labour, management and governments as they grapple with the challenges imposed by change

Functioning against a backdrop of rapid economic, social, and technological developments, collective bargaining in Canada is facing the task of adapting to a drastically altered environment, says Dr. W. Donald Wood, Director of the Industrial Relations Centre, and Professor of Economics, at Queen's University, Kingston, Ontario.

Success in solving the problems involved, Dr. Wood told delegates at the 42nd annual convention of the Ontario Hospital Association held in Kingston during October, "will obviously involve a certain amount of trial and error by labour, management, and governments," as they enter into "a period of great change in labour relations."

There will never be a time that is more ripe in view of the number of problems and opportunities than the present, to take action on the matter, believes Dr. Wood, since "it will require a willingness to experiment as boldly in matters of labour relations and personnel administration as in the physical sciences."

Dr. Wood indicated that there are four major factors shaping the present situation. They are: the economic environment, technological change and innovation, manpower and labour force shifts, and government policy and activity.

Key Factor

"The state of the economy," said Dr. Wood, "is always one of the most important factors shaping the scope and characteristics of collective bargaining—that is, the size of settlements, the emphasis on different demands, and relative bargaining power advantages. Since 1961, Canada has enjoyed . . . high levels of economic activity—high levels of employment, rapid rates of economic growth, tight labour markets, and, during the past year, some 'heating' in the form of strong pressures on some prices and on incomes. . . ."

A number of recent economic indicators show, according to Dr. Wood, "that there is now some slowing down in the pace of economic activity. There well could be a mild and short business downturn by mid-1967, although the longer-run, underlying economic forces appear strong. As always, of course, the Canadian economy will be influenced strongly by economic trends in the U.S. economy. The present economic uncertainties pose difficult problems for public economic policy. We must be careful in the present situation not to take across-the-board fiscal and monetary action to restrain demand. . . .

"As the Economic Council has repeatedly stated, a basic fundamental attack on our present economic difficulties lies in the improvement of the supply, efficiency, and mobility of our manpower and capital resources. . . .

"A second major force shaping contemporary labour relations is rapidly changing technology and innovation. While we still know little about many of the specifics of these new developments, there is a general consensus that this is a most important development in terms of its economic, social, and labour-relations implications. Its application has been extended widely and rapidly in recent years. Its potentials for the immediate future are enormous.

"Of particular relevance for labour relations is its impact on the world of work—where work is done, how it is done, who does it, and the skill and education requirements of those doing the work. The labour relations aspects of these questions pose some of the thorniest problems to be faced in the future by labour and management.

Labour Force Changes

"To a major extent, a development paralleling technological change has been the revolution in the composition of the Canadian labour force. While we are still not exactly clear about the impact of the new technology on the level of employment, it is clear that this development is an important factor in altering the industrial, occupational, and geographic structure of employment, and that this requires difficult adjustments, many of which again have labour relations aspects.

"The major manpower trends have been the relative shift in employment from goods-producing industries to service industries, the dramatic expansion in white-collar occupations, the demand for workers with more education and skill, or at least different skills, the increase in the number of women in the labour force, and the high proportion of youth in our labour force and population.

Role of Government

"The fourth major dimension in the labour relations environment is the rapidly expanding activity of government in this field—labour relations legislation, social security and labour standards legislation, manpower policies, and increasingly, direct government intervention in the collective bargaining process itself. Furthermore, collective bargaining in the public service itself is expanding rapidly, and this may well have important implications for public policy and also for labour relations in the private sector. . . .

"The scope and coverage of collective bargaining has broadened sharply recently. Trade union membership in Canada increased sharply by 9.3 per cent in 1965, the largest increase since 1951. Moreover, collective bargaining is now spreading to new occupational groups and industries—for example, government employees, workers in quasi-public institutions such as hospitals, education and utilities, trade and white-collar employees in general, including some professional groups.

"Although there is not likely to be a mass wave of organization in these areas, steady growth can be expected, with the possibility of some of this organization

falling outside the orbit of the traditional labour movement (e.g. federal civil servants, and registered nurses in Ontario) and differing in some ways from traditional collective bargaining.

Structure Broadening

"Trade union structure is also broadening under the pressures of changes in technology, industry and occupational structures. Rather than extensive amalgamation of small unions, large unions are likely to grow larger and more diversified with their membership increasingly covering different industry and occupational groups.

"Finally, unions in highly automated industries, where the economic pressure of the strike is being blunted, can be expected to experiment with other tactics—forms of secondary economic pressure, such as consumer boycotts, co-ordinated union activities, and attempts to put bargaining on a multi-unit and/or multi-employer basis.

"Apart from the expanding government legislative framework for labour relations, we are moving headlong towards more government intervention in the bargaining process itself. There are strong indications that the public and their governments in Canada are becoming less tolerant of disputes interrupting essential public services, and of private wage and price adjustments that are not in tune with broader public economic and social objectives.

"Although I believe it inevitable that there will be more compulsory arbitration and government intervention in areas providing essential public services, it is up to the parties in the private sector to make sure collective bargaining in this new era works not only in the best interests of the parties, but also is consistent with broader public goals. Whatever their other differences, surely both labour and management will agree that it is better to have the State as a partner than as a dominating authority.

"Finally, in the area of government activity, it needs to be said that we are now paying a heavy price for minority government in Canada. Too often the parties appear to be placing priority on petty political considerations rather than on clear, firm policies to solve our economic and social problems. This has not been without its serious consequences in the field of labour relations.

Large Wage Settlements

"A third significant recent trend in collective bargaining has been the particularly large size of wage settlements. This trend has also been operating in the non-union and white-collar fields. Although some are much larger, the average of settlements for 1966 is running around 7-8 per cent a year compared with the approximately 4 per cent increase in hourly rates and per capita income that has been the pattern since 1952.

"Against this background and the current hearings of the Parliamentary Committee and the forthcoming Report of the Economic Council on this subject, we are soon likely to be involved in vigorous debate as to whether Canada should have some sort of incomes and price policies or guidelines . . . Whatever the outcome of this guideline debate, it is clear that we do need to develop a national consensus on feasible ranges or frameworks within which income and price adjustments can take place in line with our national economic objectives and capabilities. Whether this consensus can be achieved through voluntary action on the part of labour and management remains to be seen.

Parity With U.S.A.

"Parity with U.S. rates will be another wage issue, and one that will be a major bargaining demand, particularly at next year's auto negotiations. Although there probably will be narrowing of the rate differential in some industries in the years ahead, we must remember that parity in wage rates is not the same thing as parity in standards of living. The latter can come only after a long, hard pull. Probably a much more immediate and significant issue will be the growing demands for wage parity between different regions in Canada. For example, there already have been strong demands in Quebec for parity with Ontario rates.

"Finally, in the wage area, technological advances are destroying the validity of many old forms of payment. In the years ahead, we can expect a gradual shift to a salary basis of payment beginning in areas where technology is moving rapidly and blurring the distinction between office and plant. . . .

"Private welfare and benefit plans have continued to expand and been adjusted in form to dovetail with expanding public welfare plans. Despite the great expansion in public programs, private plans are likely to continue to grow in the future, but be altered substantially in form. With public programs providing minimum basic coverage, private plans will be better tailored to meet major and special needs. In the process, the bases for many benefits may well be improved.

"Hours of work will continue to decline gradually in the years ahead, with pressures being exerted for more rapid reductions during periods of high unemployment. The advancing technology may also make it necessary to reassess the prevailing hourly schedules of work. Increasingly, too, more time on the job will be devoted to formal educational and training programs in order to keep employee skills up to date with the explosion of knowledge and techniques. Surely, this is one area where labour and management do have a clear-cut mutuality of interests, and where they can work together to achieve imaginative and appropriate programs.

The New Militancy

"Another highlight of current labour relations has been a new militancy and restiveness among workers that has taken many forms. Although this has had its sharpest expression in union-management relations, the situation is also prevalent in many non-union areas. While there are many underlying causes, I would like to refer to three which I believe have been very important.

"First, there is the 'catch-up' process whereby unions in industries where wages have lagged behind prevailing settlements in recent years—partly because of long-term agreements—have then attempted to narrow the gap by substantial demands. These, in turn, have become the demands of unions in areas where wages have been more in line. This situation is further aggravated by the long time taken to achieve a settlement in many negotiations, particularly at a time when some key prices, such as food, are moving ahead rapidly.

"Secondly, and related to the first factor, has been the nationwide publicity given to some of the recent huge settlements in which the government has been involved. With no clear statement of the rationale behind these increases, many employees and unions have viewed them as government-sanctioned standards of their own wage demands.

"Thirdly, an important factor underlying the current unrest in the labour relations field has been the great changes taking place in the composition of the labour force. For example, there has been the huge influx of youth into our labour force—workers with more education, different values, no background of unemployment or depressed economic conditions, and with many alternate job opportunities. It may just be that a number of management and union policies are still geared to the thirties and . . . are really out of touch with this new work force.

"In addition, the heavy bunching of the labour force between very young

An Opinion on the Freedman Report

That Canadian laws should require technological changes always to be negotiable under any collective agreement, no matter what the agreement says or omits, is suggested by Prof. H. C. Pentland of the Department of Economics, University of Manitoba, in an article on the Freedman Report (L.G., Jan.-Feb. 1966, p. 4) in the November number of *The Canadian Personnel and Industrial Relations Journal.*

He made this suggestion "because negotiation promises to handle some of the adjustment problems effectively, because such a requirement would encourage a more earnest search for solutions at other levels, and because this requirement would represent an overdue recognition of customary rights—notably the right, when one has entered upon an employment contract in good faith, not to have one's job eliminated without notice, due process, or compensation."

In his article, Prof. Pentland:

—writes of Mr. Justice Samuel Freedman, author of *Report of the Industrial Inquiry Commission on Canadian National Railways "Run-Throughs";*

—discusses the evolution of law as it affects employment relationships, and technological change, "the phenomena whose collision occasioned this [Freedman] Inquiry";

—comments on the adequacy of the Commissioner's proposals for resolving this collision. *The Canadian Personnel and Industrial Relations Journal* published the CNR brief to the Commission in its September number.

Prof. Pentland's suggestion was an extension of Mr. Justice Freedman's recommendation that the institution of run-throughs—"and by implication other important technological changes"—should be a matter for negotiation. "To make changes unfavourable to its workers," Prof. Pentland points out, "the company would have to face the pressures of collective bargaining, and the implication is that the company would have to pay an appropriate price. If the price were too high, the company might decide to forgo the change; but such a situation would suggest that the proposed change would involve a net social loss, and should not have been proposed in the first place."

Unresolved Questions

But the Commission's proposal leaves some questions unresolved. First, because unions vary in strength and most workers are not in unions at all, to leave automation to be cared for by collective bargaining would produce some unequal results. Second, the social costs of displacement vary: if in a diversified employment centre in prosperous times and among skilled workers, the costs will be minimal; if in a remote, one-industry town in a time of high unemployment and among unskilled workers, the costs will be high. Third, "it is questionable whether the bargaining table is the best place to deal with automation. It is not a straightforward question like ten cents an hour, bargainers may have more feeling than knowledge about it, and bargaining involves emotions, intransigent positions and a necessity for immediacy, none of which provides the best help for resolving a complex question."

It might be better, the author says, for union and management representatives to discuss automation quietly, remotely, away from bargaining pressures. "It is my impression that union people would mostly be willing, but management people mostly would not, because they think that the courts will support their right to do anything they choose about automation, so why tie their own hands?" Earlier in his article, Prof. Pentland had examined what and why the law has been and pointed out that traditional law had accorded management the unilateral right to introduce changes at any time without notice or consideration of those adversely affected.

The Freedman proposal for obligatory negotiation, Prof. Pentland believes, could, if applied to all employments, have an important indirect effect: it might induce management to discuss automation with unions at a high level so that it would not obtrude too urgently upon bargaining. It was at this point in his article that Prof. Pentland made the suggestion that the law should require negotiation of technological changes.

Severance Pay

He then turns to a second recommendation in the Freedman Report: severance pay for displaced workers. The recommendation could be generalized by law to all workers—not just those in railway employment, the context in which the recommendation was made—in the same way that the law stipulates minimum vacations and maximum hours for all workers, unionized or not.

> Severance pay would not constitute a parasitic welfare cost loaded on business. Rather, it would represent a very proper allocation to private costs of part of the social costs of disruption which disrupters have been escaping—and firms that caused no disruption would not pay it. Simultaneously, by drawing social costs to the attention of management, it could make managements more conscious that automation involves detriments as well as benefits, and stimulate them to plan ways to avoid the harmful effects.

But because the scale of severance pay suggested for railway workers by Mr. Justice Freedman appears high to him, Prof. Pentland suggests that it might be preferable to provide for a moderate scale of mandatory severance pay appropriate to the less serious cases, and to supplement it with other provisions more likely to reach selectively the employments that produce the major burdens of social costs. For this purpose, he recommended that experience rating be introduced into the unemployment insurance system.

The two proposals, compulsory negotiation and compulsory severance pay, are not the definitive answer to the problem of displacement by automation, but they do go part of the way and they do have a clear logic, Prof. Pentland asserts.

Effects of the Proposals

He then concludes with a comment on the effect of the Freedman proposals on the powers, practices and opportunities of management:

> Any public intervention involves, necessarily, a restriction on management's prerogatives as many managers conceive them; and it is predictable that some managers will denounce the intervention proposed by Mr. Justice Freedman, on principle, just as some have denounced every intervention of the past.
>
> Yet, past interventions have often been beneficial to owners and managers in the long-run, and I suggest that this would be true of a legal requirement that firms negotiate substantial technological changes, as it would also of a requirement that firms assume part of the costs of displacement incident to their technical progress. Negotiation and consultation is the direction in which wiser managements have been moving and, as for cost allocation, considerate managements as well as society will gain from forcing the inconsiderate to face their own costs.

Human Adjustment to Industrial Conversion

Joint union-management plan drafted by Domtar Ltd. and 30 international and national unions representing the 12,000 unionized employees in the company to help solve the problems created by technological advance

A joint union-management plan to help solve human adjustment problems created by industrial conversion has been drafted by Domtar Ltd. and 30 international and national unions representing the Company's 12,000 unionized employees. Under the chairmanship of Dr. John Crispo, director of the University of Toronto's Centre for Industrial Relations, and a joint committee, the plan was a year in developing. As well as stressing the human dimension, it delineates the respective responsibilities of labour, management and government.

The committee decided from the outset to include within their terms of reference those changes that would affect the company's regular work force in a permanent way.

Excluded from this reference were three types of dislocated personnel:

—workers laid off because of a general decline in business activity, such as a recession;

—seasonal and casual workers subject to irregular employment; and

—employees re-assigned from one job to another on a day-to-day basis.

The committee admitted that, for some workers, "industrial conversion is anything but a blessing." Among the potential losses that could be experienced were job satisfaction, employment security, livelihood, income, prerequisites associated with seniority and service, property value, and psychic and social satisfaction.

Flexible Policy Needed

"The problem is to reduce their justification for disquiet without jeopardizing advances that are vital to our future welfare," the committee said, and added that the requirement was a policy framework flexible enough to solve individual problems, and economical enough to ensure that the benefits of change were not consumed in the effort to cope with the adjustments.

The committee conceded that workers were bound to resist any change that threatened their livelihood if they did not have the assurance of alternative employment. One basic way to reduce this resistance was by maintaining full employment, they said, but admitted that "even then resistance may remain, not only until attitudes and values in general start to change, but also because of a failure to provide ways and means by which individuals can transfer from one job to another without undue sacrifice."

The committee noted that the concept of an "active labour market policy" which the Organization for Economic Co-operation and Development had promoted for several years, has been exemplified in the establishment of a federal Department of Manpower and Immigration, and they stressed that an active labour market or manpower policy designed to facilitate worker mobility—occupational, industrial or geographical—was essential to the full acceptance of industrial conversion. "Sustained full employment is clearly not enough by itself to assure workers continuity of employment."

Plan Portability

The committee discovered that, in many firms, fringe benefits have become so elaborate as to constitute "veritable little islands of private social security," and that the only way to circumvent this obstacle was to develop as many transferable fringe benefit systems as possible.

"This could be done either by making more private plans portable through vesting and funding arrangements, or by working toward more universal public social security systems."

When a one- or two-industry centre is hit by a shutdown, the situation was more complicated than adjusting individual workers to industrial conversion. "To solve the problem, it is frequently suggested that subsidies be offered to existing or potentially new sources of employment," the committee said. "The danger is that these subsidies may become a permanent burden on the rest of society." As an alternative, the committee suggested that measures be taken to entice those affected to other areas of growing employment.

"A satisfactory environment by itself will not necessarily solve the adjustment problems facing particular groups of workers in companies beset by industrial conversion," the committee stated. Although they found many instances where devices such as attrition, severance pay and early retirement were used to good effect, the members noted that none of these made much sense when applied on an across-the-board basis. They said that most of the negotiated schemes reviewed were too rigid and inflexible to meet individual needs. As a result, most collective bargaining plans made little or no allowance for the particular needs of those involved.

A second problem arose from the tendency among unions and employers to negotiate various schemes as if they were separate and distinct devices. The committee averred that a piecemeal approach to the problem reduced the likelihood of achieving a well rounded and integrated approach.

These two basic defects to the adjustment question were so serious, the committee said, that it was determined to avoid them in its proposal. The plan therefore stressed the need to look at

each individual case on its own merit and "in the light of a variety of possible remedial steps."

Twin Obligations

In outlining the responsibilities of government, union and management, the committee decided that each had a twin obligation. Government had to provide an environment within which industrial conversion could take place as freely as domestic and international competitive forces dictate, and to create an atmosphere that would help workers to accept change as a normal course of events.

Management also had a dual responsibility, the committee stated. "As the chief entrepreneurial agent in our economic system, management has an obligation to strive to introduce changes that will equip it to compete more effectively, and provide increased long-term employment security for their employees." At the same time, management must not pursue its goal of efficiency without regard to its effects upon workers whose welfare is being threatened. Through careful timing, advance notice, and consultation with the employee representatives, management could do much to reduce worker disruption and to assist those who were forced to make adjustments.

The committee said that the twin responsibilities of organized labour were to help its members understand the necessity of change, and to endeavour to shield them from undue hardships in as constructive a manner as possible.

Although individual workers should not be expected to bear untoward adjustment costs, they must be prepared to take full advantage of facilitating measures that would assist them in any transitions brought on by industrial conversion. Failing this kind of response, the committee said, there was no solution to the problem short of undue subsidization by the rest of society of those unwilling to live with the realities of present-day industrial life. "Since this would reduce the rate of rise in our standard of living, and could ultimately lead to economic stagnation, it scarcely offers an acceptable alternative course of action."

Conversion Insurance

The plan that emerged is an industrial conversion insurance scheme, funded by company contributions, but jointly administered by union and management, and intended to supplement current public measures and to experiment with new private ones designed to ease the impact of change on workers.

To ensure a sufficiently universal and integrated approach, the plan will become operative when it is accepted by bargaining units representing at least 90 per cent of the eligible employees, with the approval of their authorized local, national, and international bargaining agents.

Once the 90 per cent minimum is reached, a fund will be built up by a company contribution of 1 per cent for each hour worked by the participating employees. If necessary, the company will provide up to one year's advance on this contribution formula in order to launch the plan. If current needs do not require the full resources of the fund, it will be allowed to build up to a maximum of five million dollars, at which point contributions would cease until the fund again fell below that level. The fund, administered by a joint union-management committee, would be invested in Domtar Demand Notes, bearing interest at the current prime bank rate, and was expected to generate enough revenue to take care of requirements.

The joint union-management committee will be empowered to obtain the services of additional members on a temporary basis from localities experiencing personnel adjustment difficulties. The committee will also be empowered to employ an executive secretary, who will maintain close liaison with the appropriate federal and provincial government departments. The committee's office will not be located on either company or union premises, and the costs of administration will be borne by the fund.

Funds to Experiment

Expenditures from the fund itself will be used to supplement public programs and to experiment with new approaches. In addition to supplementing current government adjustment programs, the fund could also be used to provide such benefits as severance pay, income during retraining, or early retirement or for any other purpose deemed worthwhile by the committee.

To make the plan workable, the committee assumed that the company would be willing to give six month's advance written notice of all major changes. The committee suggested that even earlier notice might be provided to allow more time for employee representation without sacrificing the company's goal of competitive efficiency.

The plan will begin operation on the payroll date following receipt of sufficient union authorizations to meet the 90-per-cent requirement, and will be discontinued in the event that bargaining units, representing less than 80 per cent of the eligible employees, remain committed to it.

Authorized bargaining units wishing to withdraw from participation in the plan must give 12 months' notice of their intent. Bargaining units which elect to join the plan after its effective date must give 12 months' notice to the joint committee, and during such period, would not be eligible for benefits under the plan. If the plan is discontinued, the amount of money remaining will be returned to the company, less commitments outstanding on the date of termination.

Administrative Responsibility

Responsibility for the implementation and continuing administration of the plan rests with the joint committee subject to the general terms of reference. Once instigated, the plan would remain in effect until December 31, 1969, and from year to year if no notice of change is given by the company or the joint union committee, and could be amended by mutual agreement.

"Our proposal might be described as an 'automation insurance plan' were it not for the fact that it is intended to cover manpower adjustments made necessary by other forces at work in the economy besides technological change," the committee stated. "The approach we have suggested allows both labour and management to take full advantage of all public manpower adjustment programs while at the same time expanding on these where necessary. It also permits the development of other new programs in order to ensure that individual cases are dealt with in a fair manner."

The company was interested in a plan that would serve three distinct purposes:

—to give employees reasonable protection against change;

—to identify the costs involved in advance; and

—to leave it relatively free to operate the enterprise as dictated by the competitive pressures of the market.

The union group was interested essentially in one objective: To make the exercise worthwhile, it had to achieve a better employment security package as a group than the individual unions could hope to achieve on their own.

The committee concluded: "We believe that our proposal satisfied all these needs, and represents the soundest approach that Domtar union and management could take at the present time to cope with their mutual concern about the effects of industrial conversion upon the company's work force."

Legal and Illegal Strikes in Canada

Strikes that are legal, and those that are not, and some of the reasons that form the bases for strikes in Canada were outlined by Prof. H. W. Arthurs, Osgoode Hall Law School, Toronto, who spoke recently to the Fourth International Symposium on Comparative Law, at the University of Ottawa.

Prefacing his remarks, Prof. Arthurs noted that the right to strike is not really an appropriate topic for comparative legal analysis. From his point of view, "The strike, after all, is a socio-economic event rather than a juridical concept. Therefore, we ought really to begin by comparing the framework of labour relations, the dynamic historical and social forces which produce strikes, before we concern ourselves with a comparative analysis of legal doctrine.

"Put shortly, our contemporary labour relations systems envisage representation of workers by a union, collective bargaining between the union and the employer [to] produce an agreement of fixed duration, [the establishment of] wages and working conditions for the employees, and the use of the strike, actual or threatened, as part of the bargaining process. . . .

Acceptable Tactic

"It assumes," said Prof. Arthurs, "that the strike, the collective withdrawal of labour, is an acceptable (if regrettable) bargaining tactic. . . . Although the demands that precipitated the strike may have been couched in economic terms—greater hourly wages, longer vacations—frequently the real cause is to be found in hostility against a brutal foreman, frustration with changing work patterns, or fear of a real or anticipated lay-off. Under these circumstances, the strike becomes a veiled protest, veiled because our law views only an economic strike as proper. The importance of this last observation cannot be over-stressed. . . .

"Because the strike is an expression of discontent, as well as a means to an end, legitimate or illegitimate, the mere prohibition of strikes does not put an end to them. In fact, there is little in the common law trial that even remotely touches the real-life problem of the strike. In a sense, the law of strikes is the mirror image of the actual event: two-dimensional somewhat distorted, certainly devoid of human passion and compassion. . . ."

In a preliminary way, continued Prof. Arthurs, it is reasonably accurate to state that the only lawful strikes are those which are designed to gain economic objectives, and which are timely in the sense that they follow exhaustion of the compulsory conciliation procedures laid down in the legislation.

Even the strike for collective bargaining objectives is unlawful if it is untimely, he said. As well, strikes for recognition, sympathy strikes designed to bring pressure to bear on a secondary employer, strikes designed to force the employer to accept the union's interpretation of an agreement, strikes to protest employer action beyond the framework of the agreement, strikes of political protest—are all unlawful. Not only are such strikes unlawful, but activities conducted in association with them, or in substitution for them, are equally unlawful.

The Lawful Strike

"Nowhere is the collision of public policy and private law concept more dramatic than in the controversy over the status of employees lawfully on strike. . . . One important test of the legal efficacy of the strike is the degree to which the law tolerates employer sanctions against strikers. Obviously, the right to strike would be illusory indeed if the strike could be brought to an end by the discharge of the strikers. . . .

"The position of the legally striking employee is relatively secure, in the sense that both by compulsion of law and by economic pressure, he is likely to retain his status. Some strikers are vulnerable to economic pressure through loss of pension and other benefits, against which the law offers little protection. In effect, this may mean that strong unions will be able to shield strikers against such pressure by retrieving any losses when the strike is settled, while weak unions will not.

"One further problem, which is presently of more theoretical than practical significance, is the ability of an employer to forestall a strike by engaging in a lockout. The ability to select the occasion of conflict may have great tactical value—the union prefers peak production periods, the employer prefers a slack season—but so far, few employers have seized the initiative. . . ."

Unlawful Strikes

The situations in which strikes are unlawful are reasonably clear, said Prof. Arthurs. They involve an evaluation of timeliness rather than purposes. The interesting questions in this area relate rather to the development of sanctions against illegal action, and to the willingness of courts and other tribunals to apply these sanctions selectively and sensitively.

Those two last terms—"selectively" and "sensitively"—demand explanation, he pointed out, because most lawyers feel that wrongful action should automatically invoke panel sanctions, or a right in the injured party to reparation. Yet the illegal strike is not only a law problem; it is the symbol of a life-problem. In the selective and sensitive imposition of sanctions, some contribution can be made to the equitable adjustment of the tension-creating differences which gave rise to the strike. Because the ultimate good in our labour relations system is the maintenance of a strong and effective collective bargaining relationship, considerations of restitution and retribution may sometimes be sacrificed if they weaken the relationship.

"Predictably, the courts have proved largely unresponsive to policy considerations in giving remedies against illegal strikes. Illustrative of their approach has been a series of cases in several provinces involving failure to comply with statutory strike-vote requirements. Despite the existence of evidence that legislatively required or regulated strike votes seldom affect the incidence of strikes, courts tend to view the vote as a matter of great importance. The obvious fact is that workers "vote" most emphatically by supporting the strike or by crossing the picket-line, rather than by casting ballots. Yet the courts of British Columbia, Nova Scotia, Alberta, and Manitoba have held strikes unlawful because of imperfect compliance with voting requirements. . . .

"The right of an employer to dismiss his illegally striking employees has likewise been treated as a self-evident truth

The Impact of New Information-Processing Technology

The general level of employment and unemployment is dependent upon the monetary and fiscal policies of government and is not connected with "automation," or technological improvement, according to Herbert A. Simon, Professor of Computer Sciences and Psychology, and Associate Dean of the Graduate School of Industrial Administration at Carnegie Institute of Technology in Pittsburgh, Pa.

In the second of two lectures delivered at the University of Toronto in October on "The Impact of New Information-Processing Technology", Prof. Simon dealt with the effect of this technology on the economy. The first lecture was in the nature of an introduction, but it was also concerned with the effect of technology on managers.

In the second lecture, Prof. Simon discussed several misconceptions, as he considered them, about the effects of automation. Automation, he contended, would not cause large-scale unemployment; it would not make it necessary to remove a large part of the population from the labour market in order to enable society to consume all that it could produce; it would not make it impossible for people to find employment because they lacked skills that had economic value in the new technology; and rapid technological change would not cause intolerable transitional hardships.

The speaker also gave his reasons for thinking that the rate of technological progress would not increase much beyond the present rate. During the past century and a half, per capita production had increased at an average rate of perhaps 2 per cent a year. The present rate might be slightly higher, but it was almost certainly less than 3½ per cent.

Prospects for Productivity

"If the rate of innovation were the sole determiner of productivity change, there would be no reason for postulating a ceiling," the speaker said. "But there is one other crucial limit. Invention transforms itself into productivity only as it becomes embodied in machines and the skills needed to use them. The rate of investment in capital and training is the main regulator of technological change.

"Today in the United States, new investment (gross, not net) in computers and associated equipment accounts for well under 1 per cent of the gross national product. Rapid automation would require, among other things, a rapid increase in that percentage. But such an increase can only come about as a result of decreases in other forms of investment—unlikely in an expanding economy—or increases in the rate of saving. All the evidence suggests that capital and skilled manpower will continue to be scarce resources that will limit technological change to rates that will not differ greatly from the present one."

Passing on to consider the supposed threat of large-scale unemployment as a result of automation, Prof. Simon said that there had been a generalization in economics known as Say's Law which asserted that overproduction of goods and services in general was impossible "because the income from the sales of goods and services, distributed to the workers and investors who contributed to its production, is precisely the amount needed to purchase those same goods and services."

The experience of the Great Depression, however, had shown that there must be some fallacy in Say's Law. "John Maynard Keynes, among others, showed precisely what was wrong, and what must be done to amend the law. The revised Say's Law asserts that it is always possible for government, by regulating the money supply, interest rates, and the public deficit or surplus, to maintain incomes at a level adequate to purchase the goods and services that are produced. With proper government monetary and fiscal policies, overproduction can always be prevented, at any level of employment, including substantially full employment.

"Everything that has happened in the past 25 years gives us reason to believe that the revised Say's Law is correct. The American economy needs to provide two million new jobs each year to balance the increase in the working force, and two million additional new jobs for workers 'displaced' by increasing productivity. But of course, basically, it is the entrance of new population into the labour force that creates their new jobs—for they represent not only an addition to labor but an equivalent addition to prospective demand. In the same way, productivity growth creates new jobs by releasing purchasing power for new products and services. It is a matter of chickens and eggs, or, more literally of a dynamic steady state whose equilibrium can be guaranteed by government policy.

Alarm About Unemployment

"Alarm about widespread unemployment to be created by automation rises and falls inversely with the business cycle. The latter-day Luddites, who think we must smash the machines to prevent unemployment, have been rather quiet the past couple of years in the face of statistics of rising employment. They will become noisy again whenever the economy experiences a recession. They are right to object to unemployment; they are wrong in directing their protests at automation, instead of urging the correction of the situation by proper government policies. Two centuries of technological progress have demonstrated that any level of employment is compatible with any level of productivity."

The speaker also dismissed the idea that, even if purchasing power were adequate, the increase in production would in time lead to a situation in which all that could be produced could not be consumed. He pointed out that experience showed that people had little trouble in finding ways of pending increased income, and that increased purchasing power led to the development of new wants.

He also contended that if increased productivity were made use of partly as a means of increasing leisure, the result would not necessarily be bad for character or for human happiness. He admitted that some of the manifestations of the increased wealth of society probably indicated that "we are suffering, collectively, from the tastelessness of the

nouveau riche." He also agreed that increased leisure might be misused. But he intimated that some unattractive results of peoples' having more money and more spare time might be left to cure themselves.

Additional Leisure

Prof. Simon made the point that leisure was not something that would be forced upon society as a result of automation. "Notice . . .," he said, "additional leisure is not a makeshift, makework expedient to prevent unemployment; rather, it reflects our several decisions as to the forms in which we prefer to take our increased income."

He admitted that more money to spend was not synonymous with increased happiness. "A more tenable conclusion than either the hypothesis that humans only need more affluence and leisure to be happy, or the hypothesis that affluence and leisure will destroy them, is the notion that man has a very stable capacity for moderate happiness and unhappiness in a wide range of environments.

"As the world treats him better, he begins to expect more from it, and to be disappointed when his expectations are not met. If the world smiles less often, he gradually adapts himself to a more austere life, and balances what he has lost against the blessings that remain to him. . . . No matter what happens to the economy, once we have reached the point where acute physical needs are satisfied, and most physical pain alleviated, we can expect the sum total of human happiness—could we measure it at all—to be a rather stable quantity. We should not expect further changes in the amounts of goods or leisure to make much change in that. Whether you regard that as an optimistic or a pessimistic conclusion will depend on your aspirations for mankind.

A Place for the Unskilled

"So far we have been talking about averages: what technological change means for the society as a whole, or for the "average man" in it. The fear is sometimes expressed, however, that in the nearly-automated economy only electricians, engineers, scientists, and computer programmers will have employable skills. Are there any grounds for this fear?

"The rising average educational level of the labor force is often taken as evidence for the future unemployability of the unskilled, as is the strong correlation between educational levels and low/high unemployment rates. This diagnosis almost certainly confuses cause and effect. To understand trends in labor markets, we must understand the supply situation as well as the demand situation. The educational attainments demanded of job applicants depend as much on the supply of candidates with various amounts of schooling as upon the skill requirements of the job.

"Other things being equal, if an employer has a choice between a college graduate, a high school graduate, and a school dropout, he will pick them in that order. He has good reasons for doing so. In the first place, prospective employees may have learned certain things in school that enhance their competence as employees. At the risk of disloyalty to my profession, however, I am constrained to say that it is easy to exaggerate the vocational or professional value of what is taught in schools, and especially in universities, except possibly in some very specific professional curricula (and probably only for small fragments of these). 'Education' is such an obviously good thing that we overestimate the skill requirements of most jobs and the time required to obtain those skills on the job.

Acceptance of Standards

"A second, and more valid, reason for preferring the educated for employment is that diplomas provide the employer with a cheap and relatively efficient device for singling out those who, on the average, have a little more drive and are a little brighter than the usual run of job applicants. It is probably safe to say that those who drop out of school represent a generally less well motivated and less intelligent labor pool than those who persevere. It may even be that the college graduates are a smarter, more eager group than the high school students, although I think the evidence here is a little less clear, at least in the United States where the decision to go to college is simply a sign of acceptance of middle class standards.

"It is at least as true that the skills demanded by jobs adapt to the distribution of skills in the labor force as that the skills in the labor force adapt to the job demands. Both an unautomated and a highly automated economy are possible with quite widely varying levels of educational attainment in a society. For example, Germany, Japan, and England operate modern industrial economies today with a labor force whose average years of education are far less than the American average. Of course, they are also less productive, per unit of labor input, than the American economy; but it is unlikely that the difference can be attributed in any large extent to differences in the quality of labor. Moreover, we are not concerned here with the question of whether an educated labor force is more productive than an uneducated labor force, but whether unskilled labor is employable at all in an automated economy. The weight of theory and evidence suggests that it is—that man is the measure of all things, including jobs, and that the spectrum of jobs will adapt to the spectrum of available skills and abilities.

"Given the large and rapid increase that is occurring in the supply of highly educated employees, it is not even clear that the spread of wages between unskilled and highly skilled labor will increase. Perhaps the more serious question we face is whether college graduates will become demoralized if they find that they cannot earn much more than high school graduates.

Skills Remain About the Same

"Such evidence as is available from actual instances of factory and office automation also supports the view that automation does not greatly change the range of skills that is demanded. The studies that have been made to date show rather uniformly that average skill requirements remain about the same.

"Of course, evidence of what happens at the point of automation is not conclusive. We must also consider the skill requirements of the new jobs that are created by the income generated by technological progress. Here we know that employment in service industries is increasing, while employment in manufacturing and agriculture continues to decline. But 'service industries' are a mixed bag, including both highly skilled and demanding professional occupations, like physician and professor, and relatively unskilled occupations, like waiter and salesgirl. The rate at which automation proceeds in these several occupations . . . will respond, in turn, to the relative abundance or scarcity of suitable personnel.

"A man from Mars, visiting the Earth for the first time, might well be surprised to discover that the doors on buildings are tall enough to allow almost all people to pass through them without bumping their heads. He might conclude that this is evidence of natural selection in the evolution of the human species. He would be wrong, of course, because it has been the doors that have evolved in adaptation to the changing height of people, and not vice versa.

"Our man from Mars might also be surprised to find that the population possessed, collectively, just about the right

spectrum of skills to fill the jobs available in the economy. After reading the discussion above, he might conclude that in this case also, the whole burden of adaptation was not borne by man.

Who Pays for Change?

"The fifth question, Who bears the transition costs in a society undergoing rapid technological progress? is not as easily dismissed as the other four. A wheat farmer in western Canada is pleased to learn, I am sure, that rapid increases in agricultural productivity over two centuries have been the indispensable condition for Europe's and America's escape from Malthus. He would be even more pleased if he had not had to pay for this desirable result by long hours of hard work at low rates of pay. (His prospects are better at present than they have been for years, but only because of conditions of world population pressure that we all hope are temporary).

"Societies undergoing industrialization have been singularly inept in transferring transition costs from the shoulders of the few and distributing them among the many beneficiaries of progress. Part of the difficulty is built into the market mechanism itself, which is an important part of the machinery for regulating the economy.

"Adam Smith's 'unseen hand'—prices and markets—is a remarkable mechanism for motivating people to produce the goods that other people want, and to stop producing the goods they don't want. There are few of us today who believe so devoutly in laissez faire that we think the market mechanism can regulate the economy unaided by other tools and an appropriate legal framework. There are few of us, however (even in Socialist economies, with the recent reinvention of prices behind the Iron Curtain), who think an economy can be regulated, and human effort directed into productive channels, without any use of the mechanism.

Signal to Farmers

"Low agricultural prices, in laissez faire terms, are simply a signal to farmers that they should get out of the business of producing excess wheat—or whatever it is that is in excess—and find something else that is sufficiently wanted that they can produce at a profit. For a long time, that 'something else' was not something that could be produced on a farm. Hence farmers were faced with the alternative of living in genteel poverty on the homestead, or starting again at the bottom of the ladder in the city.

"In countries where farmers have had considerable political power—and have not had to rely primarily on export markets—governments have responded by subsidizing production that wasn't wanted, or wasting resources by restricting inputs. If we decry such policies as bad economics, we should not ignore the problems that gave rise to them. Our task is to find ways of eliminating agricultural (or any other) overproduction without imposing serious hardship on farm families.

"We generally prefer, with good reason, to motivate people with rewards than with punishments. We should prefer to pull them from the farms—if that's where too many are—by the attraction of alternatives, rather than to push them from the farms with poverty. An affluent society can afford to do that, and hardly any society can afford not to. The place for us to apply our imagination, then, is in devising schemes that will make it easy for people to acquire new skills in occupations where labour is scarce, to move to places where labour is wanted, and to move jobs to places where labour is available. This hardly seems too difficult an undertaking if we put our minds to it, and make it a central objective of public policy."

Strikes in Canada

Continued from page 176

by the courts, but has evoked different responses from specialized labour tribunals. The labour relations board and arbitration boards have struck a more deliberate balance between the employer's interest in discipline and the employee's predictable, although illegal response to provocation."

Equitable Relief

The discretionary nature of equitable relief administered by the courts in granting injunctions might be thought a convenient tool for striking a fair balance, in labour relations terms, between the parties, the speaker continued. But, despite the fact that the earliest reported labour injunction case in Ontario did hold that an employer's unconscionable conduct disentitled him to relief, because it had provoked the union into illegality, this doctrine has never flourished.

"If the courts have been loath to withhold the injunction remedy in deference to considerations of labour relations policy, they have not been reluctant to extend the remedy to deal with new situations which seem ripe for judicial intervention. Quite apart from the controversial use of injunctions to regulate picketing, there appears to be a growing use of the injunction to stop the strike itself. . . .

In summary, then, said Prof. Arthurs, the courts have developed what is essentially a new remedy, the injunction restraining a strike. In so doing, they have chosen to rely on thin distinctions, and only seldom have acknowledged that they were engaged in creative law-making. It cannot remain unnoticed, however, that despite their willingness to enforce personal service contracts against illegal strikers, they have not yet overcome their traditional antipathy toward forcing an employer to retain an employee in his service. Finally, at least in so far as the injunction against breach of the no-strike cause is concerned, in Ontario such injunctions would appear to be precluded by the Rights of Labour Act, Section 3, which states:

> A collective bargaining agreement shall not be the subject of any action in any court unless it may be the subject of such action irrespective of any of the provisions of this Act or of *The Labour Relations Act*.

"This section, no doubt, has led to the development in Ontario of a substantial body of arbitral jurisprudence as a substitute for the court decisions found elsewhere. . . ."

An End to Strikes?

"Let me conclude . . . by suggesting that neither civil nor criminal nor administrative sanctions will themselves prevent strikes. . . . The experience of countries where strikes are outlawed verifies it. Whether those countries are democratic, like Australia, or totalitarian, like Spain, strikes do occur. We are therefore put to a choice of alternatives: either accept the strike as an unhappy but inevitable phenomenon, or devote considerable social resources and human energy to the elimination of the causes of strikes. The English have chosen the former alternative, and the Scandinavians the latter. In certain critical areas of employment, we have decided to do away with strikes and replace them with some other satisfactory technique of fixing wages and working conditions.

"Whether we have devoted sufficient care to the provision of substitute procedures remains to be seen. My point is, simply, that we will only end strikes when we abandon our preoccupation with their juridical characteristics, and focus on their root causes. . . ."

Manpower Planning in Industry

A study prepared for the Economic Council of Canada surveyed 17 companies to determine their projected future manpower requirements and the extent of their planning in this direction

Planning for an adequate supply of the various types of manpower needed has been largely neglected by Canadian companies in their general plan of operations, according to a report titled *Manpower Planning in Industry* that was prepared for the Economic Council of Canada. The report, which is called a case study, and is Staff Study No. 18 of the ECC, was published in August. The authors are B. A. Keys and H. H. Wright.

The study was a survey of 17 companies that were thought to represent as broad a cross-section as possible of industry and commerce in Canada. In 1965, these companies were employing a total of some 350,000 persons, which was about 5 per cent of the total Canadian labour force. The number of employees in each company thus averaged about 20,000.

The data provided by these companies for the survey were consolidated and summarized in order to show the expected trends in manpower requirements by education and by occupation. The participating companies made it clear that they did not pretend to be able to predict their requirements accurately, either in numbers or in qualifications required, for as long as five years ahead. Moreover, they regarded it as proper and necessary that there should be a considerable amount of changing about among persons with certain types of training. For example, one type of engineering, scientific or technical training was considered to be about as suitable and useful as another in a number of different industries and in several occupations.

Job Opportunities

The study showed that the projected requirements were greatest for the higher levels of education (university), but because these higher levels made up a rather small proportion of the work force (5½ per cent), the greatest number of new job opportunities was expected to be for those who had graduated from high school, and who were expected to comprise 34 per cent of the work force by 1970.

"Along with this evidence of greatly increased job opportunities for those with higher educational attainment, goes comparable anticipated financial rewards. Census statistics in recent years have revealed that, generally persons with a completed high school education have had lifetime earnings approximately 50 per cent greater, and persons with a university degree almost triple those with elementary schooling only."

Regarding the general findings of the survey, the report says, "Summarizing the quantitative type of result within the group of companies surveyed, the greatest requirements in terms of rates of growth are shown in the areas where the greatest shortages already exist—for example, in the technical, professional, managerial and skilled categories.

"From an educational standpoint, a marked shift in preferred requirements is indicated toward higher levels of formal education. . . . It is noteworthy, though, that the labourer group, which shows a slight decline in its proportion of the work force, will account for a significant share of anticipated new requirements. . . ."

Manpower Plans Inadequate

Although nearly all the companies were in the habit of laying plans for capital investment for some time ahead, the report says that not much importance has so far been attached to making plans to provide for an adequate supply of trained manpower to carry out the capital plans successfully.

"One of the companies surveyed estimated that, over the past five years, capital expenditures of some $30,000,000 had been withheld, representing almost as much as [was] actually spent, because they did not command the manpower resources required to make reasonably sure that the proposed expansion could proceed on a sound and sustainable basis."

Another company thought that the present shortage of manpower was often not one of real shortage, but rather of the inefficient use of existing manpower resources. It suggested that if all those now employed were used efficiently, there might be a surplus of competent manpower.

Variety of Programs

"A wide variety of company training programs was encountered among the companies surveyed, ranging from in-company business administration courses for management trainees to complete apprenticeship training for skilled tradesmen. Some companies sponsored extensive off-premises courses; others had no formal program for those wishing to update or upgrade their skills. Still others complained that school facilities were not utilized sufficiently to meet retraining needs, and some acknowledged that they were not fully aware of the types of education and training being offered by their local school systems."

Most of the companies considered that their greatest difficulty in forecasting future manpower requirements lay in estimating their future sales and the effect of technological change.

One of the conclusions reached in the report was that "within the oft-repeated limitations, our results do indicate, within the group of companies surveyed, a definite trend toward higher educational requirements and, concurrently, declining job opportunities for those with limited education. The growth in educational requirements increases broadly as higher levels of education are reached, and is pronounced for university post-graduates, for technological institute graduates, and for high school graduates with trade or vocational school training . . ."

Layoff and Recall at Ford-Windsor

A report of the Ontario Economic Council examines the effect on employees of the Ford foundry and engine plants of the re-organization of production facilities arising from the Canada-United States Automotive Agreement.

A report on a study of events associated with the layoff and recall of 1,302 permanent, unskilled workers at the Ford Motor Co., arising out of the re-organization of the engine and foundry plants in Windsor, Ont., has recently been published by the Ontario Economic Council under the title, *The Impact of Layoff and Recall at Ford-Windsor.*

The report, which is by C. M. Birch and J. B. Gertz of the University of Windsor, says, "While the layoff period was disruptive and often difficult, there was little evidence of extreme hardship, as measured by children leaving school, families losing homes or selling household furniture, or appeals to the city for assistance."

The study, which is based largely on interviews with a number of the employees who were laid off, gives an account of the events leading to the Ford Company's decision to re-organize production facilities, some description of what was involved in the re-organization, and then supplies statistical and other detail about the experiences of the employees who were affected by the layoff.

"The first layoff of 493 men occurred at the end of June, 1965; the second layoff of 809 men took place in the middle of August. Two thirds of the personnel involved in the first layoff were re-employed at Ford after being off work five to seven months; 93 per cent of those in the second layoff were re-employed about four months after their layoff . . .

"Of the 1,082 men who returned, 267 did not use unemployment compensation (UC) or supplemental unemployment benefits (SUB) while laid off, either because they were working or because their layoff period was short. There were 327 men who averaged $68 a week in combined UC and SUB benefits. The remainder (about 30 per cent) had various combinations of UC and SUB.

"The men in the first layoff drew benefits for seven or eight weeks on the average, and virtually all who used benefits exhausted them half way through the layoff period. Those in the second layoff drew benefits for 11 or 12 weeks, and most of them found their benefits lasting for the full layoff period, since they also were entitled to a paid vacation of two or three weeks . . .

"In the second layoff, those affected lived for the most part on UC, SUB, and past savings; the men in the first layoff also relied on these resources, but most importantly, they found temporary work. At least 90 per cent of those in the first layoff were gainfully employed while away from Ford. About 15 per cent in the second layoff obtained temporary work—probably all who actively sought work. At least half the men who found employment held their jobs for the full layoff period.

"Most of the 220 who did not return to Ford went to work right away, without using either UC or SUB. Some of the men left Windsor, a small number retired, but most found jobs in the immediate area. On the basis of last referral by the National Employment Service, they found work as labourers in other auto plants, in feeder or parts plants, or in related companies."

The report emphasizes the point that the availability of alternative temporary work during the time of the layoff did a great deal to mitigate its effects. "The experiences of the Ford workers may well be unique, and not duplicated as non-automotive plants modernize, reorganize or automate. The tremendous demand for automobiles, arising out of a prosperous economy, and especially the sizable growth in demand generated by the Canada-United States Automotive Agreement, made it possible in late 1965 and early 1966 to call back relatively quickly all those laid off at Ford, and to hire several hundred additional workers as well.

"But what if demand had been stable or declining? . . . As it happened, however, there were numerous openings in local industry for unskilled workers. But in less prosperous times, their economic experiences might well have been quite different. When temporary jobs are available, laid-off men are not inclined to take training programs. Whether those workers would have participated in such programs under other circumstances is speculation. At least it is reasonable to think that ordinarily a training program would be needed, not so much for the workers who will be recalled—Ford has shown that the employer can retrain the workers as they are recalled—but for those who will not be recalled for an indefinite time.

"The men at Ford did not need to develop job mobility, except to a very limited extent. Ordinarily such development would be of critical importance. One fact which emerged was that the older men (in sharp contrast to the younger men) were not hired into production jobs in other factories."

The company found that in practice it was not able to arrange the layoffs and recalls in the orderly manner that, theoretically, should have been possible. The recall timetables proved to be especially difficult to plan, "so much so that they were altered almost daily." It turned out that the length of layoff was shorter than had been expected.

"Late April of 1966 was the estimated date of last recall. In fact, all were back by late February, and several hundred new men were hired in March and April. The production schedules tentatively established in September were not only met, but output exceeded expectation substantially for the following seven or eight months."

8th Session, ILO Inland Transport Committee

The Inland Transport Committee of the International Labour Organization adopted six resolutions during its Eighth Session, which was held from November 21 to December 2 at ILO headquarters in Geneva.

The subjects covered by the resolutions were:

—technical co-operation in training in the various fields of transport;

—railways modernization and rationalization;

—problems of concern to road transport workers;

—problems of dock workers;

—questions of concern to workers on inland waterways; and

—problems affecting workers in civil aviation.

The principal questions discussed by the Committee were those dealing with collective bargaining and pay structure in rail transport.

Delegates and observers, representing governments, employers and workers of 28 countries attended the session. Countries represented were: Austria, Belgium, Brazil, Canada, Ethiopia, Finland, France, Federal Republic of Germany, India, Israel, Italy, Japan, Malaysia, Mexico, Morocco, The Netherlands, New Zealand, Nigeria, Pakistan, Poland, Sweden, Switzerland, Turkey, U.S.S.R., United Arab Republic, United Kingdom, United States of America, and Uruguay.

The Canadian delegation was as follows:

Government Delegates—D. S. Tysoe, Industrial Relations Officer, Canada Department of Labour (Head of Delegation); and John M. Millons, Economics and Research Branch, Canada Department of Labour.

Worker Delegates—J. E. McAllister, Executive Assistant to the National Officers, Canadian Brotherhood of Railway, Transport and General Workers; and Charles Smith, Vice-President, Brotherhood of Maintenance of Way Employees.

Employer Delegates—George Milley, Employee Relations Officer, Canadian National Railways; and W. L. Jacobsen, Manager, Labour Relations, Canadian Pacific Railway.

Rosario Purpura, deputy member of the Italian Government on the ILO Governing Body, and government member of the tripartite delegation of the governing body to the Committee, presided over the Eighth Session. He was assisted by two vice-chairmen, Ernst Moor, employer delegate, Switzerland; and Emile Haudenschild, worker delegate, Switzerland.

The Committee, discussing collective bargaining and settlement of disputes in rail transport, stressed that trade unions should be associated as closely as possible in determining wages and working conditions for railway workers.

The Committee believes that the most desirable form of such association is collective bargaining, which has the advantage of bringing together, for the purpose of reaching agreement, parties that are particularly competent to handle issues involved. The Committee also felt that collective bargaining helps to promote industrial peace.

In the interests of both employers and employees, the Committee considered that there should be a balanced pay structure covering the various branches in the undertaking.

To work out the structure, the Committee recommended that the parties involved should take as their starting point the following basic principles:

—a guaranteed minimum wage, which should be sufficient to ensure to the worker a reasonable standard of living above the subsistence level;

—in determining the wage, account should be taken of family needs, including, among other things, food and its nutritive value, housing, clothing, medical care, and education; and

—the elimination of any discrimination made on the basis of race, colour, sex, religion, political opinion, national extraction, nationality or social origin, or any other distinction, exclusion or preference that has the effect of nullifying or impairing equality of opportunity or treatment in employment or occupation.

Collective Bargaining

Continued from page 172

and very old workers, has caused friction and problems for management and for union leaders as to the relative emphasis to be placed on 'cash' and 'security' items in settlements. But whatever the cause, and whether we like it or not, management and labour officials must recognize this new fact of life and develop appropriate policies and approaches for this new work force.

Bargaining Procedures

"A final trend in collective bargaining, but one still moving frightfully slowly for the problems at hand, is the development of new mechanisms and procedures to supplement formal collective bargaining negotiations. One of the main areas of application here has been in the field of manpower and work adjustments to technological change.

"It is clear that labour and management must involve themselves in various forms of regular and frequent discussion (supported by research and fact-finding) away from the crisis atmosphere of contact negotiations in order to come to grips with some of the complicated problems facing them. Such approaches should at least introduce a more businesslike rationality into bargaining relations, develop a better understanding of critical issues, and neutralize potential conflict over misunderstanding of factual and trivial issues. . . .

"In order to make collective bargaining function more effectively in today's new complex environment, many more resources also will have to be devoted to research, fact-finding, and analysis of our problems by governments, labour, management, trade associations, universities and other independent bodies. Although some encouraging results have been achieved recently in some areas, there still remains much to be done.

"Another important job for both labour and management is to develop mechanisms for transmitting these economic facts of life down the line to lower levels in their organizations. At the same time, we badly need increasing opportunity and forums for dialogue between labour and management, not only about the problems in their own sphere, but also in broader economic and social areas. . . ."

PRICE INDEXES

Consumer, January 1967

The consumer price index for January (together with the F-1 table) has been withdrawn this month, owing to an advance in printing schedule deadlines. It will reappear in the April issue.

City Consumer, December 1966

The consumer price indexes (1949=100) advanced between November and December in five of the ten regional cities, declined in three and remained steady in two. Movements ranged from an increase of 0.3 per cent in Vancouver to a decrease of 0.5 per cent in Ottawa.

Food indexes were lower in seven cities and higher in three. Housing indexes rose in six cities and remained steady in four. Clothing indexes increased in five cities, decreased in four and were unchanged in one.

Transportation indexes were higher in all cities except Ottawa, where a fractional decline was noted. Health and personal care indexes edged upward in one city, downward in four and remained constant in five. Recreation and reading indexes were higher in six cities and remained unchanged in four. Tobacco and alcohol indexes held steady in all cities except Edmonton-Calgary, where an increase resulting from higher prices in alcoholic beverages was recorded.

Regional consumer price index point changes between November and December were: Vancouver +0.4 to 139.9; Saint John +0.3 to 141.8; Montreal +0.3 to 143.9; Toronto +0.2 to 148.3; Saskatoon-Regina +0.2 to 137.3; St. John's −0.1 to 127.2*; Winnipeg −0.2 to 140.5; Ottawa −0.8 to 144.7; Halifax remained unchanged at 139.2; Edmonton-Calgary remained unchanged at 136.5.

Wholesale, December 1966

The general wholesale index rose to 261.3 in December, up 0.2 per cent from the November index of 260.7 and 2.3 per cent higher than the December 1965 index of 255.4. Five of the eight major group indexes were higher; two declined. The non-ferrous metals products group index was unchanged at 232.6.

The animal products group index advanced 0.7 per cent to 297.2 from 295.0 in November on price increases for livestock, fresh meats, hides and skins. The chemical products group index advanced to 212.3 from 212.2; the non-metallic minerals products group to 195.1 from 194.9. The iron products group index declined 0.6 per cent in December to 266.9 from 268.5 in November; the textile products group index declined 0.3 per cent to 251.9 from 252.7.

The vegetable products group index advanced in December to 229.1 from 227.2 in November; the wood products group to 341.1 from 340.6.

*On base June 1951=100.

Residential Building

The price index of residential building materials (1935-39=100) increased in November by 0.1 per cent to 346.9 from 346.5 in October, and to 152.1 from 152.0 on the base 1949=100. The price index of non-residential building materials (1949=100) remained at the October level of 150.9.

The price index of residential building materials (1935-39=100) decreased to 346.8 in December from 346.9 in November. On the base 1949=100, the December level was unchanged from 152.1 in November. The price index of non-residential building materials (1949=100) declined to 149.6 from 150.9.

U.S. Consumer, December 1966

The United States consumer price index for December has been withdrawn this month, owing to an advance in printing schedule deadlines. It will re-appear in the April issue.

British Retail, November 1966

The British index of retail prices (Jan. 16, 1962=100) had risen to 118.1 on November 15 from 117.4 in mid-October. The index was 113.6 in mid-November 1965.

The rise in the index during the month was due mainly to increases, largely seasonal, in prices of household coal, eggs and tomatoes. The index for the food group as a whole rose by 1 per cent to 116.6, compared with 115.4 in October.

The index for the fuel and light group rose by nearly 3½ per cent, and the transport and vehicles index and the services index rose by 0.5 per cent, compared with October. In the remaining six groups there was little change.

New era for Canadian nurses

A new era has begun for Canadian nurses, says Elsbeth Geiger of Toronto, president of the Registered Nurses' Association of Ontario, "and the impact will be felt across the whole province of Ontario." Miss Geiger was commenting on the retroactive contract made between the nurses' association and the Riverview Hospital, Windsor, Ont. The contract, spanning June 1, 1966 to May 31, 1968, gave the Windsor nurses an immediate raise of $25 a month and a promise of two more raises in three years.

Other terms include increased shift pay, a uniform allowance of $25 a year, increased sick leave, payment for extra education, provision for grievance and arbitration procedures, and checkoff dues to the nurses' association.

The Riverview Association was organized with the help of the RNAO employment relations department and was certified as a bargaining unit under the Labour Relations Act, January 21, 1966.

Ministry of Labour formed in Ireland

A bulletin from the Department of External Affairs in Ireland has announced the setting up of a new department called the Ministry of Labour. It will assume all the functions of Government in regard to labour affairs, including industrial relations, manpower policy and the administration of legislation relating to the protection of the interests of workers. These were functions that had previously been handled by other Government departments.

The report said that one of the department's main tasks would be to establish a research section, and representatives of employers and trade unions were asked to contribute ideas.

The new minister will be responsible for working out the Government's plans for giving workers a greater degree of security in employment, for the extension of training facilities, for the introduction and operation of redundancy compensation arrangements, and for initiating and bringing into operation a fair employment code. It was reported that the basic reason for the Government's decision to set up a new department was to devote more attention to the "human side of economic life."

Employment and Unemployment in December

Employment in December, estimated at 7,173,000, was 17,000 lower than in November. The decrease followed an unusually large decline between October and November. The labour force, at 7,439,000, was 254,000 or 3.5 per cent higher than a year earlier. Employment was up 240,000 or 3.5 per cent over the year.

Unemployment showed a smaller than seasonal increase, rising by 28,000 to 266,000 between November and December, and was 14,000 higher than a year earlier.

Unemployment in December represented 3.6 per cent of the labour force, compared with 3.5 per cent in December 1965 and 4.1 per cent in December 1964. Seasonally adjusted, the December 1966 unemployment rate was 3.6 per cent.

Employment

Total employment in non-farm industries declined slightly from November to December. Decreases during the month were chiefly in construction and manufacturing; increases occurred in trade, and in community, business and personal service.

During the past year, job opportunities for women have increased substantially. In December, the number of employed women was 129,000, or 6.2 per cent higher than a year earlier; employed men increased by 111,000, or 2.3 per cent. Manufacturing accounted for more than half of the year-to-year increase in total employment. Large increases occurred also in community, business and personal service, trade, and in transportation and other utilities. All regions shared in the year-to-year advance in employment; the largest percentage increases were in British Columbia and Quebec.

Unemployment

Unemployment increased by 28,000 to 266,000 between November and December, a relatively small increase for this time of year. Compared with a year earlier, unemployment was up 14,000. Of the 266,000 unemployed in December, some 215,000 had been unemployed for three months or less.

NOTE: The classification of labour market areas, and the summary table titled "Labour Market Conditions", are not included in this issue because the statistical basis for these tables is not comparable with a year ago. Beginning September 1, 1966, all registered applicants were asked to contact Canada Manpower Centres every 30 days—instead of the previously requested period of 14 days—to keep their registrations active. Another factor influencing the comparability of registered applicants is the extension of provisions, such as temporary layoffs, for exempting certain classes of unemployment insurance beneficiaries from registration.

Manpower Planning

Continued from page 180

The report mentioned three essential basic steps in effective manpower planning:

—future requirements for both the types and numbers of employees needed should be estimated as far ahead as possible;

—an inventory of present personnel should be made to give a clear view of existing resources;

—measures should be taken, when necessary, to match the qualifications of present employees more closely with job requirements; to establish training programs when it is necessary to improve qualifications; and to recruit new employees from outside the firm when needed.

The report emphasized the need for employers not only to estimate their future manpower needs, but also to devise some systematic method of enabling this information to be passed on to the authorities responsible for education and training. "Hence it is our further recommendation that formal steps be taken by educators, employers and governments to arrange for a systematic exchange of information on basic trends in forward manpower requirements . . ."

"In conclusion," the authors say, "it is clear that if we are to relate educational and training programs more closely to emerging trends and changes in occupational requirements, then it is essential that longer-range planning of manpower needs be carried out by all major sectors of the economy, by business firms, by labour organizations, by educational systems and by governments."

The 43-page bulletin may be obtained from the Queen's Printer, Ottawa, price $1 a copy.

Wage Schedules Prepared In December

During December the Department of Labour prepared 163 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition, and certain services. In the same period, 138 contracts in these categories were awarded.

In addition, 70 contracts that contained the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation, and the Departments of Defence Production, Post Office, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned, or to others who have a *bona fide* interest in the execution of the contract.

Contracts awarded in December for the manufacture of supplies and equipement were:

Department	*No. of Contracts*	*Aggregate Amount*
Defence Production	123	$157,348.00
Post Office	6	434,227.32

During December, the sum of $11,294.93 was collected from 23 contractors for wage arrears due their employees as a result of the failure of the contractors, or their subcontractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for distribution to the 233 workers concerned.

Current Labour Statistics

Principal Items	Date	Amount	Percentage Change From Previous Month	Percentage Change From Previous Year
		(000's)		
TOTAL CIVILIAN LABOUR FORCE* (000)	Dec. 10	7,439	+ 0.1	+ 3.5

By the Women's Bureau

Female Membership in Labour Organizations

The second report under the Corporations and Labour Unions Returns Act,* recently issued, shows that there were 255,541 women members in labour organizations across Canada reporting under the Act.

The number, accounting for 16.3 per cent of the total membership reported, includes organized women workers in the 10 provinces, Yukon and the Northwest Territories and constitutes an increase of 22,292 over the total of 233,249 reported in the 1962 return (L.G., Jan.-Feb. 1966, p. 31).

The increase of 9.5 per cent in the number of women members exceeded that of both male members, which increased by 2.2 per cent, and total members, which increased 3.4 per cent. It also exceeded the 4 per cent increase in the female labour force during the same period.

Organizations required to report under the Act include international, national and regional unions, and any other organization of employees formed for the purpose of regulating relations between employers and employees. A union with fewer than 100 members resident in Canada is, however, exempt from the terms of the Act. Data in the report are classified under three categories — international unions, national unions, and government employees' organizations.

Returns Filed with DBS

Reporting organizations are required to file a two-part return with the Dominion Statistician. The first section, from which the foregoing data are derived, gives the name of the union, addresses and principal officers, the union constitution, nationality of officers, name and address of each local union or branch in Canada, the number of male and female members, particulars of trusteeship, and the name and address of the employer.

The second section of the report covers aspects of the financial structure of the labour movement — income and expenditures, assets and liabilities, receipts from members, payments for salaries, wages and strike benefits. These items are classified as "privileged" and are published only in summary form. Appended to the report is a list of reporting organizations showing the number of locals and membership in Canada in 1962 and 1963, as well as the percentage change.

The accompanying table, based on the data in the report, covers aspects of women's participation in reporting labour organizations.

Continued on page 197

	1962	*1963*	*Change*
Women members in all reporting labour organizations	233,249	255,541	+22,292
Male members	1,279,084	1,307,843	+28,759
Total membership	1,512,171*	1,563,384	+51,213
No. of organizations reporting women members	119	132	+ 13
No. of organizations reporting no women members	50	42	— 8
Total number of organizations reporting	169	174	+ 5
Organizations reporting majority of women members	24	24	none
Locals reporting women members	2,785	3,938	+ 1,153
Total number of locals	7,873	7,995	+ 122

*Revised figure is not total of male and female members, revised figures for which are not available.

Department of Manpower and Immigration

The Rehabilitation Scene in Saskatchewan

Expansion of services and initiation of new ventures in the field of vocational rehabilitation were the main accomplishments of the Saskatchewan Council for Crippled Children and Adults during 1966.

An experimental regional vocational assessment clinic was held in Moose Jaw at the request of several local agencies. A staff team consisting of a psychologist, a social worker, a vocational evaluator and a program director spent five days in carrying out a complete vocational assessment on some 40 clients referred for this service. These persons were interviewed and given a full set of tests. The program was well received, and three similar clinics are already planned for other centres during 1967.

Training for Service Occupations

During 1966, the Council started a new project in Saskatoon designed to prepare handicapped young men, 16 years of age and over, for competitive employment in the service industries — garages, hotels, restaurants, warehouses, etc. This program is sponsored by the Saskatchewan Department of Education.

Most of the students taking the course had left school too soon to qualify for regular technical school or trades training, and almost all found it difficult or impossible to obtain employment without training. The course, which runs for a period of six months provides both classroom instruction and actual on-the-job training. Instruction includes lectures and demonstrations in budgeting, banking, basic first aid, traffic safety, personal hygiene and numerous other topics related to everyday living.

Individuals from the community are brought in to instruct the students about the world of work and the community in which they live. The Canada Manpower Centre provides lectures on employment opportunities, how to register, etc., and the Department of Labour gives instruction on the Minimum Wage Act, employee rights and related topics. The Saskatoon City Police offer lectures and films on traffic, pedestrian and vehicle safety.

There are few jobs in which the ability to operate a vehicle is not an advantage to the employee. Driver-training is offered to all students except those suffering from epilepsy. Classroom instruction is given by the program supervisor, and the road work is given through the facilities of a private driver-training school. This is a highlight of the course for the students and nearly all make high marks in this subject.

On-the-job experience or field training is provided in service stations, warehouses, bottling works, cafeterias, hotels, auto-body shops, floor-covering establishments and construction companies in the neighbourhood. A student usually receives four-week assignment periods in different jobs to provide a variety of work experience. Careful checks are made on each student's progress, and interviews are held with the employers to evaluate his performance at work.

The young men come to Saskatoon from all over the province, and they are accommodated in boarding houses in the city. They are referred for admission to the program by guidance counsellors from high schools and technical schools, social workers from the Departments of Welfare and Rehabilitation, and through the Department of Education.

This course was instituted following the successful completion of a pilot project in Regina in 1965. Sixteen students were accepted for the course in Saskatoon which ran from April 1 to September 30, 1966. All but two have successfully completed the training and are now in permanent employment. Another class with an enrolment of 22 is under way, and all are doing well.

Service Station Serves as Training Centre

In October the Council in co-operation with the Royalite Oil Company opened a service station in Saskatoon. The purpose of this project is to train handicapped young men as service station attendants. Instruction regarding oil, greasing, spark plugs, radiator and battery checks and minor repairs is part of the service station attendant's program. This project has been welcomed by all sections of the service station industry because of an extreme shortage of personnel in the service station trade.

In April 1966 the Parkland Sheltered Workshop opened in Yorkton. The program is aimed at preparing physically and mentally handicapped persons for the world of work.

The workshop is divided into three sections—woodworking, ceramics and sewing. At present, the woodworking shop is engaged in turning out 36,000 wooden stakes to be used in highway surveying. They can make about 2,000 a day. Other items manufactured in the woodworking shop include shipping crates, garbage can stands, lawn furniture, clothes racks and picnic tables. Mugs, coffee sets, ash trays, and numerous types of ornaments are turned out by the ceramics department. Simple sewing and weaving are taught.

The shop also offers a repair service for soft drink cases and milk crates, and a salvage department for the cleaning and sorting of metal and small parts.

Eighteen persons are employed at the centre, but the number is expected to increase to 70.

The Yorkton workshop is the sixth of its kind in the Province of Saskatchewan. The workshop in Saskatoon, which began operations in 1954 with 6 or 7 handicapped employees, now has more than 100 persons employed, and this year it moved to new quarters with accommodation for up to 150 workers.

The workshops are sponsored jointly by the Council for Crippled Children and Adults and the Association for Retarded Children in the province of Saskatchewan.

Another joint venture of these two organizations is a day care program for severely handicapped children, most of whom are both physically and mentally handicapped.

Marina Creations Expands

Marina Creations is a branch of the Homebound Department of the Society for Crippled Civilians, whose headquarters are in Toronto; and its work is training and assisting handicapped persons in making artistic articles in their own homes. The sales outlet of this organization in Regina has recently moved to a new, more central situation; and the move has led to a dramatic increase in sales, and consequently to increased opportunities for handicapped persons who manufacture these luxury gift articles.

By the Section on Older Workers
Civilian Rehabilitation Branch
Department of Manpower and Immigration

Counselling Is the Key to Successful Placement

In a 1963 message to the United States Congress, the late President John F. Kennedy said, "Denial of employment opportunities to older persons is a personal tragedy. It is also a national extravagance, wasteful of human resources. No economy can reach its maximum productivity while failing to use the skills, talents and experience of willing workers.

"Studies of the (U.S.) Department of Labor show that large numbers of older workers can exceed the average performance of younger workers, and with added steadiness, loyalty and dependability.

"In the (U.S.) federal Government, a number of steps are being taken to facilitate employment opportunities for older workers. I am asking all federal agencies to review their current policies and practices in order to ensure that full consideration be given to the skills and experience of older workers. I urge all employers, private and public, to adopt a similar policy."

Top Priority

The late President selected the older worker problem as one that merited top priority. Under the direction of the Federal Employment and Guidance Service (FEGS), a vocational rehabilitation project for older disabled workers had been conducted in New York City during the four-year period ending December 31, 1961. The favourable experience of this particular study provided support for the President's statement, and became the prototype for selected demonstration projects in other parts of the U.S.

Dr. Herbert Rusalem, FEGS research consultant, under the auspices of the Federation of Jewish Philanthrophies in New York City, produced a report that does much to dispel misconceptions regarding the working ability of older persons. In addition, the report provides encouragement, not only to the older workers, but also to the counsellors, placement officers, rehabilitation personnel and others intimately concerned with this growing problem.

In New York City, clients were referred to the project by the state vocational rehabilitation agency. Each client was given one or more interviews and, if needed, psychological testing or a three-week workshop evaluation, or both. Following this evaluation, a case conference selected the most appropriate plan for each client. In addition to counselling, the following services were available: personal adjustment training, vocational training, immediate placement in industry, and referral for non-vocational services. Alternately, the client might discontinue the program for reasons related to his health, motivation, or decision to leave the labour market.

Clients who completed personal adjustment training were offered a choice of placement in industry, placement in a long-term sheltered workshop, or complete withdrawal from the labour market. Vocational counselling was available at every step in the rehabilitation process, and when further service was considered advisable, referrals were made to other agencies. All clients were assured of an active placement service or a sheltered workshop environment, both of which were designed for this particular group.

The criticism has frequently been made that rehabilitation agencies are somewhat unwilling to establish programs for older rehabilitation clients. The resources of such agencies are, however, invariably limited, and other groups of applicants may appear to offer greater opportunity for successful rehabilitation. A study of the data from the New York project, on the contrary, shows that this demonstration was weighted in favour of the older disabled unemployed client.

Eight hundred and fifty-three older disabled persons were registered during the life of the project, and detailed statistics were maintained on the first 700 registrants. The average age was 63.3 years, 81.7 per cent were males, and 99.2 per cent lived in New York City.

More than two thirds had cardio-vascular or orthopedic disabilities, almost two thirds had a second disability, and 30.7 per cent had a third disability. The average educational level was 7.8 years, median period of unemployment before admission to the project was 18.5 months, more than two thirds had been service or manual workers, 95.5 per cent had significant physical limitations, 24.8 per cent were affected mentally, and 42.2 per cent had significant emotional limitations.

Of the 700 clients, 91, or 13 per cent, withdrew during the course of the project, leaving only 609 available for placement. After evaluation and training, 27 persons were considered unfit for placement, but six of these ultimately found jobs. Of the 582 available for placement, 486 were able to get one or more jobs—a total of 1,043 jobs, or a placement rate of 79 per cent. A number of these placements, it is true, were in temporary jobs or in undesirable occupations, but subsequent inquiry showed that more than half of those placed had remained on the job longer than six months. Severity of disabilities, earning limitations imposed by social security regulations, and client preference necessitated a high percentage of part-time jobs. Thirty-five per cent of all jobs obtained were for less than a full working day.

Counsellor Expectation Experience

Clients who moved from intake workshop evaluation to personal adjustment training received three sets of ratings to determine "placeability." Others received one or two sets of ratings. Those considered "ready for immediate placement" were grouped with others considered placeable, after completion of specified rehabilitation services. Of this group, 95.2 per cent obtained one or more placements. The lowest rating was given to those considered "non-placeable even in a sheltered workshop." Even in this lowest group, 24.1 per cent obtained one or more placements during the project.

The New York City experience demonstrated that vocational rehabilitation services for older disabled persons are not only socially desirable, but are also economically and operationally practical. It also demonstrates that counsellors have the capability to determine the most, and least placeable members of a group; but, even among counsellors acquainted with the problems of aging, there is a pronounced tendency to underestimate the employment potentialities of older disabled workers.

Condensed from *Teamwork in Industry*
Published by the Labour-Management Consultation Branch

The Edmonton Labour-Management Conference

The largest area labour-management conference held in 1966 took place in Edmonton last November, when 463 labour, management and government delegates met to consider how to improve "effective communications in industry."

Keynote speaker was C. Roy Brookbank, Industrial Relations Associate and professor in the Department of Commerce, the Institute of Public Affairs, Dalhousie University, Halifax. Prof. Brookbank stressed the need to improve perception in communications, noting that ". . . we talk, but we do not communicate. We hear but we do not really listen. When we do listen, we do not understand because we do not take the time nor make the effort to perceive the situation from the other side's point of view."

During the workshop discussions, the delegates split into small groups to consider various topics within the general theme. One subject, "how communications can promote a climate for more effective collective bargaining," brought forth the great need for opening, and keeping open, a continuing, two-way channel of communications between labour and management at all times.

Come Prepared

Delegates thought that such a channel, using regular labour-management joint consultation committee meetings, would help each side to understand the position taken by the other. When it came time to negotiate a contract, the two groups would come to the table better prepared to negotiate through knowledge, rather than through what could be incorrect assumptions.

Groups studying this topic also felt that there should be "no accidental leaks" to the press from undisclosed but "reliable" sources during negotiations; that each side should police its own people to keep negotiations secret until ratification. It was stated that such leaks to the press not only harmed the actual contract talks, but also allowed one side to seek public sympathy to the detriment of the other group. The groups also concluded that "there is an urgent need to improve the public's understanding of collective bargaining and its problems."

The news media came in for criticism for printing "half-facts" about contract settlements, but the delegates agreed that part of the responsibility for this lay with the negotiating parties, which fail to demand that the complete facts be made known.

Again, referring to the collective bargaining discussion groups, the delegates declared that, after the contract had been signed, both union and management should hold explanatory meetings so that every one knew the exact meaning of the agreement. They agreed that this was especially important for supervisors and shop stewards who had daily need to interpret the contract.

Company Frankness

The delegates emphasized that much misunderstanding among employees about company policies and positions could be dispelled if the company gave them more facts about its plans and competitive position, and possibly distributed to them the annual report to shareholders.

It was thought that, as both management and the union use "highly skilled individuals to negotiate, there is often a communications gap between the negotiators and the people they represent."

Throughout all the group reports on this topic, the main theme was the necessity to increase effective communications between labour and management on a day-to-day basis in order to improve the general quality of industrial relations.

The groups discussing "communication as it relates to education, employee training and development" consolidated all their findings into a series of seven recommendations, urging that:

(1) in-plant labour-management committees be established;

(2) labour and management adopt equally serious approaches to all retraining and upgrading programs;

(3) management assume a responsibility to create an atmosphere of good faith by communicating its policies and attitudes regarding education, training and development;

(4) management ensure that all employees be kept informed as to work performance, strong points as well as weak;

(5) the worker himself, or through his union communicate his ambitions and needs for self-improvement, retraining, education and development;

(6) management and labour make certain that both have personnel with the authority to communicate with each other; and

(7) joint labour-management consultation be adopted on an industry-wide basis.

The conference was jointly sponsored by the Canada Department of Labour, Alberta Department of Labour, Canadian Labour Congress, Alberta Federation of Labour, Canadian Manufacturers' Association, Edmonton and District Labour Council, Edmonton Chamber of Commerce, Personnel Association of Edmonton, Edmonton Construction Association, Edmonton General Contractors' Association, and the City of Edmonton.

Certification and Other Proceedings

Before the Canada Labour Relations Board

By the Employee Representation Branch

The Canada Labour Relations Board met for three days during December. The Board granted five applications for certification, rejected one such application, and ordered two representation votes. During the month, the Board received seven applications for certification, and allowed the withdrawal of two such applications. The Board also received one request for review of an earlier decision; in the case of another such request, it re-affirmed its earlier decision.

Applications for Certification Granted

1. *Syndicat national des employés de Cargill Grain, CSN,* on behalf of a unit of grain handlers employed at Baie Comeau, Que., by Cargill Grain Company Limited, Winnipeg, Man. (L.G., Dec. 1966, p. 740). The International Brotherhood of Pulp, Sulphite and Paper Mill Workers and Baie Comeau Elevator and Dock Workers, Local 977, had intervened.

2. Professional Transport Workers' Union of Canada, on behalf of a unit of drivers employed by J. Ronaghan Trucking Ltd., Clover Bar, Alta. (L.G., Dec. 1966, p. 741). The Truckers, Cartagemen, Construction & Building Material Employees, Local 362, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America had intervened.

3. Professional Transport Workers' Union of Canada, on behalf of a unit of employees of Western Asphalt Distributors (Alberta) Ltd., Calgary, Alta. (L.G., Dec. 1966, p. 741). The Truckers, Cartagemen, Construction & Building Material Employees, Local 362, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America had intervened.

4. Professional Transport Workers' Union of Canada, on behalf of a unit of truck drivers employed by Veteran Transfer Ltd., Edmonton, Alta. (L.G., Jan., p. 41).

5. Canadian Brotherhood of Railway, Transport and General Workers, on behalf of a unit of traffic department employees of B.C. Airlines Limited, Vancouver, B.C. (L.G., Feb., p. 128).

Application for Certification Rejected

1. *Syndicat National des Employés de Three-Rivers Elevators Ltd., de Trois-Rivières (CSN),* applicant, Three-Rivers Elevators Ltd., Trois-Rivières, Que., respondent, and Ernest Gravel, *et al.,* interveners (L.G., Dec. 1966, p. 741). The application was rejected after permission for its withdrawal was denied the applicant.

Representation Votes Ordered

1. Professional Transport Workers' Union of Canada, applicant, and the Truckers, Cartagemen, Construction & Building Material Employees, Local 362, General Truck Drivers and Helpers, Local 31, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicants, and Northern Industrial Carriers Ltd., Edmonton, Alta., respondent (L.G., Jan., p. 41; Dec. 1966, p. 740). The Board directed that the names of both applicant unions appear on the ballot (Returning Officer: D. H. Cameron).

2. Lorne McEwen and William Publow, applicants, Taggart Service Limited, Ottawa, Ont., respondent, and Teamsters, Chauffeurs, Warehousemen, and Helpers, Local 91, General Truck Drivers, Local 938, and Transport Drivers, Warehousemen and Helpers Union, Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, respondents (L.G., Dec. 1966, p. 741). The Board ordered a vote of the employees following a public hearing of an application for revocation of certification affecting the above parties (Returning Officer: A. F. Tulloch).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the functions of the Canada Labour Relations Board, for which the Employee Representation Branch of the Department is the administrative agency.

Applications for Certification Received

1. International Association of Machinists and Aerospace Workers, on behalf of a unit of employees of *Aeronaves de Mexico S.A.,* Toronto, Ont. (Investigating Officer: S. Emmerson).

2. Canadian Brotherhood of Railway, Transport and General Workers, on behalf of a unit of stevedores and other employees employed by Henderson Lumber Company Limited, Mulgrave, N.S. (Investigating Officer: D. T. Cochrane).

3. Canadian Brotherhood of Railway, Transport and General Workers, on behalf of a unit of stevedores and other employees of Rudolphe van der Walde (Canada) Ltd., Mulgrave, N.S. (Investigating Officer: D. T. Cochrane).

4. Canadian Brotherhood of Railway, Transport and General Workers, on behalf of a unit of stevedores and other employees employed by Williams & Simpson, Mulgrave, N.S. (Investigating Officer: D. T. Cochrane).

5. General Truck Drivers and Helpers Union, Local 31, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees at the North Burnaby, B.C., terminal of the Midland Superior Express Limited, Calgary, Alta. (Investigation Officer: D. H. Cameron).

6. Warehousemen and Miscellaneous Drivers Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees employed at Oakville, Ont., by M. Rawlinson, Limited, Toronto, Ont. (Investigating Officer: H. A. Fisher).

7. United Steelworkers of America, on behalf of a unit of employees of Hudson Bay Mining and Smelting Co., Limited, Flin Flon, Man. (Investigating Officer: A. E. Koppel).

Applications for Certification Withdrawn

1. Vancouver Harbour Employees' Association, Local 517, International Longshoremen's and Warehousemen's Union,

applicant, and National Harbours Board, Vancouver, B.C., respondent (general unit) (L.G., Jan., p. 41).

2. Vancouver Harbour Employees' Association, Local 517, International Longshoremen's and Warehousemen's Union, applicant, and National Harbours Board, Vancouver, B.C., respondent (security men) (L.G., Jan., p. 41).

Requests for Review under Section 61(2)

1. The Board received a request by the General Drivers, Warehousemen and Helpers, Local 979, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America for review of the certificate issued by the Board on June 6, 1966, which certified the union as the bargaining agent for a unit of driver-helpers employed on leased tractors by Arrow Transit Lines Ltd., Winnipeg, Man. (L.G., Aug. 1966, p. 455). Named as respondents were Arrow Transit Lines Ltd., Kingsway Freightlines Limited, and John Kron & Son Limited, all of Winnipeg, Man., and Kingsway Transports Limited, Agincourt, Ont.

2. The Board issued a decision in a request for a review affecting the Transport Drivers, Warehousemen and Helpers Union, Local 106, General Truck Drivers Union, Local 879, and General Truck Drivers Union, Local 938, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicants, Overnite Express Limited, Hull, Que., respondent, and Canadian Transportation Workers' Union 192, NCCL, intervener (L.G., Jan., p. 40). Following a new representation vote by the employees affected, the Board reaffirmed its decision of June 2, 1966 and again denied certification to the applicants.

Conciliation and Other Proceedings Before the Minister of Labour

By the Conciliation and Arbitration Branch

During December, the Minister of Labour appointed Conciliation Officers to deal with the following disputes:

1. Alaska Cruise Lines, Ltd., Vancouver, and Seafarers' International Union of Canada (Conciliation Officer: D. S. Tysoe).

2. Central Truck Lines Limited, Val d'Or, P.Q., and Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: C. E. Poirier).

3. Pacific Western Airlines Limited (IFR pilots) Vancouver International Airport, and Canadian Air Line Pilots' Association (Conciliation Officer: D. S. Tysoe).

4. National Harbours Board, Vancouver, and Vancouver Harbour Employees' Association, Local 517, International Longshoremen's and Warehousemen's Union (Conciliation Officer: D. S. Tysoe).

Settlements Reported by Conciliation Officers

1. Cronkwright Transport Limited, Simcoe, Ont., and Local 879, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: T. B. McRae) (L.G., Feb., p. 129).

2. Bristol Aviation Services, Montreal International Airport, and Lodge 869, International Association of Machinists and Aerospace Workers (Conciliation Officer: C. E. Poirier) (L.G., Feb., p. 129).

Conciliation Board fully Constituted

The Board of Conciliation and Investigation established in October to deal with a dispute between CHAB Ltd. (CHAB-TV) Moose Jaw, Sask., and National Association of Broadcast Employees and Technicians (L.G., Jan., p. 41) was fully constituted in December with the appointment of His Honour Judge B. Moore of Swift Current, Sask., as chairman. Judge Moore was appointed by the Minister on the joint recommendation of the other two members of the Board, N. G. A. Wilson of Regina and Ray L. King of Moose Jaw, who were previously appointed as nominees of the company and of the union.

Board Reports Received

1. Consolidated Aviation Fueling and Services Limited, Montreal, and Lodge 869, International Association of Machinists and Aerospace Workers (L.G., Jan., p. 42).

2. Canadian Broadcasting Corporation, and International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada (L.G., Dec. 1966, p. 742).

Settlement After Board Procedure

The Bell Telephone Company of Canada, Directory Sales Department, Eastern Region, Montreal, and Local 57, Office & Professional Employees' International Union (Bell Unit) (L.G., Feb., p. 138).

Settlement After Strike Action

Rod Service Ltée, Montreal, and *Le Syndicat National des Employes de Rod Service (CSN)* (L.G., Feb., p. 138).

Strike Action After Board Procedure

Consolidated Aviation Fueling and Services Limited, Montreal, and Lodge 869, International Association of Machinists and Aerospace Workers (see above).

Dispute Lapsed

Autobus Yvan Levis Ltée, Chomedey, Que., and Local 903, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L.G., 1965, p. 933).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the administrative services of the Minister of Labour and the Conciliation and Arbitration Branch of the Department.

By the Legislation Branch
Canada Department of Labour

Legal Decisions Affecting Labour

The Manitoba Court of Queen's Bench has ruled that a trade union is a legal entity under the Manitoba Labour Relations Act and under the Common Law

The Alberta Supreme Court has upheld the jurisdiction of provincial courts to review proceedings before the Canada Labour Relations Board

MANITOBA COURT OF QUEEN'S BENCH

On September 16, 1966 Mr. Justice Hall of The Manitoba Court of Queen's Bench dismissed a representative action by union members for accounting for union dues. The Court ruled that unions were legal entities capable of suing and being sued in their own names, both under the Manitoba Labour Relations Act and under the Common Law. Consequently, union members had no status to bring a representative action.

Action for Accounting of Union Dues

Officers of Local 459 of the Amalgamated Clothing Workers of America brought a representative action on their own behalf, and that of all other members of the local, against Utility Glove Company for accounting of union dues. Plaintiffs sought an accounting of money that they alleged the company, in breach of a collective agreement and Section 15(b) of the Manitoba Labour Relations Act, failed to deduct as union dues from wages earned by union workers.

Representative Action Contested

The company objected to representative action and contended that, since the union was a legal entity, the action should have been brought in its own name.

In his reasons for judgment, Mr. Justice Hall referred to Section 46A of the Manitoba Labour Relations Act, which reads:

> 46A. (1) Any employers' organization, trade union, employer, employee, or person who,
>
> (a) does, or authorizes, or aids or abets the doing of anything prohibited under this Act; or (b) fails to do anything required to be done under this Act; or (c) authorizes, or aids or abets in the failure to do anything required to be done under this Act; is liable for general or special damages, or both, to anyone who is injured or suffers damage by the act or failure.
>
> (2) A party to a collective agreement, or any employer, employers' organization, or a trade union, that is bound by a collective agreement, who or which is in breach thereof, is liable for general or special damages, or both, and may be sued by any other party thereto, or person bound thereby, who is injured or suffers damage as a result of the breach.
>
> (3) For the purposes of suing or being sued as permitted under this Act, employers' organizations and trade unions are legal entities capable of suing or being sued.

This section was enacted by the Manitoba Legislature in 1962 but was not proclaimed until 1963.

Counsel for the plaintiffs contended that the union may sue or be sued in representative capacity only, and referred to *Re Walterson and Laundry & Dry Cleaning Workers Union and New Method Launderers Limited;* (L.G. 1955, p. 565).

Counsel for the company stated that there are conflicting authorities as to the legal status of trade unions, and referred to *Re Bakery and Confectionery Workers' International Union of America Local 389, Winnipeg, and Brothers Bakery Limited* (L.G. 1962, p. 955); *and Dusessoy's Supermarkets St. James Limited v. Retail Clerks Union Local 832, et al.* (L.G. 1961, p. 818).

Reference was also made to *International Brotherhood of Teamsters and Henry Therien* (L.G. 1960, p. 276).

Mr. Justice Hall noted that the events giving rise to the litigation at bar occurred in June 1962, but that the action was not commenced until July 1964. Plaintiffs sought a civil remedy for breach by the company of Section 15(b) of the Manitoba Labour Relations Act concerning deduction and payment of union dues. In essence, this was an action for damages for violation of the statutory right. The Section reads as follows:

> 15. Where a party to a collective agreement has given notice under Section 13 to the other party to the agreement, . . .
>
> (b) if a renewal or revision of the agreement or a new collective agreement has not been concluded before the expiry of the term of, or termination of, the agreement, the employer shall not, without consent by or on behalf of the employees affected, decrease rate of wages, or increase rates of wages for the purpose of impairing the bargaining position of a certified bargaining agent or alter any other term or condition of employment in effect immediately prior to the expiry or termination provided for in the agreement, until (i) a renewal or revision of the agreement or a new collective agreement has been concluded; or (ii) a conciliation board or mediator appointed to endeavour to bring about agreement, has reported to the minister and seven days have elapsed after the report has been received by the minister; whichever is earlier, or (iii) the minister has advised the employer that he has decided not to appoint a conciliation board. . . .

Union's Legal Status to Sue

In the opinion of Mr. Justice Hall, the issue at bar was whether the union was a legal entity capable of suing in its own name to recover damages from the defendant company for breach by it of Section 15(b) of the Labour Relations Act. In his view, the union was such an entity, and therefore plaintiffs had no status to bring a representative action.

He stated further that, although Section 46A had no application to the case at bar, Subsection (3) thereof explicitly confirmed, by deliberate re-instatement, the rights and liabilities of employer organizations and trade unions as they then existed under the Act, in light of the reasoning in *Therien's* case.

In other words, according to Mr. Justice Hall, Subsection (3) is declaratory of the law is stated in *Therien* and other cases. He referred to and quoted from the decision of Mr. Justice Monnin in *Contractors Equipment and Supply (1965) Limited v. Building Material Drivers, Warehousemen and Helpers Local 914* (L.G., Apr. 1966, p. 173) the following passage:

> We accept the statement of Locke, J. in the *Therien* case, concurred in by the other members of the Court when he said at page 278: In my opinion, the appellant is a legal entity which may be made liable in name for damages either for breach of a provision of the Labour Relations Act or under the common law.

Representative Action Improper

Mr. Justice Hall dismissed the action on the ground that the union in the case at bar was a legal entity capable of suing in its own name, and that the union members had not status to bring a representative action.

Senkiw et al. v. Utility Glove (1961) Limited 66 CLLC, para. 14, 153.

ALBERTA SUPREME COURT

On July 29, 1966 Mr. Justice Riley of the Supreme Court of Alberta, in *certiorari* proceedings to quash a certification order issued by the Canada Labour Relations Board, held that provincial courts have jurisdiction to make orders in the nature of *certiorari* against the Canada Labour Relations Board which itself has a jurisdiction that extends into all the provinces of Canada; and that, in spite of the privative clause contained in Section 61(2) of the Industrial Relations and Disputes Investigation Act, a Superior Court may review an order of the Board if there has been a breach of the rules of natural justice.

Summary of Facts

On June 3, 1966, the Canada Labour Relations Board certified Amalgamated Transit Union, Division 1374, as the bargaining agent for a unit of employees of Brewster Transport Company Limited. The company applied for an order of *certiorari* to quash the certification order on the grounds that: The Board had no jurisdiction to hear the application for certification or to make a certification order; the Board erred in law in holding that the sightseeing business carried by the company was a connecting undertaking within the meaning of Subsection (b) of Section 53 of the IRDI Act; at the date of the application for certification (January 21, 1966), no part of the company's undertaking extended beyond the limits of the province of Alberta, or constituted an undertaking outside the exclusive legislative authority of the legislature of the Province of Alberta; the Board unlawfully refused to direct a vote to determine the true wishes of the employees; counsel for the company was denied information as to the identity or positions of the employees alleged to be members of the union, and was deprived of an opportunity to argue that one or more of such employees was in a supervisory position and, therefore, not an employee within the meaning of the Act.

On return of the motion, counsel for the union raised some preliminary points.

Jurisdiction of Provincial Courts

One preliminary point to be decided by the Court was whether the Supreme Court of Alberta has jurisdiction to make an order in the nature of *certiorari* against the Canada Labour Relations Board and its Officers.

In answering this question, Mr. Justice Riley noted that, in *Vantel Broadcasting Company v. Canada Labour Relations Board* (L.G. 1963, p. 57), the British Columbia Court of Appeal held that the Supreme Court of British Columbia had jurisdiction to *certiorari* the Canada Labour Relations Board, notwithstanding that it was a creation of the federal Parliament and that all its members resided outside of the jurisdiction.

On that occasion, Mr. Justice Davey stated that the Canada Labour Relations Board exercises its jurisdiction throughout the whole nation. Although the Board may sit in Ottawa, it pays no attention to provincial boundary lines, and operates without regard to them. It would be quite wrong to localize the Board in the province of Ontario, simply because its head office happens to be there, for the purpose of determining which provincial court has jurisdiction over it. Mr. Justice Davey concluded that the Board must be taken to be in the province in which it is exercising some aspect of its jurisdiction, or where its orders operate, and to be subject to the courts of that province.

The judgment of the British Columbia Court of Appeal in the *Vantel Broadcasting* case had been followed in Manitoba in *Federal Elec. Corporation v. International Brotherhood of Electrical, etc. and Canada Labour Relations Board* (L.G. 1964, p. 888) in which the Court stated:

> "Since the Board has jurisdiction in all parts of Canada, and since its orders can be enforced only in the courts of the province or provinces where those orders apply, which is where the parties affected reside or carry on business, it is logical that any attack upon the validity of an order of the Board should be made in the same court or at least in the same jurisdiction which has power to enforce the order, and not in the courts of another province whose only interest in the matter is that the Board's head office is in that province and the Board's meetings are held there.

Considering the case at bar, Mr. Justice Riley held that the respondent is exercising the main aspect of its jurisdiction, and that its order operates in the province of Alberta. The matter arose in this province. The judicial approach in the *Vantel* case consists of logic and common sense, and no considerations of administrative convenience or executive efficiency could impede Alberta subjects in their access to the Alberta courts.

Privative Clause and Review of Board's Proceedings

Mr. Justice Riley noted that Section 61(2) of the IRDI Act provides, in part, as follows: "A decision or order of the Board is final and conclusive and not open to question or review. . . ." In his view, the application to quash the certification order in the proceedings at bar raised the question of the initial jurisdiction of the Canada Labour Relations Board—that is, whether the business of the company in question is a work or undertaking to which the IRDI Act applies, and also whether the Canada Labour Relations Board may have deprived itself of jurisdiction by failing to uphold the rules of natural justice.

After reviewing various authorities, Mr. Justice Riley held that Section 61(2) does not preclude a Superior Court from bringing up and reviewing an order of the Board if there has been a breach of the rules of natural justice.

Other preliminary points decided by Mr. Justice Riley dealt with the applicability of Crown Practice Rules of Alberta to *certiorari* proceeding in civil matters, and with the limitations on admissibility of evidence that was before the Board.

Re Canada Labour Relations Board; Brewster Transport Company Limited v. Amalgamated Transit Union (1966) 57WWR, Part 7, p. 415.

Recent Regulations under Provincial Legislation

Alberta revises first-aid requirements

Quebec issues new safety rules for compressed-air workers

The Alberta Workmen's Compensation Board has revised its regulations respecting the first-aid services and equipment to be provided by employers.

In Quebec, new safety regulations for compressed-air workers have decreased the working periods in compressed air and provided for longer rest periods between shifts.

Other regulations are concerned with apprentices in the refrigeration mechanic trade in Alberta, the training and certification of chefs in Ontario, the qualifications of applicants for engineers' certificates in Alberta, and a new refrigeration code in British Columbia.

ALBERTA

Apprenticeship Act

The Provincial Apprenticeship Board has revised its regulations for the refrigeration mechanic trade. The new regulations were gazetted on December 15 as Alta. Reg. 399/66.

The minimum educational requirement remains Grade 9 or its equivalent, but the Director of Apprenticeship may now accept a person with less education, if he is recommended by a local advisory committee and passes the prescribed examination.

The term of apprenticeship is now four periods of 12 months each, with a minimum of 1,800 hours of employment in each period, including time spent attending prescribed technical courses.

The ratio of apprentices to journeymen remains one to one, with the exception that the Director may now authorize the employment of additional apprentices on the recommendation of the local advisory committee.

The minimum wage payable to an apprentice during the first period of his apprenticeship in the refrigeration mechanic trade is 50 per cent of the prevailing journeyman's rate. During the succeeding periods, the percentages are 60, 75, and 85. In no case may an apprentice be paid less than the applicable minimum wage fixed by the Board of Industrial Relations.

Boilers and Pressure Vessels Act

The regulations under the Alberta Boilers and Pressure Vessels Act governing engineers and firemen were amended with respect to qualifications of applicants for certificates. The new provisions were gazetted as Alta. Reg. 309/66 on September 30.

One change requires that candidates for a first-, second- or third-class engineer's certificate must have at least a "B" standing in the prescribed courses in science, mathematics and English. At the discretion of the Chief Inspector, credit for practical experience in lieu of educational prerequisites may be granted for a limited period.

Workmen's Compensation

New first-aid regulations made by the Alberta Workmen's Compensation Board, which went into force on December 1, laid down more stringent requirements with respect to the first-aid supplies and services to be provided by employers.

The regulations make it quite clear that it is the duty of every employer to provide and maintain the prescribed first-aid supplies and services without charge to the employees. In construction, the prime contractor will be deemed to be the employer of all persons employed at that work place, and will be responsible for ensuring that the required supplies and services are provided and maintained.

If injured at work, every employee, in turn, must avail himself immediately of the first-aid supplies and services provided by his employer.

One of the general rules stipulates that all first-aid supplies and services are to be located in a convenient place close to the working areas, and are to be available during working hours. Signs showing the location of these supplies and services are to be posted in a conspicuous place in the working area.

At every work place where one person is employed, including a truck or automobile, the employer must provide an approved first-aid kit containing the prescribed equipment, dressings, bandages and antiseptics. The regulations also specify the first-aid supplies to be maintained in the kits required for work places with from two to nine employees, and in work places where 10 or more persons are employed. These include a first-aid manual and a first-aid record book.

Unless the Board grants an exemption, there is to be a first-aid room at every work place where 100 or more workmen are employed. This first-aid room, which must be constructed and maintained in accordance with the prescribed standards, is to be under the supervision of a first-aid attendant or nurse. A stretcher, blankets and splints are to be kept at every work place occupied by 15 or more workmen.

After December 1, 1967 the employer must ensure that, in every work place where more than five workmen are employed, and which is more than five transportation miles from a physician or hospital, at least one employee on every shift has the required first-aid qualifications.

The Board may impose additional requirements, or it may approve any reduction or variation in the services, supplies or equipment as it deems necessary.

BRITISH COLUMBIA

Boiler and Pressure-Vessel Act

New regulations under the British Columbia Boiler and Pressure-Vessel Act governing mechanical refrigeration plants to be known as the "Refrigeration Code" were gazetted on December 22 as B. C. Reg. 257/66.

According to the explanatory notes, the new Code was considered necessary because of the rapid growth of refrigeration installations, such as skating rinks and cold-storage plants, and because of its application to the liquefied gas industry. Local contractors had also requested the establishment of such a Code.

In the preparation of this Code, the Department of Public Works was assisted

by a Provisional Advisory Committee consisting of three members of the Refrigeration and Air Conditioning Contractors' Association of British Columbia, and three members of the Refrigeration Workers' Union, Local 516.

The Code is essentially the Canadian Standards Association's Mechanical Refrigeration Code (B.52), with amendments to conform with the Act and the best of local practice. It comprises 22 divisions, with an appendix showing a colour code for piping. It applies to all refrigeration plants with a capacity exceeding three tons.

As well as laying down technical requirements for refrigeration systems, the Code authorizes the establishment of an advisory board; requires the submission of drawings and specifications to the Chief Inspector for registration and approval; provides for the annual licensing of refrigeration contractors; and establishes a permit system for new installations.

The Advisory Board is to be composed of the Chief Inspector, an inspector of Boilers and Pressure Boilers, a registered professional engineer actively engaged in the refrigeration field, three refrigeration contractors recommended by the refrigeration and air-conditioning contractors of British Columbia, and a person with a valid certificate of competency in refrigeration issued under the Apprenticeship and Tradesmen's Qualification Act recommended by an employees' association. Its duties will be to review evidence and make recommendations with respect to the suspension, revocation or cancellation of contractors' licences, and, on request, to assist the chief inspector with appeals.

NEW BRUNSWICK

Stationary Engineers Act

The regulations under the New Brunswick Stationary Engineers Act governing gas burning appliances and equipment were amended with respect to licensing requirements for persons who install or distribute liquefied petroleum gas. The new provisions (Reg. 66-39) were gazetted on December 14.

A new class of certificate has been established—L. P. gas cargo-liner operator—and it is now compulsory for every person who operates an L. P. gas cargo-liner to hold such a certificate, and to have it renewed annually.

NEWFOUNDLAND

In Newfoundland, the Provincial Apprenticeship Board has approved an apprenticeship training plan for the American Smelting and Refining Company, Buchans Unit. Gazetted as Nfld. Reg. 109/66 on December 6, the plan went into force on November 25 and applies throughout the province.

ONTARIO

Apprenticeship and Tradesmen's Qualification Act, 1964

The special regulations for cooks issued in 1964 have been replaced by new regulations for the trade of chef, which were gazetted as O. Reg. 375/66 on December 17.

In the new regulations, the trade of chef is designated as a certified trade, which means that certificates of qualification are now compulsory for persons engaged in this trade. The only exceptions are apprentices and persons who were already employed in the trade at the time of designation.

The rules respecting term of apprenticeship, ratio of apprentices to journeymen, and wages of apprentices are the same as in the previous regulations (L.G. 1965, p. 165).

QUEBEC

Industrial and Commercial Establishments Act

In Quebec, new regulations governing compressed-air workers were gazetted on December 10, replacing regulations originally issued in 1935 and last amended in 1947.

The preamble to the new regulations states that the special safety rules for compressed-air workers had been revised "to keep pace with the latest requirements of medical science and modern technology." In particular, it was deemed expedient to decrease the working periods in compressed air, and to increase the rest periods. It had also become necessary to control the decompression procedure, as had been done in Ontario and the State of New York, and to establish a compression procedure identical to that used in Ontario and France. New safety rules with regard to air supply were also added.

Before commencing work involving the use of compressed air, the employer must, as before, notify the chief inspector of commercial and industrial establishments, submit plans and specifications of the proposed construction and, in addition, must now have his written approval.

The maximum number of working hours in each 24-hour period, the maximum hours in each shift, and the minimum length of each ensuing rest period vary according to the air pressure. They are shown in a table. The rest period allotted for meals must never be less than one half hour, whatever the air pressure.

The pressure in a working chamber may not exceed 50 pounds for more than five minutes, except to ensure the safety of persons during an emergency. In such cases, the prescribed safety measures are to be observed, and the project physician must establish the compression and decompression procedures.

One of the rules relating to compression procedure stipulates that no person may go from his place of work to atmospheric pressure without being decompressed in the intermediate air lock.

The regulations also set out the decompression procedure to be followed. When the maximum pressure is under six pounds, pressure is to be reduced at a rate not exceeding five pounds per minute. When the maximum pressure is six pounds or more, pressure is to be reduced in three stages at the rates prescribed in the regulations. A copy of the table giving decompression periods is to be posted in the air lock, and at the controls outside the air lock.

A person may be decompressed, however, at rates not greater than twice the rates stipulated if:

—he has had previous experience with compressed air hazards;

—he has been subject to air pressure of not more than 30 pounds for a maximum period of one half hour and during that time has not done any manual work; and

—no other person is in the air lock while he is being decompressed.

The records to be kept by every employer must now show hours worked, decompression and rest periods, and all unfavourable symptoms observed or admitted by each employee leaving a compressed air area.

One of the new rules concerning air supply provides that two or more air compressors must be installed, so that, if one unit is not operable, the remaining unit or units will be of sufficient capacity to supply the air required for every working chamber and air lock. For caisson work, there must be at least two supply lines to supply air to each air lock and working chamber.

The compressors supplying the working chamber and air locks must be continually supervised by competent persons designated by the project superintendent. While work is being carried on, they must be checked every 24 hours to see that they are working properly.

The new regulations stipulate that, if a high-pressure air supply is brought into the working chamber to operate a ma-

Decisions of the Umpire

Under the Unemployment Insurance Act

CUB 2618

In his appeal to the Umpire, dated May 12, 1966, the insurance officer summarized the main facts of the case as follows:

On January 25, 1966, the claimant filed his claim for benefit effective January 23. His last employment was as a labourer in forestry operations, from July 5, 1965 to January 11, 1966. He gave "shortage of work" as a reason for separation, and added, "Not available. Unemployed since. Have not been seeking employment." In another declaration he stated: "I am not interested in working between now and May 1966 when work at the [company] commences."

On February 7, the insurance officer disqualified the claimant from benefit from the beginning of his claim, on the ground that he had not proved that he was available for work.

The claimant appealed the decision to a board of referees, submitting that if he stated that he had withdrawn from the labour market on January 25, it was because he had misinterpreted the question, as he had been available for work since January 23. The unanimous decision of the board reads:

> The Board feels that it should not intervene for the following reasons: Availability is a matter of fact. The claimant having categorically stated that he was not interested in working before May 1966, it is obvious that his second statement is valueless, unless he proves that during his period of unemployment he was truly interested in working and made genuine personal efforts to find employment.
>
> For the above reasons the Board of Referees unanimously dismisses the claimant's appeal, and decides that the claimant has failed to prove that he was available from January 23 to February 23, 1966.

The board, however, reduced the disqualification of the claimant to one week —from January 23 to 31, 1966.

The insurance officer's grounds for appeal read:

The Board erred when it reduced the period of disqualification in this case, because . . . the Act . . . clearly specifies that an insured person is disqualified from receiving benefit in respect of every day for which he fails to prove that he was available for work. In accordance with the Umpire's decision in CUB 220, the insurance officer (the Board of Referees as well), before allowing a claim, must satisfy himself that the claimant also meets the requirement of the Act that he prove that he is available for work; and that, when a claimant does not meet this requirement, he is disqualified from receiving benefits, and remains so disqualified until he shows he is available for work.

Having decided that the claimant was not available for work from January 23 to February 23, 1966, the Board of Referees was bound by Section 54(2)(a) of the Act, and should have recognized that the claimant was therefore disqualified from receiving benefits for the entire period, as the Act does not provide for any reduction of this period of disqualification because of the claimant's age, nor any extenuating circumstances.

We submit that the decision of the Board of Referees be reversed and the insurance officer's decision restored.

Considerations and Conclusions

I am in complete agreement with the insurance officer's considerations in . . . the appeal. I therefore decide to allow the insurance officer's appeal.

Unemployment Insurance Report

The Unemployment Insurance Report, which usually precedes the Decisions of the Umpire, has been withdrawn this month, owing to an advance in printing schedule deadlines. Tables E-1, 2, 3 and 4 have been withdrawn for the same reason. Tables and text will re-appear in the April issue.

CUB 2623

The claimant filed an initial application for benefit on February 28, 1966. She reported employment as a switchboard operator, from 1964 to February 22, 1966, at a salary of $68 a week. She gave the following reason for separation:

> I left voluntarily because I was dissatisfied with the hours worked. I worked one week 7:30 a.m. to 12:30 p.m. and the next week 2 p.m. to 9 p.m. I worked 11 straight days before getting Saturday and Sunday off, and then started all over again. Requested a change, but not possible with the employer. Hours were changed in July 1965, when employer moved to a new building; former hours were 8 a.m. to 2 p.m. and 2 p.m. to 9 p.m. No preschool children. Unemployed from 23 February, 1966, seeking work from 28 February 1966. I am capable and available for day work 8 a.m. to 5 p.m.—no night work.

On March 2, 1966, the employer completed the separation form and commented: Resigned.

The personnel services supervisor of the company advised that the only difference in the claimant's hours since they had moved into the new building in July 1965, was the one week she had to start at 7:30 a.m. instead of 8 a.m. The actual hours worked were the same, 38½ hours one week and 32½ hours the next. It was the 7:30 a.m. starting that she did not seem to like.

The insurance officer notified the claimant that she was disqualified, and benefit suspended from February 27 to March 19, 1966, inclusive, because she had voluntarily left her employment with the company on February 22 without just cause.

The insurance officer was of the opinion that no change of contract existed, and that the claimant should have assured herself of other work if she found that the change in working hours was not to her satisfaction. A reduced disqualification of four weeks was imposed, as the hours

worked were slightly less than a full working week.

In an appeal to a board of referees, the claimant stated:

> . . . I wish to enter an appeal in regard to my insurance disqualification. I left the [company] due to the schedule being changed to hours that were impossible to work and maintain my health. I am capable of working, but want hours that would be beneficial to myself and family. I, therefore, feel I should be entitled to my benefits until such time you people obtain me a position or I obtain one myself. I would be pleased to attend a hearing on my behalf at your convenience.

The local office wrote to her suggesting that if her doctor had advised her to leave her employment, it would be in her own interest to submit proof of this. Her reply read:

> . . . I will gladly submit the name of my doctor who you may contact in reference to my health and to the condition of my nerves. My doctor did not advise me to quit my job, but suggested that it would be better if I obtained a position with better hours and less nerve wrecking. I am sure that if you contact [him] he will verify same. I trust this [is] all the information you now require and that I will be receiving some remuneration shortly. I am still available for work and still willing to attend a hearing at your convenience.

The insurance officer reviewed the file but did not consider that a change was warranted in his decision.

The claimant wrote again, saying that when the company moved to its new building, instead of starting work at 8 a.m., she had to start at 7 a.m., not 7:30 a.m. as stated. She said that this had obliged her to rise at 5:30 a.m. and take a taxi to work because there was no bus at a suitable time.

The board's unanimous decision reads as follows:

> . . . The claimant appeared at the hearing. She was accompanied by her husband.
>
> According to her oral evidence, she left her employment as a switchboard operator on February 22, 1966, for the reason that she was dissatisfied with the hours that she was required to work. One week she worked from 7:00 a.m. to 12:30 p.m. and the next week from 2:00 p.m. to 9:00 p.m. Claimant's letter of April 16, 1966 was given consideration as further evidence.
>
> According to the employer's written evidence, the actual hours claimant worked were 38½ hours one week and 32½ hours the following week.
>
> . . . It is the opinion of the board that in view of her occupation as a switchboard operator, the hours she was required to work were not unusual. It is the opinion of the board that the claimant should have assured herself of other work if she found the working hours were not to her satisfaction.
>
> . . . The claimant's appeal is dismissed. The decision of the insurance officer is upheld.

In her notice of appeal to the Umpire, the claimant repeated the explanation about her hours of work. She said that she had tried the new hours for six months and had several times asked her supervisor for a change of position. She repeated her statement about her having to take a taxi to work each morning, because there was no bus. She said that after "working 11 days straight on these hours, my health broke down and I had no other choice but to resign." She had tried to get other employment with the same company, but without avail.

Considerations and Conclusions

The claimant says, in her letter of March 25, 1966, that her doctor did not advise her to quit. Therefore, her contention that her working hours were injurious to her health are not substantiated.

Furthermore, the claimant has adduced no evidence as to why an hourly bus service, which would enable her to arrive at work at 8 a.m., would not also enable her to arrive at work at 7 a.m.

In fact, the only reason the claimant had shown for leaving her job was her own dislike of arising early in the morning. This is a purely personal reason, and the jurisprudence has long established that purely personal reasons do not constitute just cause for leaving a job within the meaning of section 60(1) of the Act.

As a consequence, and after taking into account that the insurance officer imposed a reduced disqualification, I decide to dismiss the claimant's appeal.

Women's Bureau

Continued from page 186

The percentage of women members in all organizations reporting (see first and second tables, page 186) was 15.4 in 1962 and 16.3 in 1963. Labour organizations reporting no women members dropped from 50, or 29.6 per cent of all reporting organizations, in 1962, to 42, or 24.1 per cent of reporting organizations, in 1963, indicating that eight hitherto all-male organizations had acquired women members. The number of organizations with a majority of women members remained unchanged from 1962. Locals reporting women members on their roster increased by 1,153, while the total number of locals increased by only 122.

Gains in numbers and in percentages were evident in every province. In the proportion of women to total membership, Saskatchewan led, with 23.1 per cent. In three provinces, Saskatchewan, Quebec and Alberta, the national average proportion of women in labour organizations was exceeded during both periods. Ontario, however, had the largest total number of women members, 103,626, and also experienced the largest numerical gain.

Nearly half the women workers involved (see third table, page 186) were members of international unions, about a third were in national unions, and one out of six was a member of a government employee organization.

Alberta laws of interest to women

"Laws of Interest to the Women of Alberta" is the subject of a booklet, the first published by the Women's Cultural and Information Bureau of that Province. The booklet is a revision of a similar publication that first appeared in 1962, and it brings up to date developments regarding the franchise, citizenship, property and civil rights, matters relating to marriage, welfare of children, labour welfare and criminal offences.

Copies of this 23-page booklet are available on request from the Women's Cultural and Information Bureau, Legislative Building, Edmonton, Alberta.

Conference to be held on arts of management

The sixth Arts of Management Conference sponsored by the Canadian Federation of Business and Professional Women is to take place from May 7 to 13, 1967 at the Ascot Inn, Toronto.

The annual week-long course, first held in 1962, was inspired by the Henley Administrative Staff College in England and was organized to provide management development training for women students.

Registration is limited to 40. Further information may be obtained from the Arts of Management Conference, 6 Adelaide Street East, Suite 810, Toronto 1, Ontario.

Department of Labour

Continued from page 162

Canada; and a study of the feasibility of extending the surveys of wages, working conditions, labour organizations and collective bargaining into new or expanding areas of employment.

"With regard to new areas of employment, we are particularly anxious to know more about the extent and behaviour of organizations of workers in areas which are not now covered by the survey of labour organizations. We have evidence that there is considerable labour activity in these areas, particularly among professional and technical personnel, and personnel in the newer service sectors such as health, education and entertainment. Because of the rapidly growing importance of these areas of employment, it is important that they be included in our survey activities and that information on their industrial relations be made available on a regular basis."

Current Analysis

Mr. Saunders indicated that the branch carried out statistical studies of wages, working conditions, trade unions and collective agreements, based on the information collected in the various surveys it conducted. He gave as an example the information and analysis provided in the Labour-Management Research Series Bulletins on such subjects as income security, sickness and accident provisions, shift work, and collective agreement provisions in leading manufacturing establishments.

The subjects of these studies were selected for their timeliness and importance at the moment when the investigation was undertaken. For example, the branch was then engaged in studies of supplemental unemployment benefit plans in Canadian industry, industrial pension plans, provisions in collective agreements covering office workers, and collective agreement provisions connected with technological change. These subjects had been given high priority because of the number of requests the branch had received for information regarding them from labour, management, universities and other government agencies.

Plans were being made to conduct a study of private medical plans in Canadian industry, to bring the study of collective agreement provisions in manufacturing up to date, and to survey the new file of trade union constitutions that had been established in the branch as a result of the operation of the Corporations and Labour Unions Returns Act. It was planned to continue the policy of publishing the results of these surveys and studies in the Labour-Management Research Series Bulletins.

The branch also had a small unit working on regular analysis of the labour force, employment and unemployment, and other matters related to these.

Mr. Saunders pointed out also that the branch was responsible for a good deal of analytical work for senior officials of the Department and of other Government agencies; although, because much of this work was concerned with confidential matters, the results of it were not usually published.

Basic Research

The third main function of the branch, which he called basic research, was concerned with the investigation of problems, and with establishing and testing hypotheses, usually with the object of forming a sound basis for the evaluation and revision of policy, the speaker said.

This function had only recently been put on a regular footing, and its development dated from about the middle of the 1950s when the branch had first undertaken extensive research into training and manpower problems.

"About seven years ago the branch established a research section to undertake fundamental inquiries on a regular basis into wage and industrial relations problems. Progress and development of this activity have been hampered by difficulties in recruiting staff who are specially trained for this kind of research. During the past year, however, the branch has had some success in up-grading and expanding this activity.

"Much of the research done in this area of the branch is published through the Department of Labour's publication program, including its recently inaugurated Occasional Paper Series. Officers are also encouraged to make the findings of their research available through seminars, conferences and professional journals."

The speaker then went on to give some examples of projects of this kind that were being carried on by the branch. These included studies of wage determination, collective bargaining and industrial relations, and labour standards.

Wage Determination

Wage determination studies included a number designed to investigate the wage structure and the factors affecting it, the influence of collective bargaining on wage determination, the relation between wages and prices, and the impact of wage movements on the competitive position of Canadian industries producing largely for foreign markets, or especially exposed to foreign competition.

Examples of particular studies given by Mr. Saunders were:

(a) A study of the relationship between wages, costs of production and the international competitive position of a number of individual Canadian industries exposed to export or import competition. The study examines this relationship back to 1953 and includes international wage and cost comparisons.

(b) A study of the structure of collective bargaining and pattern bargaining in Canada. This study involves a description of the structure of collective bargaining in Canada and an industry-by-industry investigation in depth of the factors determining this structure; and an analysis of the extent and nature of pattern bargaining, that is, the inter-relationship of collective bargaining settlements in Canadian industry. The study includes an historical analysis of the structure of collective bargaining back to 1953, with some material and analysis being presented back to World War II.

(c) A study of wage-price relations. This study is a statistical investigation of these relations based on the extensive statistics which are available in Canada on an industry basis, especially wage and price statistics. These statistics are available for a number of years and since they are not available nearly to the same extent in other countries, they provide a unique opportunity for the staff of the branch to make an original contribution to the subject of wage-price relations, a subject which is uppermost in the minds of Canadians today.

Collective Bargaining

These studies were concerned with the way in which collective bargaining was dealing with new problems, and with the role of collective bargaining and the industrial relations system in the attainment of economic and social objectives, the speaker said. The study of the structure of collective bargaining mentioned above would supply some of the fundamental information needed for an understanding of collective bargaining relationships in Canada.

Another study has been begun on the impact of technological change on collective bargaining and industrial relations. The purpose of this study is to find out how technological change is affecting collective bargaining, and how collective bargaining is adjusting itself to problems

arising out of the introduction of new technology.

Information for the study comes mainly from the file of collective agreements kept in the branch. This is supplemented by field work designed to find out how the parties are in practice adapting themselves to new technology.

An experimental field study of the relationship between technological change and industrial relations in a large establishment is nearly finished, and a report should be ready for publication later this year.

An important study then being planned for the summer, Mr. Saunders said, was an investigation of collective bargaining in the construction industry. This study of collective bargaining and collective agreements would go back to the early postwar period. Besides its main purpose, this study would be useful in filling the considerable gaps that existed in the statistical information that had been collected about this important industry.

Another research and informational program was being planned with the object of examining more closely than had been done before the relation between collective bargaining and national economic and social objectives, and with the purpose of finding ways and means of encouraging the development of collective bargaining in such a way that it would make a greater contribution to these goals than it had so far. Extra personnel were being hired by the branch to carry on this work, Mr. Saunders said.

Labour Standards

Since the enactment of the Canada Labour (Standards) Code last July, the branch had extended its research into questions connected with labour standards. Special surveys of wages and working conditions in industries under federal jurisdiction had been undertaken, and the findings then being tabulated would throw some light on the impact of the Labour Code on wages, hours of work and working conditions in the establishments affected.

Broader economic analyses of minimum wages and working conditions standards were also being planned, the speaker said. A study of hours of work was under way, the purpose of which was to examine the relationship between hours of work and output and employment. It included a historical analysis of trends in hours of work, and a comprehensive analysis of the economic and institutional factors affecting hours of work.

A study of the historical development of changes in hours of work back to the beginning of the century was part of this research, and a report should be ready for publication later this year, Mr. Saunders said.

The research program concerning labour standards includes special studies of individual industries under federal jurisdiction. At present, a study of the system of wage payment in the running trades of the Canadian railways is in progress. This study examines the system as it was at the time of the McAdoo Award in 1918 (L.G. 1918, p. 432), and the impact of this award on the system from that time to the present.

"The research program of the branch is carried out under the supervision of research officers working individually or in teams. These officers have access to research, clerical and stenographic assistance, extensive computer and library facilities, and the statistical [facilities] of the branch for . . . conducting special surveys . . . related to the research program. Some of the research studies are being undertaken in co-operation with other agencies such as the Economic Council of Canada for its price reference project, and the Canadian Construction Association for its Centennial Labour Relations Inquiry. Personnel drawn from the universities take part in a number of the studies, either on contract or through the branch's summer research program. These personnel range from undergraduate to full professors, who help us with our research by working on assignments while at their universities or while spending time in the branch during the summer months.

"The professional staff is also involved in research programs with the various international agencies, including the International Labour Organization, the Organization for Economic Co-operation and Development, the United Nations, and the International Monetary Fund. Arrangements for the conduct of this work vary. In the past, much of [it] was done directly in the branch in response to requests for information from the international agencies. Recently, an increasing amount of our international work [has been] done either on a joint basis, involving the participation of various countries in studies sponsored by the agencies, or through the secondment of branch staff to agency headquarters for varying lengths of time to work with agency staff. Work for the international agencies has been increasing in the past several years, and we expect it to continue to increase. We feel this particular activity in the branch to be an important part of our work, since we have much to [gain] from the international exchange of ideas, information and experience."

His survey of the research activities of the Economics and Research Branch did not cover the research work of the whole Department, Mr. Saunders pointed out. Important research studies and surveys to obtain information were carried on from time to time by other branches of the Department. Besides these, there was the Labour Department-University Research Program, sponsored by the Department, through which research was undertaken in universities and elsewhere with the aid of Government grants to individuals and research teams.

In this way, as well as by the summer research program already mentioned, the Department was giving important encouragement to students in labour economics, and was stimulating the interest of Canadian scholars and universities in this subject.

Recent Regulations

Continued from page 195

chine, special devices are to be provided to guard against any possible change in pressure in the working chamber.

Every air lock used for persons must be equipped with a gauge to record the decompression rate. The gauge must readily indicate the variations in air pressure at intervals of at least one minute. Every working chamber is to be equipped with a gauge to record the actual pressure in the working chamber. This pressure gauge is to be installed in a place where it can be readily seen by the lock tender.

While persons are working under compressed air, it is the employer's responsibility to ensure that there is another qualified person available to take over the lock tender's duties in an emergency.

All compressed-air workers are to be given a sufficient supply of hot coffee and sugar at the end of each shift and at meal times. Previously, this applied only to men working in air pressure exceeding 15 pounds.

The requirements with respect to medical examinations for employees who have not previously worked in compressed air are more stringent than formerly. No such worker may be allowed to work unless he has been given a medical examination in a test air lock or in a medical lock. He may not work under any pressure for more than half a day unless he has been re-examined by the physician and found to be physically fit for work in compressed air.

A medical lock meeting the prescribed standards must now be provided by the employer on every project where compressed air work is carried on. Previously, this rule applied only where the maximum pressure exceeded 17 pounds.

Manpower Studies

Part I

A selected bibliography for policy and research

This bibliography has been compiled from recent literature on manpower and manpower mobility. It was prepared by Mrs. Barbara Alexandrin and Dr. A. N. Polianski for the Manpower Mobility Unit of the Department of Manpower and Immigration. The compilers have acknowledged with thanks the co-operation of the Canada Department of Labour Library, but remind readers that the Library does not have all the books and items listed. The bibliography will replace in this and the next two issues the regular list of publications recently received in the Department of Labour Library.

The bibliography that follows is designed as a reference for manpower officers working on various aspects of pilot projects. It is largely oriented toward labour force policy decisions on manpower and its allocation. With allocation as a subsidiary topic, the selection concentrates on manpower mobility and its relation to other variables, such as wage differentials. Some coverage of education and training has been included, together with material on statistics and some major occupational studies.

The topics are listed in order of relative importance. References were drawn mainly from North American economic and sociological sources as being the most relevant to Canadian experience; and the period surveyed covers the years 1945 to 1965. However, literature on other countries has not been overlooked; for example, work done by the International Labour Office has been included.

The bibliography is divided into sections, arranged in the following order: books; articles from periodicals (labour force —forecasting and analysis; mobility, migration and job satisfaction); papers and proceedings; government publications; and finally unpublished theses and dissertations. The emphasis is placed on articles in professional journals rather than on books, since they provide more pertinent reference material. Articles typically tend to deal with a specific aspect of a topic, to the near-exclusion of broader issues, whereas books, on the whole, take a broader approach. Moreover, as a rule, books are more readily accessible than articles. For the same reason, unpublished dissertations have also been included—a fruitful field of information all too frequently inaccessible to the would-be user who is unaware of their existence.

*Revised. †Preliminary.

‡Includes post office wages and salaries. **Figures in this column are for total labour income, Canada, but are not totals of the figures in the remaining columns of this table, as figures for labour income in Agriculture, Fishing and Trapping are not shown.

NOTE: Monthly figures may not add to annual totals because of rounding. SOURCE: *Estimates of Labour Income*, DBS.

Tables C-1, C-2, and C-4 are based on reports from employers having 20 or more employees in any month of the year; at July 1966, employers in the principal non-agricultural industries reported a total employment of 3,618,737. Tables C-3 gives estimates of total employment, by industry divisions, for the provinces and Canada, derived from the survey of establishments employing 20 or more persons and from a sample survey of establishments employing less than 20 persons. Tables C-5 to C-7 are based on reports from a somewhat smaller number of firms than Tables C-1, C-2 and C-4. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1, C-2 and C-4 relate to salaried employees as well as to all wage-earners in the reporting firms.

D—Manpower Division

Statistics presented in the following tables relate to registrations for employment and vacancies received from employers at Canada Manpower Centres (formerly NES offices). These data are derived from reports prepared in the Department of Manpower and Immigration, and processed in the Unemployment Insurance, Pensions and Manpower Section, Dominion Bureau of Statistics. Data are not comparable with previously published reports. See Technical Note, Page 80, January issue.

E—Unemployment Insurance

Unemployment insurance statistics emanate from the operations of the Unemployment Insurance Act, and relate to persons in contact with the Unemployment Insurance Commission, either as contributors or claimants. The data are compiled in the Unemployment Insurance and Pensions Section, Labour Division, DBS, from information supplied by the UIC. The source for Tables E-1 to E-4 is *The Statistical Report on the Operation of the Unemployment Insurance Act.* For further information regarding the nature of the data see Technical Note below.

TABLES E-1, 2, 3 and 4—These tables have been withdrawn this month, owing to an advance in printing schedule deadlines. They will re-appear in the April issue.

Technical Note to "E" Tables

Under the Unemployment Insurance Act, contact between the claimant and the Unemployment Insurance Commission is achieved by means of a network of local offices. Tables E-2 to E-4 relate to local office operations, though Table E-3 includes data on regional office processing.

Upon separation from employment, a person wishing to file a claim for benefit applies either in person or by mail to the nearest local office of the Commission. The claim will be either an "initial" or a "renewal" depending upon whether or not it is necessary to compute benefit rights. On an initial claim, the claimant's benefit entitlement is calculated, and this will be available for compensation of spells of proved unemployment during a period of one year,* unless used up prior to that time. When a claimant misses two successive scheduled reporting dates and subsequently files a claim, a renewal claim will serve to re-activate the claim, provided that there is still benefit available.

The total of initial and renewal claims (Table E-3) thus approximates the number of recorded separations from employment during a month. However, to the extent that an initial claim is taken from a person who has just exhausted benefit and seeks re-establishment of credits, the total would constitute an overstatement of the new cases of recorded unemployment. Claims in the category "entitled to benefit" include initial claims on which the contribution requirements were fulfilled and no disqualification was imposed, and renewal claims allowed, with no disqualification. Claims "not entitled to benefit" consist of failures on initial claims due to insufficient contributions, and in addition, disqualifications imposed on either initial or renewal claims. Claims not completely processed at the end of the month are shown as "pending."

Claimants are required to report every two weeks by mail to the local office. Information on the number of claimants currently reporting to local offices is obtained by a count of individual unemployment registers in the currently active file at the month-end (Table E-2). Once a claim is taken, the document on which the record of activity is maintained (the unemployment register) is placed in the active file, and it becomes dormant only after the scheduled reporting pattern has been broken twice in succession or the claimant finds work. The count of weeks on claim represents the number of weeks of proved unemployment since the most recent separation from employment. When a new unemployment register is prepared, because the previous claim has terminated and a new entitlement has been computed, the number of weeks is calculated from the date of actual separation from employment. Information on the number of weeks on claim is based on examination of a 20-per-cent sample of unemployment registers.

Payment data are provided by Treasury Offices of the Unemployment Insurance Commission and relate to transactions during a month. In some cases, the compensated unemployment would have occurred in a prior month. Data cover partial as well as complete weeks.

Estimates of the insured population (Table E-1) are based on an estimate of persons either working in insured employment or on claim at June 1 each year. Monthly estimates of insured employment are projected from the June 1 figure, using employment indexes, for individual industry divisions as published in "Employment and Average Weekly Wages and Salaries" (Employment Section, Labour Division, DBS). The number of claimants recorded at the month-end, as described above, is added to provide the total estimate.

*When the "Training Allowance Act—1966" becomes operative, the benefit period may be as long as three years.

TABLE F-1—This table has been withdrawn this month, owing to an advance in printing schedule deadlines. It will re-appear in the April issue.

G—Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Canada Department of Labour on the basis of reports from the Manpower Division, Department of Manpower and Immigration. The first three tables in this section cover strikes and lockouts that amount to ten or more man-days. The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the union directly involved in the disputes leading to the work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For further notes on the series, see p. 109, February issue.

TABLE G-1—Strikes and Lockouts, 1961-66

Month or Year	Strikes and Lockouts Beginning During Month or Year	Strikes and Lockouts in Existence During Month or Year

Canada Department of Labour Publications

Annual Report of the Department of Labour (Covers fiscal year ending March 31). (English or French). Cat. No. L1-1966.

Report of the Industrial Inquiry Commission on Canadian National Railways "Run-Throughs." Report of Hon. Mr. Justice Samuel Freedman, Commissioner. (English or French). Price $1.50, Cat. No. L35-965/1.

Supplements to Labour Gazette

Collective Bargaining Review. Prepared by the Collective Bargaining Section, Labour-Management Division, Economics and Research Branch, Canada Department of Labour. Obtainable from the Canada Department of Labour. Free to LABOUR GAZETTE subscribers.

Reports of Boards of Conciliation established under the Industrial Relations and Disputes Investigation Act together with reasons for judgment of the Canada Labour Relations Board. Obtainable from the Canada Department of Labour. Free to LABOUR GAZETTE subscribers.

Economics and Research Branch

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). Price 50 cents, Cat. No. L2-2/1966.

Industrial and Geographical Distribution of Union Membership in Canada, 1966 (English or French). Price 15 cents, Cat. No. L31-765.

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. Price 35 cents, Cat. No. L2-1/1965.

Wage Rates, Salaries and Hours of Labour, 1965. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance of service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. First year service including attractive binder with index tabs and paper-bound volume, $9.50; service without indexed binder, $7.00; individual tables, 15 cents. Paper-bound volume, $2.50. (Bilingual). Cat. No. L2-548.

Working Conditions in Canadian Industry, 1965. Price 75 cents, Cat. No. L2-15/1965.

Répertoire de termes et expressions utilisés en relations industrielles et dans des domaines connexes. A catalogue, in French, of terms currently in use in the labour relations field. Prepared by the Economics and Research Branch. Price $4.50, Cat. No. L31-967F.

Labour-Management Research Series

Shiftwork and Shift Differentials in Canadian Manufacturing Industries. Price 35 cents, Cat. No. L2-22/2.

Vacations with Pay, 1951-61: An Examination of Vacation Practices in Canadian Industries (English or French). Price 35 cents, Cat. No. L2-22/4.

Collective Agreement Provisions in Major Manufacturing Establishments, 1964. Price 35 cents, Cat. No. L2-22/5.

CORRESPONDENCE—Address letters dealing with editorial matters to the Editor, those dealing with subscriptions to the Circulation Manager. SUBSCRIPTIONS—Canada: $3 per year, single copies 50 cents each; all other countries: $5 per year, single copies 50 cents each. Send remittance by cheque or post office money order, payable to the Receiver General of Canada, to The Queen's Printer, c/o Superintendent of Government Publications, Ottawa. All subscriptions payable in advance. SPECIAL GROUP SUBSCRIPTION OFFER—Five or more annual subscriptions, $1.50 per subscription (Canada only). Send remittance, payable to the Receiver General of Canada, to the Circulation Manager. BOUND VOLUMES—$5 per copy delivered in Canada, $7 per copy to other countries. CHANGE OF ADDRESS—Attach previous address label.

The Department Today

George G. Blackburn appointed Director of Fair Employment Practices Branch

George G. Blackburn was appointed the first Director of the new Fair Employment Practices Branch of the Canada Department of Labour in February. For

George Blackburn

the past 22 years, he had served as Director of the Public Relations and Information Services Branch.

In his new position, Mr. Blackburn will be responsible for the promotion and enforcement of the Canada Fair Employment Practices Act, which prohibits discrimination in hiring practices based on race, colour, creed or national origin, in all areas of work within federal government jurisdiction. His duties will include the organizing of nation-wide educational and promotional programs designed to overcome all forms of prejudice and discrimination in employment. He will have similar responsibilities with regard to the Female Employees Equal Pay Act, which requires that women be given the same rates of pay as men for doing the same work.

Born in Wales, Ont., Mr. Blackburn was educated in Ottawa, and he was on the editorial staff of the *Ottawa Journal* prior to World War II. During the war, he served in Northwestern Europe with the Fourth Field Artillery Regiment, was promoted to the rank of Captain, and won the Military Cross.

Mr. Blackburn joined the Department of Labour in 1945, and he became Director of Information two years later. Since then he has played a leading role in developing a number of government programs including the national publicity campaign to combat winter unemployment — "Why Wait for Spring? Do it Now."

He originated and developed a national education campaign to reduce discrimination against older workers seeking employment, prepared the first consolidated examination of this problem in Canada at the request of the Canadian Manpower Council, and was for some years Chairman of the Government Interdepartmental Committee on Older Workers. He also developed extensive national publicity campaigns to assist the rehabilitation of the disabled and to widen the employment horizon for the physically handicapped.

Mr. Blackburn also devised educational material to further racial and religious tolerance; and in recent years he mounted an intensive publicity campaign, in cooperation with provincial educational authorities, to reduce the dropout rate from schools. For more than 10 years he produced "Canada at Work," a national weekly radio series that carried labour and employment matters over a network of some 80 stations. He has served on several interdepartmental and other senior advisory committees, and he has represented Canada abroad at many international meetings in the labour and manpower field.

While he was Director of Public Relations and Information Services, Mr. Blackburn wrote scripts for a number of award-winning educational films including: "Date of Birth"; "Everybody's Handicapped" (winner of a Canadian Film Award and a U.S. Golden Reels Award); "You Can Go A Long Way" (winner of a Canadian Film Award); "Call it Rehabilitation"; "Why Wait For Spring?"; and "Wayne and Shuster Look At Technical Training in Canada."

Mr. Blackburn has also acted as technical adviser to the National Film Board in the preparation of a number of other films on labour matters and industrial safety.

New Director appointed to head Public Relations and Information Services Branch

David R. Monk, 46, was appointed Director of the Public Relations and Information Services Branch of the Canada Department of Labour in February. The Branch was formerly known as the Information and Labour Gazette Branch.

In this position, Mr. Monk will be responsible for publicizing the objectives and activities of the Department, and for administering its Information Services program.

He will also keep in close touch with important developments taking place throughout the country of special interest to the Department of Labour.

Prior to his appointment, Mr. Monk was Director of the Information and Technical Services Branch of the Department of Forestry and Rural Development. In that position he was responsible for all matters connected with the Department's external communications in the fields of public relations, public education and information.

Mr. Monk was born in Victoria, B.C. During World War II, he served with the Royal Canadian Corps of Signals. In 1961, he received his Diploma in Public

David R. Monk

Administration from the University of British Columbia.

Before coming to Ottawa, Mr. Monk was with the British Columbia Forest Service of the Department of Lands and Forests, and ultimately served as its Director of Public Information and Education.

50 Years Ago

Coal miners in Alberta and British Columbia struck for a 25-per-cent war bonus and received $1.75 a week

The U.S. Supreme Court upheld the Adamson Eight-Hour Law for railway employees

Labour troubles in the Crow's Nest Pass and Alberta coal fields received some attention in the LABOUR GAZETTE of April 1917. It was recalled that disputes in District 18 of the United Mine Workers had been frequent. "Serious disturbances occurred in 1906, 1907 and 1909; and in 1911 there was a strike of eight months' duration (L.G. 1961, p. 781), which was settled by an agreement between the operators and the UMW of A. This agreement was to be effective until April 1, 1915, provision being made for alterations and renewal from that time for a further period of two years."

A renewal had been negotiated that was to run until March 31, 1917; but in June 1916, the miners had asked for a war bonus of 10 per cent of their wages in consideration of the increase in the cost of living. Negotiations resulted in a supplementary agreement, signed on August 4, 1916 giving wage increases of about 7½ per cent. But on November 11, the miners had asked the Western Coal Operators' Association for a further increase of 25 per cent, effective November 1. Alternatively, they asked for a committee to be set up to investigate the cost of living and recommend a war bonus proportionate to the increase in the cost of living.

When no agreement was reached, the miners went on strike for a few days in November, but work was resumed when the Minister of Labour arranged that a special investigation into the cost of living should be made by an officer of the Department. On January 16, 1917 the miners went on strike again, demanding the 25 per cent bonus or an increase based on the increase in the cost of living shown in the report on the special investigation.

"The strike was settled January 29 through the intervention of the Minister of Labour, who instructed the operators to pay the employees a war bonus of $1.75 a week as from November 15, 1916 to April 1, 1917 when it was expected the new agreement would be negotiated. . . ."

As a result of complaints by railway employees' organizations, the Board of Railway Commissioners toward the end of March issued a judgment on the question of the length of freight trains, in response to an application for an order defining the maximum length of trains on railways subject to the jurisdiction of the Board.

"The judgment emphasizes the burden which the war has placed on the transportation facilities of the country and the necessity of obtaining the highest possible efficiency from the rolling stock, and concludes 'under the existing conditions, the Board is not justified in directing a revision of the length of freight trains.' It is stated, however, that with a return to more normal conditions after the war, the question will be considered on its merits."

The United States Supreme Court in March sustained the constitutionality of the Adamson Eight-Hour Law for railway employees. The American railways had attacked the Act as unconstitutional (L.G., Jan., p. 4), and the LABOUR GAZETTE said that the decision of the Court "finally settles the dispute between the railways of the United States and their trainmen, numbering in all about 400,000. . . .

"At one time it seemed that [a] strike would go into effect on account of the tardiness of the Supreme Court in deciding on the argument. On March 12, when no decision was rendered, the chiefs of the brotherhoods of railway trainmen decided to strike on March 17. This decision brought intervention from Washington, and the brotherhood chiefs agreed to postpone the strike until March 19, in order to give the Supreme Court one more of its regular decision days for the Adamson Act.

"It was announced that if the decision should be favourable, the strike would be called off, but that if it should be unfavourable, or if there should be no decision, the strike would be put into effect. On the morning of the 19th, the railway managers agreed that the terms of the Adamson Law — 10 hours pay for eight hours work — should be accepted regardless of the decision of the Supreme Court, the committee of managers being probably influenced by the news of the sinking of three American ships by German submarines.

"While this agreement did not give the men their demand of time-and-a-half for overtime, which had been recognized in the Adamson law, it provided that the basis of settlement should be in accordance with the terms of the Act if it were found to be constitutional. The necessary changes will, therefore, have to be made in the agreement in view of the decision of the Supreme Court."

Prices and wages were still rising rapidly in April. "In retail prices, the cost of a list of staple foods for a family of five rose to $10.70, as compared with $10.46 for February and $8.36 for March last year. . . . In wholesale prices, the Department's index number stood at 220.6, as compared with 217.3 for February and 176.4 for March 1916." In March 1914, it had been 137.0.

Examples of wage increases included "substantial increases" for carpenters, boilermakers, blacksmiths, patternmakers, moulders and labourers employed by Yarrows Limited, Victoria and Machinery Depot and Navy Yards, Esquimalt. Working hours were at the same time reduced from 48 to 44 a week, except for ship carpenters and shipyard labourers, who already had a 44-hour week. A hundred and twenty-five plasterers in Hamilton had their wages increased from 50 to 55 cents an hour; and plumbers, gas fitters and steam fitters in the same place got an advance that brought their rate to 47½ cents an hour. In the transportation industry, 500 employees of transport companies in Toronto had their wages increased from $59 to $63 a month.

NEWS BRIEFS

Labour unrest discussed at McGill University seminar

Organized labour's extreme restlessness arises "in part because of its internal growing pains, but in equally large part because of its inability to establish reciprocal relationships . . . with its management counterpart at various levels," in the opinion of Prof. C. R. Brookbank of the Institute of Public Affairs, Dalhousie University.

In a paper prepared for a special evening research seminar held recently at McGill University, Prof. Brookbank dealt with "Causes and Issues in Current Labour Unrest."

"Are unions abusing their power, particularly where the strike is concerned? No. But they are sometimes unintentionally misusing their power because the strike is often dysfunctional as a solution to the new levels and complexities of problems, as in the case of essential services like transportation," the speaker said. "Is the collective bargaining process, as we have known it for many years, out of date? No. It is not out of date within the frame of reference for which it was initially developed; but it is inadequate for new labour-management frames of reference that require development at different levels."

He thought that, "for a variety of reasons, none of which is lack of concern on their part," union leaders were losing contact with their members, mainly because of lack of communication between them and the members.

"Will government become the new power figure in labour relations in the public interest? If present conditions continue, government at various levels will — directly or by allotment of power to judicial bodies — have no alternative to acceptance of a directive rather than regulatory role in labour relations," Prof. Brookbank said.

He raised the question whether our present labour legislation was outmoded. "No," he said, "but it is inadequate. How will this erratic and undisciplined behaviour affect the economy? The behaviour on all sides is confused and ineffective rather than erratic and undisciplined, but it will have an adverse effect on the economy unless more orderly relationships emerge from the confusion."

The speaker appeared to think that, in dealing with organized labour, management had failed to "organize" itself for that purpose. He said that organized labour was in "a better position to cope with the complexities of growth and change than is 'unorganized' management," and that "whereas organized labour has expanded its scope and structure, employers have not really felt it necessary to extend their organization in dealing with unions. Traditional management organizations such as the Canadian Manufacturers' Association and the Canadian Chamber of Commerce have maintained and perhaps extended their activities, but not specifically in the area of labour-management relations."

Newfoundland ends strike with decertification threat

Legislation enacted by the government of Newfoundland in January gave 125 striking employees of the Central Newfoundland Hospital at Grand Falls the choice of returning to their jobs within 72 hours, or having their union, the Canadian Union of Public Employees, decertified throughout the province. The employees chose to return to their jobs.

To back up demands for higher pay, the Grand Falls hospital employees walked out on January 24, some 155 hours after the government had invoked Section 39A of the Labour Relations Act — in effect declaring that a state of emergency existed at the hospital.

In a counter-move, the . . . created a new Act named, "An Act Respecting Hospitals" and "An Act Further to Amend the Labour Relations Act," to replace Section 39A of the old Act.

Maximum penalty under the old Act for the walkout of the hospital employees was a fine of $1,000 against the union involved. The new Act outlaws strikes against hospitals in Newfoundland and provides for:

—fines of from $1,000 to $4,000 for unions striking against hospitals, $100 to $500 for officers of the union, and $10 for anyone breaking the Act;

—mandatory decertification of the offending union; and

—a waiting period of one year following decertification, before the union can apply for recertification.

Engaged in the strike that provoked the new legislation were nursing assistants, orderlies, maids, and kitchen and laundry workers — all of whom wanted the government to take action on wage recommendations of a conciliation board.

The Central Newfoundland Hospital Corporation, which administers the Grand Falls hospital and other hospitals on the island province, agreed with the conciliation board report — as did CUPE, which represented the striking employees. But the Corporation pointed out, that owing to lack of funds, it could not grant the recommended increases on its own. The corporation manages hospitals with funds from a budget approved by the provincial Department of Health, plus some minor income from other sources. The total is described as insufficient to cover the estimated $80,000 a year that it would cost to meet the new increases.

At a meeting convened after the hospital employees returned to work, executive members of local, national and international unions that belong to or are affiliated with the Newfoundland Federation of Labour and the Grand Falls and District Trades and Labour Council assured the hospital employees that they will fight indefinitely to have the new legislation removed from the statute books of Newfoundland.

Federal minimum wage increased in U.S.

Effective February 1, 1967, the federal minimum wage in the United States was increased to $1.40 an hour from a previous minimum of $1.25 an hour established in 1963. The amendment to the Fair Labor Standards Act affected over 32 million employees and nearly 2 million companies.

At the same time, the law was extended to include 8 million more workers, who now have a minimum wage of $1.00 an hour. The newly covered workers included those in some laundry and dry-cleaning business, construction, hospitals, nursing homes and schools, hotels, motels and restaurants. Some farm workers, on large farm operations, were included for the first time, provided that certain qualifications were met.

Congress enacted the amendment concerning increases in the minimum wage last fall. The present outline for wage increases in firms under federal jurisdiction called for a minimum of $1.60 an hour by February 1, 1968 for all those previously covered and an equal wage level, through five yearly increases, by February 1, 1971, for those newly covered by the Act.

Most workers covered by the Act already earn more than the new minimum wage level. Therefore, the legislation forced pay increases for only 4.6 million workers this year, and about 100,000 workers next year.

Pros and cons of injunctions debated by B.C. labour and management

Representations favouring and opposing the use of injunctions in labour disputes were made at a conference of labour and management representatives held under the sponsorship of the British Columbia Federation of Labour on January 7 and 8 in Vancouver.

Don Lanskail, Forest Industrial Relations Limited, said that labour wants injunctions abolished as part of a move toward uprooting the present collective bargaining system, and as a means of providing labour with more power. He charged that labour wants the injunction abolished so that it can gain the right to compel workers, through organizational or mystery picketing, to join a union and to force an employer to capitulate in the face of massive picketing in a legal dispute.

Labour's anti-injunction campaign, Mr. Lanskail asserted, is a form of camouflage that is hiding the real issues confronting labour and management. "The campaign," he said, "is designed to bring about a massive tilt of the present bargaining balance between labour and management, and would give labour a weapon against which there would be no effective defence.

"The present balance of bargaining power does not disclose any need for massive changes. Labour has all the power it needs to advance the interests of the Canadian worker. . . ."

Mr. Lanskail expressed the belief that injunctions support rather than hinder the free system of collective bargaining, and he stated that if the real issues were put before the public at large, they would overwhelmingly support continuation of the system.

Ray Haynes, secretary of the British Columbia Federation of Labour, told the conference that there would be no industrial peace in British Columbia until such time as unions are accepted as an integral part of society, and that the first step in that direction would be for all concerned to listen to labour's arguments against injunctions.

An injunction banning picketing, Mr. Haynes noted, has never helped to bring any strike or lockout to a conclusion — at least, not a negotiated conclusion. "At best," he said, "all an injunction does is prolong a dispute. Injunctions were intended to maintain the status quo. The results are the opposite in labour disputes." They result in defeats for the unions, the firing of workers, and the smashing of unions.

Mr. Haynes was particularly critical of the *ex parte* injunction, arguing that it places undue pressure on court judges to make quick decisions on complaints of one party without any rebuttal from the other in a dispute.

"When a judge is asked to make a decision granting an injunction," said Mr. Haynes, "he is actually being asked to decide victory or defeat on issues of social import on the terms of legal procedures and outdated precedents."

Tom Berger, a labour lawyer and a member of the British Columbia Legislative Assembly, charged that B.C. labour legislation has curtailed personal freedom. He believes that injunctions should be applied in some cases, but that the *ex parte* injunction should be removed from labour disputes.

"The first few days of a labour dispute are usually critical," said Mr. Berger. "The conduct of some employers bears testimony to this. After receiving an injunction, it is rare for them to take a case any further. . . . With an *ex parte* injunction, the employer has what he wants without having to prove his case."

A plea for the early establishment of a new labour relations board that would sort out labour problems, was entered by Mr. Berger.

B. W. F. McLoughlin, a representative of the legal profession, pointed out that the courts have bent over backwards to exercise care in the use of injunctions, and he expressed the opinion that neither management nor labour is lily-white in the injunction issue.

"Some unions," said Mr. McLoughlin, "will cheerfully ignore the law; be ready to accept whatever penalties result, in the hope of gaining some economic advantage in the bargaining.

"Some employers do the same. To deal with these irresponsible persons on both sides, the injunction, and often the *ex parte* injunction, must be available. . . ."

Jack A. Moore, director of Western Canadian Regional Council No. 1, International Woodworkers of America (AFL-CIO/CLC), told the conference, "If we can come to an understanding, we can maybe exert enough influence on the Government to enact legislation to drive labour relations in this province into the Twentieth Century."

At the present time, he said, "we are trying to cope with 20th century problems with Nineteenth Century mechanisms, and injunctions are a 19th century mechanism. As long as we run to the courts to get our chestnuts taken out of the fire, we will never have the kind of industrial peace we need to continue progress in this nation."

Government employment in Britain

The British Ministry of Labour's employment services are provided through a country-wide network of about 1,000 offices that act as employment exchanges; and a pamphlet, "Government Employment and Training Services in Britain," dated October 1966, prepared for British Information Services, Canada, describes briefly the nature of the services provided.

"The primary function of the employment exchanges is to introduce, free of charge and without obligation, suitable persons seeking employment to employers requiring employees, thus providing an efficient service to employers and jobseekers, and meeting the needs of the national economy," the booklet says.

The services are dealt with under the main headings: placement and counselling, youth employment service, disablement resettlement service, mobility of labour, employment of workers from overseas, and industrial training.

Bill C-231, "to define and implement a national transportation policy for Canada, to amend the Railway Act and other acts," etc., (L.G., Oct. 1966, p. 561), was given third reading on January 27 (*Hansard* 12364), and received the Royal Assent on February 9 (p. 12855).

The establishment of a Royal Commission on the status of women, with Mrs. John Bird as chairman, was announced by the Prime Minister on February 3 (p. 12613). The Commission was to "report on the status of women in Canada and to recommend what steps might be taken by the federal Government to ensure their equality with men in all aspects of Canadian society.

"Effective March 1, Central Mortgage and Housing Corporation will accept applications from merchant builders for loans to be made in the period April 1 to May 31 inclusive, without a pre-sale requirement," the Minister of Labour announced in the House on January 30 (p. 12381). He said that the program would be similar to the recent annual fall direct-lending arrangements that had been used to encourage winter construction and stabilize employment during the winter months.

Briefs to the Government

Canadian Labour Congress

In its annual brief to the Government, the Canadian Labour Congress referred to the "series of industrial disputes," that had occurred in the period between presentation of the 1966 and the 1967 briefs, and suggested that the reaction to the disputes "in Parliament and other quarters has led us to believe that there is still widespread ignorance of the nature of trade unions, and considerable prejudice against them."

The Congress wondered why a state of shock was evident in certain quarters at the suggestion that trade unionists should seek substantial wage increases at a time when they accept with equanimity "the higher than average salary increases business executives have granted to themselves," and the record profits shown by Canadian corporations during the period. Surprise was also expressed by the Congress over the fact that those who "ought to know better" were outraged that trade unionists should use strikes in order to achieve wage gains.

The CLC lamented that the present government "has seen fit to use the coercive powers of the state to force striking workers back to work on one occasion, and to use the threat of such powers in a number of others. . . . We believe very strongly that it is no solution to industrial disputes for your government to restrict or deny to workers the right to withdraw their labour, and to compel them to work against their will. That is a formula familiar to every authoritarian government the world over, but one that is inconceivable here."

Government's "Task Force"

Reference was made in the brief to the Government's appointment of the "Task Force" to study labour relations legislation. This drew the complaint from the Congress that there was no member of labour or management included in the makeup of the group, and the suggestion that "rather than a change in legislation, the need is for a more genuine acceptance of trade unions and the role they play in a free society."

The Congress declared that "it is natural and inevitable that trade unions should exploit their advantage of relatively good times in order to obtain higher wages. If they failed to do so, they could hardly justify their continued existence. Yet, this very legitimate function is being disputed and denied. There apparently is no proper time when trade unions should seek wage increases."

Both the Government and the people of Canada "must face up to the inevitable fact that the trade unions will continue to press for wage increases, and that they will engage in strike action, if necessary, in order to achieve their objectives."

Referring to the Government's responsibility to public interest and international trade relations, the CLC stated that the Government also has "a role to play in the development of mature labour relations in Canada," and that doing that properly "may enable you to carry out your other responsibilities more successfully."

Canada's Economy

The brief described the economy of Canada as being "in a very precarious state," and went on to state the CLC's belief that, "in the absence of corrective economic measures, there is every likelihood that our nation's birthday (referring to Centennial Year) will be marred by an increase in the level of unemployment, and possibly by a trend toward the sluggish rates of growth and high levels of unemployment that plagued the economy from 1957 to 1962."

To support its claim, the Congress suggested that there is evidence of a slowing of the growth of the gross national product, a dramatic decline in the number of new housing starts, and forecasts of a decline in investment.

On an optimistic note, however, the Congress pointed out that "we are confident that the levelling off in . . . rate of economic growth forecast for 1967 need not necessarily be the harbinger of a prolonged recession in the Canadian economy, provided that the appropriate expansionary policies are enacted soon enough."

Appropriate expansionary policies, the CLC submitted, would be a critical evaluation of the level of construction expenditures, elimination of the 11 per cent tax on building materials, immediate action towards expansion of social security programs, and easing of monetary restrictions.

Labour Board Representation

A firm stand was indicated by the Congress in its brief "against any reduction in its representation on the Canada Labour Relations Board, and against interference with national collective bargaining units."

Referring to attempts allegedly being made by the Confederation of National Trade Unions to change the makeup of the Board, the CLC stated: "We do not propose to accede to any change in the composition of the Board which would reduce the number of Congress nominees and add to that of the Confederation.

"We say this secure in the knowledge that we are indisputably the major trade union centre, not only in Canada as a whole, but in the province of Quebec as well. The Congress alone has members in every part of Canada. We do not propose to subordinate ourselves to a minor organization, merely to satisfy the aspirations of its leaders."

Acceptance of the CNTU's alleged efforts to change bargaining relationships would mean "a disintegration of national collective bargaining relationships, and their transformation into a system alien to this country." The Congress concluded with the assertion that "we have no intention of submitting to any move in this direction."

The Congress expressed the belief that the Government's decision to abandon

Continued on page 256

Canadian Railway Labour

Executives' Association

In their annual brief to the federal Government, February 9, the Canadian Railway Labour Executives' Association expressed disappointment that the Government had not accepted the Freedman recommendations (L.G., Jan.-Feb. 1966, p. 4). "We are aware that you have appointed a 'task force' to examine Industrial Relations," the brief said. "In all sincerity, we look upon this action as a postponement of the necessity of taking a decision. All the praise that was directed towards Mr. Justice Freedman and his report are meaningless in view of the decision to establish the 'task force'."

The brief, read by J. A. Huneault, Vice-president, Brotherhood of Maintenance of Way Employees, pointed out that since 1963 the railway unions had made repeated representation to the Government concerning the inadequacy of the Industrial Relations and Disputes Investigation Act. They were becoming increasingly alarmed at the gap in the Act that made it possible for management to unilaterally impose changes in working conditions during the life of a collective agreement.

"Our fears were justified, as evidenced by the legislation last September that brought an end to the legal strike of railway employees before an agreement was reached." The brief further argued that compulsory arbitration would be "unjustifiable discrimination against labour in a democratic society," and would not bring an end to strikes, but would make them just illegal. Final and binding arbitration negates the purpose of collective bargaining, the brief said, and represents a retrograde step in industrial relations in Canada.

The brief expressed approval of the principle of Bill C-231. "We have consistently advocated the need for a national transportation policy in Canada." The Association reminded the Prime Minister that on December 2, 1966, it had written to him and to all members of Parliament about the lack of responsibility for railway employees who could suffer the adverse consequences of the legislation.

The Association pointed out that although Bill C-120, which preceded the present bill, did not provide for an amendment to Section 182 of the Railway Act, it did consider remunerating railway employees for any financial loss caused by change of residence. "We expressed the view to the Standing Committee in a letter dated March 15, 1965 that the amendment fell pitifully short of our request and indeed of (their) own recommendation."

The Association's brief also recommended:

—that the Government provide, through Bill C-231, for an amendment to Section 182 of the Railway Act to ensure the rights of railway employees in case of abandonment, merger between railways, closing of terminals, introduction of run-throughs and other changes;

—that the compensatory provisions of the Canadian National-Canadian Pacific Act be incorporated into the Railway Act, to provide compensation as a criterion to be used by the Transport Commission;

—that in view of the possibility of joint operating rights, a provision be written into Bill C-231 that would guarantee the right of employees to negotiate for a fair and reasonable share of employment opportunities.

The brief asked also that the Government:

—incorporate into the Canada Labour (Safety) Code the standards set out in the present Sanitary Code;

—increase the basic exemptions provided for by the Estate Tax Act to $100,000;

—afford greater income tax relief to persons in the lower income brackets;

—increase the yearly grants to the Railway Grade Crossing Fund;

—permit legal lotteries for allocation to social services by amending the Criminal Code;

—follow a policy of maintaining Seaway user charges at a level that will meet current and future operating costs, and provide for needed expansion and modernization of the Seaway system.

In addition to Prime Minister Lester B. Pearson, the Government was represented at the hearing by Hon. John R. Nicholson, Minister of Labour, Hon. Allan J. MacEachen, Minister of National Health and Welfare, Hon. Arthur Laing, Minister of Indian Affairs and Northern Development, Hon. Jean Marchand, Minister of Manpower and Immigration, Hon. J. W. Pickersgill, Minister of Transport, Hon. C. M. Drury, Minister of Industry and Minister of Defence Production, Hon. John J. Connolly, Minister without Portfolio, Hon. Walter L. Gordon, and Mr. Bryce Mackasey, Parliamentary Secretary to the Minister of Labour.

The Government's Reply

In replying to the submission by the Canadian Railway Labour Executives' Association, the Minister of Labour refuted the suggestion that "the Government paid lip service to the Freedman Report." He acknowledged the Association's concern with certain inadequacies in the Industrial Relations and Disputes Investigation Act and in the new working conditions induced by technological change in the railway industry.

He said that the Freedman Report recommended voluntary agreement between labour and management groups "wherever possible" to discuss changes in working conditions. He remarked that it was encouraging to observe the number of negotiations and conciliation board proceedings initiated during the six months following the tabling of the Freedman Report.

Mr. Nicholson reminded the Association that the Brotherhood of Railroad Trainmen had a firm commitment from management that no run-throughs would be introduced without prior discussion

Collective Agreements in Manufacturing

Vacation and Holiday Provisions

A study of 25 main types of provisions contained in collective agreements covering bargaining units of 1,000 or more employees in all Canadian industries except construction and railway transport was published in two parts in the October and November 1966 issues of the LABOUR GAZETTE (p. 564 and 640).

The first part of that study showed that of the total number of 188 agreements covering 505,400 employees, 94 agreements covering 249,120 employees were in manufacturing industry. A second study dealing separately with manufacturing only, based on the same survey as the previous general study, has now been completed, and the findings will be analysed in this and in the May issue of the GAZETTE.

As in Part I of the previous study, the agreement provisions examined in this issue will be those dealing with paid vacations and paid holidays. Tables on these provisions are included, as well as two other tables showing the scope of the study by province and by month of expiry of agreement.

In the May issue, the subjects covered will be compensation for work on paid holidays, shift premiums, call-in pay guarantees, pay for union officials for time spent on grievance work or in the negotiation of collective agreements, and paid bereavement leave. A number of miscellaneous provisions will also be examined.

The findings of this survey are set out in the accompanying tables and in those that will be published in the next issue of the LABOUR GAZETTE.

The agreements used in the survey are the same as those used in the previous study, "Collective Agreements in Industry," (L.G., Oct. 1966, p. 564 and L.G., Nov. 1966, p. 640), except that only those in the manufacturing industrial group were included.

The study was made by Ross Charlton, Barry Maloney, and Daniel Stace of the Economics and Research Branch of the Department, under the supervision of Felix Quinet, Chief, Collective Bargaining Division.

In a few cases where the language used in the agreements left some doubt as to its meaning, the provisions could only be classified subject to the proviso that they may be open to other interpretations as well.

Among the main findings concerning the provisions dealt with in the present issue were the following:

—of the 94 agreements covering 249,120 employees, only one affecting 1,990 employees failed to mention a provision for paid vacation of more than one week; and all but three, covering 5,310 employees, provided for a two-week vacation after various lengths of service;

—all but seven of the 94 agreements provided for a three-week vacation; and all but 19, covering 47,160 workers, provided for a paid vacation of four weeks;

—a five-week vacation was provided for in only 15 of the 94 agreements;

—some form of "extended" vacation, such as "supplementary vacations," or "pre-retirement vacations," was provided for in 12 agreements covering 13 per cent of the employees;

—in all the agreements, there was provision for paid holidays, four days a year being the minimum number and 13 days the maximum; eight days was the commonest number;

—71 of the agreements covering 71 per cent of the employees applied to bargaining units in Ontario and Quebec, numbering 38 and 33 in each province respectively.

Adjustment to Change

The Economic Council of Canada has recommended a broad program of labour-management co-operation for the solution of unemployment problems arising from technological changes in industry

The importance of encouraging technological improvement, and at the same time the need to prevent the hardships it causes to individuals from falling too heavily on those directly affected, is emphasized in *A Declaration on Manpower Adjustments to Technological and Other Change*, recently issued by the Economic Council of Canada.

Appended to the declaration, besides the names of the chairman and vice-chairman, are the names, occupations and official designations of all the members of the Council, among which are representatives of business concerns, trade unions, farmers' organizations, two universities, and a consumers' organization.

"History shows that in the long run technological development increases employment, incomes and living standards. It creates new jobs and new occupations through new processes and new products. It offers the possibility of shorter working hours with more leisure time and easier work," the Council says in pointing out the benefits of technological improvement.

Keeping Pace

It also refers to the particular importance of keeping pace with technological developments in the case of a country like Canada, with its open economy and its heavy dependence on exports. "If we fall behind technologically, the Canadian economy will suffer; we will be unable to maintain our competitive position and achieve full employment and strong economic growth."

The main concern of the declaration, however, is to suggest ways and means by which those employees who are displaced by technological change can be found, or helped to find, other satisfactory jobs. The Council recommends "a range of adjustment methods and procedures which have been successfully tested in many situations involving change." These recommendations set out the part that should be played by government, labour and management, the need for manpower planning, and describe certain "Agreed Methods of Adjustment to Change."

"A basic role of government is to contribute through appropriate policies to a high level of over-all demand in the economy. This is necessary if we are to achieve full employment. Without these conditions, it would be difficult if not virtually impossible . . . for labour and management to effectively assist employees displaced by technological and other innovations. . . ."

But even under conditions of full employment, displaced manpower cannot be sure of finding alternative employment without help, and it is there that labour and management have important responsibilities. The measures that should be taken by them include counselling, training and retraining of the employees affected, and their transfer to other jobs within or without the plant. These measures require the co-operation of labour and management, and in this regard, joint labour-management committees functioning throughout the year are recommended.

Manpower Planning

In putting into effect measures of manpower adjustment, the importance of manpower planning well in advance of expected changes is emphasized. The success of these measures is largely dependent upon it, and such planning might be among the functions of a joint labour-management committee, the declaration suggests.

"Some believe that discussions or negotiations between the parties should not be limited to the consequences of change, but should also concern change itself. However, this question of negotiating change does not come within the framework of this declaration. . . ."

Methods of Adjustment

Among the "agreed methods of adjustment to change", the Council places advance notice of change first. Such notice should be given as early as possible—three months being the minimum if the changes are "of material significance" — and it should explain the expected effects on manpower. "Advance notice, to be effective as an initial step prior to the selection of actual programs of adjustment, must be given to the local union or unions, to the joint labour-management committee, where it exists, and to the employees affected. Only then can the adjustment process be arranged through the co-ordinated efforts of the employer and the union or unions. When the adjustment to change requires the use of public programs, advance notice should also be given to such public authorities as required. . . ."

Taking advantage of attrition of the labour force is one of the most valuable ways of minimizing the effect of displacements. Instead of hiring new employees to take the place of those who have left, persons who face layoff may be put into the vacant places. Normal attrition may be hastened in some cases by the device of early retirement of those who, for

health or other reasons, find it difficult to continue working until normal retirement age.

One way of making use of advance manpower planning is "the use of transfers within the same firm to prevent loss of employment due to technological or other change." In some cases, retraining may be needed to enable such transfers to be made. "Where the departmental seniority system is a serious hindrance to transfers, labour and management should seek a change to a form of plant-wide seniority. . . .

"In the case of multi-plant companies, the problem of transfer may be alleviated by inter-plant mobility. Inter-plant transfers can, however, become complicated when different unions represent workers in different plants, and where one union holds separate contracts for different plants. . . . There must be a high degree of co-operation among different unions and between unions and management, in order to modify the seniority structure and thus permit the necessary degree of flexibility."

Training and Retraining

The most difficult problem in training or retraining is that many workers lack the necessary basic education and technical training. In spite of the expansion of training programs in recent years, especially by the government, the opportunities provided are not being sufficiently exploited, the Council said. Too many workers, unions, and managements do not know of, or do not know how to take advantage of, the facilities that exist for setting up training programs in industry.

Portability of Pension Rights

"There is a vital need to increase pension portability in order to increase the potential mobility of workers in an age when technological and other change is making mobility more important than ever before. . . . Vesting of pension rights . . . tends to make the pension structure more flexible, thus increasing the potential mobility of a worker. . . ."

Financial Measures

In cases where separation from the firm cannot be avoided, financial measures to ease such a separation are needed. These may take the form of severance pay, supplementary unemployment benefits or mobility allowances.

"If severance pay is to be a useful adjustment device, it must be reasonably substantial, and there should be effective counselling on its use. . . . Supplementary unemployment benefits . . . can serve as a useful device in aiding workers who may be unemployed for long periods before recall. In recent months, a governmental mobility allowances program has been in operation. . . . Labour and management have a responsibility to see that workers are fully informed on how to get such assistance. . . ."

Co-ordination of Measures

Improved placement facilities, training and retraining programs, and mobility assistance programs give federal and provincial governments the means to support and complement the adjustment measures that are within the scope of labour and management, but "co-ordination of all these activities is essential."

"The increasing availability of, and improvements in public labour market programs through the new Canada Manpower Division of the federal Department of Manpower and Immigration, and provincial programs, should considerably reduce adjustment burdens on the private parties." But the declaration said that, to ensure that adjustment problems are not dealt with in piecemeal fashion, governments, labour and management must act in concert in order that public and private measures may be used together in the most suitable way.

Labour Unions, Collective Bargaining And Inflation

"There is little evidence supporting the view that collective bargaining in Canada is an initiator of inflation," said Dr. George Saunders, Director of the Labour department's Economics and Research Branch (L.G., Dec. 1966, p. 708), in an address to the Thirteenth Annual Congress of the Commerce Students of Quebec, in December. He told the Congress that recent collective bargaining experience seemed to indicate that, in periods of rising economic activity, collective bargaining had the effect of holding down wages.

In his address, Dr. Saunders discussed the role of collective bargaining in the development of inflation. He noted that collective bargaining applied to only a limited part of the Canadian labour force, unlike many European countries where the whole work force is unionized, and collective bargaining is highly centralized. In Canada, three quarters of the labour force is not unionized, and it has its wages and working conditions settled outside of collective bargaining.

"In recent years, wages and salaries in these non-union sectors have been rising at a faster rate than in union sectors." Dr. Saunders explained this relative behaviour in terms of supply and demand factors. The services of unskilled and semi-skilled workers, most of whom are union members subject to collective bargaining, are in relative abundance, whereas the services of professional and technical workers, who are largely unorganized, are in great demand.

Dr. Saunders noted that the union sector of the Canadian economy is a key one because it involves manufacturing, forestry, mining, building construction, utilities and transportation. "If collective bargaining is successful in pushing up costs in this sector . . . these costs would be reflected in the prices of the variety of products [of] Canadian industry."

Dr. Saunders noted further that the so-called inflationary wage settlements occurred in sectors where competitive forces are weak, such as air, rail, truck and water transportation firms, which enjoy monopolistic or oligopolistic market positions. He suggested that much of what was negotiated was simply a "catching up" to current standards. "The tough bargaining and strikes that have accompanied many of the large settlements of the past year, therefore, may reflect not so much the size of the settlements, but rather their timing. In any event, the increasing rate of wages we are now observing is neither a unique phenomenon restricted to the collective bargaining sector nor to this period of business activity."

Dr. Saunders emphasized the importance of market forces in influencing wages. He found it difficult to accept the notion that collective bargaining played a role that was significantly greater than the role played by other factors of the inflationary process in the Canadian setting. "We may find a high correlation between the extent of collective bargaining and wage behaviour, but this may be because unionism tends to be concentrated in highly productive, high-wage-paying industries. There are numerous examples of highly organized industries, such as clothing and textiles, in which wages are low compared with those of other equally well organized industries, such as automobiles and steel."

Unity in the Construction Industry

Peter D. Dalton Named CCA President

Peter D. Dalton

—Photo by Ashley and Crippen

The Canadian Construction Association, at its annual meeting in Toronto, elected Peter D. Dalton, President of Dalton Engineering and Construction Co. Ltd., as its president for 1967.

Mr. Dalton is past President of the Ontario General Construction Association and of the Toronto Construction Association. He is also the employers' delegate to the National Technical and Vocational Training Advisory Council.

He graduated from McGill University in 1928 with a degree in Engineering. In 1940, he founded the Dalton Engineering and Construction Co. Ltd. Mr. Dalton succeeds Armand Trottier, President of Philippe Trottier, Inc., who is now the Immediate Past President of the CCA.

The need to achieve greater unity among construction associations was one of the principal topics discussed at the 49th annual meeting of the Canadian Construction Association held in Toronto, January 20 to 25. "If employees can go and get a union certified to represent them, why shouldn't contractors be able to go and get an association to represent them? It might equalize bargaining power on the two sides of the bargaining table," said Dr. John Crispo, Director of the Centre for Industrial Relations at the University of Toronto, in a progress report on the "Canadian Inquiry on Construction Labour Relations," which was commissioned as a Centennial Project by the CCA.

The report consists of 14 topics concerning several aspects of the construction industry and its labour relations. Many of the individual topics included in the report are centred on the whole question of the bargaining process in the construction industry.

Dr. Crispo charged that one of the major problems facing the construction industry was the lack of solidarity among associations in settling union disputes. The Associations in most localities are practically powerless, he said. He cited the example of the recent strikes in the meatpacking industry to show how firms were making separate settlements with unions in order to take advantage of competitors' difficulties.

Other reports on this topic will include a study on Labour Relations Acts in this country, under the direction of Dr. A. W. R. Carrothers, Dean of the Faculty of Law of the University of Western Ontario; a study of technological changes in industry, prepared by the National Research Council; and a study of the building trade unions' problem of jurisdictional disputes. Dr. Crispo told the group that Abbé G. Dion, Faculty of Social Sciences of Laval University, who is a fellow-member of the federal Task Force on Labour Relations, "is looking at the causes and consequences of jurisdictional disputes, at various approaches that can be taken to try to minimize these disputes and, where they break out, to try to deal with them."

Dr. Crispo went on to discuss a study being made on manpower forecasting supervised by K. V. Pankhurst, Department of Manpower and Immigration. "They are going to be looking at the need for a manpower forecast, which is pretty obvious if you are worried about training and filling needs in the future."

He also outlined some of the problems and factors that complicate labour relations in the construction industry. Craft fragmentation among the trades, whereby each trade does a relatively minor piece of the total work, is one of these factors. He cited a lack of job security as one of the major environmental problems.

The problem of attitudes on both sides was also discussed by Dr. Crispo. "[Among employees], there is really no loyalty toward the individual firm." Contractors make deals with unions, he said, but cannot make deals with fellow contractors, because of either lack of trust or fear of the combines investigation branch (Investigation and Research, Combines Branch, Department of the Registrar General).

Presidential Address

In his presidential address, Armand Trottier discussed construction unity, Association unity and Canadian unity. "The CCA personifies construction unity at the national level for the firms in our membership representing on a widespread basis the various major aspects of the construction industry — and all on an equal basis. It is also a good example of Association unity, for its membership includes nearly one hundred associations. And it is a good example of Canadian unity, for this membership is built up from all of our ten provinces, and has agreed to policies and programs on a nation-wide basis."

A panel addressed the general session of the CCA on the subject of "Construction Prospects, 1967-1970." Dr. J. J. Deutsch, chairman of the Economic Council of Canada, told the delegates that the construction industry has been an industry of particular interest to the Council. "There are very few countries in the world where the construction industry is as important as it is in Canada. In Canada, we are great users of capital, and capital expansion investment plays a very large role in our development."

Dr. Deutsch went on to say that in 1963 he projected a need to increase the volume

Continued on page 240

Working Conditions in Canadian Industry, 1965

The scope of the annual survey was extended to include employees of federal and provincial governments, hospitals and water transport

Health benefit plans cover 86 per cent of non-office, and 93 per cent of office workers

A large majority of the employees in establishments included in the May 1965 survey of working conditions conducted by the Economics and Research Branch of the federal Department of Labour were covered by some type of health benefit plan. Plans of this kind applied to 86 per cent of the non-office employees and 93 per cent of the office workers.

In the following analysis, the percent coverage of health benefit plans refers to the number of persons employed by establishments reporting the plan as a percentage of the total number of employees covered by the survey. This is not necessarily the same as the number of employees that actually participate in such plans — in some cases an establishment may have a plan of the kind, but some of the employees may not be covered by it.

The survey conducted by the Department in May each year is the most extensive review of working conditions in Canada: the report on the 1965 survey is based on information obtained from nearly 21,000 returns from employers with a total of 2,928,985 employees on May 1 of that year—only a little short of 40 per cent of the labour force.

This total was made up of 1,976,551 non-office, and 952,434 office employees. Comparable figures for the 1964 report were a total of 2,341,647 employees, comprising 1,622,929 non-office, and 718,718 office workers.

The total number of employees covered in 1965 was thus 587,338 greater than the number covered in the 1964 survey. This increase was accounted for mainly by the inclusion in 1965, for the first time, of employees of federal and provincial governments, hospitals, water transportation and service incidental to water transportation. Before 1965, the only government employees covered were those of municipal public works departments.

The main non-agricultural industries still not included in the survey are forestry, construction, and education.

NON-OFFICE EMPLOYEES

Health benefit plans, the survey showed, covered 86 per cent of the 1,976,551 non-office employees in 20,592 reporting units. Major medical services only were provided by plans covering 20 per cent of the employees. Plans providing specified basic benefits only covered 36 per cent of the workers, and 30 per cent came under plans that provided a combination of major medical and specified benefits.

The main types of benefits provided, and the percentage of employees covered by each were: surgical and obstetrical, 84; physician's care in hospital, 82; physician's home and office calls, 73; special duty nursing care in hospital, 32; diagnostic, X-ray and laboratory services, 76; and prescribed drugs, 34.

Sixty-four per cent of the plans were financed by employer and employees jointly, 14 per cent by the employer only, and 8 per cent by the employees only. In plans covering 83 per cent of the employees, both the employees and their dependants were covered.

By Province

British Columbia led in the proportion of non-office employees covered by health benefit plans, with 94 per cent of the 183,343 employees in the 2,085 units that reported.

The lowest percentage of employees covered were: Saskatchewan, 33 per cent (this province has a government health plan); Prince Edward Island, 60; Newfoundland, 65; and Nova Scotia, 75 per cent. In other provinces, the percentage covered ranged from 83 to 89.

By Industry

In manufacturing, 91 per cent of the 922,557 employees covered by the survey came under health benefit plans. In some industries including natural gas, rubber footwear, tires and tubes, aircraft and parts, railway and rolling stock equipment, and railway transport, the coverage was complete.

Industries with the smallest proportion of employees covered were: coal mining, 25 per cent; clothing, 57 per cent; services incidental to water transportation, 59 per cent; laundries and dry cleaning, 58 per cent; investment and loan, 51 per cent; and restaurants, 48 per cent.

OFFICE EMPLOYEES

Of the 952,434 office employees in 18,949 reporting units included in the sur-

---

"Working Conditions in Canadian Industry, 1965, prepared by the Economics and Research Branch of the Department of Labour, has just been issued. This report gives the most recent available information on such working conditions as: hours of work, frequency of pay days, reporting pay, minimum call-out pay, statutory holidays, vacations with pay, health benefit plans, number of employees covered by collective agreements, uniforms, and club and association membership fees.

The report is in two parts, the first one covering non-office, and the second office employees. Both parts are presented on a geographical and an industrial basis. The information on each item of working conditions is first given for the industrial composite for Canada and for each province, and then separately for each of the industrial groups into which the survey is divided.

The information contained in the report was obtained from the Department's annual survey of working conditions conducted at May 1, 1965, based on almost 21,000 reports from employers with a total of 2,928,985 employees.

The bilingual report, price 75 cents, may be obtained from the Queen's Printer, (Catalogue No. L2-15/1965).

vey, 93 per cent were covered by health benefit plans. Major medical service only was provided in plans covering 21 per cent of the employees in the survey, and the same percentage of the employees came within the scope of plans providing specified basic benefits only. Plans in which a combination of major medical and specified basic benefits were given covered 51 per cent of the employees.

The particular types of benefits provided, and the percentages of employees covered by each type were: surgical and obstetrical, 93; physician's care in hospital, 91; physician's home and office calls, 86; special duty nursing care in hospital, 61; diagnostic, X-ray and laboratory service, 86; and prescribed drugs, 62.

Seventy-one per cent of the plans were paid for by the employer and the employees jointly, 11 per cent by the employer only, and 11 per cent by the employees only. Both the employees and their dependants were covered in plans that included 92 per cent of the employees in the survey.

By Province

As with the non-office workers, British Columbia had the highest proportion of employees in the survey covered by health benefit plans, namely 98 per cent. In several other provinces, however, the coverage was almost as high, New Brunswick and Alberta having 97 per cent and Quebec 96 per cent.

The lowest percentage covered was again in Saskatchewan, namely 46 per cent. In all other provinces the percentage was above 90, except in Newfoundland, with 88, and Prince Edward Island, with 81 per cent.

Health Benefit Plans in Canadian Industry, 1965

	Non-Office Employees	*Office Employees*
	No.	No.
Survey coverage	1,976,551	952,434
	%	%
Have health benefit plan	86	93
Types of plans		
Major medical provisions only	20	21
Specified basic benefits only	36	21
Combination of major medical and specified benefits	30	51
Types of benefits		
Surgical and obstetrical	84	93
Physician's care in hospital	82	91
Physician's home and office calls	73	86
Special duty nursing care in hospital	32	61
Diagnostic, X-ray and laboratory services, etc.	76	86
Prescribed drugs	34	62
Plans provide benefits for employees and dependents	83	92
Plans financed by		
Employer and employees jointly	64	71
Employer only	14	11
Employees only	8	11

Percentages shown are proportions of the number of employees covered by survey.

By Industry

The proportion of employees covered by health benefit plans of some kind was above 90 per cent in the great majority of industries, and it was 100 per cent in natural gas, rubber products, rubber footwear, tires and tubes, synthetic and silk textiles, primary iron and steel, aircraft and parts, railway and rolling stock equipment, railway transport, and banks.

Coverage was lowest in: coal mining, 22 per cent; clothing, 71 per cent; hospitals, 75 per cent; hotels, 73 per cent; restaurants, 56 per cent; and laundries and dry cleaning, 65 per cent.

Engineers' questions start course in cybernation

The effects of the machine age on man are being studied at San José State College, San José, Calif. The course, Cybernation and Man, evolved from questions asked by senior engineering students over a period of several years.

Some of these questions are: What are the relationships between automation and unemployment, automation and education? What bearing does the computer have on career planning? What of the population explosion and its effects on both advanced and emerging nations? Is there a manpower shortage or surplus on the horizon? Is a policy of "full employment" realistic? Why credit the "man-hour" for increased productivity when the machine plays the determining role?

Do we have a technological problem because of the depletion of our physical natural resources? More mundanely — what approaches can we take to solve the increasing problems of traffic congestion, air and water pollution? What can we do to effect a more reasonable dissemination of our proliferating information?

What will be the role of individual and collective man in a technological world? If not needed for gainful work, what is his purpose? And what is he to do with the time available to him?

There are no simple solutions to the questions asked, the college said, and no single textbook to offer authority on the many questions still unanswered. The course is planned to encompass classroom instruction and demonstration, field trips to cybernated and automated establishments, and lectures by faculty members and guest speakers. Small group discussion seminars are also an important part of the course.

First offered during the 1965 spring semester, the course was taken by 40 upper division and graduate students from 12 different majors. The college reported that because the students have evaluated the pilot study as one of the most significant courses of their college career, it will now become a regular offering.

Employment Fatalities in Canada

The Canada Department of Labour has received reports on 217 employment fatalities that occurred in Canada during the fourth quarter of 1966. During the previous quarter, 354 fatalities were recorded. This is 77 more than the previously published total of 277 (L.G., Jan. 1967, p. 22). In the fourth quarter of last year, 341 fatalities were recorded — 56 more than the preliminary figure of 285 (L.G., Apr. 1966, p. 163).

During the quarter under review, there were two multi-fatality accidents that brought death to 15 workmen. An explosion and fire, which devastated Polystyrene Chemical Plant, Ville LaSalle, Que. in October, left 11 employees dead. Four bush workers drowned in the Madawaska River near Renfrew, Ont. in November.

Three industry divisions accounted for 68.2 per cent of the total number of fatalities.* These were: construction, 24.9; transportation, 23.5; and manufacturing, 19.8 per cent. The remaining 31.8 per cent were distributed in other industry divisions in this order: mining, 8.8; forestry, 7.8; trade, 4.6; service 4.1; agriculture, 3.7; fishing, 1.8; and finance and public administration, 0.5 per cent each.

The 25-44 age group accounted for 52.5 per cent of the total number of fatalities. The remaining 47.5 per cent were distributed in other age groups as follows: 45-66, 28.1; 20-24, 12.0; over-65, 5.5; and 14-19, 1.9 per cent.

Two occupation divisions accounted for 59.4 per cent of the total number of fatalities. These were: craftsmen, production process and related workers, 42.4; and transport and communication workers, 17.0. The remaining 40.6 per cent were distributed in other occupation divisions in the following order: labourers, unskilled workers (not-agricultural, logging, fishing, or mining), 8.8; loggers and related workers, and miners, quarrymen and related workers, 6.5 each; managerial, and service and recreation occupations workers, 4.1 each; farmers and related workers, 3.7; professional and technical occupations workers, 2.3; fishermen, trappers and hunters, 1.8; clerical, and sales occupations workers, 1.4 each.

Three accident-type categories accounted for 63.6 per cent of the total number of fatalities. These were: struck by different objects, 22.6; falls and slips, 21.6; and collisions and derailments, 19.4. The remaining 36.4 per cent were distributed in other accident-type categories as follows: caught in, on or between, 12.4; conflagrations, temperature extremes and explosions, 10.6; over-exertions, 4.6; inhalations, absorptions, and industrial diseases, 3.7; electric current, 2.8; miscellaneous accidents, 1.8; and striking against or stepping on objects, 0.5 per cent.

A cross-section analysis of the greatest concentration of fatalities reveals that the 25-44 age group accounted for 59.3 per cent of the total number of fatalities that occurred in construction, 62.7 per cent in transportation, and 53.5 per cent in manufacturing industries. A similar cross-section examination of these industries to pinpoint the main concentration of fatalities by occupation shows that craftsmen, production process and related workers accounted for 70.4 per cent of the total number of fatalities that occurred in construction, and 76.7 per cent in manufacturing. Transport and communication workers accounted for 56.9 per cent of the total number of fatalities that occurred in transportation industries.

An analysis of cross-classifications of industry divisions by main accident-type categories reveals that 61.2 per cent of the fatalities in the category of being struck (by such objects as automobiles and trucks, falling trees and limbs, landslides and cave-ins, tractors and loadmobiles, trains and other railway vehicles) occurred in mining, manufacturing and transportation (20.4 per cent each). Of the 59.6 per cent of fatalities in the category of falls and slips (from scaffolds, stagings, buildings, roofs, towers, ladders and stairs, for example, and to different levels, such as into rivers, lakes, seas, harbours, holds of vessels, tanks, vats and kilns) 38.3 per cent occurred in construction, and 21.3 per cent in transportation.

Similarly, of the 73.8 per cent of fatalities in the category of collisions, derailments and wrecks (that involved automobiles and trucks, railway trains, tractors and loadmobiles, aircraft, or other transportation agencies) 21.4 per cent occurred in construction, and 52.4 per cent in transportation. Further, of the 77.8 per cent of fatalities in the category caught in, on or between (that involved tractors and loadmobiles, automobiles and trucks, hoisting and conveying apparatus, buildings and structures, trains and other railway vehicles) 22.2 per cent occurred in

---

The employment fatalities covered in this review involved persons gainfully employed, and occurred during the course of, or arose out of their employment, and included deaths resulting from industrial diseases.

Statistics on employment fatalities are compiled by the Economics and Research Branch from reports received from the provincial Workmen's Compensation Boards and certain other official sources. Newspaper reports are used to supplement these. For industries not covered by workmen's compensation legislation, newspaper reports are the Department's only source of information. It is possible, therefore, that coverage in such industries as agriculture, fishing and trapping, and certain of the service groups is not as complete as it is in industries covered by workmen's compensation legislation. Similarly, a small number of traffic accidents that are in fact industrial may be omitted from the Department's records because of lack of information in press reports.

The number of fatalities that occurred during the period under review is usually greater than indicated in the article and tables. Fatalities that were not reported in time for inclusion, however, are recorded in supplementary lists, and statistics are revised accordingly in the next annual review.

*See Table H-1, p. 287.

agriculture; 18.5 in manufacturing; and 37.0 in construction.

Finally, 69.6 per cent of fatalities in the category of conflagrations, temperature extremes and explosions (such as explosions of chemicals, conflagrations, blasting accidents, explosions of liquid air, gas pressure apparatus, and containers—gasoline or oil) occurred in manufacturing.

Fatalities in proportion to employment by sex and age groups, occupation and industry are shown in Table H-2, p. 288.

The 25-44, 45-64, and over-65 age groups, which comprised 32.2, 21.9, and 2.3 per cent of the men, and 11.9, 8.3, and 0.6 of the women among the total number of workers employed, accounted for 52.0, 27.6, and 5.0 per cent of the total number of fatalities for men, and 0.5 per cent for women in each of these groups. The 14-19 and 20-24 age groups, which comprised 4.9 and 8.2 per cent of the men among the total workers employed, accounted for 1.9 and 12.0 per cent of the total number of fatalities. Women comprised 4.2 and 5.5 per cent of the total workers employed in these age groups, but no fatalities for women were recorded.

A rough analytical summary of the occupation divisions in the same table shows that men in the primary industry occupations, and white-collar and service occupations, who comprised 8.2 and 28.9 per cent of the total number of workers employed, accounted for 18.0 and 12.3 per cent of the total number of fatalities. Women in the same occupations comprised 0.7 and 25.0 per cent of the total number of workers employed, and were involved in 0.5 and 1.0 per cent of the total number of fatalities.

In the manual occupations, comprising 37.2 per cent of the total number of workers employed, of which 32.4 per cent were men and 4.8 per cent were women, men accounted for 68.2 per cent of the total number of fatalities, and there were no fatalities recorded for women. A conclusive analysis of this table shows that men, who comprised 69.5 per cent and women 30.5 per cent of the total number of workers employed, were involved in 98.5 and 1.5 per cent of the total number of fatalities.

The fatality statistics by industry, in proportion to employment series, illustrate the order of a diminishing risk of being killed at work. The fourth quarter of 1966 review for men points to this sequence: forestry, fishing, mining, construction, transportation, manufacturing, agriculture, service, trade, finance, public administration. With the present composition of the labour force, the risk for women is negligible.

Insurance Registrations And Other UIC Statistics

On November 30, insurance books or contribution cards had been issued to 5,101,176 employees who had made contributions to the Unemployment Insurance Fund since April 1.

On the same date, registered employers numbered 346,625, an increase of 365 since October 31.

Enforcement Statistics

During November, 10,504 investigations were conducted by enforcement officers across Canada. Of these, 7,559 were spot checks of claims to verify the fulfilment of statutory conditions, and 875 were miscellaneous investigations. The remaining 2,070 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 369 cases, 155 against employers and 214 against claimants.*

Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 773.*

Unemployment Insurance Fund

Revenue received by the Unemployment Insurance Fund in November totalled $38,302,808.55 compared with $35,908,298.83 in October and $35,003,504.38 in November 1965.

Benefits paid in November totalled $14,286,899.89 compared with $12,336,003.05 in October and $12,614,802.05 in November 1965.

The balance of the Fund on November 30 was $273,478,606.49. On October 31, it was $249,462,697.83; and on November 30, 1965 it was $149,210,813.74.

CCA Annual Meeting

Continued from page 236

of our construction by about 60 per cent, almost 20 per cent a year, for the three years 1963 to 1966. This has actually happened, he added.

"Our projection up to 1970 indicated not only that we would have to expand industrial capacity as such very rapidly, but also it was quite apparent very quickly that we had a big job to do in housing, because while we are having an enormous increase in the labour force, we are also now beginning on a period of very rapid family formation. The rate of increase needed in construction in Canada from now to 1970, according to our estimates, will be perhaps slightly faster than the growth of the economy as a whole," which is about 5 per cent, he explained.

Dr. Deutsch called for a steadier development of the construction industry. "The Economic Council, as you know, has emphasized very much the need to get greater stability in the rate of growth of the industry in the future." He called for longer term forward planning and government participation to help toward this end.

Two other panelists, W. A. Beckett, of W. A. Beckett Associate, Toronto, and A. S. Rubinoff, Director of Economic Analysis, Department of Finance, Ottawa, also spoke on construction prospects. Mr. Beckett told the CCA that there would be a growing demand for improved quality of construction. Mr. Rubinoff said the Government was prepared to stimulate housing particularly and the economy generally, if that is needed this year. "Action has been taken to stimulate housing by increasing the maximum lending rate in NHA mortgages to induce investors to place more funds in this area, and the interest rate formula has been made more flexible, which should enable lenders to make plans for future funding."

Construction Safety

D. A. Campbell and G. J. Samson, both of the Construction Association of Ontario, addressed the CCA on the subject of responsibility for safety in the construction industry. "Legislation tends to reduce responsibility of management," Mr. Campbell told the group. "Forward-looking management must take up the responsibility and give safety encouragement, interest and patience."

Dr. A. N. Sherbourne, of the University of Waterloo, spoke to the General Contractors' section on "Waterloo's Approach to Engineering Education." He summarized the distinctive feature of the Waterloo plan for engineering education in the phrase "mutual independence." He told the section: "From the outset, Waterloo has operated a co-operative scheme of engineering education that we believe, combines the best of an academic course and sound, graded, practical experience."

Dr. Sherbourne explained that the program involved two groups of engineering students who "oscillate between industry and the university, being out of phase by four months." Each student spends eight terms in the university and six terms in industry, he explained. "It should be pointed out that the satisfactory completion of work experience is a necessary condition for the award of B.A.Sc. This testifies to the importance attached to the 'practical' component of the course of study," he added.

*These do not necessarily relate to the investigations conducted during this period.

PRICE INDEXES

Consumer, January 1967

The consumer price index (1949=100) increased 0.1 per cent to 146.0 at the beginning of January from 145.9 in December. The January index was 3.4 per cent higher than the January 1966 figure of 141.2. Five of the main components showed slight increases, while the clothing component decreased, and the tobacco and alcohol component remained unchanged.

The food index advanced 0.1 per cent to 144.9 from 144.7. Prices for whole milk, cake and cake mixes, butter, bananas, apples, root vegetables, cabbage, most beef cuts, cottage roll, veal, and chicken were higher. Price decreases were recorded for bread, sugar, coffee, eggs, fresh citrus fruits, most canned and frozen fruits and juices, tomatoes, lettuce, celery and some meats.

The housing index rose 0.3 per cent to 147.6 from 147.2. Higher rents, repairs, mortgage interest and costs of new homes caused the shelter component to rise. Increases in the household operation component were recorded for most furniture items, appliances and supplies, as well as for household help. Small decreases were reported for sheets and blankets.

The clothing index decreased 0.8 per cent to 128.6 from 129.7; sale prices for men's, women's and children's clothing items accounted for this decrease. Piece goods also declined, and a slight increase was recorded in footwear prices.

The transportation index rose 0.3 per cent to 153.0 in January from 152.6 in December. Higher prices for gasoline, motor oil and train fares outweighed the effect of slightly lower prices for new automobiles.

The health and personal care index advanced 0.2 per cent to 184.9 from 184.5. The recreation and reading index rose 0.2 per cent to 161.9 from 161.5. Increased prices for radios contributed to the rise in the recreation component, and higher prices for newspapers moved the reading component upward. The tobacco and alcohol index was unchanged at 126.5.

Group indexes a year earlier (January 1966) were: food 140.6, housing 142.9, clothing 122.7, transportation 149.1, health and personal care 178.1, recreation and reading 155.4, and tobacco and alcohol 123.1.

City Consumer, January 1967

The consumer price indexes (1949 = 100) rose in six cities; declined in three and remained constant in one between December, 1966 and January, 1967. Movements ranged from an increase of 0.8 per cent in Saint John to decreases of 0.1 per cent in Halifax and Toronto. There was no change in the Saskatoon-Regina index.

Food indexes rose in seven cities; declined in three. Except in St. John's and Halifax, where no change was recorded, housing indexes rose. Clothing indexes declined in all cities, except Vancouver and Saint John, where advances were recorded, and in Saskatoon-Regina where no change occurred.

Transportation indexes rose in eight cities; declined fractionally in two. Health and personal care indexes rose in five cities; declined in one and remained unchanged in four. Recreation and reading indexes rose in four cities and declined in six, ranging from an increase of 1.3 per cent in Saint John to a decrease of 0.7 per cent in Edmonton-Calgary. Tobacco and alcohol indexes remained unchanged in all cities, except Saint John, where they rose.

Regional consumer price index point changes between December, 1966 and January, 1967 were: Saint John +1.2 to 143.0; Vancouver +1.0 to 140.9; Ottawa +0.5 to 145.2; Montreal +0.2 to 144.1; Winnipeg +0.2 to 140.7; Edmonton-Calgary +0.1 to 136.6; Toronto +0.1 to 148.2; St. John's +0.2 to 127.0*; Halifax +0.2 to 139.0; Saskatoon-Regina was unchanged at 137.3.

Other Indexes

Owing to an advance in the publication date of the LABOUR GAZETTE, the general wholesale index, the price index of residential building materials and the United States consumer price index are not included this month. They will re-appear in the May issue.

Farm Products Prices

The index of Canadian farm products prices at terminal markets (1935=39-100) declined 0.2 per cent to 248.7 from 249.3 in the four-week period ended January 27. The animal products index moved down 1.1 per cent to 321.4 from 325.1, and the field products index advanced 1.3 per cent to 175.9 from 173.6.

*On base June 1951=100.

British Retail, December 1966

The British index of retail prices (Jan. 16, 1962=100) advanced to 118.3 at mid-December from 118.1 at mid-November. The index a year ago was 114.1.

Increases in the average prices of eggs, bacon, and cauliflower were partly offset by a reduction in the average price of tomatoes. The index for the food group as a whole rose by less than one-half of 1 per cent to 117.0 compared with 116.6 in November.

The index for the transport and vehicles group rose by less than one-half of 1 per cent to 110.5, compared with 110.2 in November. There was little change in the general level of prices in the remaining eight groups.

William Pollock replaces Walter Reuther on Council

William Pollock, President of the Textile Workers' Union of America (AFL-CIO), was elected a member of the Executive Council, senior policy-making body of the AFL-CIO, during the month of February.

Mr. Pollock filled the vacancy created by the resignation from the Council of Walter Reuther, President of the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (AFL-CIO).

In resigning, Mr. Reuther indicated that he was dissatisfied with the leadership of the 13,500,000-member AFL-CIO, claiming that it had become complacent under the presidency of George Meany. There were suggestions that the Auto Workers might discontinue membership in the AFL-CIO.

Employment and Unemployment in January

Employment decreased between December and January by 190,000 to a total estimated at 6,983,000, a decrease that was about usual for the season. Men accounted for 124,000 and women for 66,000 of the total decrease. The labour force declined by 75,000 to 7,364,000 during the period.

Unemployment, at 381,000, was 22,000 higher than a year ago, and 115,000 higher than the December figure of 266,000.

The unemployment rate in January was 5.2 per cent of the labour force, compared with 5.1 per cent in January 1966 and 5.9 per cent in January 1965. Seasonally adjusted, the January 1967 unemployment rate was 3.6 per cent.

The labour force, at 7,364,000, was 271,000 or 3.8 per cent higher than a year earlier. Employment was up 249,000, or 3.7 per cent, during the year.

Employment

The decrease of 156,000 in non-farm employment between December and January was less than seasonal; farm employment declined by 34,000 during that period. In non-farm industries, the employment decline came mainly from reduced activity in trade, manufacturing and construction.

Non-farm employment was up 258,000 compared with a year earlier. The largest increases occurred in manufacturing, trade, transportation and other utilities, and community business and personal service. Farm employment was 9,000 lower than in January 1966.

Employment was substantially higher than a year earlier in all regions except the Atlantic, where the level was practically unchanged.

Unemployment increased by 115,000 to 381,000 between December and January, normal increase for this period. The January estimate was 22,000 higher than a year earlier.

Of the 381,000 unemployed in January, about 319,000 had been unemployed for three months or less. The remaining 62,000, or 16 per cent of the total, had been unemployed for four months or more.

NOTE: The classification of labour market areas, and the summary table titled "Labour Market Conditions", are not included in this issue because the statistical basis for these tables is not comparable with a year ago. Beginning September 1, 1966, all registered applicants were asked to contact Canada Manpower Centres every 30 days — instead of the previously requested period of 14 days —to keep their registrations active. Another factor influencing the comparability of registered applicants is the extension of provisions, such as temporary layoffs, for exempting certain classes of unemployment insurance beneficiaries from registration.

Technical Note to "D" Tables

The registrations at Canada Manpower Centres appear in Table D-4 and are comparable to the statistics that were shown for NES local offices in previous issues of the LABOUR GAZETTE. Because the reporting system for the centres is designed for operational purposes, the statistics given must be interpreted in the light of the effect that operating practices have on statistical data.

The data are assembled by the Centres in two basic forms. The first is by broad industrial groups based on the Standard Industrial Classification Manual of the Dominion Bureau of Statistics, 1948. Statistics tabulated from this source reflect the total work load (vacancies notified, registrations for employment, placements, etc.) during a given reporting period, and Table D-2 is compiled from these data. The second is by broad occupational groups. These groups are based on the occupational classifications of the Dictionary of Occupational Titles (published by the United States Employment Service), and the Canadian Supplement.

Designed for personnel selection work, this classification system differs from other methods of grouping occupations, such as the one used in the Census. The Canada Manpower Centres prepare monthly inventories of unfilled orders for workers and applicants registered for employment. These inventories are compiled by occupational groupings, and they are the source from which the data in Tables D-1, D-3 and D-4 are derived. It is important to note that both the industrial and occupational groupings are very broad, some 20,000 occupations, for example, being condensed to 103 groups in the basic reports, and an even greater consolidation being effected in the "D" tables.

Users of these statistics should be aware of certain other features. First, vacancies and placements in these series do not make any distinction between regular, part-time or casual employment, the latter being employment for not more than six consecutive working days. Second, although Canada Manpower Centres coverage of persons looking for work is quite extensive, and a good over-all indicator of movements in total labour supply, tthe coverage in the various occupational groups (Table D-3) is not uniform, and data may not therefore be representative of labour supply within individual occupational groups.

Finally, there is no legal requirement for employers to notify Canada Manpower Centres of job vacancies, so the coverage of vacancies is far from complete. Thus, the "vacancies notified" series does not provide an accurate indication of the extent of labour demand. Although it is reliably estimated that Manpower Centres are notified of upwards of 30 per cent of all job vacancies, the actual percentage varies widely between different industries, occupations and geographic areas.

A New Vocational Unit For the Deaf

A new unit to provide training for employment to young people handicapped by serious hearing problems has been opened at the Interprovincial School for the Education of the Deaf in Amherst, N.S. The school is a co-operative program in which the Maritime provinces and the federal Government are sharing the costs.

George Barbour of the Nova Scotia Information Services, writing to *Rehabilitation in Canada* about this program, stated that there are, at present, 16 full-time and 23 part-time students receiving instruction in printing, auto-body repair, drycleaning, machine wood-working, sewing and dressmaking. The program is carried on under the direction of Vocational Supervisor Douglas J. Page, a graduate in vocational teacher training from the Institute of Technology in Moncton, N.B.

The students are instructed also in related subjects such as mathematics and language in order that they may equip themselves to take their place in the community and minimize the effects of their handicaps.

According to Mr. Barbour consideration is being given to the inclusion in the vocational education curriculum of courses in upholstery, barbering, bricklaying, shoe repair and drafting.

Everyday Problems

In addition to these vocational courses, every effort is being made to acquaint the students with the methods of handling a variety of typical problems that could arise in a normal working day. To this end, all vocational students are given familiarization training in such areas as banking, household budgets, credit buying, income tax, insurance and compensation information.

A student who has started one course of study and subsequently finds that it is not suitable for him may transfer to another. Also, if a student wishes to enter an occupation in which there is not sufficient interest to form a class, the vocational unit staff will co-operate with the appropriate vocational rehabilitation authority to arrange for him to be trained elsewhere. In one case a student decided he wanted to work in a bakery, and arrangements were made for apprenticeship training for him in Saint John.

Students in the printing classes learn to work on a variety of letterpress and offset equipment, and they acquire basic information on the setting up, operation and preventive maintenance of these machines. Instruction is also given the students in layout, type sizes and proofreading.

The auto body students cover all aspects of body repair such as straightening, welding, filling, finishing and painting and students in drycleaning are given instruction in types of material, equipment, the spotting board and labelling.

Power Equipment

Instruction in machine woodworking covers the operation of such woodworking power tools as the variety saw, band saw, surface planer, jointer, drill press, mortiser and portable power tools.

The girls in the sewing course receive instruction in all types of hand work and in the operation of standard, automatic and power machines. They also learn how to make patterns and effect alterations. On completion of this course, the girls are equipped to do anything from minor alterations to factory-type production sewing.

Following the completion of their respective courses, the staff of the vocational unit works closely with the Canada Manpower Centres and the various rehabilitation divisions of the provincial governments in the placement of students. Students are placed in their home areas wherever possible. The staff is also in contact with industry, and pursues a follow-up program in the placement of graduates.

An interesting aspect of the preparation of vocational education students for their role in society is a boarding-out system which seeks to locate them in the homes of Amherst area residents. The plan gives students the opportunity to form associations with hearing people outside the school atmosphere. The main purpose of the program is to permit students to develop responsibility for their social lives, and to make the transition from institutional life to the business world an easier one.

Founded in Halifax

The history of the Interprovincial School for the Deaf goes back to the founding in Halifax in 1856 of a School for the Deaf which began with only two pupils. By the end of the first year, enrolment had increased six times; and in 1858 the school was expanded. For 103 years, the school functioned on behalf of hundreds of students from the Atlantic Provinces and elsewhere.

In 1961, the present Interprovincial School for the Education of the Deaf was opened in Amherst, and a vocational unit was added in 1965. The latter unit was officially opened in June 1966 by the Honourable Stephen T. Pyke, Minister of Highways and Public Works in the Nova Scotia government.

School Superintendent D. J. Jenkins points out that although there has always been some vocational education and pre-employment training for students at the school, the program until now was not extensive and could not accommodate very many students.

About three years ago, officials of the departments of education of Nova Scotia and New Brunswick, and the Board of the Interprovincial School first gave consideration to expanding the curriculum to include vocational courses. They also set out to determine what occupations would be most suitable to enable persons with a serious hearing problem to compete in the hearing world.

Mr. Jenkins, who took up his duties as School Superintendent in 1965, says of the present academic school program that, as far as possible, work in the upper school level is related to the public school curriculum. He emphasizes, however, that the main concern of the school staff is the individual development of each child. He claims that people whose hearing is seriously impaired have much to offer society; but he adds that it is necessary for their abilities to be developed through a combination of academic and vocational education programs.

Members of the Board, which is chaired by Dr. H. M. Nason, supervisor of elementary and secondary education for the Province of Nova Scotia, and the staff of the school are optimistic that the skills acquired by students in vocational courses will enable them to become active members in any community in which they ultimately become residents.

"Sizzling 60" Club Proves Older Salesmen Too Good for the Shelf

The Sizzling 60 Club at the Texas Refinery Corporation of Fort Worth, Texas, has almost 300 salesmen as members, all of them over the age of 60. One of the objectives of the club, according to its constitution, is: "To prove that men in their 60s are just in the prime of life and are making a real contribution to our working economy, and not at an age to be forced into retirement."

The constitution was written in 1955 when the club started with 110 members. Today, with 300 members, the club can offer some very positive proof that the objective is being realized.

How Well Do They Do?

For example, E. A. Montgomery, now 72 years old, was the retired sales manager for a wholesale grocery concern when he joined the Corporation as a salesman in 1957. Last year, during the week of May 12, Mr. Montgomery earned $1,350 in commissions, and a packet of trading stamps along with it, because the bulk of his business was "cash with order."

True, he doesn't do that well every week. During the week of June 6, he earned $275 in commissions; of June 13, $606; and of July 4, $88. The odds are that he will win a free, all-expense company trip to Italy this year, as one of the firm's top salesmen.

Albert Morissette, 66, of the Province of Quebec, Canada, who has won the Canadian Sizzling 60 Club top award for four consecutive years, earned in three months this year almost half the $3,300 a year he was paid by a retail store before he joined Texas Refinery as a salesman in 1955. Paul Preussner, 69, of Germany, had TRC earnings totalling $17,766 in 1965, and no one will be surprised if he matches that in 1966. And Norman C. Huhn, 67, a Pennsylvanian, is averaging about $1,000 a month in commissions. A board member of the Club, Mr. Huhn was honoured this year, as an outstanding member, with a plaque. He has already won the free trip to Italy and, in 1963, he was a company guest on a vacation in Madrid, Spain.

Henry Kliegl of Iowa earned a $116 commission this year on his 79th birthday. True, Mr. Kliegl got his birthday commission with help from Texas Refinery. The company received a request for a salesman to call, and it wired Mr. Kliegl. He did the rest.

Martin Trindel, 66, a district manager in Nebraska, started TRC selling part-time in 1963. Last fall he sold his own oil company, in which he had a $100,000 investment, to put in full-time selling for the Texas Refinery. In the first six months of 1966 he earned over $6,000.

Are these men the exceptions? Not quite. Men of their maturity have been doing as well since the Sizzling 60 Club records began in 1955.

Other Advantages for Older Men

Club members work their own hours. Usually, they put in fewer hours less regularly than men 10 or 20 years younger. As one man of 68 said, "I'm as good a man as I ever was for four hours. Then I want a nap, so I take it."

The salesmen work on a straight commission basis. As individual contractors, they have their own business without investment, overhead, or inventory. They plan their own time, provide their own transportation, and, depending on the time and effort they put in, and their skill as salesmen, set their own income.

Some of the club members are men who have grown grey with the company, some are new recruits. An applicant of 60 or 70 years is not unusual. In practice, however, Texas Refinery finds 75 is about the limit for a beginner.

How Does the Company Do It?

A new recruit is trained by Texas Refinery, given a sales kit, and the help and supervision of expert salesmen who have worked their way to the top by the same route the new man — whatever his age — must take. In business since 1922, the company has worked out a simple sales approach, and easy but effective demonstrations for its line of 22 products. It tells a new recruit where to look for customers. And once he has learned the fundamentals, the mature worker does well with less direction than a younger man. His years give him balance and responsibility, and where a lack of formal education holds back many mature workers, it is no handicap in selling.

Many of the men in the Sizzling 60 Club were retired from other companies because of their age, not because they were unable to work. Texas Refinery has a 65-year retirement age for its own office people, whose work calls for an 8-hour day, five days a week and 49 weeks a year. Like other companies, the firm knows that a standard retirement age saves the heartbreak of ruling that one man must go while another may stay, and also enables the employees to plan intelligently for their later years.

But Texas Refinery believes that the mature worker has a definite place in selling, since he can set his own pace. The company is proud of its Sizzling 60 Club members here and abroad — in Canada, Mexico, and more than 100 foreign countries. They have proved to its satisfaction and their own that the mature worker is effective as a salesman.

Readers interested in further information may write to A. M. Pate, Jr., President, Texas Refinery, P.O. Box 711-A, Ft. Worth, Tex. 76101.

This article appeared in the January 1967 issue of "Aging", a publication of the Administration on Aging, U.S. Department of Health, Education and Welfare. It is reprinted in its entirety because it is a most unusual example of the productive capabilities of men in their sixties.

Certification and Other Proceedings

Before the Canada Labour Relations Board

By the Employee Representation Branch

The Canada Labour Relations Board met for three days during January. The Board granted two applications for certification, and ordered three representation votes. During the month, the Board received 15 applications for certification, and allowed the withdrawal of five such applications. The Board also received one application for revocation of certification, and one request for review of an earlier decision. Withdrawal of an application for revocation of certification was also allowed by the Board, and it issued Reasons for Judgment in respect of an application for certification previously rejected.

Applications for Certification Granted

1. Association of Canadian Television and Radio Artists, on behalf of a unit of television and radio broadcasting employees of the Canadian Marconi Company, Montreal, Que. (Television Station CFCF-TV and Radio Station CFCF) (L.G., Feb., p. 129).

2. Driver Salesmen, Plant, Warehouse and Cannery Workers, Local Union No. 987, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers and truck maintenance staff employed by Central Alberta Dairy Pool, Transport Division, Red Deer, Alta. (L.G., Feb., p. 128).

Representation Votes Ordered

1. Seafarers' International Union of Canada, applicant, and *Les Messageries de la Cote Nord Ltée* (North Shore Shipping Lines Ltd.), City of Laval, Que., respondent (L.G., Jan., p. 40), and International Union of District 50, United Mine Workers of America, intervener. The Board directed that only the name of the Seafarers' International Union of Canada appear on the ballot. The Board also directed that the vote be taken when the navigation season opens and the *MV Prince Ungava* is in operation (Returning Officer: R. L. Fournier).

2. Seafarers' International Union of Canada, applicant, and Chembarge Limited, Point Edward, Ont., respondent (L.G., Feb., p. 128). The Board directed that the vote be taken in the spring after the *S.S. Norman P. Clement* resumes operations (Returning Officer: S. Emmerson).

3. Seafarers' International Union of Canada, applicant, and The Pelee Shipping Company, Limited, St. Thomas, Ont., respondent (L.G., Feb., p. 128). The Board directed that the vote be taken when the navigation season opens and the *MV Pelee Islander* is in operation (Returning Officer: S. Emmerson).

Applications for Certification Received

1. Professional Transport Workers' Union of Canada on behalf of a unit of drivers employed by Mid-West Tankers Ltd., Edmonton, Alta. (Investigating Officer: D. H. Cameron).

2. International Association of Machinists and Aerospace Workers on behalf of a unit of Traffic Department employees employed by TransAir Ltd., St. James, Man. (Investigating Officer: A. E. Koppel).

3. *Syndicat des employés de Transport de St. Remi* on behalf of a unit of employees of *Houle Express Ltée,* St. Remi, Que. (Investigating Officer: R. L. Fournier).

4. Atomic Energy-Draftsmen Local 1645, CLC, on behalf of a unit of design and drafting employees employed by Atomic Energy of Canada Limited, Clarkson, Ont. (Investigating Officer: H. A. Fisher).

5. Licensed Aircraft Engineers, Local 1642, CLC, on behalf of a unit of employees of Bristol Aviation Services Ltd., Dorval, Que. (Investigating Officer: R. L. Fournier).

6. *Association des employés du Transport d'Anjou Inc.* on behalf of a unit of employees of *Transport d'Anjou Inc.,* Rivière-du-Loup, Que. (Investigating Officer: R. L. Fournier).

7. *Syndicat général du cinema et de la télévision (CSN)* (Section Radio-Canada) on behalf of a unit of certain employees of the Canadian Broadcasting Corporation employed in its TV Production Centres at Montreal and Quebec City, Que. (Investigating Officer: R. L. Fournier).

8. National Association of Broadcast Employees and Technicians on behalf of a unit of certain Programming Department employees of Calgary Television Ltd. (CHCT-TV), Calgary, Alta. (Investigating Officer: D. H. Cameron).

9. International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers, Local Union No. 141 and International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers, Local 938, General Truck Drivers Union, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America on behalf of a unit of employees of Boyes Transport Limited, Malton, Ont. (Investigating Officer: H. A. Fisher).

10. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of a unit of office employees at Fort William and Port Arthur, Ont., employed by Manitoba Pool Elevators, Winnipeg, Man. (Investigating Officer: A. E. Koppel).

11. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of a unit of office employees at Fort William and Port Arthur, Ont., employed by McCabe Grain Company Limited, Winnipeg,

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the functions of the Canada Labour Relations Board, for which the Employee Representation Branch of the Department is the administrative agency.

Man. (Investigating Officer: A. E. Koppel).

12. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of a unit of office employees at Fort William and Port Arthur, Ont., employed by Richardson Terminals Limited, Winnipeg, Man. (Investigating Officer: A. E. Koppel).

13. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of a unit of office employees at Fort William and Port Arthur, Ont., employed by United Grain Growers Limited, Winnipeg, Man. (Investigating Officer: A. E. Koppel).

14. Miscellaneous Workers, Wholesale and Retail Delivery Drivers and Helpers, Local Union No. 351, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America on behalf of a unit of messenger boys employed by Canadian Pacific Telecommunications, Vancouver, B.C. (Investigating Officer: D. H. Cameron).

15. *Syndicat national des employés de bureau du Port de Montreal (CSN)* (National Syndicat of the Port of Montreal Office Employees (CNTU)) on behalf of a unit of office employees of National Harbours Board at Montreal, Que. (Investigating Officer: C. E. Poirier).

Applications for Certification Withdrawn

1. *Syndicat national des employés des usines des chemins de fer — section des employés de l'entretien (CSN),* applicant, and Canadian Pacific Railway Company, Montreal, Que., respondent (Atlantic Region) (L.G., June 1966, p. 307). The following had intervened: Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; Brotherhood of Railway Carmen of America; Division No. 4, Railway Employees' Department; Brotherhood of Maintenance of Way Employees; and Brotherhood of Railway Signalmen.

2. *Syndicat national des employés du National-Canadien (CSN),* applicant, and Canadian National Railway Company, Montreal, Que., respondent (Pointe St. Charles Shops) (L.G., Nov. 1966, p. 657). The following had intervened: Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers; Brotherhood of Maintenance of Way Employees; International Association of Machinists and Aerospace Workers; Division No. 4, Railway Employees' Department; Sheet Metal Workers' International Association; Brotherhood of Railway Carmen of America; Canadian Brotherhood of Railway, Transport and General Workers; International Brotherhood of Electrical Workers; Brotherhood of Railroad Signalmen; and United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada.

3. Canadian Brotherhood of Railway, Transport and General Workers, applicant, and Henderson Lumber Company Limited, Mulgrave, N.S., respondent (L.G., March, p. 190).

4. Canadian Brotherhood of Railway, Transport and General Workers, applicant, and Rudolphe van der Walde (Canada) Ltd., Mulgrave, N.S., respondent (L.G., March, p. 190).

5. Canadian Brotherhood of Railway, Transport and General Workers, applicant, and Williams & Simpson, Mulgrave, N.S., respondent (L.G., March, p. 190).

Application for Revocation Received

1. Bernard Doherty, applicant, MacCosham Van Lines Limited, Kingston, Ont., respondent, and General Truck Drivers' Union, Local 938, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America,

---

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Conciliation and Arbitration Branch. The Employee Representation Branch acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944 and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for controlling applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements — that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and Other Proceedings Before the Canada Labour Relations Board and (2) Conciliation and Other Proceedings Before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's Newfoundland. The territory of the officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; officers resident in Toronto confine their activities to Ontario; officers in Montreal are assigned to the province of Quebec; and officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Conciliation and Arbitration Branch and the Employee Representation Branch are in Ottawa.

respondent. The application was for revocation of the Board's order of July 12, 1961, certifying the respondent union as bargaining agent on behalf of a unit of drivers and warehousemen employed by MacCosham Van Lines Limited and working in and out of Kingston, Ont. (L.G. 1961, p. 913).

Request for Review, Section 61(2) of Act

The Board received a request from l'*Association nationale des employés et techniciens en radiodiffusion* (National Association of Broadcast Employees and Technicians) for review of the Board's decision of June 30, 1965 which certified the petitioner as bargaining agent for a unit of employees employed at Radio Stations CHLT-AM and CHLT-FM and Television Station CHLT-TV by La Tribune Inc., Sherbrooke, Que. (L.G. 1965, p. 732).

Application for Revocation Withdrawn

1. North Canada Air Ltd., Prince Albert, Sask., applicant, and Canadian Brotherhood of Railway, Transport and General Workers, respondent (L.G., Feb., p. 129). The application withdrawn was for the revocation of the Board's order of March 16, 1966 certifying the respondent union as the bargaining agent for a unit of employees of North Canada Air Ltd., comprising certain flight crew and ground personnel, including office and maintenance staffs.

Reasons for Judgment

The Board issued Reasons for Judgment in respect of its rejection of an application for certification as bargaining agent affecting some 3,500 employees of the Canadian Pacific Railway Company employed in or about its Angus Shops at Montreal. In the opinion of the Board, the unit applied for was not appropriate for collective bargaining. The Reasons for Judgment are to be published in the LABOUR GAZETTE Supplement No. 1, 1967. (See also L.G., Jan., p. 39, Applications for Certification Rejected).

Conciliation and Other Proceedings

Before the Minister of Labour

By the Conciliation and Arbitration Branch

During January, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. TransAir Limited, St. James, Man., and Canadian Air Line Dispatchers' Association (Conciliation Officer: A. E. Koppel).

2. Continental Trucking Ltd., Saskatoon, Sask., and Local 395, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: A. E. Koppel).

3. National Harbours Board, and National Syndicate of Employees of the Port of Montreal (CNTU) (Conciliation Officer: C. E. Poirier).

Settlements by Conciliation Officers

1. TransAir Limited, St. James, Man., and Canadian Air Line Dispatchers' Association (Conciliation Officer: A. E. Koppel) (see above).

2. Dominion Auto Carriers, Ltd., Vancouver Terminal, B.C., and Local 351, International Brotherhood of Teamsters. Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: J. D. Meredith) (L.G., Nov. 1966, p. 659).

3. The Cumberland Railway Company (Sydney and Louisburg Division) and Lodge 684, Brotherhood of Railroad Trainmen (Conciliation Officer: D. T. Cochrane) (L.G., July 1966, p. 374).

4. *Robert Transport Ltée,* and Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: R. L. Fournier) (L.G., Sept. 1966, p. 522).

5. Canadian Pacific Railway Company, B.C. Coast Steamship Service, and Canadian Merchant Service Guild (deck officers and engineers) (Conciliation Officer: J. D. Meredith) (L.G., Feb., p. 129).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the administrative services of the Minister of Labour and the Conciliation and Arbitration Branch of the Department.

Conciliation Boards Appointed

1. *Radio Saguenay Limitée* (CKRS and CKRS-TV) Jonquière, Que., and National Association of Broadcast Employees and Technicians (L.G., Feb., p. 129).

2. Pacific Western Airlines Limited (I.F.R. pilots) Vancouver International Airport, and Canadian Air Line Pilots' Association (L.G., March, p. 191).

3. McCabe Grain Company Limited, Edmonton, Alta., and Local 987, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L.G., Jan., p. 41).

Settlement During Board Procedure

La Télévision de Québec (Canada) Ltée, and National Association of Broadcast Employees and Technicians (L.G., Jan., p. 41).

Settlement After Strike Action

Consolidated Aviation Fueling and Services Limited, Montreal, and Lodge 689, International Association of Machinists and Aerospace Workers (L.G., March, p. 191).

Canada Department of Labour

Legal Decisions Affecting Labour

Supreme Court of Canada rules that grievance procedures under collective agreement cannot deprive an employee of the right to sue for unpaid wages

New Brunswick Supreme Court (Appeal Division) upholds employee's right to sue for damages for wrongful dismissal notwithstanding grievance procedure under collective agreement

On October 19, 1966 the Supreme Court of Canada held that an employee could bring a court action for recovery of wages based on a declaration of right obtained pursuant to a union grievance settled by arbitration under collective agreement.

Circumstances of Dispute

There was a dispute between a union and the Hamilton Street Railway Company over the pay that a spare operator was guaranteed under a collective agreement. The union claimed that if the spare operator worked at all, he was guaranteed a minimum of seventy hours pay. The company contested this claim, and the union submitted the dispute to arbitration pursuant to Article VIII of the agreement.

Declaration of Entitlement

The majority of the arbitration board held that the spare operators were entitled to seventy hours pay, and that the union was entitled to pursue its complaint under Article VIII of the agreement.

The company claimed that this grievance procedure was of no use to the employees concerned because they could not do anything with a mere declaration of entitlement. It was the company's view that each employee should have presented a personal grievance under Article VI dealing with grievance procedure; and then they would have secured declarations that they were entitled to specific sums of money. Having secured these declarations, they could have filed them with the Supreme Court under Section 34(9) of the Ontario Labour Relations Act; and then they would have had a judgment instead of useless declarations of right. As the employees failed to take this course, there was no jurisdiction in any court to consider their actions for recovery of unpaid wages.

Personal Action

The union had followed arbitration procedures under Article VIII and was successful in getting a declaration favourable to the interpretations that would give employees their money. The arbitration board, however, did not state in its reasons how much each of the employees was entitled to because they were not parties to the grievance procedure under Article VIII.

Following the arbitration decision, the employees sued in the Division Court for their unpaid guaranteed pay. They were met with the defence that they had no remedy because they had not followed Article VI of grievance procedure. Both the Division Court Judge and the Court of Appeal rejected this contention.

On appeal to the Supreme Court of Canada, the company's contention was also dismissed. In rendering the judgment of the Supreme Court, Mr. Justice Judson noted that the employees in question had the matter conclusively settled in their favour by the arbitration board. Following the decision of the board, they could go before the Court and say, "We are entitled to this money. All that remains is a mere matter of calculation. These are the hours for which we are entitled to be paid — seventy hours minus whatever hours we were paid for and which we actually worked." This was what actually happened and, according to Mr. Justice Judson, the courts had jurisdiction to determine this matter. This was the precise point decided by Chief Justice McRuer in *Grottoli v. Lock and Son Limited* (L.G. 1964, p. 46).

According to Mr. Justice Judson, if one would follow the company's argument to its ultimate conclusion, it would mean that no employee could ever sue for unpaid wages. In order to be able to do so, an employee would have to follow the grievance procedure in the collective agreement, and be bound by very stringent time limits. This would be so, even though there was no dispute about the wages being due and owing.

Mr. Justice Judson stated further that a collective agreement is not concerned with non-payment of wages. These may be sued in the ordinary courts. If, however, the right to be paid depends upon the interpretation of the collective agreement, such decision is within the exclusive jurisdiction of a Board of Arbitration appointed under the agreement. But it makes no difference whether this decision of the Board resulted from each employee submitting a personal grievance under Article VI, with the consequent registration of the equivalent of a judgment with the Supreme Court, or from a declaration at the instance of the union following Article VIII of the collective agreement. In the one case, the individual employees get the equivalent of judgments; in the other case, they have declarations of right on which they can sue.

Mr. Justice Judson held further that, where wages are concerned, if the employee lets the six days go by before he

files a grievance, the union can still pursue the matter under Article VIII of the collective agreement as it did in the case at bar.

Rights of Labour Act Not Applicable

According to Mr. Justice Judson, the Ontario Rights of Labour Act had nothing to do with the case at bar. Section 3(3) provides:

> A collective bargaining agreement shall not be the subject of any action in any court unless it may be the subject of such action irrespective of any of the provisions of this Act or of the Labour Relations Act.

He held that the citation of a conclusive arbitration award under a collective bargaining agreement as the foundation for a claim for wages is not the same thing as making the collective agreement the subject of any action in any court.

Appeal Dismissed

The Supreme Court of Canada dismissed the company's appeal and upheld the right of the employees to sue for wages due to them under a collective agreement. *Hamilton Street Railway Co. v. Northcott,* 66 C.L.L.C., para. 14,157.

N.B. SUPREME COURT (APPEAL DIVISION)

On July 12, 1966 the Supreme Court of New Brunswick (Appeal Division) upheld the right of an employee, allegedly discharged because of union activities, to sue the employer for lost wages and damages. The Court held that the inclusion in the collective agreement of a grievance procedure did not bar the employee from resorting to any common law right of action with regard to the contract of employment.

Circumstances of Dispute

On August 17, 1963 an employee entered into the employ of Miramichi Hospital as a stenographer or clerk on accounts, at a salary of $250.00 per month. On October 31, 1963 a collective agreement was executed by the Hospital and Local Union No. 865, National Union of Public Employees, of which the employee in question was an active member.

On November 13, 1963 the employee was dismissed by the Hospital (through its administrator) without notice, and without being paid any salary in lieu thereof. The employee brought a court action against the hospital, claiming that the only reason for her dismissal was her participation in union activities. The plaintiff claimed in relief: (a) her rightful classification from the date of her dismissal; (b) reimbursement of all wages from date of her dismissal; (c) damages for wrongful dismissal; and (d) all seniority and other rights provided for under the agreement.

Employer's Submission

In the defence, the employer pleaded that the dismissal of the employee was for good cause, and in the alternative that the common law right of the plaintiff to sue had been abrogated by the collective agreement, and that any right the employee had to an action on her contract of employment had become vested in the union. The Trial Judge considered the alternative plea for the dismissal of the action, and he refused to grant it. This ruling was appealed by the employer.

On appeal, it was contended that the collective agreement was a bar to the action, and in the alternative that, if it were not, the plaintiff had no right of action until the remedies provided by the agreement had been exhausted.

In his reasons for judgment, Chief Justice Bridges referred to the following provisions of the collective agreement: Article I stated that the purpose of the agreement was to maintain harmonious relationship between the Hospital and the Union, to provide an amicable and equitable method of settling all differences or grievances, including the definition of terms and conditions of employment. Section 2 of Article IV dealt with the instances such as absence, theft, fraud and drunkenness by reason of which an employee could be discharged without notice with wages to the date of his or her dismissal. Section 3 of Article IV read:

> Nothing contained in the foregoing shall be deemed to restrict or limit the right of the Hospital to discharge employees for any other just cause, nor shall it restrict any employee covered by this agreement from processing a grievance in accordance with this agreement.

Article V prohibited strikes and lockouts during the life of the agreement. In Sections 1 and 2, Article VII dealt with the formation of the grievance committee, and with grievances and grievance procedures leading to arbitration.

Sections 3 and 4 of Article VII provide for the appointment of a board of arbitrators. Sections 5 and 6 of this Article read in part:

> The majority decision of the said Board shall be recognized by both parties as a binding order of compliance. In the case of dismissal or suspension, and [if] the Board decides that an employee has been unjustly suspended or dismissed, the Board shall make an order restoring to the employee all rights and benefits provided by this agreement, including reimbursement of wages lost.
>
> The Union shall have the right to file a grievance, when, in its own opinion, there has been a breach of the Labour Agreement.

Grievance an Arbitrable Matter

In the opinion of Chief Justice Bridges, the dismissal of the employee in the case at bar could have been made the subject of a grievance, and a matter for arbitration under the provisions of the collective agreement.

He noted that Section 18(1) of the New Brunswick Labour Relations Act reads:

> Every collective agreement entered into after the commencement of this Act shall contain a provision for final settlement, without stoppage of work, by arbitration or otherwise, of all differences between the parties to or persons bound by the agreement or on whose behalf it was entered into, concerning its meaning or violation.

According to Chief Justice Bridges, the provisions of Articles V and VII of the collective agreement should be read in conjunction with Section 18(1) of the Act. He stated further that if an arbitration on the dismissal of the employee had been held, and the arbitrators had made an order with which the Hospital complied, this would have been the end of the matter, as it would have been had they found the dismissal was justified. In the case of arbitration, an action would lie only if the Hospital refused to comply with an order of the arbitrators.

Right of Action for Wages

Chief Justice Bridges noted that in *Re Grottoli v. Lock & Son Limited* (L.G. 1964, p. 46) Chief Justice McRuer held that the common law relationship of employer and employee was not abrogated by reason of the existence of a collective agreement under the terms of which the relationship was governed, and that Section 34(1) of the Ontario Labour Relations Act, requiring arbitration of collective agreement disputes, did not oblige an employee to resort to arbitration to the exclusion of court action to enforce a claim against his employer for unpaid wages. Section 18(1) of the New Brunswick Act has the same impact as Section 34(1) of the Ontario Act. In the *Grottoli* case Chief Justice McRuer said:

> It is argued that the provisions of

Section 34(1) are so broad as to exclude any right of an employee, who is employed where a collective bargaining agreement is in force, to bring an action against his employer for his wages. It is argued that the employee must resort to the arbitration procedure provided for in the collective bargaining agreement, and when the arbitration is completed, the claim against the employer is filed with the Registrar of the Supreme Court under ss. (9) of Section 34, and it then has the same force and effect as a judgment of the Court.

If I were to adopt this argument, it would create rather chaotic conditions with reference to the simple matters of employees who operate under a collective bargaining agreement getting paid promptly, and it would also put in the hands of a union that has been certified as a collective bargaining agent extraordinary power over non-members of the union who were employees of the same employer. The union could see fit to assert the claims of the members of the union but not assert the claims of non-members of the union.

Collective Agreement No Bar to Action

Chief Justice Bridges could find no provision in the collective agreement under consideration that would restrict an employee to the sole remedy of having the subject of his complaint processed as a grievance under the collective agreement. In his view, it was possible that some of the relief claimed by the plaintiff could only be obtained through the grievance procedure; but there was also a claim for damages for which an action clearly lies in the case of wrongful dismissal.

The Court also considered Section 18(3) of the New Brunswick Labour Relations Act, which is not found in the Ontario Act. The Section reads:

> Every party to and every person bound by the agreement, and every person on whose behalf the agreement was entered into, shall comply with the provision for final settlement contained in the agreement and give effect thereto.

Chief Justice Bridges held that this provision should not be interpreted as restricting the plaintiff to only the remedy of having her dismissal processed as a grievance under the collective agreement, and an arbitration held. To hold that it should be so interpreted would mean that an employee who has been wrongfully dismissed would be without remedy, unless his dismissal was taken up by the union and carried to arbitration.

In his view, it was not the intention of the Legislature to vest such powers in a union, or to prevent an employee, on his dismissal, from bringing an action such as that of the plaintiff. On the other hand, the Chief Justice stated, if the dismissal of the plaintiff had been processed as a grievance, no action would lie until there had been an arbitration.

Appeal Dismissed

The Court dismissed the employer's appeal and upheld the right of the employee to a court action seeking damages for wrongful dismissal in regard to a contract of employment in spite of the inclusion of grievance procedure in the collective agreement.

Miramichi Hospital et al. v. Woods, 66 C.L.L.C., para. 14, 159; (1967) 59 D.L.R. (2d) Part 4, p. 290.

Recent Regulation under Federal Legislation

Unemployment insurance applied to farm workers

Employment in agriculture and horticulture was brought under the Unemployment Insurance Act, effective April 1. Most employees working on farms and ranches, or in nurseries, greenhouses or horticultural establishments, or for fruit or vegetable growers will be covered.

When the Unemployment Insurance system was introduced in 1940, employment in agriculture and horticulture was exempted. The Unemployment Insurance Act provides, however, that the Unemployment Insurance Commission may, with the approval of the Governor in Council, bring any exempted employment under the Act. This has now been done with respect to employment in agriculture and horticulture by an amendment to the Unemployment Insurance Regulations published as SOR/66-483 on November 9, 1966. Employment connected with poultry farming and horse raising had been brought under in 1956.

Close relatives of the employer are not eligible to be insured as his employees, and casual or part-time employees can claim exemption. A person who does not ordinarily work in insurable employment may, when he is hired, file a declaration stating that he is claiming exemption and may be exempted so long as he does not work for the farmer more than 24 hours per week, or 10 days in any period of 30 days, or 20 weeks in a calendar year.

A farm worker will be considered fully employed for the purposes of the Act only during any week in which he works on five or more days for an aggregate of 40 or more hours.

If a farmer provides his employees with board or lodging or both, the amount which must be added to the employee's cash wages before contributions for Unemployment Insurance purposes are calculated is as follows: for both board and lodging, $14 per week; board only, $7; room or house only, $7.

As with other employers subject to the Act, farmers are required to register with the nearest local office of the Unemployment Insurance Commission, obtain a licence to purchase unemployment insurance stamps, and assume the responsibility of affixing insurance stamps in the employee's unemployment insurance book within three days of each pay day. If the employee does not have an unemployment insurance book, the employer must obtain one by applying to the local office.

The rates of contribution and benefits and other basic provisions will be the same for agriculture as for other jobs covered by the Act.

By Unemployment Insurance, Pensions and Manpower Section, Dominion Bureau of Statistics

Claimants up 9 Per Cent From Total a Year Ago

The number of claimants for unemployment insurance benefit at the end of November was 9 per cent higher than the total at the end of the same month in 1965, and it was the first time since 1959-60 that there had been an increase in November compared with the same month in the previous year. This development, however, is part of a trend that had been evident since the middle of 1966 and was becoming more pronounced as the year drew to an end.

It may be partly connected with an increased number of industrial disputes that have caused dislocations in industries other than those directly affected. Besides this, the rate of unemployment during the past few months, compared with the previous year, has begun to move upward slightly.

Table 1 shows the number of claimants reporting at local offices across Canada at the end of each month for the period July to November in the years 1960 to 1966.

TABLE 1—Claimants at month-end, 1960-1966

Year	*July*	*Aug.*	*Sept.*	*Oct.*	*Nov.*
			(000's)		
1960	294	280	280	330	485
1961	255	229	229	269	386
1962	212	199	198	244	374
1963	219	193	186	219	303
1964	205	182	174	215	275
1965	184	192	157	170	245
1966	196	187	165	184	266

Returning to the current month, there were 266,000 claimants for unemployment insurance benefit at the end of November, compared with 245,000 a year earlier. The rate of increase in the number of female claimants compared with 1965 exceeded that of males, and as a result the percentage of males in the total at the end of November was slightly lower than in November 1965.

The increase in the total number of claimants, compared with the previous year, occurred in all provinces, except Prince Edward Island and Alberta, but more than 75 per cent of it was concentrated in Ontario and British Columbia.

Compared with the previous month, there were approximately three claimants in November for every two in October, which was characteristic of that time of the year, when many claimants register before the period during which seasonal benefit becomes payable under the modified contribution requirements.

Of the total number of claimants at the end of November, about 60 per cent began to claim during the month, and males made up three quarters of this group. There were, however, nearly as many females as there were males among those who had been claiming for more than four weeks. As in October, there were more female than male claimants in this group in Ontario and the Prairie Provinces.

A claimant's unemployment register is placed in the "live file" at the local office as soon as the claim is made. As a result, the count of claimants at any given time inevitably includes some whose claims are in process. "Claimants" should not be interpreted either as "total number of beneficiaries" or "total job applicants."

Beneficiaries and Benefit Payments

It is estimated that during November on the average 141,000 beneficiaries were receiving $24.19 each week, or a total of $14,300,000 for the month. In October, about 130,000 beneficiaries received an average rate of $23.82 a week, the total paid out being $12,300,000. In November 1965, a total of 126,000 beneficiaries received an average of $23.77 a week, or a total of $12,600,000.

Initial and Renewal Claims

There were 153,000 initial and renewal claims during November, compared with 86,000 in October and 152,000 in November 1965. As in the previous year, 95 per cent of the claims were filed by persons whose benefit rights had been exhausted and who were seeking an extension of such rights.

Table 2 summarizes the more important data connected with the operation of the Unemployment Insurance Act.

TABLE 2 — Summary Table

Activity	*Nov.*	*Oct.*	*Nov.*	*Cumulative Data 1966*	
	1966	*1966*	*1965*	*Jan. to Nov.*	*12 months ending Nov.*

Decisions of the Umpire

Under the Unemployment Insurance Act

CUB 2638

In his initial application for benefit the claimant reported employment as a load control operator for a federal Government department from January 21, 1957 to December 31, 1965. He was retired, having reached the age of 65.

The local office wrote to the employer acknowledging receipt of confirmation of the employee's separation, and pointing out that no mention was made of any moneys on separation. The local office asked whether or not the claimant would be entitled to any moneys, and if so, how much he would get and to what period they would be allotted.

When the employer failed to reply to the letter, the insurance officer requested that the local office investigate further, because it appeared that the moneys received by the claimant, a retired civil servant, might be earnings. The employee's claim was allowed, pending further information from the employer.

The claimant then wrote the local office:

> Gratuity cheque received on 24 February for $926.25; less income tax, 92.65; net, $833.60. One week's pay for each of the 8 years. I was employed by [a federal Government Department] [from] 1958 to 1965.

The local office again contacted the employer, and the employer replied that the claimant had received eight weeks' pay—gross $1,071.04. The employer stated also that the claimant was struck off strength December 31, 1965 and the money given to him in a lump sum, which did not extend the claimant's period of service.

The insurance officer notified the claimant that he considered the moneys received by him as retirement leave credits, and had allocated them at the rate of $133.88 per week to consecutive weeks commencing January 2, 1966, and ending with the week commencing February 20.

On March 19, 1966 the claimant appealed to the board of referees, giving the following reasons:

> Your decision has been based on your interpretation of the word "Gratuity". Your term for this item (Retirement Leave Credits) this term, I never heard of before. However, I never had time to peruse all the Civil Service Regulations, so that is possible.
>
> I never knew until I was called to the civil service office for the final interview, that I would receive any monetary reward.
>
> In the course of conversation, the statement was made, and I am quoting: The government will grant you a "Gratuity" of one week's pay for each of your 8 years, for past services rendered, i.e., 1958 to 1965.
>
> This item had to be documented, then forwarded to the Commodore for approval and the necessary authority, before payment would even be entertained. Note: The same procedure was never necessary in order to receive salary cheques. This action indicated to me, something approved over and beyond the realm of salary cheques; i.e., a gratuity, or grant (not a credit or claim). A free gift as defined in the dictionary and for which the Commodore had to accept responsibility.
>
> To my mind, it was not earned (as we understand the term) neither did it have anything to do with 1966, but granted for the prior years, 1958-1965. I had no basis in fact, for any claim legitimate or otherwise, without the prior approval and goodwill of the Commodore. Had it been otherwise, I had no status, and the matter was dead.
>
> I never had any experience with the Unemployment Insurance Commission, never having any requirement, so thought of it as normal insurance, the same as sick insurance or any other. I paid for this insurance strictly and solely from my own pocket, for 10 years, 1952 to 1957 and from 1962 to 1966 having reached the demarcation line on salary; so I feel I have invested approximately $1,000. In actual fact, any benefit I receive will simply be a return of my own investment.
>
> I am in my senior years now 66 years, going on 67. I had envisioned this gratuity helping to complete my home, but "alas" one government department says Yes, and another department says No.

On March 31, the claimant wrote the board of referees to add to his appeal the following:

> I was struck off the strength at the dockyard on the 31 December 1965. My identification card was collected. I ceased at that moment to be an employee of the government, and my access and egress to and from the dockyard came to an end.
>
> Had I been an employee beyond that date, the employer was obligated to continue unemployment insurance coverage on my behalf, and I would have been entitled to expect same for future credit.
>
> This did not take place, so we ask why? And the answer seems, I was not an employee earning wages; had it been otherwise, then the employer contravened the Unemployment Insurance Act by failing to keep coverage on my person. I would also be in a position to claim coverage for the period concerned aside from your position (as representing the Commission) of having to take legal action against the defaulter for evasion.
>
> My position at the dockyard was open to competition as far back as October 1965 to allow for familiarization and partial training so there would be no delay in installation of my successor.
>
> It is fairly common knowledge that the government does not pay two (2) salaries for one position, so that he and I could not draw salaries for one established position, and my position was filled in early January. The title of "Gratuity" as given by the dockyard seems fairly obvious. . . .

The unanimous decision of the board of referees stated that the gratuity received by the claimant had been incorrectly determined and allocated because it could not be considered earnings when paid at termination of the contract of service. It also quoted information supplied to the local office by the employer: "Eight weeks' gratuity, gross $1,071.04, 31 December 1965. Money given in a lump sum and did not extend period of service."

The board pointed out, too, that moneys such as "bonus, gratuities, severance pay, etc., payable at termination of the claimant's contract of service, shall not be considered as earnings. . . ."

In his appeal to the Umpire, the insurance officer stated that the claimant was employed by the Department of National Defence, at $6,900 per annum, and that he was subject to the provisions of the Civil Service Regulations. These provide

that an employee may be granted retirement leave or a gratuity in lieu of retirement leave, when he ceases to be employed.

The insurance officer pointed out also that Unemployment Insurance Benefit Regulations clearly provide for the allocation, as earnings, of retirement leave credits or payments in lieu thereof. Such payments received in a lump sum are allocated in accordance with the provisions, and such allocation is not subject to a continuation or extension of the claimant's period of service.

"The circumstances of the present case," he concluded "are similar to those set out in CUB 1933, to which the board's attention was invited. The basis for determining that retirement leave credits or payments in lieu thereof are earnings is clearly set out in that decision. It is respectfully submitted that the board of referees' decision should be reversed and the insurance officer's appeal upheld."

Considerations and Conclusions

Regulation 172(2)(f) provides that the following income shall not be considered as earnings:

> Bonuses, gratuities, severance pay or retirement payments payable at the time of, or after, the termination of the claimant's contract of service or prior thereto in contemplation of the termination. . . .

Regulation 173 provides for the allocation of the earnings mentioned in its sub-section (4) as follows:

> Retirement leave credits or payments in lieu thereof, wages in lieu of notice, workmen's compensation total temporary disability payments, and other moneys received at the occasion of separation shall, subject to subsection (5), be allocated to the period for which payable.

In CUB 1933, a cash "gratuity" equal to two months' salary was paid in lieu of retirement leave credits to a claimant who, in 1961, had been released by her employer due to pregnancy; and the record showed that such payment was conditional upon the employer's certification that her service had been satisfactory. The Umpire ruled that the lump sum which the claimant had received as a "cash gratuity" represented, in fact, a payment in lieu of retirement leave credits. He said:

> Inasmuch as, according to the evidence, the certification that the claimant's service had been satisfactory was a condition of her contract of employment and that condition was fulfilled in her case, the question of gratuity does not arise. . . .
>
> In order to constitute a cash gratuity, the moneys received by the claimant should have been paid notwithstanding the non-fulfilment of the condition regarding the certification of satisfactory service.

In the instant case, the payment which the claimant received was not subject to the aforementioned certification, and the law under which the payment was made, i.e., section 59(1) of the Civil Service Regulations as amended in 1963, appears to entitle the employee coming under subsection (1) to claim, as of right, either retirement leave or a gratuity in lieu thereof, the granting of a gratuity in lieu of leave, when so requested, being left at the discretion of the deputy head.

From the foregoing it can be seen that the money which the claimant received in lieu of retirement leave was paid to him in fulfilment of a condition of his contract of employment. As a result, it was not a gratuity nor any one of the kinds of earnings specifically mentioned in paragraph (f) of Regulation 172(2). It would have been a gratuity to the extent of the equivalent of two weeks' pay if the claimant had received an amount equal to ten weeks' pay instead of eight.

I, therefore, decide to allow the insurance officer's appeal.

CUB 2650

The claimant, who had been employed as a brakeman by a railway company since October 1943, was suspended by his employer effective December 24, 1965, after a train accident that had occurred on the same day.

When the claimant filed his claim for benefit he attached a copy of the transcript of the hearing before the railway board which investigated the accident.

The insurance officer decided that the claimant had lost his employment by reason of his own misconduct within the meaning of the Act, but that there were extenuating circumstances sufficient to reduce the period of disqualification to two weeks. The claimant was notified to this effect.

The claimant appealed this disqualification to the board of referees. The reasons for appeal, as given by the claimant's Union, the Brotherhood of Railroad Trainmen, were:

> . . . Unquestionably the prime contributing cause of this accident is the arrangement of these two signals. It constitutes a trap into which sooner or later some engineman or train crew would fall victim. In the case of Mr. . . . . , I believe it would be impossible to find an engineman or trainman more conversant with the operating rules, or who adheres to them to a greater degree. [The claimant] had every confidence that [the engineman] understood the signal indications he called out and certainly that [the claimant] knew much better than he, how much of a brake application to make and when to make it in any given situation.
>
> In this case, I believe it extremely significant that on the notices of discipline handed out by the company, no rule violations are charged. This is very unusual, and we submit that the reason for this omission could be that company officials realize a misleading indication was given to this train by the position of the signals and therefore the company, without admitting it, are assuming some responsibility for the accident.
>
> In the case of [the claimant], to charge him with responsibility in connection with this accident, and to consider that his actions amounted to misconduct, is an injustice. There was no defiance of authority or wilful violation of rules or even a hint of personal misconduct. This man was carrying out his duties exactly in the manner he believed was required of him. His discipline record was clear as evidenced by the enclosed copy of his suspension notice. I believe the magnitude of the injustice imposed on this man by the company could be better understood if a parallel is drawn between the penalty assessed in this case and that of the average fine handed out in our courts of law for a highway traffic act violation. Even if no extenuating circumstances were present to affect the decision, it would be unheard-of in a property damage accident for a fine to be assessed in the amount of three months' earnings of the party involved. . . .

The board heard the appeal and the majority upheld the insurance officer. It pointed out that the claimant had been questioned particularly as to his knowledge and practice with respect to the regulations, and he had himself admitted that certain operating rules were not followed.

The dissenting board member stated that the claimant had an enviable record, and that misconduct should therefore be discounted. He said that there was some doubt involved in the claimant's suspension, and that he should not be penalized further by the Unemployment Insurance Commission. He added that the insurance officer's two weeks disqualification instead of the maximum six weeks indicated that there was considerable doubt as to misconduct.

The brotherhood appealed once again to the Umpire, repeating the events leading up to the accident, and adding that,

because of the claimant's enviable record, and the customary discharge of his duties in the best interests of the company, to charge him with misconduct would be a grave injustice on the part of the UIC. The brotherhood added that there had been no defiance of authority or wilful violation of the rules, or even a hint of personal misconduct.

> The suspension from duty was the result of a misunderstanding or error in judgment in that [the] brakeman . . . believed that [the] engineman . . . knew exactly what the signal indicated, and the correct action to take in this situation. We therefore contend that no action on the part of [the claimant] can be construed as misconduct under . . . the Unemployment Insurance Act.
>
> The engineman at the controls, and who was at the head end of this train, received his benefits in full when he went before a board of referees. This man who in our estimation made the mistake of interpreting this signal wrongly, was not found to be guilty of misconduct under the meaning of the Act. We also believe [the claimant] was unfairly assessed with the responsibility of this accident.

The brotherhood then asked that the period of disqualification from benefits be eliminated, in order to relieve "the undue hardships that were experienced by this man and his family."

The insurance officer commented that the dissenting board member's statement to the effect that the insurance officer imposed a two-week disqualification instead of the maximum six weeks because there was considerable doubt as to misconduct was only a presumption on his part. "It is an established principle that the benefit of any reasonable doubt must be given to the claimant," he said.

> In the present case the insurance officer concluded that extenuating circumstances existed and he reduced the period of disqualification accordingly. The Umpire has pointed out that the imposition of a disqualification of less than six weeks cannot be taken as an indication that the insurance officer was in doubt as to whether any disqualification was warranted. Rather, it merely represents a case where discretionary powers have been used to shorten the period because in the opinion of the insurance officer, extenuating circumstances were present (CUB 973) (L.G. 1954, p. 275).

The Brotherhood of Railroad Trainmen made a further statement on behalf of the claimant and was also granted an oral hearing on October 6, 1966.

Considerations and Conclusions

We are here dealing with the claimant's own case, and the fact that the same board of referees decided in favour of one of his fellow-workers involved in the same accident cannot be taken into account because his case is not before me.

The record shows that, on December 24, 1965, the claimant was careless in the discharge of his duties as a brakeman in that, as he himself declared before the railway board which investigated the accident in question, he did not call "in the proper manner" the indication of the train order signal to the engineman. In fact, the claimant "just repeated" the engineman's call without verifying its accuracy.

As the Umpire said in decision CUB 1877:

> While no person is infallible, yet it must be borne in mind that it was the claimant's responsibility to see that the said operating rule was carried out to the letter inasmuch as not only his personal safety but that of others and railway property stood to be affected.

In view of the foregoing, I consider that the claimant's misconduct has been satisfactorily proved and that, by imposing on him a disqualification of two weeks only, the mitigating circumstances which might have existed in this case were properly taken into account.

As a consequence, I decide to dismiss the brotherhood's appeal.

Canadian Railway Office of Arbitration: Case No. 49

A dispute involving the dismissal of a locomotive fireman early in 1964 for allegedly attempting to defraud the company, and a request for full payment of time lost, was dealt with by the Canadian Railway Office of Arbitration at a hearing in Montreal on January 9, 1967.

The arbitrator upheld the claim, which asked that demerit marks should be expunged from the fireman's record, and that the claimant should be reimbursed for time lost during his absence from the company's employ, with no loss of seniority.

CASE No. 49

Dispute between the Pacific Great Eastern Railway Company and the Brotherhood of Locomotive Engineers over the assessment of demerit marks and consequent dismissal of a locomotive fireman accused of attempting to defraud the company.

Before the alleged offence, there had been dissatisfaction among crew members over what they considered the unwarranted removal of "passing tracks." After the tracks were removed, they complained about the delays in reaching destinations resulting in an increase in time spent on duty. On the day in question, the claimant had spent 40 minutes of his run of 12 hours and 40 minutes waiting on a siding for another train to pass, and he subsequently submitted a claim for payment for "road overtime" resulting from what he called an "unnecessary lack of passing tracks."

During the official investigation, a statement was submitted by the fireman explaining that he had intended only to underline the unrest caused by the removal of the passing tracks, and the general feeling among the employees that they should not have to give an appreciable amount of free time to the company. He said he had had no intention of accepting payment for the overtime, and he was astounded when the company adjudged his claim, which was so obviously an invalid one, as "a fraudulent attempt to obtain a sum to which he was not entitled." The company, however, chose to ignore the statement and based their suspicion of fraud on the terse replies the fireman made to their leading questions.

When asked by the company to cite the clause of the collective agreement on which he had based his claim, the fireman said there was no such clause, and he readily admitted that he was claiming time to which he was not entitled under the collective agreement. The resultant 20-demerit-mark penalty, when added to 40 demerit marks that he had received over a previous incident during the twelve-month period, totalled the 60 demerit marks that warranted dismissal.

The arbitrator, while not condoning the manner in which the claimant had presented his grievance against the company, could not understand how the company, with the fireman's statement in hand, could have reached the conclusion that there had been an attempt to defraud. The arbitrator said he had no hesitation in finding that the penalty of 20 demerit marks was improperly imposed and that it should be removed from the claimant's work record. He directed that the claimant be returned to his former position with the company, with no loss of seniority, and that he be paid what he would have earned in that employment during the time lost through his dismissal, less any sum received from other employment.

Canadian Labour Congress Brief

Continued from page 230

the July 1, 1967 target date for the introduction of Medicare, was "based on false grounds."

It was contended in the brief that "the argument that the implementation of Medicare would have an inflationary effect is sheer sophistry. The legislation would not have caused a flow of new money into the hands of consumers or of the providers of medical services. It would have been (and will be) in very large measure merely a transfer of premium payments from public to private agencies.

"Any delay in putting the legislation into effect, therefore, is a social loss to Canada and an injustice to those who might have benefited from the legislation a whole year earlier."

Referring to other social legislation, the Congress made strong representations for a review of family allowances, which it felt could be "a significant contribution to the war on poverty," and the granting of Old Age Security Pensions of $115 a month at age 65, without a means test.

Minimum Wage Revision

The Government was urged by the Congress to establish a minimum wage of $1.50 an hour, as it had been requested to do in an earlier brief. The CLC warned that in spite of the recency of the creation of the $1.25 figure, it did not want the Government to consider the new plea as "merely a form of one-upmanship."

The Congress noted that it considers the minimum wage to be an integral part of any campaign to combat poverty and raise living standards, and "we take this opportunity to remind you that Canada in 1964 voted in favour of an International Labour Organization Resolution which, among other things, stated that adequate minimum standards of living should be ensured through the establishment of a dynamic minimum wage level and a dynamic level of social security measures, adjusted periodically to take full account of economic growth and to have due regard to increases in the cost of living. "We consider that the time is appropriate to review the present minimum wage."

It was pointed out in the brief that a number of years have passed since the Unemployment Insurance Act had been amended, and that some revisions are now in order. It asked that the Government give immediate attention to the matter.

One of the greatest social challenges facing Canadians is the provision of sufficient and adequate housing, the CLC noted in its brief. And it contended that home building has not even kept pace with the growth of population. It was estimated, the CLC said, that at least 170,000 housing-unit starts a year are needed in Canada to maintain even present living standards and that it was expected that final tallies would show that there were only 130,000 housing-unit starts in 1966.

The brief noted that the drop in starts had occurred mainly in the low rental housing sphere, where the greatest need existed, with the result that the situation was "particularly acute because the fastest growing group in Canada is the 20-to 24-year-old group that is forming new families and requires housing."

The Congress proposed that the Government make funds available for the construction of housing for lower-and middle-income groups. Experience indicated that Government action in increasing the National Housing Act interest rate to 7¼ per cent, hoping that it would encourage more active participation by approved lenders in the housing field, had failed to achieve its purpose.

"There should be vast expansion of the public housing program, and the provinces should be encouraged to participate to a much greater degree," the brief suggested.

Auto Trade Agreement

The CLC challenged the Government to take action to assist workers who have been adversely affected by the auto trade agreement (L.G. 1965, p. 320), adding that failure to do so was a detriment to support of freer trade.

It was also noted in the brief that the agreement had failed to provide benefits for Canadian consumers.

"Price increases, in the United States as well as in Canada," claimed the CLC, "were inflationary and unjustified in the light of indefensively high profits and substantial savings from rapid productivity advances in the industries in both countries—especially in the Canadian industry, which is now relieved of high-cost, low-volume product lines thanks to the agreement."

It was ironic, the Congress felt, to note that the very efficiencies "which should have been reflected in price reductions to consumers are instead the cause of severe dislocations of employment, involving thousands of workers in the auto and auto parts industries in Canada."

Immigration Policies

Some obvious contradictions were evident in the Government's recently announced immigration policies, the Congress asserted. The placing of emphasis on bringing in well educated and skilled immigrants meant the perpetuation of the kind of exclusive policies that revision of the immigration act was intended to exclude. The Congress expressed support for the announced intention to admit immigrants on humane grounds and to remove standards of a discriminatory nature.

The brief pointed out that the "Congress is not opposed to immigration as such. It has, however, taken the position that immigration must be associated with economic planning in general, and that a long-term immigration policy must be related to other economic policies to maintain a buoyant economy and high levels of employment."

Dealing with the case of skilled workers, the brief drew attention to the fact that in countries where the greatest source of skilled immigrants exists, skilled workers are in short supply.

The brief suggested also that there should be a readiness, particularly on the

CLC urges expansion For Women's Bureau

The Canadian Labour Congress annual brief to the federal Government, presented on February 8 (see also p. 230), expressed concern for the well-being and care of the increasing number of children of working mothers. Concern was also expressed over the large number of women in the labour force who work under conditions less favourable than those for men insofar as pay and other conditions of employment are concerned.

Although the CLC lauded the work of the Women's Bureau, especially the contributions made since its inception under its first Director, Miss Marion V. Royce, it urged an expansion of staff and budget for research and publicity purposes in order to keep the public properly informed on those matters coming within the Bureau's frame of reference.

part of prospective employers, to engage in the education and training of immigrants.

Consumers' Affairs

The Congress advocated the creation of a department of consumer affairs that could give Canadians protection against unwarranted price boosts.

"There should be some agency," the brief said, "which would be able to exercise a restraining influence on price changes by its authority to investigate and publicize those price changes which in its opinion were unwarranted . . . a fact-finding body before which both consumers and producers could appear. . . ."

It was also suggested by the Congress that such a body could look into cases involving misleading advertising, deceptive packaging, and the offering to the public of poor quality merchandise.

Natural Resources

Steps should be taken on several fronts to give greater protection to Canada's natural resources, the brief recommended, particularly in the fields of water pollution, forest conservation and preservation of the country's national parks. Failure to implement effective measures could deprive future generations of their Canadian heritage.

Use of Injunctions

The brief assumed that the Government is "familiar with the CLC views on the use of injunctions in labour disputes, even though you might be disposed to say that this does not come within your jurisdiction. There is, however, one aspect which is clearly within the federal domain, and that is the matter of picketing as defined in the Criminal Code.

"We have on previous occasions called on you to amend the Code to clarify and protect the right of trade unionists to picket. We believe that the kind of amendments which we have sought and are still seeking might contribute toward a lessening of the use of the injunction and a strengthening of what is an essential civil right—the right of workers to demonstrate the fact that they are on strike.

"We are increasingly alarmed at the presumption by legislatures, both federal and provincial, and the judiciary, that employers have some prior right which must be respected even at the cost of civil liberties.

"If there is to be labour relations legislation, it should not end up as a convenient tool for the employer to use against the trade union of his employees, but as a mechanism for resolving disputes fairly and objectively. . . ."

The Congress commended the Government for enacting Bill C-170, the Public Service Staff Relations Act, but pointed out that "The real test of the legislation, however, lies ahead when collective bargaining will begin. Whether it will be collective bargaining carried on in good faith, or merely an exercise in futility by the employee organizations in the public service, will depend in very large measure on your own position as the employer.

"It will depend not only on the attitudes which you bring to the bargaining table, but the personnel policies which you establish and the instructions which you issue to those who are engaged in the managerial function on your behalf.

"The administration of grievance procedures, their adjudication, and the work of arbitration tribunals will also colour the labour-management relationships which will develop.

"Although collective bargaining in the public service already exists in other parts of Canada, its introduction in the federal field represents bargaining on a scale unknown before, and its results may have far-reaching effects.

"We, for our part, propose to do everything in our power to help develop a sophisticated and mature labour-management relationship in the public service of Canada. We hope that you will direct your energies in the same direction."

General Observations

The brief drew the Government's special attention to a number of matters which it felt were of prime interest and importance, not only to the Congress and all Canadians, but even to the world at large.

Commenting on the establishment of the Women's Bureau by the Canada Department of Labour, it said that the Bureau has an important role to play in drawing attention to any disadvantages suffered by women in the labour force, merely because they are women. . . .

On the topic of radio and television broadcasting the brief said: "The Congress is in favour of a greater degree of control of broadcasting than exists at present, and therefore supports the conclusions of the Fowler Report in this connection. . . ."

Referring to Canada's Indians and Eskimos, the brief declared that Canada's treatment of these minorities would remain a blot on the national conscience until the country displayed more energy, or diverted more resources and exercised more imagination in rescuing these people from their desperate situation.

"Better living conditions, better health facilities, better educational opportunities and vocational training are indispensable if these goals are to be attained. You have declared your intention to embark on a war against poverty. This is an important salient in which you should be immediately involved and on a large scale."

Referring to the U.S. Copyright Act, the brief said that the Act has caused the Canadian graphic arts industry to suffer certain disadvantages — namely, smaller volume of business, and fewer jobs than might otherwise be available. "We ask you, therefore, to enter into discussion with the United States Government to remedy the situation by a suitable amendment to the Copyright Act."

The brief requested:

—an amendment to the Income Tax Act concerning deductible expenditures by employees;

—establishment of a national advisory committee on fair employment practices;

—effective measures to make possible a viable Canadian merchant marine and a Canadian deep sea fleet under Canadian ownership;

—the establishment of an air transport industry council;

—a substantial increase in federal support for medical research;

—the elimination of the federal sales tax on drugs; and

—the reservation of coastal and intercoastal trade to vessels built and manned in Canada, and the reservation to Canadian and American vessels of trade on our inland waters on an equitable basis.

International Affairs

In the sphere of international relations, the Congress made a strong plea for an increase in the Canadian aid program abroad, because of a widening gulf between the rich and the poor nations that constituted a serious threat to world peace and the well-being of all mankind.

Although the Congress was aware that there had been a slow increase in Canada's allocations for external aid, it emphasized the need for "a bold and imaginative program," including such things as:

—spending one per cent of the gross national product on external aid and development;

—exploration of all possible avenues of granting special tariff and trade concessions to new countries;

—support, through international agencies, of reasonable requests for easier trade, fiscal and credit facilities, and increased allocations for Canada's Soft Loan Assistance Program;

—expansion of facilities in Canada and abroad for training qualified personnel from developing countries; and
—conclusion of agreements with specialized agencies of the United Nations for technical assistance programs.

A more forceful and imaginative method of seeking ways to end the war in Viet Nam was urged upon the Government. The brief also urged it to "observe the spirit and the letter of mandatory sanctions against Rhodesia," and to support the adoption and implementation of more effective measures by the United Nations, should present sanctions fail.

Finally, the Congress urged the Canadian Government to:

(1) reach an international agreement to prevent the spread of nuclear weapons;
(2) implement a total ban on nuclear tests under a system of effective international control;
(3) settle outstanding political and territorial issues through peaceful negotiation;
(4) complete general and controlled disarmament of all nuclear, chemical, bacteriological and conventional weapons by treaty;
(5) work towards effective U.N. presence and influences in disarmament negotiations; and
(6) seek abandonment of the nuclear role by Canadian armed forces, and removal of all nuclear systems from Canadian soil.

The Government's Reply

Responding to the CLC's annual brief, Prime Minister Lester B. Pearson said that both the Government and the CLC reflected "an institutional point of view" on many issues of concern in the labour field. He said that the point of view of the Government was to advance and maintain the public interest.

About the CLC's charges that the Government used the coercive powers of the state to force striking workers back to work on one occasion, and used the threat of such powers in a number of others," Mr. Pearson said the Government did its best to recognize the established processes of collective bargaining.

The introduction of legislation to provide for collective bargaining in the Civil Service (Bill C-170) was evidence of the Government's respect for the essential progress of the process of collective bargaining. He pointed out that there was a need to develop new and constructive attitudes so that the process could be more effective. The Prime Minister called upon the Congress to work together with the Government and management groups to form a tripartite approach to solving the problems they share in common.

Mr. Pearson commented on the Task Force headed by Dean H. D. Woods (L.G., Nov. 1966, p. 631), saying that it was established, "not as a means to delay solution of labour disputes, but as a means to get background information on which to base" labour negotiations.

Reacting to charges that the Task Force was too neutral and too academic, the Prime Minister called for the direct association of labour with the consulting committees to study labour relations legislation. Labour was well represented on the Economic Council of Canada, he said, and labour committees can contribute to the study of labour matters. He added that labour organizations can submit proposals to the Government for discussion regarding the introduction of legislation.

Mr. Pearson then mentioned that the postponement of social legislation for Medicare did not mean that the Government had failed to live up to its expectation or to carry out its promises.

Hon. John R. Nicholson

After reiterating some of the Prime Minister's remarks concerning the Government's approach to the problems of labour and management, Mr. Nicholson said that his attitude, the attitude of the Department of Labour, and the attitude of the Government were that collective bargaining was the best process for the settlement of labour-management disputes.

He acknowledged that there had been resort to legislative action to end labour-management disputes, and he asked the Congress to remember the crisis situation that existed in 1966. He stated that there was no attempt to introduce legislation during disputes in the Ontario trucking industry and Air Canada. In the case of the 1966 railway dispute, the Government weighed the position of labour and all other factors before taking action, the Minister said.

Mr. Nicholson added that there were many positions on which the Congress and the Cabinet were agreed. He said that the Department would welcome more men with a labour background to work with the Department, and he mentioned that the Assistant Director of the Department's Labour-Management Consultation Branch, and the Director of the Conciliation and Arbitration Branch were union men.

The Minister of Labour went on to say that changes in labour policies should not be made in a crisis atmosphere. He hoped that there would be a better atmosphere for change in 1967 and 1968. He expressed "a sincere hope that the Task Force will bring in such suggestions as outlined in the brief."

Concerning the Unemployment Insurance Commission, the Minister shared the view that it was time for change in its legislation, and that the ceiling on benefits should be adjusted. He agreed that the benefits were out of line with present standards. He reminded the Congress representatives that the responsibility for recommending changes, however, lies within the Commission itself; the Cabinet then considers the recommendations.

Mr. Nicholson said that there were 167,000 housing starts and 163,000 housing units completed in 1966. Part of these were for people of low income. He added that, in 1963, there were 700 housing starts in the province of Ontario; in 1966 the number was 7,000; and in 1967 the figure would likely double to 14,000.

The Minister noted also that "the shortage of public housing was not the fault of the federal Government." Each province must tackle its housing problems individually, because of regional differences. He said that all requests from the provinces for assistance received attention, and that many were acted upon within months, or even weeks.

Hon. Jean Marchand

The Minister of Manpower and Immigration said that, contrary to a suggestion made in the CLC brief, he did not know of any requests before the Canada Labour Relations Board to change the representation on the Board.

Mr. Marchand was in agreement with the two principles mentioned in the brief favouring immigration. He said the White Paper on Immigration reflected what had been recommended by the Economic Council. He pointed out that the White Paper does not insist that immigrants be skilled as well as educated; if they can be retrained, there is no requirement that they be both.

It was also noted by Mr. Marchand that the first duty was to retrain the Canadian labour force. He added that it was not true that there might be a shortage of skilled and well educated immigrants at this time. He stressed that Canada would not accept cheap labour or unskilled labour that would compete with Canadian workers.

In discussing the Government's manpower policy, the Minister said, "We have accepted the principle of the man who must be retrained, and he is entitled to an

allowance while in the process. The amount is not important." He mentioned that the amount could be in the area of $90 and $125.

Mr. Marchand said that the results of the change in the automobile trade agreement was "not the only case in which the workers were affected by Government decisions." He attributed other changes to monetary policies, fiscal policies or other Government programs.

Hon. Mitchell Sharp

The Minister of Finance said that the purpose of the Government's fiscal and monetary policy is "to prolong economic expansion." This could be indefinite if given a stable international scene, he explained. "This means more than just stimulating the economy."

Mr. Sharp said that there was a change in the public psychology in which it was believed that all costs would go up. He said that the Government had to do two things: make sure the Government didn't interfere with the economy, and look at Government spending. The Government had to consider either a budgetary deficit or an increase in taxes.

The Government resolved not to have high interests, he said. "Therefore, priorities had to be established. The Government chose to introduce old age pensions and hence Medicare was postponed for one year.

Hon. Paul Martin

The Minister of External Affairs discussed the recommendation to contribute one per cent of the gross national product for the economic growth of developing countries. He mentioned that Canada had doubled its external aid. He also commented that in some quarters complaints had been heard about Canada's contributions abroad, coupled with suggestions that the contributions were too large already.

The Minister said that Canada was trying to end the war in Viet Nam. He noted that, at the present time, "there is a truce for a limited period but I don't know if it can be extended beyond four days." He said that Canada is looking for reciprocal action on the part of the participants in the Viet Nam war.

Mr. Martin said that racist policies cannot be condoned in Rhodesia or in South Africa. Canada condemned the policy of apartheid used in South Africa's former mandate. He said that Canada was one of 14 countries in the United Nations trying to suggest how to condemn apartheid.

The Minister discussed the international agreement against the spread of nuclear weapons. "Canada is working strongly to limit the nuclear club," he said. An agreement was likely to result because of the efforts of both the great powers, and countries like Canada, to confine the weapons to the five existing nuclear powers. He reiterated Mr. Sharp's statement that "the Government was dependent on peace for full employment and economic growth."

Canadian Railway Labour Executives' Association Brief

Continued from page 231

with them. He added that the residual non-operational groups had entered into an agreement for a longer period of time than had been indicated in the Freedman Report.

The Minister asked the Association to recall the "crisis atmosphere" of 1966. "You have realized how reluctant we are to have other than the freest and fullest collective bargaining. It was only after the most careful consideration that we introduced the railway legislation [ending the 1966 rail strike; and we provided] for further conciliation and mediation." He explained that the Government thought that it would be "better to have the 'task force' study this thing objectively and bring in its submissions . . . and in a more stable atmosphere, give consideration to what is the best way to handle problems such as you refer to in your brief."

Hon. J. W. Pickersgill

The Minister of Transport remarked that the law with respect to the St. Lawrence Seaway toll structure sets the objective for policy in keeping with recommendations as outlined in the brief. As long as the law is there, "it is the duty of the Government, as far as it is possible, to try to carry out that objective."

On the subject of providing greater protection at level crossings, Mr. Pickersgill said that he will ask the new Transport Commission "to undertake research into better methods of protection at crossings." He explained that an obstacle to the federal Government was to provide for the complete cost. The Government must have municipal participation, although it will pay the greater share, he said.

Mr. Pickersgill announced that Bill C-231 would receive Royal Assent later in the afternoon, and "it does not in fact contain any of the things you wanted in it, not even the 'pitifully inadequate' amendments proposed in the Bill of 1964." No reference was made to the companies' having any responsibility for those who will be severed from employment, nor to discussion between labour-management groups on the subject of technological change as recommended in the Freedman Report, he told the Association. Mr. Pickersgill explained that the Minister of Transport was not the one to introduce that legislation; it was up to the Minister of Labour. By introducing such provisions, Mr. Pickersgill added, he would open up controversy that would delay the bill for another six months.

Rt. Hon. Lester B. Pearson

The Prime Minister told the Association that the Task Force was not a delaying action. He said that the Government will press the Task Force and bring collective bargaining more into line with today's situations. He hoped that there will be continuous negotiation and discussion between labour and management groups, so that the Government will not be confronted with the conflict of public interest, and the problems of maintaining collective bargaining and the right to strike, which flows from it.

Labour brief urges boost in minimum wage

The Alberta Federation of Labour called for an increase in the province's minimum wage from $1 to $1.50 an hour in its annual submission to the provincial Government on January 19.

Representatives of the 35,000-member Federation pointed out that the third Annual Review of the Economic Council of Canada ranked Alberta among the three richest provinces, it having a per capita income in 1965 of $1,974. On this basis, the Federation claims, Alberta can afford a minimum wage rate of $1.50 an hour or more because "a substantially higher rate is required in Alberta, with its undoubtedly higher cost of living."

The brief refuted charges that the minimum wage increase would bankrupt the employers and damage the economy. "As the history of our country and other countries shows, the progressive introduction of such legislation has been accompanied by economic growth rather than by social and economic setbacks."

Manpower Studies

Part II

A selected bibliography for policy and research

This is the second instalment of a bibliography compiled from recent literature on manpower and manpower mobility. The first instalment appeared in the March issue of the LABOUR GAZETTE. *Prepared by Mrs. Barbara Alexandrin and Dr. A. N. Polianski for the Manpower Mobility Unit of the Department of Manpower and Immigration with the co-operation of the Canada Department of Labour Library, the bibliography is replacing the regular list of publications recently received in the Department's Library. Readers are reminded that the Library does not have all the books and items listed in this bibliography.*

*Revised. †Preliminary.

‡Includes post office wages and salaries. **Figures in this column are for total labour income, Canada, but are not totals of the figures in the remaining columns of this table, as figures for labour income in Agriculture, Fishing and Trapping are not shown.

NOTE: Monthly figures may not add to annual totals because of rounding.

SOURCE: *Estimates of Labour Income*, DBS.

Tables C-1, C-2, and C-4 are based on reports from employers having 20 or more employees in any month of the year; at August 1966, employers in the principal non-agricultural industries reported a total employment of 3,679,561. Table C-3 gives estimates of total employment, by industry divisions, for the provinces and Canada, derived from the survey of establishments employing 20 or more persons and from a sample survey of establishments employing less than 20 persons. Tables C-5 to C-7 are based on reports from a somewhat smaller number of firms than Tables C-1, C-2 and C-4. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1, C-2 and C-4 relate to salaried employees as well as to all wage-earners in the reporting firms.

D—Manpower Division

Statistics presented in the following tables relate to registrations for employment and vacancies received from employers at Canada Manpower Centres (formerly NES offices). These data are derived from reports prepared in the Department of Manpower and Immigration, and processed in the Unemployment Insurance, Pensions and Manpower Section, DBS. Data are not comparable with previously published reports. See also Technical Note, page 242.

E—Unemployment Insurance

Unemployment insurance statistics emanate from the operations of the Unemployment Insurance Act, and relate to persons in contact with the Unemployment Insurance Commission, either as contributors or claimants. The data are compiled in the Unemployment Insurance, Pensions and Manpower Section, DBS, from information supplied by the UIC. The source for Tables E-1 to E-4 is *The Statistical Report on the Operation of the Unemployment Insurance Act*. For further information regarding the nature of the data see Technical Note, page 219, March issue.

TABLE E-1—Estimates of the Insured Population under the Unemployment Insurance Act

End of	*Total*	*Employed*	*Claimants*
1966—October	4,582,000	4,397,700	184,300

*The bulk of the cases in this group were on claim from 27-39 weeks.
NOTE: Values less than 50 are subject to relatively large sampling variability.

Technical Note to "D" Tables

Continued from page 242

The following comments pertain specifically to Tables D-1 to D-4:

Table D-1

(a) Unfilled Vacancies represents an inventory of employers' vacancies unfilled at the close of business on the day indicated. Deferred vacancies — those on which employers are not prepared to accept referrals within 31 days—are excluded from this series. Canada Manpower Centres act on vacancies as soon as possible after they are received, so that unfilled vacancies represent only a proportion of the vacancies listed by the Centres and consist of three main groups: (1) those reported to the office shortly before the inventory is taken; (2) those on which applicants have been referred but on which employers have not yet confirmed placements: (3) those that are difficult to fill because of a local (or wider) occupational shortage, or because of particular working conditions.

Unfilled Vacancies is, consequently, a biased sample of vacancies notified.

(b) Registration on File represents an inventory of applications for employment at the close of business on the day indicated, excluding certain categories such as persons who are employed but who are seeking other work, or those who have registered for employment in advance of their availability.

Table D-2

(a) Registrations Received consists of both new and renewal applications for employment received during the period. An individual may register more than once in a period, so the figures do not therefore reflect the total number of persons registering in a reporting period.

(b) Vacancies Notified is the total of job openings reported to Canada Manpower Centres during the period indicated.

Table D-3 (formerly D-4)

This table shows a breakdown by sex and broad occupational groups of the inventory of registration on file (see item (b) in note to D-1 above). As some 20,000 occupations are compressed into 28 general classifications, caution must be exercised in forming conclusions about any one group.

Table D-4 (formerly D-5)

This table presents registrations on file at Canada Manpower Centres. The figures do not relate exclusively to the municipalities concerned, but reflect the total registrations on hand from the areas served by the Canada Manpower Centres shown in the Table.

*St. John's index on the base June 1951 = 100.

NOTE: Indexes above measure percentage changes in prices over time in each city and should not be used to compare actual levels of prices as between cities.

G—Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Canada Department of Labour on the basis of reports from the Manpower Division, Department of Manpower and Immigration. The first three tables in this section cover strikes and lockouts that amount to ten or more man-days. The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the union directly involved in the disputes leading to the work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For further notes on the series, see page 109, February issue.

TABLE G-1—Strikes and Lockouts, 1962-1967

Month or Year	Strikes and Lockouts Beginning During Month or Year	Strikes and Lockouts in Existence During Month or Year: Strikes and Lockouts	Strikes and Lockouts in Existence During Month or Year: Workers Involved	Duration in Man-Days: Man-Days	Duration in Man-Days: Per Cent of Estimated Working Time

Food Prices and the Cost of Living

Public concern over food prices in Canada during 1966 prompted investigation by a special committee of the Senate and the House of Commons, formed originally to examine consumer credit

Canadian housewives, who began last year to question the high cost of eating, started a protest that eventually became the concern of a special joint committee of the Senate and House of Commons on consumer credit.

During the first two weeks of September 1966, the Senate and the House of Commons agreed to expand the terms of reference of a Joint Committee that had been appointed earlier to examine consumer credit. The Committee's added responsibility was "to enquire into and report upon the trends and factors that may have contributed to changes in the cost of living in Canada in recent months."

Owing to public concern over food prices, the Committee decided first to investigate the reasons for the upward trend. They met on 42 occasions between September 28 and December 13, 1966 and heard testimony from a representative cross-section of individuals and organizations.

The Committee was chaired jointly by Senator David A. Croll and Member of Parliament Ron Basford. An interim report, *Consumer Credit (Prices)* was released in January.

Many Factors

The Committee's first general observation in the interim report tabled in both Houses of Parliament on December 20, 1966 was that the factors influencing the cost of living in Canada are many and varied. Some changes could be explained by the increased price of imports. But there was also evidence that consumer prices moved in response to changed market conditions in other sectors of the economy or in markets outside Canada.

Although these conditions affected the slice of the national income that was going to labour, farmers, business and others, the rise in the cost of living in Canada could not be blamed on unusual or unwarranted increases in the respective shares. Nor could any group or sector of the economy be singled out and blamed for the recent increase in consumer prices. The Committee's general conclusions were that there have been many factors contributing to the change in the cost of living, particularly in the price of food.

The Committee experienced some difficulty in obtaining satisfactory statistics on the prices of a number of important commodities—particularly meat—at the firm, wholesale and retail levels. Members believed that this was partly owing to the division of responsibility between the Department of Agriculture and the Dominion Bureau of Statistics.

Co-ordination Needed

Subsequently the Committee urged more interdepartmental co-ordination in the compilation of price statistics, and the diversion of additional staff to the Dominion Bureau of Statistics to help expand and improve the collection of statistical data on prices. It stated that there was a pressing need for DBS to broaden the scope of its retail pricing program to encompass a wider range of qualities of goods and services, and to allow more useful item price averages to be derived, by cities, on a continuing basis.

Although the Committee recognized that there are technical problems involved in compiling accurate price statistics, it declared that "it is an appropriate Government function to disseminate price information as widely as possible to the consuming public."

The Committee concluded that economics cannot be the exclusive province of experts, even though it has aspects that are technically complex. It therefore urged the establishment of a Senate and House of Commons joint committee whose primary aim would be to keep the whole field of consumer affairs under continuous review. The proposed committee would also be responsible for conducting surveys of economic developments that affect employment, income and consumption levels.

Consumer Demand

The Committee discovered an increasing tendency for consumers to buy "convenience foods" requiring a minimum of preparation. This trend was attributed to the unwillingness or inability of many consumers, particularly the increasing number of married women in the labour force, to devote much time to the preparation of food. They recommended that more attention be devoted to consumer education through the educational system, and by the wider distribution — through government channels — of information useful to the consumer.

The Committee urged that consumers be informed about physical properties such as weight, volume, quality, and number of units. This information should be available at the time of purchase, and should be expressed clearly and unequivocally. It said that the Government must take every measure within its power to protect the consumer against all forms of exploitation, and it recommended that:

—the product be described by its generic name when this is meaningful;
—products of a certain type, variety and quality be graded;
—packages be designed in sizes, shapes or dimensions that will not deceive or mislead retail purchasers;
—the net quantity of the contents in terms

NEW LEGISLATION

and the Federal Government Service

The Public Service Staff Relations Act, the Public Service Employment Act, and the Financial Administration Act have become law, and will affect some 200,000 federal Government employees

Far-reaching legislation, passed by Parliament in February, ushered in unprecedented changes in labour-management relations in the federal Government service when three bills became law as the Public Service Staff Relations Act, the Public Service Employment Act, and the Financial Administration Act. Some 200,000 federal Government employees are affected.

The first of these Acts provided for the establishment of a system of collective bargaining, for the setting up of the necessary machinery in connection with it, and for methods of settling disputes and grievances in the public service; the second, which replaced the Civil Service Act, was concerned with the system of appointments and promotions in the public service; and the third established Treasury Board as the paramount authority in personnel management and in the organization of the public service.

The three Acts passed through Parliament as Bills C-170, C-181 and C-182.

Bill C-170 was introduced in the House by the Prime Minister on April 25, 1966 and was given first reading. The introductory resolution described it as "a measure to provide for the establishment of a system of collective bargaining applicable to employees in the public service of Canada, and for the resolution of disputes that may arise in the negotiation or conclusion of collective agreements applicable to such employees; to establish a process for the presentation of grievances of employees arising in connection with their employment, and to establish a system for the adjudication of grievances of employees; to provide for the establishment of a board, to be known as the Public Service Staff Relations Board, which shall be responsible for the administration of the said measure, and to provide further for the constitution and appointment of such other authorities, officers and employees as are required in connection with the administration of the said measure."

Bill C-181 was introduced by the Prime Minister on May 12, 1966. In speaking on the Bill at that time, the Minister of National Revenue said: "Under this particular measure, the Civil Service Act is to be replaced by a new statute to be known as the Public Service Employment Act. This measure will not only retain the merit system of appointment and promotion, and the type of job security long enjoyed by civil servants, but will extend them to thousands of additional government employees. The Civil Service Commission is to become the Public Service Commission and, within a wider jurisdiction, it is to be concerned exclusively with the staffing functions."

Explaining Bill C-182, introduced the same day by the Prime Minister, the Minister of National Revenue said in part: "This particular Bill proposes that Treasury Board be empowered to act for the governor in council on all matters relating to financial management, personnel management, general administrative policy, the organization of the public service and the control of establishments. In the personnel field, the Board would be responsible, among other things, for the determination of rates of pay, hours of work, leave and other conditions of employment; for the classification of positions and employees; for the establishment of standards of discipline; and for the promotion of safe and suitable working conditions."

The Public Service Staff Relations Act, besides providing for the establishment of the Public Service Staff Relations Board, sets out methods of obtaining certification as bargaining units, and the forms of negotiating through a conciliation process, and allows most public service employees to choose between the right to strike or the settlement of disputes by compulsory arbitration. It also provides for the appointment of an arbitration tribunal to settle disputes. Employees in essential services are not allowed to strike. Senior management, the RCMP and the armed forces are excluded from the operation of the Act.

Right to Strike Questioned

During debate on the bill in the Commons, some members of the opposition expressed doubt about the wisdom of allowing public service employees the right to strike. J. Patrick Nowlan (PC, Digby-Annapolis-Kings) said, "Frankly, I am against giving the right through legislation to public servants to strike. Compulsory arbitration is one matter, but the right to strike is an unfortunate blazing of a new trail which I cannot agree with."

The Minister of National Revenue said the Government assumed that the great majority of civil servants would choose arbitration rather than the right to strike. Jack Horner (PC, Acadia) asked why, if the Minister really believed that, it was necessary to allow public service em-

Collective Agreements in Manufacturing

Part II

Provisions Affecting Pay

Provisions dealt with in Part II of this study are those that affect pay, training or retraining, moving expenses or relocation allowances, contracting out, re-opening of agreements for negotiation of general wage increases, guaranteed employment or earnings, the supply of protective equipment or uniforms, and paid bereavement leave.

This is the second half of a study of 25 main types of provisions contained in 94 collective agreements in Canadian manufacturing industry. Part I, concerning vacation and holiday provisions, was published in the April issue of the LABOUR GAZETTE, p. 232.

The tables accompanying this part cover shift premiums, rest periods, compensation for work on paid holidays, length of probationary period, notice of layoff, call-in or call-back payments, and frequency of paydays. Tables covering a number of miscellaneous provisions are omitted, but the data they contain are summarized in the text below.

Payment of a premium for work on a second shift was provided for in 76 agreements covering 208,050 employees out of the 94 agreements covering 249,120 employees that came within the scope of the survey.

Provision for payment of a premium for work on a third shift was contained in 79 agreements affecting 211,400 employees. A few of the agreements, therefore, mentioned premium pay for a third shift, without saying anything about pay for a second shift.

The most common provision for work on a second shift was for premium pay of 8 or 9 cents an hour. This was contained in 25 agreements affecting 54,930 employees. For a third shift, the most common premium was 10, 11 or 12 cents an hour, which was provided for in 36 agreements covering 81,140 employees.

Compensation on Paid Holidays

A provision for pay for time worked on a paid holiday was contained in all but 7 of the 94 agreements. The most common provision was for time-and-a-half in addition to holiday pay. It was found in 40 agreements covering 87,430 employees.

Probationary Period

A probationary period for new employees was provided for in 75 agreements affecting 206,530 employees. The most common period was three months, which was stipulated in 36 agreements covering 102,610 workers.

Call-in Pay Guarantee

A guarantee of pay for a minimum period at a certain rate, in cases where persons were called to work outside their regular working hours, was contained in 77 agreements affecting 157,730 employees. A minimum of four hours at straight-time pay was the most common provision, being found in 31 agreements covering 73,190 employees.

Miscellaneous Provisions

Rest periods were mentioned in 34 agreements affecting 121,330 employees. The most common provision was for two periods amounting to a total of 20 minutes a day, which was found in 18 agreements affecting 81,090 employees.

Payment of wages once a week was the most common provision regarding frequency of paydays. Weekly payment was provided for in 22 agreements affecting 45,340 persons. Sixty-three of the agreements contained no provision regarding paydays.

Notice of layoff was stipulated in 41 agreements affecting 108,560 employees. The length of notice varied from one to seven days, and in three agreements it was 30 days. The most common provision was for seven days, which was found in 11 agreements affecting 28,300 employees.

Some provision regarding training, retraining or apprenticeship was found in 54 agreements covering 156,880 employees—that is, 57 per cent of the agreements affecting 63 per cent of the workers.

Moving expenses or relocation allowances, or both, were provided for in only six agreements (6 per cent) affecting 39,870 employees (16 per cent).

Some stipulation regarding contracting-out of work was contained in 16 agreements affecting 42,650 employees.

Compensation for time spent by union representatives in investigating grievances during working hours was provided for in

---

The findings of this survey are set out in the accompanying tables and in those that were published in the April issue.

The agreements used in the survey are the same as those used in the previous study, "Collective Agreements in Industry," (L.G., Oct. 1966, p. 564 and L.G., Nov. 1966, p. 640), except that only those in the manufacturing industrial group were included.

The study was made by Ross Charlton, Barry Maloney, and Daniel Stace of the Economics and Research Branch of the Department, under the supervision of Felix Quinet, Chief, Collective Bargaining Division.

In a few cases where the language used in the agreements left some doubt as to its meaning, the provisions could only be classified subject to the proviso that they may be open to other interpretations as well.

Some Form of General Wage Adjustment or Re-opening During Life of Collective Agreement*

47 agreements affecting 118,090 employees. In 15 of these agreements, a limit was placed on the time or pay that would be allowed.

Provision for compensation for time spent by union representatives in negotiating collective agreements during working hours was not common, being found in only six agreements covering 8,030 employees.

Provision for re-opening the agreement during the contract period for negotiation of general wage increases (wage re-opener) was found in only three agreements (3 per cent) covering 9,000 employees (4 per cent).

Some form of guaranteed employment or earnings was provided for in eight agreements (9 per cent) affecting 41,720 employees (17 per cent).

In 32 agreements (34 per cent) affecting 76,200 employees (31 per cent), the employer undertook to supply protective clothing, equipment or uniforms.

Paid bereavement leave in case of the death of parents, children, spouse, brother or sister of an employee, to a limit of three days, was provided for in 64 agreements (68 per cent) covering 153,250 employees (62 per cent).

Bereavement leave with pay in case of the death of a father-in-law or a mother-in-law, to a maximum of three days, was provided for in 49 agreements (52 per cent) covering 129,010 employees (52 per cent).

Study made of the collective agreement in Canada

A new book, *The Development and Enforcement of the Collective Agreement,* by C. H. Curtis, traces in depth the historical development of procedures in Canada for the enforcement of collective agreement provisions. The 115-page book is No. 4 in the Research Series published by the Industrial Relations Centre, Queen's University. The author is Professor of Industrial Relations in the School of Business, and Faculty Associate in the Industrial Relations Centre, at Queen's University.

Professor Curtis cites several legal decisions that have set the precedent or established a trend in conclusions handed down by Canadian courts in disputes involving the administration of collective agreements.

Professor Curtis points out that, traditionally, collective agreements are unenforceable at common law. The reasons in support of the legal cases vary. He discusses the interpretation of the decisions at common law and, in his conclusion, comments on attitudes of trade union people for courts and of courts for union-management relations.

The collective agreement is necessary in order to stabilize union-management relations but, if it is to be successful, it must be declared to be binding on both parties to it. In his discussion of the collective agreement under statute law, Professor Curtis summarizes the early Canadian statutes relating to trade unions. One such law, the 1888 *Mines Arbitration Act* of Nova Scotia, provided machinery for the settlement of disputes over the content of the agreement, but did not deal at all with disputes regarding the administration of the collective agreement.

He goes on to show the development of the *Industrial Relations and Disputes Investigation Act* of the federal Government and also of the provincial industrial relations acts. He discusses in greater detail the significant differences among the various Canadian collective bargaining statutes in their provisions for procedures for the settlement of disputes described as those arising out of the "interpretation, application, administration, or alleged violation" of the collective agreement.

Professor Curtis includes a discussion of the alternatives to arbitration, which may be negotiated alternatives or statutory remedies and penalties. He considers which courts are open to unions and employers involved in disputes over the interpretation, application, administration and alleged violation of their collective agreements, and which are closed. But courts of New Brunswick and Nova Scotia have had little occasion to consider the question of the legal status of either unions or collective agreements.

A survey of labour arbitrations in the courts shows how the courts have dealt with disputes brought before them. Professor Curtis discusses some of the problems connected with arbitration. He illustrates his discussion with several legal cases involving arbitration procedures that show some of the problems connected with settling them. And in his conclusion, Professor Curtis provides suggestions for some ways in which arbitral problems may be overcome.

50 Years Ago

Pension and benefit plan for employees was established by the Bell Telephone Company

The Labour Gazette ceased monthly reporting of non-fatal accidents

An employee pension and benefit plan that had been adopted by the Bell Telephone Company of Canada a short time before was described in the Labour Gazette of May 1917. The plan was to become effective on July 1, 1917.

To finance the plan, the company had set up a fund of $400,000, and its intention was to keep the fund at this figure by the necessary appropriation at the end of each year. The fund was to be administered by a committee consisting of the general manager, the secretary, the general auditor, the general plant superintendent and the general superintendent of traffic.

For the purposes of the plan, the employees were divided into four classes: A, B, C, and D. Class A comprised men of 60 years of age or more, and women of 55 or more, who had been employed with the company for 20 years or longer. These might be pensioned at their own request or at the discretion of the committee.

Class B employees comprised men of from 55 to 59 years of age, and women of from 50 to 54 whose length of service was 30 years or more. Class C was composed of men of less than 55 years of age, and women of less than 50 whose length of service was 30 years or more. Members of classes B and C could be retired on pension only at the discretion of the committee, and with the approval of the president or the general manager.

Class D included any employee with 15 years or more of service who had become totally disabled by sickness; and these employees could be granted a disability pension for such period as the committee might decide. In such cases, the approval of the president or the general manager, and certification by a physician as to the extent of the disability, were necessary.

The annual pension in all cases was to be 1 per cent of the average annual salary during the last 10 years of employment, multiplied by the number of years of service. At the discretion of the committee, the pension might be based on the 10 consecutive years of highest pay. The minimum pension was $20 a month, except in the case of a disability pension to an employee of less than 20 years service.

The Bell Telephone Company's plan also provided accident, sickness, and death benefits. Accident disability benefits were provided on account of disability arising out of an accident on the job. For total disability, the benefits equalled full pay for 13 weeks, and half pay for the remainder of the disability, the maximum benefit not to exceed $20 a week after six years of such payments.

Partial disability benefits paid were equal to the full loss of earning capacity for the first 13 weeks, and 50 per cent of the loss for the remaining period of disability, the period of payments not to exceed six years.

Sickness benefits were granted to employees with more than two years service, beginning from the eighth day of absence, according to a scale that varied with length of service, from four weeks at full pay and nine weeks at half pay for employees with two years service, to 13 weeks at full pay and 39 weeks at half pay for those with 10 or more years of service.

Death benefits, payable only to the wife or husband or wholly dependent relatives of a deceased employee in cases other than an accident arising out of, or in the course of employment, amounted to one year's pay, not exceeding $2,000, if the deceased had had 10 or more years service; and six months pay if he had had from five to ten years service. In the case of death as a result of an accident arising out of, or in the course of employment, the death benefit was three years' pay, not to exceed $5,000, and burial expenses not to exceed $150.

When compensation was payable under any law, the amount of such compensation was deductible from any benefit payable under the plan.

Unemployment in Trade Unions

A quarterly report on unemployment in trade unions showed that 2.1 per cent of the members in all occupations were unemployed on March 31, 1917, the same percentage as at the end of December 1916. The percentage of unemployment in building and construction, however, was 7.4 in March compared with 5.2 in December.

In reporting on the condition of the lumbering industry in April, the Gazette said that in Newcastle, N.B., stream driving had begun, and a large number of men were employed at wages ranging from $2.75 to $4, compared with $2.25 to $3.50 in former years. At Port Arthur, lumber camps were breaking up, but sawmills had not yet started. At Prince Albert, mills were preparing to open and were taking on a large number of men.

Regarding agriculture, it was reported that in the Chatham district good farm hands were getting from $40 to $50 a month for eight months' work. "Saskatoon reported a good demand for farm labour, and that about 3,000 men had been placed through the efforts of the Provincial Labour Bureau; wages averaged about $50 per month. . . .

"In British Columbia, an active campaign was being conducted to secure school boys and women for fruit picking and packing, and Vancouver reported that up to the end of the month, of the 3,000 required, some 400 women and girls had signed contracts to start work about June 1. Victoria reported that 250 men had gone to the Prairie Provinces to work on farms."

The publication of a monthly statement on non-fatal accidents in Canada was discontinued with the May 1917 issue of the Labour Gazette.

Striking Quebec School Teachers Sent Back to Classrooms by Law

As a means of legislating striking school teachers back into their classrooms, the Quebec Legislative Assembly on February 17 enacted Bill 25, "An Act to Ensure for Children the Right to Education and to Institute a New Schooling Collective Agreement." The Bill had been introduced in the Legislature on February 10.

The Bill had two immediate effects: It compelled the striking teachers to return to their classrooms; and it took away their right to strike during the life of the Bill, which expires June 30, 1968.

Aware that the Bill would become effective on February 17, the teachers — estimated to number between 60,000 and 70,000 — staged a one-day "study session" on that date to express their displeasure. The result was that more than 2,000,000 students were left without instruction that day.

Advised by their respective unions to obey the law, the teachers with the exception of one small group returned to their posts on February 22.

Yamaska First

The strike, which ultimately affected all sections of the province, began November 24, 1966 when teachers in the Yamaska region walked off their jobs to back demands for higher pay and a revision of regulations governing their employment. They returned to their posts on January 25, 1967 after they had been issued court injunctions.

The strike picture continued darkening from the beginning, however. On January 13, the 9,000 French and English-speaking Catholic teachers in Montreal went on strike to back demands for salary increases ranging from 15 to 20 per cent. The Government was offering an estimated seven per cent, a figure which had risen during negotiations from an original 2.5 per cent.

At the height of the strike, both the CLC and CNTU issued statements supporting the stand taken by the teachers.

Said the CLC, through President Claude Jodoin: "The Canadian Labour Congress fully supports the position adopted by the teachers now on strike. The justice of their position is proven by the widespread support they are receiving from teachers and their organizations all across the country. The Canadian Labour Congress is prepared to do everything possible to assist them . . ."

Compulsion

The CLC labelled Bill 25 "compulsion of the worst kind." Marcel Pepin, President of the Confederation of National Trade Unions, noted that "The teachers' fight is everybody's fight," and called for a radical redistribution of wealth in the province, so that enough is available for essential social purposes including increased teachers' salaries "that will help them attain a fitting social level . . ."

The strike by the Montreal teachers was the first since 1949, when the teachers of that time staged an illegal one-week walkout (L.G. 1950, p. 1787).

With its strike right revoked, Quebec joins three other Canadian provinces in which strikes are prohibited: British Columbia, Manitoba and Newfoundland. Strikes are permitted in the other provinces, except Ontario, where the situation is unclear.

As a matter of historical fact, it might be pointed out that the teachers of Victoria, B.C., took the first strike action recorded in the British Empire when they walked out for two days in 1916 to support demands for collective bargaining rights.

Alberta teachers, given the right to strike in 1942, have used that right several times. Most of the strikes lasted for only a few days, but one in 1943 lasted for a month.

New agreement deals with displacement by automation

A collective agreement to deal with worker displacement by automation was signed between the Oil, Chemical and Atomic Workers' Union and Imperial Oil Ltd. at Ioco, B.C. in February at Vancouver. It is believed to be the first agreement of its kind in Canada and is expected to set a pattern for all industry.

Federal government, university, management and labour officials worked 16 months to produce the plan. Similar discussions are already going on with other oil companies.

The program grew out of conclusions drawn by Dr. Tait Montague, head of the Institute of Industrial Relations at the University of British Columbia (L.G. 1962, p. 596), who chaired the research subcommittee set up by the company after a threatened general strike in B.C. in November 1965. The four-point plan groups according to their age, workers who are threatened with displacement by automation:

—those between 57 and 65 may take an early retirement at better than the normal retirement pension; if automation pushes them out of their jobs, they will retain their regular wage rate until a new rate is negotiated for their new position;

—those between 46 and 57 may retain their wage rate levels in the same way, until they either get a higher paid job through training or retire; in addition, they are not required to have the formal education qualifications normally necessary for in-plant transfer;

—those between 35 and 46 will retain their wage levels for a period equivalent to one week for each year of service, or during a period of training for a higher-paid job in the plant; and

—those not falling within these categories are protected by clauses in the general contract agreement that call for six months notice of machinery or job changes, severance pay, and security of position based on seniority.

The major significance is that the program lays emphasis on training at company expense at the lower age levels, while providing a measure of income protection for older workers not expected to be able to improve their capacity through training.

Referring to worker displacement caused by automation, Dr. Montague said that management has as much responsibility to plan its manpower needs as its capital expenditure, and that much more of this must be done in future. He said that maximum use should be made of attrition through retirement and other means, rather than through layoff, to reduce the work force in the change to automation.

Dr. Montague noted that automation plans must be flexible and programs adjustable, because no one plan is suitable to all circumstances or all plants. Provisions made for people should be based on age and length of service. Discussion of automation problems should remain away from broad negotiations for new contracts, but should remain the property of those responsible for contract negotiations, he said.

Nurses make gains in first contract

The public health nurses of Peel County are the first such group in Ontario to sign a collective agreement after being certified by the Ontario Labour Relations Board. The contract, which the nurses signed on February 16 after nearly a year of negotiations, gives salary increases of $400 to $850, depending upon their qualifications.

A unit of nurses in a Windsor hospital has also signed a collective agreement, after being certified by the Board. And a unit of public health nurses in Ontario County has signed a collective agreement, but it has not yet been certified.

As soon as the Peel County contract was signed, the Registered Nurses' Association of Ontario announced that it was lifting its "grey" listing of the County. The "grey list," which means that registered nurses are asked not to apply for any jobs in the area, was applied last November when negotiations temporarily bogged down.

Two other Ontario areas are still grey-listed. They are Halton County, and the United Counties of Stormont, Dundas and Glengarry, where nurses have formed themselves into bargaining units, but do not want to be certified by the Labour Relations Board.

The contract with the nurses of Peel County, which provides for an increase of the minimum salary from $4,700 to $5,300, and for an increase of the maximum salary from $5,700 to $6,550, is retroactive to January 1, 1967.

Registered nurses who lack the one-year university preparation course in public health after registration now have a salary range of $4,800 to $5,800, which represents an increase of $400 in the starting salary and of $800 in the maximum. In addition, the nurses gained increased car allowances and extended holidays—three weeks after one year of service, and four weeks after seven years of service.

Major 1966 settlements affect 388,000 workers

More than 180 major collective agreements involving negotiating units of 500 or more employees in industries other than construction were signed by employers and labour organizations across Canada during 1966, according to a survey performed by the Department of Labour. These settlements affected approximately 388,600 workers.

About half of the agreements were for terms of from 21 to 26 months; a little less than a third were for terms of 33 months or more; and about one out of every nine was for less than 15 months.

The 92 agreements in the first group that ran for about two years provided for a wide range of wage increases during the life of the contract. In seven out of every ten settlements in this category, increases were in the 10-to-20 per cent range, half of them being for from 13 to 16 per cent. Four of the 92 settlements provided for increases of 30 per cent, and three for increases of 34 per cent.

Of the contracts signed during the year, 61 were for a period of 33 months or longer. More than half of these provided for increases ranging from 14 to 21 per cent, and about one out of every four for increases of 23 to 27 per cent. In most of the remaining agreements that ran for about three years, increases were of 29 per cent or more.

In 12 of the 20 contracts with a duration of less than 15 months, increases ranged from 4 to 6 per cent, in six others from 10 to 13 per cent, and in the remaining two they were of 16 and of 27 per cent.

All but four of the contracts surveyed provided for wage increases that took effect last year; 157, or 84 per cent of the total, for increases to take effect in 1967; and 59 agreements, or 32 per cent of the total, for increases taking effect in 1968.

(Supplement No. 1, 1967 carries full details.)

Labour bill reports are now available

The first issue in the 1967 series of current reports on labour bills and other bills of general labour interest is now available.

The first report contains reviews of the new Newfoundland Hospital Employees (Employment) Act, and the legislation passed in Quebec to end the teachers' strike (Bill 25).

Other bills reviewed include Nova Scotia's new Construction Safety Act, and an amendment to the Manitoba Workmen's Compensation Act.

Prepared by the Legislation Branch of the Canada Department of Labour, the reports will cover the provisions of each such bill introduced in Parliament and the provincial legislatures at the 1967 sessions, and will follow the progress of each bill to Royal Assent or rejection.

At the close of each session, the major developments of the year will be reported in the Labour Law section of the LABOUR GAZETTE.

Single copies of these mimeographed reports are available from the Legislation Branch.

PARLIAMENT

Bill C-278 to provide for the training of adults who wish to undertake occupational training, to authorize the entering into of contracts with provinces and employers to provide for the payment of costs involved, and dealing with other matters connected with such training, was introduced by the Minister of Manpower and Immigration on March 3 and passed first reading (*Hansard* p. 13743).

Bill C-170 to provide for the establishment of a system of collective bargaining applicable to employees of the public service of Canada (L.G., June 1966, p. 278), Bill C-181 respecting employment in the public service of Canada (L.G., July 1966, p. 349), and Bill C-182 to amend the Financial Administration Act to give the Treasury Board the authority required to enable it to act as the principal agent of the employer in collective bargaining in the public service, all passed third reading on February 20 (pp. 13236, 13254 and 13267). Bills C-170 and C-181 received the Royal Assent on February 23 (p. 13407) and Bill C-182 on March 1 (p. 13641).

Bill C-221 respecting pension plans organized and administered for the benefit of persons employed in connection with certain federal works, undertakings and businesses (L.G., August 1966, p. 429) passed second (p. 13847) and third reading (p. 13855) on March 10.

Quebec doctors win new salary scale

Two "study sessions" held by more than 1,000 resident doctors and interns employed in Quebec hospitals to back demands for higher salaries resulted in the granting of salary bonuses ranging from 17 to 33 per cent, plus retroactive bonuses ranging from $420 to $595. The one-day sessions were held one week apart in February.

Salaries for the interns and resident doctors before the sessions ranged from $255 to $430 a month. Under the new scale, the range goes from $334 to $500. The doctors had asked that the range be from $400 to $650 a month.

In addition to the salaries adjustments, the doctors gained recognition as a professional bargaining group, and it was indicated that they will be free to enter into new negotiations with their employers, effective July 1 this year.

Montreal clerical employees sign new contract

Following a five-week strike, that began January 30 to back demands for higher wages, Montreal's 4,515 municipal clerical employees returned to their jobs on March 6 with a new working agreement, but minus the 20 per-cent salary increase plus $700 across-the-board bonus they were demanding when they went on strike.

Under the terms of the new two-year agreement that expires November 30, 1968 the employees received: a cash bonus of $400; salary increases ranging from $425 to $600, effective March 6; a further raise of $250, effective January 1, 1968; and an additional boost of $150, effective on the last day of the contract.

Earlier, the city's blue-collar workers ended a four-day walkout by accepting a wage boost ranging from 57 cents to $1.22 an hour.

Under the terms of the new contract, lowest classification employees—ordinary labourers and charwomen — had their basic salaries raised to $2.55 per hour. Wages for the highest-category employees were increased to a basic rate of $3.81 per hour.

Most of the increases for the blue-collar workers were retroactive to December 1, 1966. For the remainder, the raises were retroactive to August 30. The new one-year contract expires November 30, 1967.

An arbitrator looks at haircuts and costumes

An American export shipping firm fired an office employee for maintaining a general appearance and mode of attire contrary to the accepted norm of the commercial business world by wearing boots and tight pants and sporting a Beatle haircut. The case was treated as a grievance by the employee's union and was finally submitted to arbitration.

The arbitrator's award ran in part:

"There was just cause under the collective bargaining agreement of the parties for the imposition of a disciplinary penalty upon the grievant office employee for maintaining a general appearance and mode of attire during working hours, and contact with customers of the employer in the performance of his job duties, wholly alien to the accepted norm of the commercial business world generally, and that of the employer in particular—i.e., the transportation of ocean-borne freight; to wit, by wearing boots, tight clinging orange-brown pants (with a wide oversized belt and buckle) and a flowing, hirsute cranial adornment characteristic of the Beatles and sundry other avant-garde devotees of 'mod' in the world of art and 'music' with which the public generally, and a fair segment of teenage parents especially, are all too familiar (albeit no uninitiate squares) in this 'way out' dynamic era on the very verge of lunar visitation and extra-terrestrial exploration."

The arbitrator, however, went on to say a good word for the employee, a young man of 20 years of age who, it appeared, had shown himself a satisfactory clerk apart from his tastes in the matter of dress and appearance.

"To the utter astonishment of the employer, grievant appeared at the arbitration hearing sans his former attire, shorn of his flowing locks, and presenting the very epitome of the more mundane accepted norm befitting a manifest dispatching clerk in the shipping industry—establishing beyond cavil that the encountered separation from the business world and his pay envelope had succeeded in delivering 'a message' which had theretofore eluded the well-intended efforts (talks, exhortations and warnings) of a patient and forbearing management prior to resorting to discharge. The prime purpose of discipline, where adequate and feasible, is corrective — which it demonstrably appears has now been achieved.

"Accordingly, effective as of . . . the grievant is reinstated to employment with the company, without back pay and without loss of seniority, but nonetheless under the following terms and conditions upon which said reinstatement is conditioned. . . ."

Briefly, the conditions upon which this repentant and reformed young man was to be reinstated in his job were that he should "refrain and desist from his former mode and manner of attire, hair styling and general appearance during working hours. . . . Failure of the grievant to abide by the terms and conditions aforesaid shall constitute a valid basis for his termination."

Stelco bricklayers to get $4 an hour

A new contract signed by the Steel Company of Canada and the 130 members of Local 1, Bricklayers, Masons and Plasterers' International Union, Hamilton, Ont., will give Stelco bricklayers a basic salary of $4 an hour by August 1, 1968. The bricklayers will receive a 72-cent-an-hour increase over the period of the contract, which expires November 30, 1969.

New book studies international unionism

The advantages, and some of the disadvantages, of international unionism to its members—and to employers and the public at large—were cited in a new study, *International Unionism,* by John Crispo, Director of the Centre for Industrial Relations, University of Toronto.

Basing his study on 400 interviews with Canadian trade union officials, and officials of 75 international unions, Dr. Crispo examines the involvement of international unions from their effect on the political activities of the Canadian labour movement to the growing demand for U.S. wage parity in Canada.

The book explores the reasons for the emergence and endurance of the international union link. It describes major disputes, and examines the flow of funds and benefits between the two countries. External restraints on the labour movement are assessed, as well as the attitudes of Canadian employers and the Canadian government. In his closing chapter, Dr. Crispo summarizes and discusses the advantages and disadvantages associated with the presence of international unions in Canada.

Published in January by McGraw-Hill Company of Canada, the book sells at $8.60 a copy.

If international unions are to continue to prosper in Canada, they should give their Canadian members more autonomy, says Dr. John Crispo, Director of the Centre for Industrial Relations, University of Toronto, in a pamphlet financed by the Canadian-American Committee, a joint body of the National Planning Association of the United States, and the Private Planning Association of Canada.

Dr. Crispo goes on to say that, "although some international unions allow a good deal of Canadian autonomy," and although Canadians have risen to top posts in international unions, too often Canadian section leaders are appointed from the U.S.

"When the senior Canadian officers owe their positions to the international administration, and there is no separate Canadian policy-making forum, there is a tendency to neglect purely Canadian considerations and points of view."

Dr. Crispo concludes that, although Canadian members of international unions have had many reasons to be content with their leadership in the past, increased flexibility should be encouraged in cases where a common approach is not in the interests of one or both parties.

There are 110 international unions operating in Canada.

Maternity Protection for Women Workers

In the Federal Republic of Germany

Maternity protection legislation in Germany dates from 1878

The first ILO Convention on maternity protection was ratified by the Government in 1927

As the continuing rapid growth of the female labour force in Canada is bringing the subject of maternity protection for women workers increasingly under discussion, the Women's Bureau of the Canada Department of Labour has made a survey of relevant laws and practices in this country. The study has now been published as *Maternity Protection for Women Workers in Canada,* available from the Queen's Printer, Ottawa, at a price of 35 cents (Cat. No. L38-2467).

In addition to documenting the Canadian situation, the study includes detailed information regarding standards of maternity protection adopted by the International Labour Organization and data regarding policy and practice in three other Commonwealth countries—Australia, New Zealand and the United Kingdom — and two countries in Europe — France and Sweden. This article* on maternity protection in the Federal Republic of Germany supplements the study.

Maternity protection legislation in Germany dates from the Industrial Code Supplement of 1878, which prohibited the employment of women for a period of three weeks after childbirth without granting them a claim to continued payment of wages or to a maternity allowance. In subsequent years, the period of prohibited employment was lengthened, and provisions were made for health insurance and maternity allowances. The first ILO Convention on Maternity Protection (No. 3), adopted by the International Labour Conference of 1919, was ratified by the German Reich on October 31, 1927.

The legal foundation for maternity protection in the Federal Republic of Germany today stems from the Basic Law of the Republic, which specifies that every mother has a claim to the protection and care of the community. Following postwar promulgation of the Basic Law, the Bundestag passed the Law for the Protection of Gainfully Employed Mothers (Law on Maternity Protection) in January 1952. Regulations for implementation of the Law, directives issued by the Federal Ministry of Labour, and other legislative enactments were added over the next decade, until in November 1965 the Bundestag issued a revised Law Concerning the Protection of Working Mothers, which is the basis of existing provisions.

The Law applies, irrespective of marital status, to women who are "employed persons," including home workers or persons of equivalent status if they are engaged in piece work. The term "employed person" applies also to apprentices, learners, unsalaried assistants, probationers and women undergoing vocational training. A woman's nationality has no legal bearing on her claim to maternity protection. The conclusive factor is that she be employed within the territory of the Federal Republic or of Berlin (West).

Prohibited Employment

The Law is written in terms of prohibited periods and types of employment rather than maternity leave. An expectant mother must not be employed if, according to the certificate of a physician, her health or that of her child would be jeopardized, either because of her physical condition or because the type of conditions of work would be detrimental to any pregnant woman. Irrespective of these factors, it is illegal also to employ a domestic servant or a daily help during the last four weeks before childbirth, and other expectant mothers during the last six weeks before childbirth, unless they expressly declare their willingness to work.

It is illegal for an employer to give notice of termination of employment to any woman during pregnancy, and within fourth months after the birth of her child, if the employer is aware of the time of pregnancy and childbirth, or if he is informed of it within two weeks after notice has been given. On the other hand, the expectant employee can serve notice to terminate employment at any time, or can withdraw by agreement with her employer. Provision is made, however, whereby the supreme "Land" authority competent in matters of protection of labour will have authority to declare a dismissal permissible in special cases.

After childbirth, a woman must not be employed for a period of eight weeks. In cases of premature or multiple births, this period is extended to 12 weeks. Beyond this length of time, if a woman is not fully fit to work, she presents a medical certificate to her employer, who must assign her to a job in keeping with her reduced capacity. Restrictions are placed also upon overtime, night and Sunday work. Provision for nursing periods is obligatory and must not entail loss of earnings for the employee.

As for prohibited types of employment, the Law requires that expectant mothers not be assigned to:

—heavy physical labour;
—tasks that expose them to harmful effects of materials or rays prejudicial to health;
—dust, gases or fumes;
—heat, cold or damp; or
—vibrations.

Various classes of work in which women are frequently employed are listed in the regulations as examples of what is generally prohibited. The examples include jobs that require:

—lifting of weights by hand (10 pounds,

*Information for this article was provided by the Federal Republic of Germany.

if lifted regularly without mechanical aid, or 20 pounds if lifted occasionally);
—having to stand continuously, if there is no provision for short periods of rest;
—stretching, bending or stooping;
—the operation of machinery requiring extensive foot action; and
—exposure to occupational disease.

Assembly-line work requiring a prescribed speed is also forbidden for pregnant women. The local inspector of labour has discretionary powers, however, to grant exceptions in cases where there is no possibility that the work or speed of work will be harmful to the mother or her child.

Working Environment

Employers are required to provide suitable arrangements in the work-place to protect the life and health of a woman worker who is either pregnant or nursing. These may include special conditioning of machinery and tools, and provision for sitting down or taking a short rest if the work involves continuous standing or moving about. On the other hand, where work requires that the woman be seated continuously, she must be allowed to interrupt her work for a short period from time to time in order to move about.

The Federal Minister of Labour is authorized to issue regulations making it compulsory for an employer to arrange suitable rest rooms where expectant or nursing mothers can lie down. Further, the local labour inspector is granted authority in special cases to order that appropriate measures be taken to maintain the safety standards established by the Law.

Financial and Medical Benefits

It is the intention that, wherever possible, women shall not suffer any financial loss as a result of statutory prohibitions of employment for reasons of maternity. Under the Health Insurance Act of the Federal Republic of Germany, women workers who participate in the fund are entitled to receive both financial and medical maternity benefits.

The maternity allowance paid during the prohibited period of employment before and after childbirth is equal to the woman's average weekly pay over the previous three-month period. If leave is extended by reason of incapacity for work, the allowance payable is usually 50 to 70 per cent of wages, instead of the 100 per cent paid during normal leave. If a woman nurses her child, she receives an additional daily nursing allowance for a maximum period of 26 weeks.

Medical benefits under the Health Insurance Act include such items as midwifery assistance, the cost of prescribed drugs, minor accessories, and medical treatment during delivery or in case of complications during pregnancy. In addition, the Law requires that the employer allow a woman time off with pay for essential medical examinations related to her condition of pregnancy or childbirth.

Domestic servants to whom notice to terminate employment has been given are entitled, after completion of the fifth month of pregnancy, to special benefits from the Federal Government until they become eligible for regular maternity and nursing allowances. The maternity benefit is equivalent to the average wages, after deductions, paid during the 13 weeks preceding notice of termination of employment.

If a domestic servant has been employed for less than 13 weeks, the computation is based on the average earnings for the shorter period. In cases where this calculation becomes too complicated, the average daily wage of a woman doing the same type of work is used as a basis of compensation.

An unusual feature of the German Law is that, if a woman is not insured under the Health Insurance Act, the employer may be responsible for the stipend paid to her during the period of prohibited employment. Such an exaction placed upon the employer, even though it may entitle him to an income tax deduction, might seem to be a deterrent to the employment of women. The following comment from a brochure published by the Press and Information Office of the Federal Republic of Germany is therefore of particular interest:

> . . . in times when the labour market situation is poor, this protection . . . prejudices under certain circumstances the recruitment of married women in particular. On the other hand, with the flourishing state of trade that has for long been maintained, and the labour deficiency connected therewith, it is to be observed that the employers are concerned to make posts as attractive as possible beyond what the regulations prescribe. . . .

It is worth noting also that if, with permission from the authorities, the employer terminates the employment of an uninsured woman during pregnancy, she is entitled to a maternity allowance paid by the Federal Government.

Implementation of the Law

Factory inspectors employed by governments at various levels (i.e., federal, "land" and municipal) supervise the execution of provisions of the Law. The employer is obliged to provide all necessary information regarding the nature and periods of employment of pregnant and nursing women. These records must be kept available for at least two years after the last entry.

Criminal penalties may be applied in cases of violation of the regulations under the Act. Imprisonment of up to one year, plus fines of up to 5,000 marks may be levied in cases of deliberate violation of the Law, when the health or working capacity of the woman has been endangered. Smaller fines are imposed in situations where the violation is proved to have been due to negligence.

Reprint published on Employer 'Free Speech'

Under the title, "Employer 'Free Speech' in the United States and Canada," the Industrial Relations Centre of Queen's University has issued a reprint of an article published in the *Alberta Law Review* in 1965. The author is Bernard L. Adell, now a member of the Faculty of Law at Queen's University, where he specializes in labour law.

"Labour legislation in the United States and in every Canadian jurisdiction recognizes the right of employees to select trade unions as their agents for the purposes of collective bargaining, and imposes a corresponding duty upon employers to refrain from interfering with, or coercing their employees in the exercise of this right," the author says.

"It will be the purpose of this article to compare the extent to which American and Canadian courts and labour relations boards have, in enforcing the employer's statutory duty, placed limitations on what he may say to his employees during the course of a representation election campaign. In an attempt at reasonable clarity, it is proposed first to outline the growth of the tangled mass of American law on this subject. That having been done, it will be possible to look at the far smaller number of reported Canadian cases."

The book, which is priced at $2, cites decisions of the United States National Labor Relations Board, the federal Circuit Courts of Appeal, and the United States Supreme Court with regard to American law. Regarding Canadian law, it examines the interpretations of federal and provincial laws by the Canada Labour Relations Board, and by the various provincial labour relations boards.

Food Prices

Continued from page 290

of weight or measures be expressed simply in easily identifiable terms; and
—the essential information about a packaged product and its physical contents be stated in a prominent place on the label.

The Committee urged the Government not to wait for the findings of the Economic Council of Canada, which are expected to be available in the latter part of 1967, but to establish immediately a Department of Consumer Affairs headed by its own Minister. It urged also that immediate steps be taken to promote standardization and simplification of grades, nomenclature and packaging for commonly purchased consumer items.

Sales Promotion

The Committee did not reach any final conclusions about the effect of promotional devices on prices, but it did conclude that promotion should be used with restraint. It called price or quality promotion "desirable", but condemned competitive methods that create doubt or confusion. As an example of such methods, it cited the use of "cents-off" labels which, without stating the regular price, imply that a package is being sold below the regular retail price.

The Committee urged also that the proposed Department of Consumer Affairs examine the effectiveness of the prosecution procedures concerning misleading advertising, and it noted that more care should be used in the re-marking of prices of goods in the inventories of retail food stores. The members stated that they would conduct further investigations into the use of sales "gimmicks" such as trading stamps, games and contests. These, they said, should not be allowed to interfere with normal price competition.

The Committee strongly recommended that information concerning corporate activities be readily available for the scrutiny of parliamentarians, public officials, consumer groups, investment analysts and the academic community. "Such public disclosure would also be a spur to greater efficiency and productivity by preventing inefficient entrepreneurs from hiding their inefficiency from shareholders or public scrutiny." It observed that there was no reason why large public companies should be compelled to compete in the market place against other large private competitors whose operations are almost wholly secret, and "many of which are privately held, wholly-owned subsidiaries of non-Canadian parents."

The Committee therefore recommended that:
—the distinction between disclosure requirements for private and public companies be eliminated;
—the disclosure requirements for both public and private companies be enlarged to give the public sufficient information on corporate activities for continuous analysis and comparison.

Food Chain Profits

The Committee maintained that profitability could be measured by examining net profit after taxes as a percentage of gross sales, but it admitted that this method of comparing profit levels had some deficiencies, and that an analysis should also be made of profits in relation to invested capital. The Committee retained the services of a firm specializing in management consulting and accounting to conduct a study in this field.

Experts who testified said that in the late stages of an expansionary period, there tended to be a squeeze on profit margins resulting from rising costs and the inability of sellers in competitive markets to raise prices sufficiently to counteract them.

"In the time available . . . it was not possible to ascertain all the facts necessary to reach any firm conclusion," regarding advertising costs, the Committee said, but it did state that there was evidence that the market power of the retail level of the food industry was sufficiently strong to shift some of the burden of advertising costs to food processors or manufacturers.

Concentration of Power

During its investigations, the Committee uncovered evidence of great concentration of market power in one food empire. Describing the disclosure as "an astonishing revelation, the enormity of which surprised even the sophisticated," the Committee went on to say that further investigation and appraisal would be needed to reveal all the implications of this company's vast holdings, and its control over food and other related aspects of the economy.

Other investigation revealed that the detergent and soap industry "was controlled by three giants, having among them 85 and 90 per cent of the total business." The Committee pointed out also that five great corporate food chains and the voluntary chains together control more than 75 per cent of the grocery business in urban areas—and the percentage is increasing. Further, in one part of the food processing industry, one firm controls 100 per cent of markets in the Maritimes and Western Canada, and at least 80 per cent of the markets in Ontario and Quebec.

The domination of a few large corporations in some sectors of the Canadian economy is clearly evident, the Committee reported, and this situation gives rise to the question, "Is this in the public interest?" The Committee declared that this question should be answered — and it recommended a thorough assessment of the food industry to discover whether the market power of any group is sufficient to impair the workings of a competitive market, and whether there are undue barriers to entry into the market. In addition, monopolistic tendencies should be made public, they said.

In its final conclusions, the Committee agreed with the many witnesses who believe that Government price control is not the answer to price stability. As members pointed out, however, the federal Government does not have the constitutional power to enter this field.

Inquiry commission to study trucking industry

C. A. L. Murchison, Q.C., Ottawa, was appointed in April by the Minister of Labour to head an inquiry commission to study the application of the Part I hours-of-work provisions of the Canada Labour (Standards) Code to the inter-provincial and international trucking industry. A native of Souris, Man., Mr. Murchison is a former Commissioner of the Unemployment Insurance Commission (L.G. 1964, p. 937).

The commission was set up in response to requests received from the Canadian Trucking Association Inc., the Canadian Warehousing Association, and other employers who had complained that the application of the hours-of-work provisions of the Code could be detrimental to their operations.

Inland shipping and the Labour Code

A recently completed survey of hours of work in the shipping industry on the Great Lakes and the St. Lawrence River was approved by representatives of Canadian Maritime unions and the Dominion Marine Association, who met with Department of Labour officials in March.

Culminating from the meeting, a union-management committee was set up to develop practical measures for bringing the industry within the requirements of the Canada Labour (Standards) Code.

PRICE INDEXES

Consumer, February 1967

The consumer price index (1949=100) advanced 0.1 per cent to 146.1 at the beginning of February from 146.0 in January. The February 1967 index was 2.8 per cent higher than the February 1966 figure of 142.1. In the current period, only the food component recorded a decrease; all the remaining components showed increases.

The food index declined 0.6 per cent to 144.1 from 144.9 in January. Lower prices were reported for most fats including butter, eggs, grapefruit and bananas, some processed and frozen fruits and juices, canned and frozen peas, fresh tomatoes, poultry, and all cuts of pork and beef except blade roast, stewing beef and hamburg. Prices were higher for all dairy products except cheese, as well as for bread, tea, apples, root vegetables, cabbage and lettuce, fresh and frozen fish, lamb and veal.

The housing index rose 0.1 per cent to 147.7 from 147.6 as a result of increases for rentals, new houses and dwelling insurance.

The clothing index advanced 0.4 per cent to 129.1 from 128.6. Higher prices for most items of men's and women's wear and piece goods outweighed lower prices in footwear and many items of children's wear.

The transportation index rose 1.3 per cent to 155.0 from 153.0. The increase reflected generally higher prices for gasoline, motor oil and car insurance.

The health and personal care index increased fractionally to 185.1, up 0.1 per cent from 184.9. The recreation and reading index rose 1.1 per cent to 163.6 from 161.9 General price increases for magazine subscriptions accounted for the rise in the reading component, and higher prices for camera film and bicycles caused an advance in the recreation component. The tobacco and alcohol index increased 0.2 per cent to 126.8 from 126.5, reflecting increases in the prices of cigarettes, beer and alcohol.

Group indexes a year earlier (February 1966) were: food, 142.5; housing (shelter and household operation), 143.1; clothing, 123.3; transportation, 150.0; health and personal care, 178.1; recreation and reading, 156.4; tobacco and alcohol, 123.4.

City Consumer, February 1967

The consumer price indexes (1949 = 100) advanced in four of the ten cities, declined in three and remained constant in three between January and February 1967. Movements ranged from an increase of 0.5 per cent in Montreal to a decrease of 0.3 per cent in St. John's.

Food indexes declined in eight cities and rose in two. Housing and clothing indexes advanced in seven of the ten regional cities and remained unchanged in three. Transportation indexes rose in seven cities and declined in three.

Health and personal care indexes increased in seven cities, decreased in one and displayed no change in two. Recreation and reading indexes rose in all cities, with increases ranging from a high of 2.7 per cent in Ottawa to a low of 0.7 in Toronto. Tobacco and alcohol indexes were higher in five cities, lower in one and unchanged in four.

Regional consumer price index point changes between January and February were as follows: Montreal +0.7 to 144.8; Winnipeg +0.4 to 141.1; Halifax +0.3 to 139.3; Saint John +0.3 to 143.3; Toronto —0.1 to 148.1; Saskatoon-Regina —0.3 to 137.0; St. Johns* —0.4 to 126.6; Ottawa remained unchanged at 145.2; Edmonton-Calgary remained unchanged at 136.6; Vancouver remained unchanged at 140.9;

Wholesale, January 1967

The general wholesale index dropped slightly in January to 260.7 from the December 1966 index of 261.3 but was 1.3 per cent higher than the January 1966 index of 257.4. Four of the eight major group indexes decreased while four increased.

The animal products group index declined 0.7 per cent to 295.1 from 297.2 on lower prices for livestock, fishery products, cured meats, and eggs. A decline of 0.6 per cent to 250.4 from 251.9 in textile products group index reflected lower prices for worsted and wool cloth, cotton fabrics and miscellaneous fibre products. The wood products group index moved down 0.6 per cent to 338.9 from 341.1 because of lower prices for newsprint, cedar and fir. The non-ferrous metals products group index declined slightly to 232.5 from 232.6.

Price increases for prepared paints, soaps and detergents were responsible for an advance of 0.8 per cent in the chemical products group index to 214.0 from 212.3. The non-metallic minerals products group index moved up 0.4 per cent to 195.8 from 195.1. Minor increases occurred in the two major group indexes, vegetable products, 229.4 from 229.1, and iron products, 267.3 from 266.9.

*On base June 1951=100.

Farm Product Prices

The index of Canadian farm products prices at terminal markets (1935-39 = 100) declined 0.3 per cent to 248.4 from 249.2 in the three-week period ended February 24. The field products index moved down 1.3 per cent to 173.3 from 175.5, and the animal products index advanced 0.2 per cent to 323.6 from 323.0.

Building Materials

The price index of residential building materials (1935-39=100) increased in January by 0.3 per cent to 348.0 from 346.8 in December, and to 152.6 from 152.1 on the base 1949=100. The price index of non-residential building materials (1949=100) advanced by 0.6 per cent to 150.5 from 149.6.

U.S. Consumer, January 1967

The United States consumer price index (1957-59=100) remained stable in January for the first time in a year. The index stood at 114.7, the same as in December. A year ago in January the index was 111.0.

The list of declines in January in food prices was headed by beef, poultry and eggs. The price decreases for these three items more than offset increases in the prices of fresh fruits and vegetables. The price of new cars, used cars and apparel also dropped.

Increases were mainly in services. Medical services, which rose by nearly 1 per cent during the month, are now 8½ per cent higher than they were a year ago. Rents and the cost of household services were also up.

Employment and Unemployment in February

Employment, estimated at 6,980,000 was practically unchanged between January and February. The labour force, which increased by 12,000 to 7,376,000 during the period, was 254,000, or 3.6 per cent higher than a year earlier. Employment was 214,000, or 3.2 per cent higher than in February 1966.

Unemployment, at 396,000, was 15,000 higher than the January figure of 381,000, and was 40,000 higher than a year ago.

The unemployment rate in February represented 5.4 per cent of the labour force, compared with 5.0 per cent in February 1966 and 5.8 per cent in February 1965. The seasonally adjusted rate for February of this year was 3.8 per cent.

Employment in February was relatively unchanged from January. In non-agricultural industries, employment increases in manufacturing and service were partly offset by decreases in construction and trade. Farm employment declined by 14,000 between January and February.

Non-farm employment, at 6,543,000 in February, was 246,000 higher than a year ago. The largest increases were in manufacturing, service, transportation and other utilities, and trade. Agricultural employment declined during the year, the February estimate of 437,000 being 32,000 lower than a year earlier.

Unemployment

Unemployment increased by 15,000 to 396,000 between January and February, a slightly higher increase for this period.

Of the 396,000 unemployed in February, 310,000, or 78 per cent of the total, had been unemployed for less than four months. About 57,000 had been unemployed for four to six months and 29,000 for seven months or more.

NOTE: The classification of labour market areas, and the summary table titled "Labour Market Conditions", are not included in this issue because the statistical basis for these tables is not comparable with a year ago. Beginning September 1, 1966, all registered applicants were asked to contact Canada Manpower Centres every 30 days — instead of the previously requested period of 14 days —to keep their registrations active. Another factor influencing the comparability of registered applicants is the extension of provisions, such as temporary layoffs, for exempting certain classes of unemployed insurance beneficiaries from registration.

Wage Schedules Prepared In January

During January, the Department of Labour prepared 266 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada for works of construction, remodelling, repair or demolition, and certain services. In the same period, 182 contracts in these categories were awarded. In addition, 74 contracts containing the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation and the Departments of Defence Production, Post Office, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned, or to others who have a bona fide interest in the execution of the contract.

Contracts awarded in January for the manufacture of supplies and equipment were:

Department	*No. of Contracts*	*Aggregate Amount*
Defence Production	143	$441,967.00
Post Office	7	123,155.73
RCMP	2	25,960.35
Transport	2	156,473.16

During January the sum of $6,593.26 was collected from 18 contractors for wage arrears owing their employees as a result of the failure of the contractors, or their subcontractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for distribution to the 319 workers concerned.

B.C. Department of Labour observes 50th anniversary

The British Columbia Department of Labour, created in May 1917 and currently headed by Hon. L. R. Peterson, QC, Minister of Labour and Minister of Education, this year marks its 50th anniversary. The province's first Minister of Labour was Hon. J. W. de B. Farris, QC, (L.G. 1917, p. 422) and J. D. McNiven its first Deputy Minister of Labour.

In his address in reply to the Speech from the Throne at this year's first session of the Legislature, Mr. Peterson outlined some of the obstacles that had been met and surmounted during the Department's history, and suggested that, "Today, the British Columbia Department of Labour ranks in the forefront of departments of labour in North America in its service to people, and I wish to pay special tribute to the men and women of the Department who have made this possible. . . ."

In the beginning, Mr. Peterson said, there were no minimum wage regulations, no holidays with pay, no Women's Bureau, no Research Branch, and no adequate labour legislation or apprenticeship and industrial training programs—all of which are now available.

During 1966, he pointed out, the Government created the British Columbia Labour-Management Committee, composed of representatives of labour, management and government, with a view to encouraging more meaningful communications between the three parties.

"The Committee is . . . considering what steps it can take to conduct a thorough review of the use of injunctions in labour disputes," said Mr. Peterson, "the best method of achieving liaison between itself and the federal Department of Manpower and Immigration, and the effects of a reduced work week in industry. . . . We expect this Committee to make a significant contribution to the industrial harmony of the province."

NOTE: Dashes indicate data unavailable at press time.

Women in the Labour Force, 1966

The number of women in the labour force and in employment in Canada passed the two-million mark in 1965, and continued to rise in 1966, according to the most recent issue of *Facts and Figures about Women in the Labour Force,* which indicates trends in women's employment. The report is based on annual averages compiled by the Special Surveys Division of the Dominion Bureau of Statistics, and it provides a comparison between the figures for the year 1961 and those for 1966.

The "labour force," as indicated in the report, consists of those members of the non-institutional civilian population who are over 14 years of age, and who were employed or seeking employment at the time of the survey. It includes paid workers, self-employed workers, employers and unpaid family workers. The term "employed" includes all those in paid employment, unpaid family workers, and those with a job who were not at work because of weather, illness, industrial dispute, vacations, or time taken off for other reasons. Housewives and students who worked part-time during the survey week are also included.

In the five-year period under review, the increase of women in employment was 29.6 per cent, more than double the rate of increase in the female population of 12.1 per cent. By contrast, from 1961 to 1966 the male population grew by 11.5 per cent and male employment by 13.7 per cent. Numerically, the female population over 14 years of age in 1966 exceeded the male population by 118,000; but men in employment outnumbered their female co-workers by nearly 3,000,000.

Regions

Nearly 500,000 women were added to the Canadian labour force in the five-year period, and by 1966, women represented 30 per cent of the total.

Ontario, with 850,000 women in the labour force, and Quebec with 623,000, together accounted for two thirds of all working women in Canada in 1966.

Age Groups

In both 1961 and 1966 almost half the women in the labour force were over 35 years of age, the largest number being in the 35-to-44 age group, which accounted for a fifth of the total in each year. The largest numerical increase, 112,000, was in the 20-to-24 age group, followed by the 45-to-54 age group, which increased by 98,000 during the five-year period.

Participation Rate

Of the female population of Canada, 32.8 per cent participated in the labour force in 1966 compared with 28.7 per cent in 1961. The male labour force participation rate* declined from 79.8 to 77.8 per cent in the same period.

The 14-to-19 age group of women was the only one to show a decline in the participation rate—from 32.3 in 1961 to 31.4 in 1966. The rate for those over 65 years of age remained at 5.9 per cent, unchanged from the situation in 1961; but of those between the ages of 65 and 69, slightly more than one in 10 was in the labour force in 1966. This represents a small decline from 1965.

In all other groups, there was some increase in the participation rate. The largest was in the 45-to-54 age group, with an increase of 5.7 per cent, followed closely by the 35-to-44 age group, with an increase of 5.5 per cent, and those of the 55-to-64 age group, with an increase of 5.2 per cent. In this last group, the participation rate, which was 15.8 per cent in 1956, rose to 23.2 per cent in 1961 and to 28.4 per cent in 1966.

The participation rate of married women in the female force continued to increase, rising from 20.8 per cent in 1961 to 26.8 per cent in 1966. The rate for single women dropped slightly from 51.4 per cent in 1961 to 49.7 per cent five years later. In numbers, more than 339,000 married women joined the labour force during the period. As a percentage of women employed, married women passed the half-way mark, and represented 52.5 per cent of those working in 1966.

The proportion of single women in the population increased from 23.8 in 1961 to 25.6 in 1966; but, as a percentage of the female labour force, dropped from 42.5 to 38.7 per cent during the period. Women who were widowed, divorced or separated accounted for approximately 10 per cent of the total female population and remained a fairly constant proportion of the labour force and of those employed during the period under review.

*The labour force as a percentage of the population.

Hours of Work

In 1961, 57.5 per cent of the women in employment worked between 35 and 44 hours a week, but the proportion dropped to 55 per cent in 1966, indicating a trend toward a shorter work week. The number working more than 44 hours dropped from 14.5 per cent to 11.7 per cent during the same period. In 1966, one out of every three women worked less than 35 hours, compared with 28 per cent in 1961.

Men and Women

There was also a trend toward shorter hours for men, but to a much lesser extent than for women. In 1966, 34 per cent of male workers were still working longer than 44 hours per week, compared with 11.7 per cent of women workers; in 1961, the ratio had been 35.7 per cent for men and 14.5 per cent for women.

Industry and Occupation

In establishments classified as being in the community, business and personal service group, women comprised slightly more than three in five of all workers employed in 1966. This industry classification is second to manufacturing in the total number of employees. In manufacturing, the ratio of women to all workers is one to five. Almost half the employees in finance, insurance and real estate are women.

In the two largest occupational groups where women predominate, there has been little change since 1961. In 1966, two thirds of all clerical workers, and more than half those in service and recreation occupations were women.

Facts and Figures about Women in the Labour Force, 1966 may be obtained on request from the Women's Bureau, Canada Department of Labour.

By the Civilian Rehabilitation Branch
Department of Manpower and Immigration

Vocational Rehabilitation in Review

With the enactment of the Vocational Rehabilitation of Disabled Persons Bill in 1961, the plan was that every disabled Canadian would receive all possible assistance to enable him to become a productive citizen, sharing in the country's prosperity and entering as fully as possible into the life of his community.

Since then, 10,247 handicapped persons have been reported by the provinces as rehabilitated under the federal-provincial Vocational Rehabilitation Program. These people represent only those who required special assistance to obtain gainful employment. Many of the handicapped are already in Canada's labour force competing successfully with their non-handicapped workmates. There are other handicapped persons, however, who still need help to find work.

Because Canada's statistics on the number of disabled persons and the kinds of disabilities most prevalent are meagre, a review of some of the cases that have come to the notice of the rehabilitation program may help to reveal some of the needs and the possibilities. All of the following cases have been selected at random from reports submitted during 1966-67.

A man of 28 with a Grade 13 education had never worked because of a congenital spastic condition which made it necessary for him to use two canes. He was receiving a Disabled Persons Allowance. This young man was given counselling and provided with training in engineering technology at the Ryerson Institute of Technology in Toronto. When he completed his training, the Institute placed him as a computer programmer. Today he earns more than $5,000 a year.

A woman, 45 years of age, had been a power machine operator all her life, but arthritis had caused weakness in her right hand and arm and she was unemployed. After counselling, she was given clerical training, and a Canada Manpower Centre found employment for her as a clerk-bookkeeper at $240 a month.

A man of 27 had a tumor removed from his spinal cord. The operation left him paralysed in the lower limbs, and with weakened arms and shoulders. Previously he had been a farm labourer, but after his illness, he became dependent upon his family for support. He was given counselling, medical care and physio-therapy. A training-on-the-job situation was found for him, and he is now employed as an auto parts clerk at $200 a month.

Congenital deformities in the hands and feet of an 18-year-old man had produced an inferiority complex, and at the time of his referral he was being supported by his mother. He was provided with counselling and medical and psychiatric treatment, and then given training in diesel mechanics. Now, four years later, he is employed as a marine diesel operator and earns $300 a month.

A man of 29 had been employed as a meat cutter. His right hand was amputated as a result of frostbite, and he was on social assistance at the time of his referral to the rehabilitation service. He was given counselling, medical service, surgical treatment and occupational therapy, and was provided with a hand prosthesis. This enabled him to return to his former occupation with his previous employer.

A young man with a Grade 10 education had congenital defective vision. He had worked only as a casual labourer, and at the time of referral was unemployed and dependent on relatives. After counselling, he was enrolled in a training course in plumbing at the district vocational school. He completed his training and was placed by the employment service as a plumber. He now earns about $550 a month.

A 19-year-old man lost his left hand and right eye. He had completed Grade 11 at school but became dependent on relatives for support. Following counselling, and medical and surgical treatment, he took a bookkeeping course at the district vocational school and was able to obtain employment as an office clerk at $350 a month.

Some handicaps are much more difficult to surmount. There is the case of a 22-year-old woman who is a quadriplegic because of polio. She had Grade 10 education and was receiving a Disabled Persons Allowance. She received counselling, medical treatment, physiotherapy and occupational therapy, and was given an electric wheelchair. After a course in shorthand and typing, she was provided with an electric typewriter. The Canada Manpower Centre subsequently found employment for her as a typist in a hospital, and she is now completely self-supporting.

A handicap is not necessarily physical. A young mentally retarded girl of 16 was referred for work assessment and work adjustment training to the Centre for Vocational Services in Hamilton, Ont. After a period of adjustment training, the Centre was able to place her in employment as a domestic earning $60 a month plus her room and board. She is filling a useful place in the life of her community.

The Minister of Manpower and Immigration, Mr. Marchand, stated in a recent address that "the Department of Manpower and Immigration seeks to create the opportunities and conditions that allow people to obtain and hold jobs for which they are best suited and which, in turn, make them most productive."

Although Mr. Marchand was not referring specifically to the Vocational Rehabilitation Program, his words were, in effect, a statement of its policy.

Policies for the Employment Of Older Workers

The preference for younger persons, and the views held by some employers concerning older workers as a class, constitute barriers to a fair appraisal of their personal competence and potentialities, says a report by a committee of the Organization for Economic Co-operation and Development. Published in January, the report contains the conclusions of the Manpower and Social Affairs Committee of the OECD on policies for the employment of older workers.

The committee cites the prevalence of formal or informal age limits in hiring and job placements as evidence of these attitudes, notwithstanding that exceptions are made and limits relaxed in periods of labour shortage.

The report goes on to say that, where discrimination exists against older persons, it is sometimes derived from institutional rules such as personnel practices favouring internal promotion or insurance plans. It is often reinforced by the failure of hiring officers to ascertain the individual's abilities and qualifications, or the inadequacy of existing tests of personal capacity or performance. Limited knowledge of special techniques of job redesign and training methods for older workers tend to strengthen resistance to their employment, according to the committee's conclusions.

The OECD paper suggests that general programs for health, education and vocational training should be available to workers of all ages to promote mental and physical adaptability to changing job requirements and social needs. Some older workers have social and psychological problems that call for vocational rehabilitation. Therapeutic, health, and rehabilitative aid, social case-work counselling, and educational services for hard-to-place individuals are mentioned as measures to help some older persons to adjust to current labour market standards.

The report advocates the use of training methods specifically adapted to the learning needs of older persons. Preparatory general education may be required by individuals prior to occupational training for suitable available jobs, and such training should be carried out under conditions providing personal security in an environment in which there is as little distraction as possible.

The document recommends the use of a special educational program designed to persuade employers to consider older applicants on their individual merits, and to discourage the imposition of maximum age limits.

Regarding pensions and retirement, the committee suggests that pension systems should allow for flexible retirement from work. It makes an exception in cases in which job requirements indicate otherwise. Private and public bodies concerned with retirement benefit or pensions systems should be encouraged to review their practice to permit, by legislation or regulation, greater personal choice as to age of retirement.

The committee has sponsored studies on several aspects of the employment of older workers related to job redesign, training methods, placement techniques for older workers; and also on a flexible retirement age for continued employment of older workers. An international management seminar and a regional multipartite seminar on job redesign and occupational training for older workers followed these studies. The committee was persuaded that a wider knowledge and use of the findings of the reports mentioned above would contribute to the attainment of the objectives of an active manpower policy.

The committee's study of the employment experience of persons of 40 years of age and older indicated that some of them could profit from assistance in adjustment to the labour market, and that specific programs for promoting their employment would increase the numbers of older persons actively participating in the economy.

Countries with relatively full employment and labour shortages could thereby bring unemployed, underemployed and prematurely retired older workers into their active labour force. The study suggests that, in furthering their social aims, developed countries with less than full employment should consider active participation of older workers, thus enabling individuals themselves to gain opportunities for satisfying employment.

The following OECD papers related to job redesign or special training techniques are available free, in English and French, from the Section on Older Workers, Vocational Rehabilitation, Department of Manpower and Immigration, Ottawa:

The Older Worker in a Changing Employment Environment—Ian Campbell.

Re-designing Jobs for Older Workers—K. F. H. Murrell, Welsh College of Advanced Technology, U.K.

Various Cases of Job Re-design for Older Workers—Dr. Paule Rey, O.E.C.D. Consultant.

The Adjustment of Older Workers to Highly Mechanized Work — Dr. C. A. Heijbel, Sweden.

Vocational Training Methods for Older Workers in the French Railways — A. Coqueret, France.

Job Re-design and Occupational Training—Attitude and Role of Employers and Their Organizations — Bernard Vrillon, Deputy General Secretary of the Social Commission, French Employers' Association.

Job Engineering and Job Re-assignment for the Older Worker in American Industry—Albert J. Abrams.

Training Older Workers in New Skills —Lawrence Williams.

Certification and Other Proceedings Before the Canada Labour Relations Board

By the Employee Representation Branch

The Canada Labour Relations Board met for three days during February. The Board granted five applications for certification, rejected two such applications, and ordered two representation votes. The Board also granted one request for a review of an earlier decision and one application for revocation of certification. During the month, the Board received seven applications for certification, and allowed the withdrawal of two such applications.

Applications for Certification Granted

1. Truckers, Cartagemen, Construction & Building Material Employees' Union Local 362, General Truck Drivers and Helpers, and Local 31 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Northern Industrial Carriers Ltd., Edmonton, Alta. (L.G., Mar., p. 190) (See also item No. 2, under Applications for Certification Rejected).

2. Seafarers' International Union of Canada on behalf of a unit of unlicensed employees employed aboard the *Lac Vancouver* by Steltner Development & Manufacturing Company Limited, St. Catharines, Ont. (L.G., Feb., p. 128).

3. International Association of Machinists and Aerospace Workers, on behalf of a unit of ticket and reservation office employees employed by Aeronaves de Mexico, S.A., at Montreal and Toronto (L.G., Mar., p. 190).

4. Warehousemen and Miscellaneous Drivers' Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America on behalf of a unit of furniture-moving employees employed in the Oakville Branch of M. Rawlinson, Limited, Toronto, Ont. (L.G., Mar., p. 190).

5. Professional Transport Workers' Union of Canada on behalf of a unit of drivers employed by Mid-West Tankers Ltd., Edmonton, Alta. (L.G., Apr., p. 246).

Applications for Certification Rejected

Canadian Union of Public Employees, applicant, Canadian Broadcasting Corporation, respondent, and International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada, intervener (L.G., Jan., p. 40) (Reasons for Judgment issued).

2. Professional Transport Workers' Union of Canada, applicant, Northern Industrial Carriers Ltd., Edmonton, Alta., respondent, and Truckers, Cartagemen, Construction & Building Material Employees' Union Local 362, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, intervener (L.G., Mar., p. 190) (See also item No. 1 of Applications for Certification Granted). The application was rejected for the reason that it was not supported by a majority of the employees affected in a representation vote conducted by the Board.

Representation Votes Ordered

1. *Syndicat des employes de Transport de St. Rémi,* applicant, and *Houle Express Ltée.,* St. Rémi, Que., respondent. (L.G., Apr., p. 246) (Returning Officer: R. L. Fournier).

2. Canadian Air Line Pilots' Association, applicant, and Central Airways/ Wong Aviation Limited, Toronto, Ont., respondent (L.G., Feb., p. 128) (Returning Officer: S. Emmerson).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the functions of the Canada Labour Relations Board, for which the Employee Representation Branch of the Department is the administrative agency.

Request for Review Granted

The Board granted a request by the International Association of Machinists and Aerospace Workers for a review of the Board's order dated January 12, 1965 which certified the union as the bargaining agent for a unit of various classifications of employees of Atomic Energy of Canada Limited, employed in the Maintenance Section of the Engineering Branch of the company's Whiteshell Nuclear Research Establishment at Pinawa, Man. The Board directed that the applicant's certificate be amended by adding to the bargaining unit certain employees in the company's Stores Section, Administration Division, Whiteshell Nuclear Research Establishment (L.G. 1965, p. 245).

Application for Revocation Granted

Lorne McEwen and William Publow, applicants, Taggart Service Limited, Ottawa, Ont., respondent, and Teamsters, Chauffeurs, Warehousemen and Helpers' Union Local 91, General Truck Drivers' Union Local 938, and Transport Drivers, Warehousemen and Helpers' Union Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, respondents (L.G., Mar., p. 190). The application was for revocation of the Board's order dated July 27, 1964 certifying the respondent unions as bargaining agent for a unit of employees of the respondent company. The granting of the application followed a representation vote ordered by the Board.

Applications for Certification Received

1. *Syndicat National des Employés des Minoteries Phenix (CSN)* on behalf of a unit of employees of Eastern Canada Flour Mills, Ltd., Montreal, Que. (Investigating Officer: R. L. Fournier).

2. *Syndicat National des Employés du Port de Montreal (CSN)* on behalf of a unit of cold storage warehouse and refrigeration engineers employed by the National Harbours Board at Montreal, Que. (Investigating Officer: C. E. Poirier).

3. International Association of Machinists and Aerospace Workers on behalf of a unit of pilots and co-pilots employed by Northern Wings Limited, Sept-Iles, Que. (Investigating Officer: R. L. Fournier).

4. Chauffeurs, Teamsters and Helpers' Union Local 395, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Motorways Van Lines Ltd., carrying on business under the name and style of Security Storage Division of Motorways Van Lines Ltd., Regina, Sask. (Investigating Officer: A. E. Koppel).

5. Chauffeurs, Teamsters, and Helpers' Union Local 395, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Smeed's Moving & Storage Ltd., Regina, Sask. (Investigating Officer: A. E. Koppel).

6. Building Material, Construction and Fuel Truck Drivers' Union Local 213, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of H. M. Trimble & Sons Ltd., Calgary, Alta. (Investigating Officer: D. H. Cameron).

7. Canadian Merchant Service Guild, on behalf of a unit of licensed personnel employed on vessels operated by Blue Peter Steamships Limited, St. John's, Nfld. (Investigating Officer: W. J. Gillies).

Applications for Certification Withdrawn

1. Licensed Aircraft Engineers, Local 1642, CLC, applicant, and Bristol Aviation Services Ltd., Dorval, Que., respondent (L.G., Apr., p. 246).

2. International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, Local 141, and International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers, Local 938, General Truck Drivers' Union, applicant, and Boyes Transport Limited, Malton, Ont., respondent (L.G., Apr., p. 246).

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Conciliation and Arbitration Branch. The Employee Representation Branch acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944 and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for controlling applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements—that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and Other Proceedings Before the Canada Labour Relations Board and (2) Conciliation and Other Proceedings Before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's Newfoundland. The territory of the officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; officers resident in Toronto confine their activities to Ontario; officers in Montreal are assigned to the province of Quebec; and officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Conciliation and Arbitration Branch and the Employee Representation Branch are in Ottawa.

OFL educational conference held at Niagara Falls

To obtain changes in labour legislation, Canadian labour should use the methods it employed in an earlier campaign to secure human rights legislation, Prof. H. W. Arthurs of Osgoode Hall Law School, Toronto, told more than 1,000 delegates representing labour, the legal profession and governments at the Ontario Federation of Labour educational conference, held at Niagara Falls in February.

Prof. Arthurs observed that the human rights campaign succeeded because "it was designed to make legally effective a public policy in favour of racial justice to which political leaders and opinion makers were already morally committed. . . ."

On the subject of injunctions, Prof. Arthurs said that labour should seek to have the widely accepted rights of free speech and assembly and of due process made effective in this context. He suggested creation of a legislative code of picketing that would give courts a clear yardstick, and the adoption of special procedures appropriate to labour litigation.

William Dodge, Executive Vice-President of the Canadian Labour Congress, expressed the view that injunctions are instruments favouring one class of society over another. He added that "there are no boards, commissions, experts or arbitrators of any description capable of making wide decisions as effectively as the free bargaining system. . . ."

Conciliation and Other Proceedings Before the Minister of Labour

By the Conciliation and Arbitration Branch

During February, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Canada Coach Lines Limited, Hamilton, Ont., and Amalgamated Transit Union, Division 107 (Conciliation Officer: T. B. McRae).

2. *Martel Express Ltée,* Farnham, Que., and Local 106 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: C. E. Poirier).

3. Cassiar Asbestos Corporation Limited, Clinton Creek, Y.T., and Local 564, International Union of Mine, Mill and Smelter Workers (Canada) (Conciliation Officer: J. D. Meredith).

4. Atomic Energy of Canada Limited, Pinawa, Man., and Lodge 608, International Association of Machinists and Aerospace Workers (Conciliation Officer: A. E. Koppel).

5. Atomic Energy of Canada Limited, Pinawa, Man., and Local 938, Canadian Union of Public Employees (Conciliation Officer: A. E. Koppel).

6. National Harbours Board (Quebec harbour police) and Public Service Alliance of Canada (Conciliation Officer: C. E. Poirier).

7. Atomic Energy of Canada Limited, Pinawa, Man., and Local 308, Building Service Employees' International Union (Conciliation Officer: A. E. Koppel).

8. National Harbours Board, and Public Service Alliance of Canada (Prescott elevator group) (Conciliation Officer: T. B. McRae).

9. B. C. Air Lines Limited, Vancouver International Airport, and Local 234, Canadian Brotherhood of Railway Transport and General Workers (Conciliation Officer: D. S. Tysoe).

10. *Radio Lac St-Jean Ltée (CFGT)* Alma, Que., and National Association of Broadcast Employees and Technicians (Conciliation Officer: C. E. Poirier).

11. Central Truck Lines Limited, North Bay, Ont., and Local 938, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: T. B. McRae).

12. Canadian National Railways (Borden—Cape Tormentine Ferry Service) and Canadian Merchant Service Guild (Conciliation Officer: H. R. Pettigrove).

13. *Radio Iberville Ltée,* Ville Jacques-Cartier, Que., and *Syndicat Général de la Radio CSN (CHRS)* (Conciliation Officer: R. L. Fournier).

14. Allied Aviation Service Company of Newfoundland, Limited, and Lodge 927, International Association of Machinists and Aerospace Workers (Conciliation Officer: W. J. Gillies).

Settlements by Conciliation Officers

1. Alaska Cruise Lines, Ltd., Vancouver, and Seafarers' International Union of Canada (Conciliation Officer: D. S. Tysoe) (L.G., March, p. 191).

2. Central Truck Lines Limited, Val d'Or, Que., and Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: R. L. Fournier) (L.G., March, p. 191).

3. The Cumberland Railway Company (Sydney and Louisburg Division) and Brotherhood of Locomotive Firemen and Enginemen (Conciliation Officer: D. T. Cochrane) (L.G., Feb., p. 129).

4. New Imperial Mines Ltd., Whitehorse, Y.T., and Local 924, International Union of Mine, Mill and Smelter Workers (Canada) (Conciliation Officer: J. D. Meredith) (L.G., Feb., p. 129).

5. Canadian National Steamship Company Limited, Vancouver, and Seafarers' International Union of Canada (Conciliation Officer: J. D. Meredith) (L.G., Feb., p. 129).

Conciliation Board Appointed

National Harbours Board, and National Syndicate of Employees of the Port of Montreal (CNTU) (L.G., Apr., p. 248).

Conciliation Boards Fully Constituted

1. The Board of Conciliation and Investigation established in January to deal with a dispute between *Radio Saguenay Limitée* (CKRS and CKRS-TV) Jonquière, Que., and National Association of Broadcast Employees and Technicians (L.G., Apr., p. 248) was fully constituted in February with the appointment of His Honour Judge René Lippé of Montreal, as Chairman. Judge Lippé was appointed by the Minister on the joint recommendation of the other two members of the Board, company nominee Claude Lavery and union nominee Claude Trudel, both of Montreal.

2. The Board of Conciliation and Investigation established in January to deal with a dispute between Pacific Western Airlines Limited (IFR pilots) Vancouver International Airport, and Canadian Air Line Pilots' Association (L.G., Apr., p. 248) was fully constituted in February with the appointment of George W. Rogers of Vancouver, as Chairman. Mr. Rogers was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, company nominee E. A. Alexander, Q.C., and union nominee P. Baskin, both of Vancouver.

Board Report Received

CHAB Ltd. (CHAB-TV) Moose Jaw, Sask., and National Association of Broadcast Employees and Technicians (L.G., March, p. 191).

Strikes Terminated During February

1. *CKCV (Quebec) Limitée,* Quebec City, Que., and National Association of Broadcast Employees and Technicians (L.G., Oct. 1966, p. 591).

2. Taggart Service Limited, Ottawa, Ont., and Locals 91, 938 and 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L.G., Nov. 1966, p. 662).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the administrative services of the Minister of Labour and the Conciliation and Arbitration Branch of the Department.

By the Legislation Branch

Legal Decisions Affecting Labour

The Ontario Court of Appeal rules that an employee cannot sue for wages due under a collective agreement when the right to payment is disputed

The British Columbia Supreme Court rules that the B.C. Labour Relations Act applies to employees of Simon Fraser University

On November 15, 1966 the Ontario Court of Appeal, in dismissing an employee's appeal, ruled that the courts have jurisdiction to entertain a court action by an employee for pay in lieu of vacation due to him under a collective bargaining agreement, where the right to receive the payment is not disputed by the employer. But when the employer disputed the worker's claim for pay, the court was prevented from deciding this issue by the terms of the collective agreement regarding settlement of grievances and the provisions of the Labour Relations Act, because the court had no jurisdiction to interpret a collective agreement.

Circumstances of Dispute

Carl Close, the plaintiff in the case at bar, was a member of the Toronto Typographical Union, Local 91, which union was his duly certified bargaining agent. The plaintiff was entitled to the benefits of a collective bargaining agreement made between the union and the Globe and Mail Ltd., and dated December 11, 1961.

This agreement had originally been effective from January 1, 1961 to December 31, 1962; its terms and conditions had been continued in effect during the negotiations which took place between the parties for a new collective bargaining agreement. The negotiations had been continued for a long time prior to July 2, 1964, on which date the Globe and Mail Ltd. notified the Union and its members, who were working in the production of the defendant's daily newspaper, that certain changes would be introduced in the working arrangements as of July 9, 1964. On this latter date, the members of the union including the plaintiff went on strike and have not since returned to work.

The collective bargaining agreement contained in provisions as to vacation with pay sections 1301 to 1310. Section 1301 provided for three weeks vacation pay after one year of employment ending March 31. Section 1301A granted a fourth week of vacation with pay to employees who had completed 23 years of continuous service on or before March 31 in any year. Section 1304 provided that new employees, substitutes and extras who worked a portion of the year would receive one day of vacation with pay for the first nine days worked, and one day for each remaining 17 days worked, with a maximum of 15 days vacation for any vacation year; the employees to whom section 1301A applied would receive one day for the first seven days worked, and one day for each remaining 12 days worked, with a maximum of 20 days of vacation for any vacation year. Section 1310 provided:

> When a member's employment is terminated for any reason, he shall receive accumulated vacation credits in accordance with the applicable pro rata basis set out in Section 1304.

In the calendar year 1964, prior to the July 9, the plaintiff received one week's vacation with pay. After cessation of work, the defendant paid to him an amount of money representing two per cent of his pay earned from the 1st April 1964 to the 9th July, 1964.

Afterwards the plaintiff instituted an action for pay in lieu of vacation, calculating his claim on the normal amount of wages for three weeks, the remaining portion of the four-week vacation for which he claimed to be qualified due to his length of service.

The action was dismissed by the County Court Judge, and from the dismissal the plaintiff appealed to the Court of Appeal.

Company's and Employee's Submissions

In the Court of Appeal the defendant company submitted that by virtue of the Ontario Rights of Labour Act, the Ontario Labour Relations Act, and the collective bargaining agreement, the jurisdiction of the courts was ousted, leaving to the employee as his only remedy for the recovery of any amount due to him, the procedure set out in the collective bargaining agreement.

In support of the contention that the courts had jurisdiction to deal with the employee's claim, counsel for the employee relied on the judgment of Chief Justice McRuer in *Re Grottoli v. Lock & Son Ltd.* (L.G., 1964, p. 49).

In rendering the judgment of the Court of Appeal, Mr. Justice Kelly noted that, in the *Grottoli* case, the claim of the plaintiff was for the unpaid portion of vacation pay calculated at 4 per cent of his wages earned from July 1, 1956 to June 30, 1957. The plaintiff was a member

of a union which, as bargaining agent for the members of the union, had entered into a collective bargaining agreement with the defendant; this agreement provided for vacation pay at the rate of 4 per cent of earnings.

The defendant did not allege that the plaintiff had not become entitled to the amount claimed, but challenged the jurisdiction of the court to deal with the claim in the light of the collective bargaining agreement, the provisions of the Labour Relations Act, and the Rights of Labour Act. No question was raised in the courts as to the employee's entitlement to the amount claimed. Chief Justice McRuer held that the court had jurisdiction to hear and determine the employee's claim.

Unpaid Wages

Also, counsel for the employee brought to the attention of the court the decision of the Supreme Court of Canada in *Hamilton Street Railway Company v. Northcott* (L.G., Apr., p. 249), in which the Supreme Court ruled that the grievance procedures under collective agreement cannot deprive an employee of the right to sue for unpaid wages.

Mr. Justice Kelly noted further that, in the *Hamilton Street Railway Co.* case, an employee sued for unpaid wages to which he was entitled on the basis of the finding of the board of arbitration as to the meaning of the collective bargaining agreement. The board of arbitration made no award of specific compensation for the employee found to be so entitled.

The defendant company disputed the jurisdiction of the court to entertain the claim, and argued that the effect of the collective bargaining agreement, the Labour Relations Act, and the Rights of Labour Act was to oust the jurisdiction of the courts with respect to such a claim. Because the collective bargaining agreement had been interpreted by the board of arbitration, however, and the right of the employee to receive the amount claimed was not placed in issue, the courts upheld the jurisdiction of the court to entertain the employee's claim.

Mr. Justice Kelly added that, in the *Hamilton Street Railway Co.* case and the *Grottoli* case, the issue was whether an employee—being a member of a bargaining unit as agent for which a union had entered into a collective bargaining agreement with the employer — had the right of recourse to the courts for the enforcement of the payment to him of wages which the employer improperly withheld, although admitting them to be due and owing. These cases established beyond question that in such circumstances the jurisdiction of the courts is unaffected by the provisions of a collective bargaining agreement, the Labour Relations Act, and the Rights of Labour Act.

Lack of Jurisdiction

Considering the issue at bar, Mr. Justice Kelly noted that the parties to the action took divergent and irreconcilable views with respect to the plaintiff's right to vacation, and to pay in lieu of vacation. The employee contended that the holidays with pay to which he was entitled in the year 1964 were the holidays referable to the working year ended March 31, 1964; the employer contended that the holidays with pay which the employee was to be given in the calendar year 1964 were holidays referable to the working year ending December 31, 1964, by virtue of the terms of the collective bargaining agreement.

In the opinion of Mr. Justice Kelly, the court below could not give judgment based on either of these contentions unless and until it had interpreted the collective bargaining agreement and adopted one or other of the alternative interpretations; this it was precluded from doing, however, by the terms of the collective bargaining agreement and the terms imported into that agreement by the provisions of the Labour Relations Act.

To have made any decision involving the interpretation of the collective bargaining agreement would have been an alleged exercise of a jurisdiction that the Court is precluded from exercising. Any interpretation of the collective agreement is a question that would have had to be decided by resort to the machinery provided in the collective bargaining agreement.

Appeal Dismissed

In a unanimous decision, the Court of Appeal dismissed the employee's appeal on the ground that the trial judge had no jurisdiction to try the action. *Close v. The Globe and Mail Ltd., 66 CLLC, para. 14, 160.*

B.C. SUPREME COURT

On August 15, 1966 Mr. Justice Dohm of the British Columbia Supreme Court, in dismissing an application by way of *certiorari* to quash a certification order, held that the B.C. Labour Relations Act applies to all employees in the province except those of the Crown, and includes employees of Simon Fraser University created under the Universities Act (B.C.). Consequently the Board of Governors of the University in question is "employer" within the meaning of the B.C. Labour Relations Act, and the powers given to the University governors must be interpreted to include the power to bargain with a union certified under the Labour Relations Act with a view to concluding a collective agreement.

Summary of Facts

The board of governors of Simon Fraser University brought an application by way of *certiorari* proceedings to quash an order made by the Labour Relations Board on April 12, 1966 whereby twelve different trade unions were certified as the appropriate bargaining agents for employees of Simon Fraser University at Burnaby, B.C. The order was made under powers granted to the Labour Relations Board by the B.C. Labour Relations Act.

Simon Fraser University was established as a corporate body under the B.C. Universities Act passed in March of 1963.

University's Submission

Counsel for the board of governors of the University submitted that the certification of the trade unions in question was an error in law, and that the Labour Relations Board either exceeded or lacked jurisdiction to make such an order. He submitted that, because of the language of the statute that created the Simon Fraser University, the board of governors of the University has unilateral powers that preclude the machinery of negotiating and collective bargaining provided by the Labour Relations Act.

Counsel further submitted that there was a statutory conflict between the Labour Relations Act and the Universities Act; because the latter is a special statute, it overrides the former, which is a general statute. It was also submitted that it would be unlawful for the board of governors of Simon Fraser University to delegate any of its statutory powers.

Counsel argued further that the Universities Act precluded the employees and servants of the University from the rights and privileges to which they would otherwise be entitled under the Labour Relations Act. Reference was made to sec. 46(d) and 52 of the Universities Act regarding unilateral powers. These read as follows:

> Sec. 46(d) to appoint the President of the University, Deans of all Faculties, the Librarian, the Registrar, the Bursar, the Professors, Associate Professors, Assistant Professors, Lecturers, Instructors, and other members of the teaching staff in the University, and all such officers, clerks, employees, and servants as the Board may deem necessary for the purposes of the University, and to

fix their salaries or remunerations, and to define their duties and their tenure of office or employment, which, unless otherwise provided, shall be during the pleasure of the Board. . . .

Sec. 52. If any question arises about the powers and duties of the Convocation, the Chancellor, the President, the Senate, the Faculties, or any officer or servant of the University, the same shall be settled and determined by the Board, and its decision is final.

In short, the University counsel submitted that because of these unilateral statutory powers, the board of the University should not have been found to be an "employer" by the Labour Relations Board.

Mr. Justice Dohm rejected this argument on the ground that under sec. 65 of the Labour Relations Act, the Labour Relations Board has the power to decide who is an employer; and the Board's decision on such a question is final and conclusive. There was implicit in the certification order a finding that the board of governors of the University was an employer.

Negotiating Collective Agreement

The effect of the order of certification was that, pursuant to notice, the parties "shall commence to bargain collectively and shall make every reasonable effort to conclude a collective agreement."

Mr. Justice Dohm noted that, under sec. 46 (m) and (n) of the Universities Act, the university board had the power to enter into any agreements. This section reads as follows:

Sec. 46. The management, administration, and control of the property, revenue, business, and affairs of the University are vested in the Board. Without thereby limiting the general powers conferred upon or vested in the Board by this Act, the Board has power

(m) to enter into any agreements or covenants on behalf of the University; and

(n) to do and perform all other matters and things which may be necessary for the well-ordering and advancement of the University.

Mr. Justice Dohm found nothing contradictory between the Universities Act and the Labour Relations Act, and in his opinion the board of governors of the University would be neither abdicating these powers or duties nor committing any illegal acts by negotiating in conformity with the Labour Relations Act.

Mr. Justice Dohm stated further that the board of governors would be wrong in taking the position that they were at liberty not to negotiate any type of collective agreement, or to negotiate only in respect of certain matters. In his view, Simon Fraser University is not an agency of the Crown, but is a separate corporate entity and an employer. As the Labour Relations Act of British Columbia binds all employers except the Crown (by reason of the B.C. Interpretation Act), it follows that all employees except Crown employees are entitled to the protection afforded labour under this statute.

According to Mr. Justice Dohm, the interpretation of the Universities Act urged by counsel for the board of governors would relegate the employees and servants of the University to a position of injustice, because it would impute to the Legislature an intention to prevent the university employees from having the full protection of union representation by exempting the university as an employer under the Labour Relations Act.

Mr. Justice Dohm held that the Legislature could not intend an interpretation of the Universities Act that would disregard fundamental principles. The Legislature must have had knowledge of the prior general Act at the time of enacting the later special Act. He also presumed that the Legislature did not intend to make any substantial change in the existing law and policy that gives certain rights to all employees in the Province. In his opinion, it would require a clear expression to show any contrary intention on the part of the Legislature. He thought that the wording of some sections in the Universities Act could be improved, but that the employees of the University should not be deprived of any of the protection of prominent legislation because of ill-chosen language in the statute.

Mr. Justice Dohm distinguished the decision of Mr. Justice Riley of the Supreme Court of Alberta in *National Union of Public Employees, Local 862 v. Board of Industrial Relations and Governors of the University of Alberta* (L. G. 1963, p. 818) on the ground that the situation in Alberta was somewhat different, in that the Alberta University Act, being a special Act, antedated the Alberta Labour Disputes Act; and Mr. Justice Riley applied the maxim *generalia specialibus non derogant.* In addition, there is in the British Columbia Universities Act, sec. 46(m) and (n) (referred to above) which do not appear in the Alberta statute.

Duty to Negotiate

In conclusion, Mr. Justice Dohm held that the board of governors of Simon Fraser University are in the same position as any other employer (apart from the Crown), that their powers are subject to the Labour Relations Act, and that they should accordingly make every reasonable effort to conclude collective agreements with the respective unions, without restrictions.

Regina v. B.C. Labour Relations Board, Ex parte Simon Fraser University, (1966) 58 D.L.R. (2nd), Part 6, p. 571; 66 CLLC, para. 14,150.

Revisions announced in Manpower Mobility Program

A major revision of the Manpower Mobility Program was announced in the House of Commons by Manpower Minister Marchand in March.

The revised program drops the restrictive condition that workers must be unemployed or permanently laid off four months prior to qualifying for a grant to move to a new job area. In addition, it drops the requirement that aid paid to workers unemployed for less than four months must be repaid.

"Any man who is unemployed, or has been notified of his permanent layoff, will be entitled to a grant if there is little prospect of suitable employment in his home community and there is a definite job for him to go to in another area," the Minister said.

Two new features to the mobility plan were introduced by Mr. Marchand. When a person forced to move to a new job location faces "considerable expense and even loss" in selling his home in an area of unemployment, a grant of $500 will be paid when the home is sold or a new one purchased.

The Minister proposed to make small grants to enable unemployed people to look for work in the nearest area where there are better opportunities than in their home district. This grant will cover the person's return travel expenses and, if he has dependants, a modest allowance to help support them while he is away. This allowance will be up to $20 a week for the first dependant, $30 a week for two dependants, and $40 a week for three or more. The allowance will be available for a maximum of four weeks.

Mr. Marchand said that the former program, introduced in 1965, had not provided as much help as was intended. He also mentioned that some of the people who most need help in moving are not unemployed but are people such as marginal farmers with very low incomes. He noted that there were problems of definition and administration that must be solved before making a further extension of coverage. The changes were planned to take effect on April 1, 1967.

Recent Regulations under Provincial Legislation

New trades regulations have been issued in three provinces

Saskatchewan has increased allowances for apprentices

In recent months, British Columbia and Ontario have designated new trades under their respective Apprenticeship and Tradesmen's Qualification Acts, and Manitoba has issued its first regulations for the industrial electricians' and industrial mechanics' trades.

In Saskatchewan, the scale of allowances for apprentices was revised.

ALBERTA

Electrical Protection Act

Alberta has amended its regulations under the Electrical Protection Act.

Subject to certain amendments, the ninth edition of the Canadian Electrical Code (C22.1-1966) has been adopted as regulations under the Act, replacing the earlier edition, which had been in the governing standard since January 1, 1963.

The special rules governing electrical installations and equipment in oil fields were revised, and new safety rules with respect to overhead power lines were added.

The new regulations — Alta. Reg. 420/66 and 421/66 gazetted December 31 and Alta. Reg. 441/66 gazetted January 14—went into force on January 1, 1967.

BRITISH COLUMBIA

Apprenticeship and Tradesmen's Qualification Act

New regulations under the British Columbia Apprenticeship and Tradesmen's Qualification Act, gazetted as B.C. Reg. 1/67 to 3/67 on January 5, amended the schedule of designated trades and added new provisions governing certificates of proficiency.

The industrial electrical trade, defined as the installation, maintenance and repair of electrical equipment in industrial operations, has been added to this schedule.

The minimum qualifying time necessary for a certificate of proficiency in this trade is 8,000 hours. Employees in the lumber industry with less experience, who are presently employed as journeymen electricians, are eligible for examination, provided that they apply within the next six months.

Another new provision deleted the automobile maintenance trade, with its five branches, from the list of designated trades and added the following trades to the schedule: automotive mechanical repair; automotive body repair; automotive painting and refinishing; automotive trimming, and automotive radiator manufacture and repair.

The qualifying time required for a certificate of proficiency is 10,000 hours in the automotive mechanical repair and body repair trades, and 8,000 in the automotive painting and refinishing trade.

Another new regulation established 8,000 hours as the minimum qualifying time required for a certificate of proficiency in the heavy duty mechanic trade.

MANITOBA

Apprenticeship Act

Special apprenticeship regulations for the industrial electricians' and industrial mechanics' trades were gazetted as Man. Reg. 131/66 on January 7 and went into force on the date of publication.

The minimum age for apprentices in these trades is 18. The minimum educational standard is Grade 10 or its equivalent in the industrial electricians' trade, and Grade 9 in the industrial mechanics' trade. Persons with less education may be accepted with the approval of the Director of Apprenticeship.

The term of apprenticeship is four years in the industrial electricians' trade and three in the industrial mechanics' trade, with provision for time credits for previous training or experience in the trade.

The regulations do not limit the number of apprentices, but they permit the Trade Advisory Committee to fix the ratio of apprentices to journeymen, subject to the approval of the Provincial Apprenticeship Board.

Apprentices in these trades are to work the same hours as journeymen. If no collective agreement is in force, the Board will fix the starting rate, as well as progressive increases. The wages of apprentices for overtime hours are to be adjusted on the same basis as the wages of a journeyman working for the same employer in the same area.

A person with at least six years experience as an industrial electrician or an industrial mechanic may obtain a certificate of qualification without examination on the recommendation of his employer, provided that he applies within 12 months after the publication of the regulations. After that, he must pass the prescribed examination in order to qualify for a certificate.

ONTARIO

Apprenticeship and Tradesmen's Qualification Act, 1964

In Ontario, the trade of dry cleaner has been designated a certified trade by O.Reg. 22/67 gazetted on January 28.

An apprenticeship training program, consisting of four periods of 900 hours each, has also been established for this trade.

SASKATCHEWAN

Apprenticeship and Tradesmen's Qualification Act

The scale of weekly allowances payable to apprentices who are attending full-time class instruction was revised by a regulation gazetted February 10 (Sask. Reg. 34/67).

The weekly rates for apprentices are:

Single	$30
With one dependant at home	51
With two dependants at home	60
With three dependants at home	68
With one dependant away from home	66
With two dependants away from home	75
With three dependants away from home	83

Seasonable Increase in Claimants for Unemployment Insurance

By the Unemployment Insurance,
Pensions and
Manpower Section, Dominion Bureau of Statistics

Claimants for unemployment insurance benefit on December 30, 1966 numbered 423,400, approximately 5,000 more than the 418,000 recorded on the same date in 1965. These totals comprise regular and seasonal* benefit claimants numbering 363,800 and 59,600 respectively, at December 30, 1966 and 351,200 and 66,800 a year earlier. On November 30, 1966 claimants totalled 266,300 of which 4,000 were classed as seasonal benefit claimants.

Males accounted for almost three quarters of the month-end claimant total, and between 70 and 75 per cent of these began to claim during the month. The month-to-month increase of 157,000 was made up of 134,000 males and 23,000 females.

As usual, all provinces reported substantial percentage increases in the November-to-December total of claimants, the increases being larger in the Atlantic provinces than elsewhere. This condition is explained by the fact that seasonal benefit claimants are proportionately more numerous in that area, where they account for more than a quarter of the total, compared with approximately 15 per cent at the national level. In comparison with 1965, the largest percentage increase occurred in British Columbia; small increases of 5 per cent or less occurred in Newfoundland and Ontario; and elsewhere, 1966 totals were lower than the previous year's. The higher claimant totals in British Columbia this year resulted from labour disputes in certain segments of the province's labour force.

Initial and renewal claims filed in local offices across Canada during December totalled 251,500 compared with 262,200 in December 1965. Claims during November totalled 152,700. The month-to-month increase of 98,800 was slightly lower than last year, when the increase was 110,600. More than 90 per cent of the claims filed in December were in respect of persons who separated from employment during the month, and the remainder were on behalf of persons whose benefit rights had terminated and who were seeking extension of those rights.

Beneficiaries and Benefit Payments

Benefit payments during December were 6 per cent higher than a year earlier, a total of $22,400,000 being paid out to an estimated 215,000 beneficiaries — an average weekly payment of $24.81. During December 1965, $21,200,000 was paid to some 217,000 beneficiaries — an average weekly rate of $24.46. In November, 141,000 beneficiaries received $14,300,000 the average weekly rate being $24.19.

*Benefit payable during the period beginning with the Sunday before December 1 and ending with the Saturday after May 15, to certain classes of claimants unable to fulfil the requirements under the regular benefit provisions of the Act.

Insurance registrations and other UIC statistics

On December 31, 1966, insurance books or contribution cards had been issued to 5,166,363 employees who had made contributions to the Unemployment Insurance Fund since April 1.

On the same date, registered employers numbered 345,863, a decrease of 762 since November 30.

During December, 9,471 investigations were conducted by enforcement officers across Canada. Of these, 7,139 were spot checks of claims to verify the fulfilment of statutory conditions, and 703 were miscellaneous investigations. The remaining 1,629 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 344 cases, 134 against employers and 210 against claimants.*

Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 768.*

Revenue received by the Unemployment Insurance Fund in December 1966 totalled $35,960,792.27 compared with $38,302,808.55 in November and $33,738,884.12 in December 1965.

Benefits paid in December totalled $22,426,912.51 compared with $14,286,899.89 in November and $21,183,762.50 in December 1965.

The balance in the Fund on December 31 was $287,012,486.25. On November 30 it was $273,478,606.49; and on December 31, 1965 it was $161,765,935.36.

*These do not necessarily relate to the investigations conducted during this period.

Summary Table

Decision of the Umpire

Under the Unemployment Insurance Act

CUB 2657

The claimant filed an initial claim for benefit at the local office at New Westminster, B.C. on September 9, 1964. She said she had been employed in Montreal and had left voluntarily because her husband wanted to attend the University of British Columbia. Her employer confirmed these facts. She claimed her six-year-old daughter as a dependant, and a benefit period was established.

The claimant next worked in New Westminster from November 23, 1964 until January 13, 1965. On March 17, 1965 she filled a renewal application for benefit, and reported that she had been on leave of absence until March 1, 1965 because of illness, and that she was expecting a confinement about September 1, 1965. She again claimed her six-year-old daughter as a dependant. The claim was allowed.

In September 1965 an investigation revealed that the claimant's husband was also on benefit and that he had claimed the same child as a dependant. A statement from the husband's employer, dated October 7, 1965 showed that, from September 1964 until August 1965, the husband had worked part time during the university year and full time during vacation periods.

On March 29, 1966 the claimant was notified that she was not, as of May 2, 1965, entitled to the dependency rate of benefit because she had failed to prove that the person claimed was a dependant within the meaning of the Act. The insurance officer was of the opinion that the claimant did not wholly or mainly support the child.

On March 31, 1966 the claimant appealed to the board of referees. Her notice of appeal read:

> I wish to appeal the decision that I did not mainly support my daughter . . ., commencing 2 May 1965. I think I should not have been disqualified as I have proof that I did support her. . . .

The board's unanimous decision reads, in part:

> . . . The Board proceeded to hear [her representative's] remarks concerning the insurance officer's submission to the board, which is as follows:
>
> "In September 1965 the local office discovered that both the claimant and her husband were on claim, each claiming the same child as [his (her)] dependant. It was therefore decided to investigate whether or not the claimant had been wholly or mainly supporting her daughter. . . ."
>
> Both the claimant and (her husband) emphatically denied that dependency benefits for the child had been claimed by both of them at the same time.
>
> Subsequent to their departure, the board ascertained that this particular paragraph was in error, and that the child had only been claimed as a dependant by one of the parents at any one time.
>
> Both the claimant and her representative insisted that at no time did her husband support either her or the child, wholly or in part, while living together in the same household, for the period under review commencing 2 May 1965.
>
> It is the opinion of the board that the claimant's husband commenced receiving a substantially higher weekly wage, effective 2 May 1965.
>
> The insurance officer decided that [the claimant's husband] was now wholly or mainly supporting the dependant, and at this stage suspended claimant's dependency rate of benefit, and with this decision, members of the board are in full agreement. The appeal is disallowed.

The claimant sought, and was granted, leave to appeal to the Umpire.

A statement of observation submitted on June 30, 1966 by the Chief of the Adjudication Division on behalf of the insurance officer, reads in full:

> "Both the insurance officer and the board of referees appear to have been influenced by the amount of the earnings of the claimant's husband during his summer employment and gave more weight to that factor than appears to be justified in view of the other evidence. That evidence is the fact that since 1963 the claimant's husband has been attending university and since that date the claimant has established herself as the family breadwinner. . . .
>
> "Furthermore, all the husband's earnings derived from his part-time employment while attending university went towards his tuition fees and books, and the claimant's earnings during this period seem to have taken care of the family living expenses. These facts have not been contradicted.
>
> "While the husband's summer employment yielded more than he had earned from his part-time employment, it is considered that these earnings were not such as to break the continuity of dependency or to render its genuineness doubtful (CUB-715) (L.G. 1951, p. 1395). It is therefore submitted that, as the claimant had assumed the role of breadwinner for the duration of her husband's university studies and was living up to her undertaking, her daughter . . . was dependent on her within the meaning of the Act. . . .
>
> "Taking all the evidence into consideration, it now appears that the weight of evidence should have fallen in favour of the claimant, and the benefit of any doubt should be resolved in her favour."

Considerations and Conclusions

I concur with the statement of observations submitted to me on behalf of the insurance officer.

As a consequence, the appeal is allowed.

Canadian Railway Office of Arbitration Grants One Claim and Rejects Four

Five separate disputes, concerning the penalizing of an engineer, two claims for mileage submitted by engineers, and dismissals of a trainman and a yard foreman were dealt with by the Canadian Railway Office of Arbitration at hearings in Montreal on February 13, 1967.

The one-man tribunal of Magistrate J. A. Hanrahan granted one claim and disallowed four.

The five claims and the award of the arbitrator in Cases Nos. 50, 51, 52, 53, and 54 are:

CASE No. 50

Dispute between the Canadian National Railway Company (Atlantic Region) and the Brotherhood of Locomotive Engineers over discipline assessed a locomotive engineer for refusal to carry out company instructions.

An engineer was ordered to operate shunter train No. 778 from Bathurst to Tracadie, N.B., on January 28, 1966. Because of the snow conditions, it was necessary to have a snow plow operated ahead of the engine. On reporting for duty, the engineer refused to operate the train with the snow plow ahead of the engine because the plow had wings attached. The engineer was removed from service and assessed 10 demerit marks and time out of service to count as suspension for refusal to carry out the orders given him by the yard agent. The brotherhood appealed the discipline assessed. The company refused to remove the discipline.

A spokesman for the brotherhood explained to the arbitrator the operation of pushing wing and wedge snow plows, and article 9-B of the engineer's schedule. In order to prevent the possibility of an accident, a qualified man must be placed in wing snow plows to warn of hidden obstructions ahead, and the locomotive pushing it must not have cars attached to it. In the case of pushing wedge snow plows, the locomotive must not be required to handle more than 50 per cent of its tonnage rating.

The engineer stated that, knowing there were wings on the plow, he would not push it while operating the train. Instead, he offered to take it behind the engine and work with it if necessary on the Caraquet Subdivision. He also offered to operate the plow ahead of the engine with just the van to clear the road, then return to Bathurst to handle the train. He explained he was not advised that this plow was to be handled as a wedge plow.

The brotherhood's spokesman therefore contended that the engineer refused to carry out the orders, not as a wilful disregard of authority, but as a precaution to prevent danger to himself and others.

The spokesman for the company maintained that the grievance as presented concerned a decision by the arbitrator regarding the discipline of the engineer for refusing duty, rather than an interpretation of Article 9-B. The spokesman stated that this model of snow plow could be used as a wedge plow, a wing plow or a flanger. However, the company could not produce evidence to show that the employee concerned was aware of how the wings could be locked in to permit its use as a wedge plow. The company contended that the engineer should have complied with the orders given him, and filed a grievance under the provisions of Article 57 if he believed that the action was contrary to the collective agreement.

The spokesman cited a decision given by the former Canadian Railway Board of Adjustment No. 1, dated May 16, 1963, in which the company had offered the same argument against a grievance involving an engineer's refusal to carry out instructions on the pretext of supposed violation of the collective agreement; the company had been upheld.

The arbitrator commented that the proper course for an employee questioning an order is to comply and then grieve, if he believes his rights under the agreement have been infringed. Where there is a bona fide claim, however, that such a refusal is based upon an actual fear of the danger, a different assessment of the conduct should be made. In this case, the engineer evidently believed that taking out this train, with a plow ahead of him on which he thought the wings were in operation, constituted a danger.

For these reasons, the arbitrator ruled that the disciplinary action taken should be expunged from the work record of the engineer, and that he should be paid what he would have earned if the period of suspension had not been imposed.

CASE No. 51

Dispute between the Canadian National Railway Company (Atlantic Region) and the Brotherhood of Locomotive Engineers over a claim for 100 miles submitted by a locomotive engineer for setting out a caboose from his train.

On arrival at Halifax from Moncton on March 4, 1966, the train engineer was required, while yarding, to set out a deadhead caboose from behind 13 cars in his train. He used three tracks with the deadhead caboose first out on the second track. Two tracks would normally have been sufficient. After performing this work, he submitted a claim for 100 miles for setting out the caboose. The company refused to pay the claim. The brotherhood contended that this was in violation of Article 7-G of the collective agreement.

The spokesman for the brotherhood said that Article 7-G offers to pay engineers for 100 miles when required to perform work other than putting away their own train (including caboose) when yard engineers are on duty. The spokesman cited a letter from the company's vice-president, dated April 11, 1962 assuring the brotherhood that there would be "no

abuse of Article 7-G of the working agreement." The letter read in part:

> Under these rules, at terminals where yard engines are on duty, road engineers may be used to set off and, if necessary, spot important cars or bad order cars from their own train. They may also be required to switch and pick up equipment for movement in their train and, of course, switch and re-spot other equipment, where necessary, to accomplish this work. In some instances, it may be necessary for them to put away their caboose. In addition, the engineman will put his own train away in a minimum number of tracks.

Switch engines were on duty on that date. The spokesman claimed that the dead-head caboose that was switched out had no importance attached to it and was not the "caboose of their own train," as mentioned in the vice-president's letter.

The spokesman for the company contended that the revised Article 7-G permitted the company to use road engineers, on arrival at their objective terminal, to perform necessary switching in connection with their own train and to put their own train away, even though yard engines might be on duty at the time. The company's consideration of the importance of the dead-head caboose meant that this portion of Article 7-B applied to the situation concerned. The spokesman cited Arbitration Case No. 11, which found that the switching required remains a matter for the company to determine. (L.G., 1965, p. 1086).

The arbitrator noted that this finding made it unnecessary to deal with the question of the "importance" of the caboose. What occurred here was hardly the "spotting of an important car" in the sense that it was dealt with alone. It was part of the general switching required in connection with the train itself, apart from the convenience resulting for the despatch of the dead-head caboose to the next train.

The arbitrator disallowed the protest made by the brotherhood that a ruling of this nature would open the provisions of Article 7-G to abuses. He emphasized that each set of circumstances must be passed upon in relation to the language used in this provision.

In the circumstance described, the claim was denied.

CASE No. 52

Dispute between the Canadian National Railway Company (Atlantic Region) and the Brotherhood of Locomotive Engineers over a claim for 907 miles submitted by an engineer when not called to handle an auxiliary train on the Chester Subdivision.

When a derailment occurred at mileage 38 in the Chester Subdivision on December 31, 1965, the company ordered a spare board crew from Halifax to handle an auxiliary train to the derailment. An engineer, who was regularly assigned to trains between Bridgewater and Halifax, was on lay-over in the Fairview Bunkhouse (Halifax). He was not called to handle the auxiliary train. He subsequently submitted a claim for 907 miles which the company refused to pay. The brotherhood contended that this was in violation of Article 40 of the collective agreement.

Article 40 states that engineers named on the seniority lists have prior rights to all service operating over certain territories. It was thus claimed in this incident that the engineer had prior right over all engineers from Halifax.

A spokesman for the brotherhood acknowledged that speed was of the utmost importance in getting a crew on the job in such an emergency situation. It was said, however, that the engineer could have been on duty for this assignment in minutes if he had been called.

The spokesman for the company argued that, at the time the auxiliary was ordered, the engineer still had his assignment to cover on the train from Halifax to Bridgewater, for which he would be called for 7:00 a.m. As it turned out, the engineer's morning run was cancelled but this was not ascertained until after the other crew had been called and were on duty.

The spokesman argued further that Article 23(b), which states: "In case of accident requiring the use of auxiliary, the first engineer available may be called without involving claim for run-around," took precedence over Article 40.

In these circumstances, the Arbitrator found that there was no violation of the engineer's rights under the agreement. He therefore denied the claim.

CASE No. 53

Dispute between the Pacific Great Eastern Railway Company and the Brotherhood of Railway Trainmen, *ex parte*, over dismissal of a trainman.

After a work stoppage on December 3, 1965, in which trainmen and enginemen participated, a trainman received a notice on December 7 to attend for investigation into this matter. He was assessed 50 demerit marks for his alleged participation in the work stoppage and was not permitted to return to work.

On January 21, 1966 the employee received a further notice to attend for investigation. He was granted a postponement to January 31. On this date, the investigation was convened, but was terminated prior to its conclusion when the trainman walked out of the meeting.

On February 1, the employee received notice to appear on February 3. The notice read, in part: "Because such action by an employee is completely in violation of the collective agreement, it constitutes insubordination and therefore cannot, in the circumstances, be condoned by the company." He did not appear. And he did not appear at a subsequent investigation, which, he was notified on May 25, would be held on May 31 and June 2. This failure to appear led to a notice of termination of employment.

One of the principal arguments advanced for the employee was that an investigation had been carried out in pursuance of the notice of December 17, 1965 that stated as part of the subject matter: ". . . and any and all matters relating thereto". The argument urged that, having conducted an investigation and assessed a penalty, the company was precluded from pursuing the subject matter any further; that the trainman and those advising him were justified in the action taken because of the vagueness of the language used in the second notice, and the clear indication that the subject matter involved was not that investigated originally. Such a course on the part of the company was said to be in violation of Article 4-2.

A reading of that article revealed nothing that specifically dealt with this contention, other than what could be attributed to the sentence appearing in Section 2 (d) reading: "An employee will not be disciplined or dismissed until after a fair and impartial investigation has been held, and until the employee's responsibility is established by assessing the evidence produced. . . ."

As to the notice of January 21, it was contended that it did not contain sufficient and reasonable particulars of the offence alleged in order to provide the trainman his right to a "fair and impartial investigation;" that the employee concerned was entitled to know when and where the alleged offence being investigated had occurred, and that the company had a responsibility to provide such particulars in the "subject matter for investigation."

A spokesman for the company said that the subject matter of the second hearing was not that which had been investigated in pursuance of the notice of January 21. It concerned activities over and above the employee's personal withdrawal that, in the opinion of the company, represented conduct that required further investiga-

tion, and possibly action other than that taken by way of a disciplinary assessment of 50 demerit marks.

It was stated that on receipt of the notice of January 21, the trainman contacted the general chairman of the brotherhood. As a result, the chairman arranged for a meeting with the regional manager of the company, to be held at Prince George on January 31.

In a letter to the regional manager requesting this appointment, the general chairman said: "For the reasons stated herein, a second investigation is not acceptable to the organization. In the event the company does not agree with the organization's position, the only alternative is that this matter be referred to a Board of Arbitration."

The company contended that, apart from the action taken by the general chairman, which resulted in different communications passing between him and the company, the employee himself, once notified, was under a personal obligation to comply. It claimed that the privilege of an accredited representative of the brotherhood being permitted to accompany an employee being investigated gives him no authority to question the propriety of the investigation, but only to ensure that the provisions of the agreement concerning it are properly carried out. If they are not, or if the result is deemed unfair, an orderly method of procedure is provided by way of a grievance to have the result reviewed finally, if necessary, by arbitration.

The arbitrator did not find that the contents of the notice of January 21 would warrant an employee's ignoring its requirements to attend. He found there was no defence for his failure to respond to the notice of May 25, which required his attendance for investigation. This notice was explicit in describing the purpose for requiring his attendance on June 2. Had he complied with that notice, the arbitrator commented, this would have afforded the trainman and his representatives every opportunity to press for the basic cause of his original failure to attend.

The arbitrator found that the course taken by the employee was ill-advised and represented an act of insubordination constituting just cause for disciplinary action. The claim was therefore denied.

CASE No. 54

Dispute between the Pacific Great Eastern Railway Company and the Brotherhood of Railway Trainmen, *ex parte,* over dismissal of a yard foreman.

At the North Vancouver terminal on November 8, 1966 a yard foreman was approached by the train yard co-ordinator and questioned about the delay that occurred in an important barge connection, and the related switching. The train yard co-ordinator told the arbitrator that the yard foreman refused to work the barge at the time appointed by the co-ordinator.

The penalty imposed upon the yard foreman for his insubordination while on duty on this occasion was 40 demerit marks. Unfortunately for this employee, he was already under the handicap of 50 demerit marks. This, of course, took him over the maximum permitted under the disciplinary system in effect on this railway, and he was dismissed.

The arbitrator commented that it was regrettable that the employee, with his years of service and experience in such matters, did not behave in a more acceptable manner, having always recourse by way of a grievance for any unfair treatment.

The claim was denied.

New Legislation

Continued from page 291

ployees the choice. "Why should there be an alternative?" he asked. "One need only consider the Province of Quebec to understand how the Government can get into serious difficulty when essential services are tied up."

Gerard Pelletier (L, Hochelaga) said that he was in "total disagreement" with Mr. Nowlan, and he added that the Commons should not be influenced by labour disputes in Quebec or elsewhere. He thought it was "absolutely normal" that civil servants should have the option of the strike weapon, and he said that Parliament had the power to stop any strike in an essential service.

Richard Bell (PC, Carleton) tried to get the bill amended to allow conscientious objectors to be exempt from being compelled to pay dues to a public service union. The bill did not provide for public service employees being compelled to join a union or pay dues, but Mr. Bell pointed out that this provision might be won in future collective bargaining. The proposed amendment was, however, defeated.

Others Covered

The new Act covers some 50,000 hourly-rated federal employees who were excluded from the Civil Service Act and who have generally been appointed through patronage. Richard Bell said that although now, with the passing of the appointment of these public service employees to the deputy heads of departments it was hoped that patronage would largely disappear, he had doubts whether this would be so. He said that he hoped ministers would not put pressure on their deputies to re-establish patronage.

The new Act allows public service employees to take some part in political activity and, with the approval of the Public Service Commission, to run as candidates in elections.

Although the three bills quickly passed the Senate, several of the senators expressed doubts about public service employees being given the right to strike.

The Prime Minister announced early in March that collective bargaining for civil servants would come into force on March 13.

Jacob Finkelman became the first chairman of the new Public Service Staff Relations Board, resigning the chairmanship of the Ontario Labour Relations Board to take the post.

Inquiry Commission to study Newfoundland shipping

An Inquiry Commission was appointed by the Minister of Labour in February to study the application of Part I of the Canada Labour (Standards) Code, concerning hours of work, to the shipping industry in Newfoundland and to longshoring and other works, undertakings and businesses operated in connection with shipping.

Shipowners had complained that adopting the Code standards with respect to hours would hamper the operation of their ships, which are a key means of transportation in the province.

Part I of the Code with respect to Newfoundland shipping and works has been deferred until December 31, 1967.

The Inquiry Commissioner will be Judge C. J. A. Hughes, Fredericton, N.B. Judge Hughes was born in Fredericton, practised law at St. Stephens, N.B., and during World War II was chairman of the New Brunswick War Labour Board and chairman of the New Brunswick Wartime Labour Relations Board.

Judge Hughes has been legal adviser to the New Brunswick Electric Power Commission, solicitor for the city of Fredericton, chairman of the Province's Labour Relations Board, and chairman of several arbitration boards. He was appointed County Court Judge for York, Sunbury and Queens, in May 1965.

Manpower Studies

A selected bibliography for policy and research

This is the third instalment of a bibliography compiled from recent literature on manpower and manpower mobility. The first two instalments appeared in the March and April issues of the LABOUR GAZETTE. *Prepared by Mrs. Barbara Alexandrin and Dr. A. N. Polianski for the Manpower Mobility Unit of the Department of Manpower and Immigration with the co-operation of the Canada Department of Labour Library, the bibliography is replacing the regular list of publications recently received in the Department's Library. Readers are reminded that the Library does not have all the books and items listed in this bibliography.*

Robot discusses labour problems

An IBM computer, presenting aspects of problems faced by the federal Government, will be one of the features in the Law and Government area of the Canadian Pavilion at Expo '67. The computer will be fed information by various Government departments that have been asked to contribute to the project.

A series of questions and alternative answers devised by the Department of Labour illustrates the type of contribution needed to feed the computer.

When the visitor selects "Hours of Work in Canada" as the subject of his choice, the following question appears on the video screen:

Should hours of work be reduced in Canada?

(1) Yes — type "yes"
(2) No — type "no"

If the visitor believes that hours of work should be reduced in Canada, he types the word "yes". The computer then produces the next question:

What form should the reduced hours take?

(1) shorter work day— type "day"
(2) shorter work week— type "week"
(3) longer vacations— type "vacations"
(4) more statutory holidays— type "holidays"

When the visitor types his choice, the next question automatically appears on the video screen. The number of questions on any one topic is limited to a maximum of eight. The questions on "Hours of Work in Canada" reach a maximum of seven.

The computer never commits itself on aspects of economic theory that are open to dispute, but leaves the decision to the visitor. Most of the questions are framed to make the visitor think.

The purpose of the centennial project is three-fold. First, it provides the visitor with the experience of performing man-to-machine communications; second, it will familiarize the visitor with some of the problems dealt with by the federal government; and third, the questions should rouse the visitor's awareness of the complexity of various problems, making him realize that many questions cannot be answered by a simple Yes or No.

James Hoffa starts eight-year prison term

James Hoffa, President of the International Brotherhood of Teamsters, started serving an eight-year prison sentence on March 7 for jury tampering. He had headed the 1,800,000-member union for 10 years.

Mr. Hoffa has relinquished control of the union and direction of national contract talks with the trucking industry to Vice-President Frank Fitzsimmons, his choice as successor.

Although his prison term does not expire until 1971, he may be eligible for parole in November 1969. It is expected that he will retain the title of President, but will give up his $100,000-a-year salary.

UIC extends insurance coverage

Unemployment insurance coverage has been extended to include paid workers employed in the agricultural and horticultural industries. The extended coverage became effective April 1, 1967 (L.G., Nov. 1966, p. 660).

Previously, the plan applied only to those workers in specialized forms of agriculture, such as poultry farming, and employees in some forms of horticulture, not including nurseries and greenhouses. Under the new plan, the Unemployment Insurance Act will apply to the entire industry on a country-wide basis.

The regulations make unemployment insurance compulsory and it applies to these industries under the same conditions and with the same rates of contributions and benefits as in other industries.

To receive benefit when unemployed, a farm worker will have to show that he is available for work and unable to find employment. He must show that he has paid contributions in insurable employment for the required number of weeks. For this purpose, contributions from both farm work and other insurable employment can be counted.

A worker in agriculture or horticulture cannot be insured, however, if his wages from his employer are less than $9 a week cash apart from the value of any board and lodging, or if he is a relative of the employer, or if he is a self-employed farmer in his own right but temporarily working as an employee for another farmer.

C—Employment, Hours and Earnings

Tables C-1, C-2, and C-4 are based on reports from employers having 20 or more employees in any month of the year; at September 1966, employers in the principal non-agricultural industries reported a total employment of 3,659,462. Table C-3 gives estimates of total employment, by industry divisions, for the provinces and Canada, derived from the survey of establishments employing 20 or more persons and from a sample survey of establishments employing less than 20 persons. Tables C-5 to C-7 are based on reports from a somewhat smaller number of firms than Tables C-1, C-2 and C-4. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1, C-2 and C-4 relate to salaried employees as well as to all wage-earners in the reporting firms.

D—Manpower Division

The re-organization of manpower activities under the Department of Manpower and Immigration has led to a number of administrative changes which have, in turn, altered the significance of D Table statistics to persons registered for employment placements and unfilled job vacancies.

The result is that valid comparisons with previous periods are not possible on the basis of these statistics. Accordingly, their publication is being suspended.

New statistical series are being developed to give more significant information about persons using the services of Canada Manpower Centres. The results will be published as they become available.

Technical Note to "G" Tables

Statistical information on work stoppages in Canada is compiled by the Economics and Research branch of the Canada Department of Labour on the basis of reports from the Manpower Division, Department of Manpower and Immigration. The first three tables in the section cover strikes and lockouts which amount to ten or more man-days.

The developments leading to work stoppages are often too complex to make it practicable to distinguish statistically between strikes on the one hand and lockouts on the other. However, a work stoppage that is clearly a lockout is not often encountered.

The data on workers involved include all workers reported on strike or locked out, whether or not they all belonged to the unions directly involved in the disputes leading to work stoppages. Where the number of workers involved varied in the course of the stoppage, the maximum number is used for monthly totals, but adjustments are made for changes reported in the number of workers involved in work stoppages extending over two or more months. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included in the data on workers involved. Their number, however, if any, is shown in parentheses for the major work stoppages listed in Table G-4. The data in parentheses are those reported at an early stage of the work stoppage, and they refer only to the plant or premises at which the stoppage occurred.

Duration of strikes and lockouts in man-days is calculated by multiplying the number of workers involved in each work stoppage by the number of working days the work stoppage was in progress. Where the number of workers involved varied significantly in the course of the stoppage, an appropriate adjustment is made in the calculation as far as this is practicable. The duration in man-days of all stoppages in a month or year is also shown as a percentage of estimated working time, based on the corresponding monthly figure or annual average figure for non-agricultural paid workers in Canada. The data on duration of work stoppages in man-days are provided to facilitate comparison of work stoppages in terms of a common denominator; they are not intended as a measure of the loss of productive time to the economy. For convenience of expression, however, duration in man-days is on occasion referred to as "time loss" in reviews based on this series.

The data on the distribution of work stoppages by industry in Table G-2 follow the Standard Industrial Classification, DBS (1960).

In Table G-3 work stoppages are classified according to jurisdiction, whether federal or provincial. This is done on the basis of the government agency that intervened in the dispute. Where there was no such intervention the classification is, wherever possible, on the basis of the agency that previously dealt with labour matters in the establishment involved.

Work stoppages involving 100 or more workers are listed in Table G-4, which shows in each instance the employer(s) and the location of the premises at which the work stoppage occurred, the union(s) directly involved or concerned in the dispute, number of workers involved, duration in man-days, starting date (the first day on which normal operations were affected) and termination date. For work stoppages that are terminated by mutual agreement, the termination date is usually the day on which work was resumed. Work stoppages that have not been resolved in this way are as a rule considered terminated, for statistical purposes, at the date by which it was established that two-thirds or more of the workers involved had either returned to work, or had found work with other employers, or had been replaced by new employees; or the date by which it was reported that the operations affected by the work stoppage would not be resumed. Also shown in Table G-4 are the major issues, as far as known, that led to work stoppage, and the result, i.e., the terms of settlement of major issues where a settlement was reached when the work stoppage terminated, or the circumstances in which the work stoppage came to an end.

While the methods used to obtain data on work stoppages preclude the likelihood of major omissions, it is not always possible, particularly on a preliminary basis, to obtain precise information in detail. Consequently the information in this section may not be accurate in all respects.

E—Unemployment Insurance

Unemployment insurance statistics emanate from the operations of the Unemployment Insurance Act, and relate to persons in contact with the Unemployment Insurance Commission, either as contributors or claimants. The data are compiled in the Unemployment Insurance and Pensions Section, Labour Division, DBS, from information supplied by the UIC. The source for Tables E-1 to E-4 is *The Statistical Report on the Operation of the Unemployment Insurance Act*. For further information regarding the nature of the data see Technical Note, page 219, March issue.

TABLE E-1—Estimates of the Insured Population under the Unemployment Insurance Act

End of	*Total*	*Employed*	*Claimants*
1966—November	4,583,000	4,316,700	266,300
October	4,521,000	4,336,700	184,300
September	4,528,000	4,363,100	164,900
August	4,577,000	4,389,800	187,200
July	4,512,000	4,316,000	196,000
June	4,500,000	4,318,700	181,300

Edmonton-Calgary	132.5	136.6	136.6	134.4	132.1	137.5	138.8	189.7	154.3	125.0
Vancouver	137.5	140.9	140.9	140.3	139.8	132.8	151.8	166.6	161.5	125.6

*St. John's index on the base June 1951 = 100. NOTE: Indexes above measure percentage changes in prices over time in each city and should not be used to compare actual levels of prices as between cities.

G—Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Canada Department of Labour on the basis of reports from the Manpower Division, Department of Manpower and Immigration. The first three tables in this section cover strikes and lockouts that amount to 10 or more man-days. The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the union directly involved in the disputes leading to the work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For further notes on the series, see page 336.

TABLE G-1—Strikes and Lockouts, 1962-67

Month or Year	Strikes and Lockouts Beginning During Month or Year	Strikes and Lockouts in Existence During Month or Year			
		Strikes and Lockouts	Workers Involved	Duration in Man-Days	
				Man-Days	Per Cent of Estimated Working Time
1962	290	311	74,332	1,417,900	0.11
1963	318	332	83,428	917,410	0.07

Canada Department of Labour/June 1967

Canada Department of Labour Publications

Annual Report of the Department of Labour (Covers fiscal year ending March 31). (English or French). Cat. No. L1-1966.

Report of the Industrial Inquiry Commission on Canadian National Railways "Run-Throughs." Report of Hon. Mr. Justice Samuel Freedman, Commissioner. (English or French). Price $1.50, Cat. No. L35-965/1.

Supplements to Labour Gazette

Collective Bargaining Review. Prepared by the Collective Bargaining Section, Economics and Research Branch, Canada Department of Labour. Obtainable from the Canada Department of Labour. Free to LABOUR GAZETTE subscribers.

Reports of Boards of Conciliation established under the Industrial Relations and Disputes Investigation Act together with reasons for judgment of the Canada Labour Relations Board. Obtainable from the Canada Department of Labour. Free to LABOUR GAZETTE subscribers.

Economics and Research Branch

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). Price 50 cents, Cat. No. L2-2/1966.

Industrial and Geographical Distribution of Union Membership in Canada, 1966 (English or French). Price 15 cents, Cat. No. L31-766.

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. Price 35 cents, Cat. No. L2-1/1965.

Wage Rates, Salaries and Hours of Labour, 1965. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance of service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. First year service including attractive binder with index tabs and paper-bound volume, $9.50; service without indexed binder, $7.00; individual tables, 15 cents. Paper-bound volume, $2.50. (Bilingual). Cat. No. L2-548.

Working Conditions in Canadian Industry, 1965. Price 75 cents, Cat. No. L2-15/1965.

Répertoire de termes et expressions utilisés en relations industrielles et dans des domaines connexes. A catalogue, in French, of terms currently in use in the labour relations field. Prepared by the Economics and Research Branch. Price $4.50, Cat. No. L31-967F.

Labour-Management Research Series

Shiftwork and Shift Differentials in Canadian Manufacturing Industries. Price 35 cents, Cat. No. L2-22/2.

Vacations with Pay, 1951-61: An Examination of Vacation Practices in Canadian Industries (English or French). Price 35 cents, Cat. No. L2-22/4.

Collective Agreement Provisions in Major Manufacturing Establishments, 1964. Price 35 cents, Cat. No. L2-22/5.

50 Years Ago

The Legislature of British Columbia established a Department of Labour and the GAZETTE described its duties and organization

The passing of an act by the Legislature of British Columbia establishing a Department of Labour in that province was reported in the LABOUR GAZETTE of June 1917.

This journal said that the new act had been largely adapted from Chapter 13 of the Ontario statutes of 1916 that had created a Trades and Labour Branch in Ontario. "The duties imposed upon the new department . . . include the administration of laws affecting labour, the dissemination of information on all matters connected with the industrial occupations of the people, the publication of data relating to the industries of the province and rates of wages, and the establishment of employment bureaus.

"The department is also required to report on industrial conditions, the establishment of new industries, and the operation of labour laws in other countries. It is required to consider any petition suggesting a change in the labour laws, or any matter affecting the industrial classes presented by any trades and labour council or other organization, and to perform any other duties prescribed from time to time by the provincial legislature. The Minister of Labour and his officers are given adequate powers to obtain the information required under the act . . . "

The GAZETTE also reported the passing of a Civil Service Act by the British Columbia Legislature in May. The Act established a Civil Service Commission consisting of one person. "The Commission is required to test and pass upon the qualification of candidates for admission to, or promotion in the civil service; to investigate the operation of the Act; upon the request of a Minister, to investigate any matter relative to his department; and to report upon the organization of the departments and on any proposed change in such organization.

"The civil service is divided into classes as follows: (a) deputy ministers; (b) technical officers, consisting of such classes of persons possessing professional or other special technical knowledge and experience as may be specified by order in council; (c) first class, consisting of the principal administrative and executive officers not specifically provided as technical officers; (d) second class, consisting of other clerks having administrative, executive, or technical duties which are of the same nature as, but of less importance and responsibility than, those of the first class; (e) third class, consisting of other clerks performing duties of minor importance and of a routine character, also including stenographers and typists; (f) fourth class, consisting of constables, gaol guards, game wardens, fire wardens, messengers, janitors, and others whose duties are not clerical.

"The first and second classes are divided into two, and the third class into three grades. In addition to these classes, there is a special grade of skilled employees, such as foremen, inspectors, clerks of works, junior draftsmen, photographers, electricians and machinists.

"The salaries of deputy ministers and technical officers may be fixed by the Lieutenant-Governor in Council, and such officers are eligible for annual increases not exceeding $10 per month until the limit per annum fixed for the office is reached. In the other four classes, the minimum and maximum annual salaries are as follows: First Class, Grade A, $2,400 to $3,000; Grade B, $2,100 to $2,400. In each grade of the first class, the annual increase is $120.

"Second Class, Grade A, $1,800 to $2,100; Grade B, $1,000 to $1,800. In each grade of the second class, the annual increase is $100. Third Class, Grade A, $1,080 to $1,500; Grade B, $720 to $1,080; Grade C, $540 to $720. In Grade A of the Third Class, the annual increase is $72. In Grades B and C, the annual increase is $60. In the fourth class the maximum salary is $1,200."

After some further description of the organization of this provincial civil service, the GAZETTE continues, "The Lieutenant-Governor in council may appoint technical officers without competitive examinations upon the recommendation of the minister based on the report in writing of the deputy minister, if the person to be appointed obtains from the Commission, certificates that he possesses the requisite knowledge and ability and is duly qualified as to health, character and habits. Vacancies in Grade A of the higher classes are to be filled as far as is consistent with the public interest by promotion from the Second or Third Classes.

"Annual leave may be granted for a period not exceeding 21 working days in each year. In case of illness, upon production of the certificate of a physician approved by the Commission, the Commission may grant the necessary leave of absence for a period not exceeding 12 months. The retirement age is placed at 65, although the term of office may be extended for a period not exceeding 12 months."

The LABOUR GAZETTE reviewed a bulletin of the United States Bureau of Labor Statistics that consisted of a reprint of the memoranda of the British Health of Munition Workers' Committee. In a memorandum on hours of work, the Committee objected to overtime on several grounds, one of which was that it was "liable to curtail unduly the period of rest and sleep available for those who have to travel long distances to and from their work, a matter of special importance in the case of young persons."

Another objection was that "the fatigue entailed increases the temptation to men to indulge in the consumption of alcohol." The Committee recommended that "average weekly hours (exclusive of meals) should not exceed 65 to 67, including overtime. Hours in excess of 65 should only be worked for short periods and to meet sudden and unexpected circumstances."

For women, "Work in excess of the normal limit of 60 hours a week ought to be discontinued as soon as practicable, although little objection is seen to such moderate overtime during the week as can be compensated for by an earlier stop on Saturdays. Boys over 16 should be allowed to be employed overtime up to the maximum suggested for men, but boys under 16 should not work more than 60 hours a week.

"In a special study of output in relation to hours of work, the committee found that for men engaged in very heavy labour, the maximum hours of actual work yielding the most effective results appear to be 56 or less per week; for men engaged in moderately heavy labour, about 60 per week; while for men and youths engaged in light labour, such as tending semi-automatic machines, probably 64 hours per week should be the maximum."

Economic Council of Canada

National Conference on Labour-Management Relations

Prof. Jean-Réal Cardin

ECC calls 220 delegates to discuss employment security and manpower policy

The role of collective bargaining, and the need for permanent joint consultation committees is debated by labour, management and government

Collective bargaining is unlikely, in the present state of things, to make a meaningful contribution to the solution of manpower adjustment problems. The insufficiency of collective bargaining is due, in large measure, to the attitudes held by management and by unions.

These are the findings of a report titled *Manpower Adjustment to Technological and Other Change and Labour Relations in Canada*, by Prof. Jean-Réal Cardin, Director, Department of Industrial Relations, Laval University. The report was commissioned by the Economic Council of Canada, and was used as the basis for discussion at a two-day National Conference on Labour-Management Relations held at Ottawa in March.

The paper dealt with weaknesses in the present situation of manpower adjustment to technological change, and suggests certain institutional means to improve the contribution of current labour relations to the solving of the problem. It was one of a series of studies prepared to provide a basis of discussion for participants at the Conference.

The first two chapters survey the attitudes, structures and internal communications in both labour and management organizations. Prof. Cardin notes that organized labour in Canada is deeply aware of the problem of manpower adjustment, although it faces certain difficulties inherent in the structures of unionism in Canada. Similarly, among Canadian employers, there is a notable absence of structured organizations, a diversity of attitudes and interests, and a multiplicity of problems and policies.

Chapter three is an assessment of current collective bargaining practices, and of the communication systems surrounding manpower adjustment procedures. Chapter four outlines the role of government agencies in labour relations and its effects on labour-management-government communications. There is general agreement that intervention of public authorities is necessary, Prof. Cardin points out, and he suggests criteria for developing labour market policies toward technological and other changes.

To lay the basis of discussion, Prof. Cardin presents certain suggestions in Chapter five of both a long- and a short-term nature concerning improvement of the contribution of labour relations to solving the problems of manpower adjustment to change. He suggests that the recent labour disputes in Canada demonstrate the inability of our labour laws, union and management structures, and accepted ideologies to resolve these problems effectively. He says that the notion of the common good must be redefined because governments can no longer limit their actions to roles as arbitrator, conciliator, mediator-extraordinary, policeman or judge.

"Generally, it is clear that labour and management cannot contribute to changing their environment except by compromising at the outset—that is, by agreeing to reformulate the ideological

assumptions that now support their actions. [They must provide] themselves with the necessary organizations and a research and management staff to carry on a dialogue at the highest levels in an objective and informed manner."

To meet this general long-term suggestion, Prof. Cardin calls on the Canadian labour movement to establish a better balance between bargaining demands and participation, and to achieve a greater cohesion of structure and a better arrangement of authority. To management, he suggests that a greater conception of the social role of the firm be recognized, and that representative organizations in the field of labour relations be created. Toward both, he stresses the need for more advanced research and the required technical personnel.

Narrow Outlook

Other findings in the report are:

(1) Because unions have confined themselves to a role of "pure bargaining and to the constraint of management decisions," many observers have deplored the lack of a broad outlook on union action. Fragmentation among unions by industry, and the incapacity of unions, by craft, to offer effective contribution to solving manpower problems have limited their powers and, hence "solutions often tend to become 'political' rather than technical or truly objective, because of the various internal pressures being brought to bear on the spokesmen for the union." Furthermore, "the presence in Canada of two major labour congresses, plus a certain number of independent organizations, may contribute to the problem of communications within the labour movement."

(2) "Traditional management attitudes in Canada leave employers ill prepared to co-operate effectively in the over-all solutions that these problems require." An "individualistic philosophy" has invested management with a role and a prestige that have made it the real, and practically the sole custodian of actual power in the field of economic and industrial organization. Management associations, however, are not generally empowered or organized to participate in collective bargaining.

(3) Government initiatives to develop labour-management communications are taking place outside the scope of collective bargaining. They have not succeeded in influencing the traditional state of communications between employers and unions in their everyday labour relations practices concerning concrete problems.

(4) Periodic meetings to draw up a contract do not permit the objectivity necessary for airing conflicts that arise from their respective approaches to manpower adjustment problems. Management wants to retain its traditional rights to industrial control, while unions want to attain a certain security of employment for their members by limiting management initiative.

Industry Level

Among other suggestions he makes toward the solution of labour problems, Prof. Cardin calls for an integrated manpower policy that will include an expanded conception of collective bargaining. Collective bargaining must take into account policies of a more general nature, and carry them out at industry, rather than at plant level.

To dissipate the "atmosphere of crisis" and to eliminate the "legalism and the sterile strategy" of labour-management communications on collective bargaining, Prof. Cardin suggests forming permanent joint bodies. Following the European example of "paritarism", the parties could then meet periodically to discuss common problems as they develop. With the help of technical and other advisers, the joint committees could set guidelines that would lead to the conclusion or renewal of an agreement that could serve as a pattern for their reports at the industry level, and as a basis for local and regional agreements.

Prof. Cardin attributed the false conception that joint bodies in industrial relations are alternatives to real negotiation, to the fact that such formulas are often put forward as substitutes for negotiation. He denies the notion that if the parties managed to "understand each other" at meetings and on aims outside their ordinary disputes, no conflict could continue between them. Instead, he underlines the need for a "form of bargaining"—for a means of confrontation in which the parties could participate frankly and objectively.

For the immediate future, he suggested that a joint consultative committee be set up between authorized and representative management delegates, and union representatives from the two Canadian congresses. This "summit committee" should be formed "to take a serious look at all the problems due to changes affecting manpower, and to delimit, with the greatest possible accuracy, the areas of understanding and possible or apparent conflict between employers and unions."

Legislation

He stressed that, "If legislation is to result from these discussions, it is the State which must pass this legislation. In this way the legislation is much more likely to affect the legitimate points of view expressed by this committee and the discussions that may take place there."

Joint industrial committees should be formed as soon as possible at the levels of the different branches of industry most severely affected by technical progress. "It is essential, in my opinion, that such meetings . . . , enjoying some permanence and unquestioned loyalty, be formed even if they exist at first on a purely 'voluntary' and informal basis."

Prof. Cardin's paper concludes with the recommendation that joint organizations at individual employer and establishment levels be set up for the analysis and discussion of local problems, and he emphasized that these meetings on the company and plant level should be left up to the initiative of the parties involved. The joint bodies, he believes, could go a long way toward making the groups aware of the problems, and then ultimately lead to overall, long-term solutions to problems of manpower adjustment.

KEY SPEAKERS

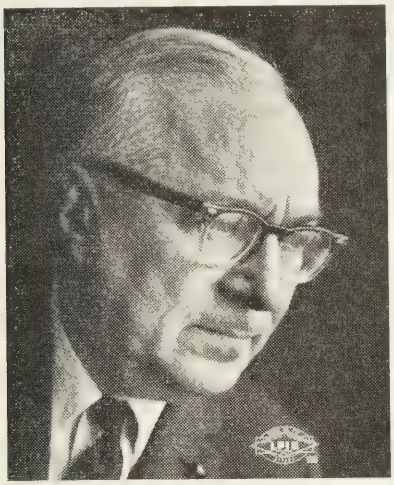
The delegates to the ECC's Labour-Management Conference were addressed by several key representatives on the subject of labour and management relations, after which work study groups considered the proposals and recommendations presented.

The conference was not without moments of tension as representatives tackled problems of national concern. Problems concerning the introduction of automation and other technological changes in Canadian industry were met with both opposition and agreement. In drawing their conclusions, however, the delegates reached a consensus that labour and management must change their attitudes if they are to communicate effectively and deal intelligently with technological change.

Outlining the Issues

The Chairman of the Economic Council, Dr. J. J. Deutsch, in his keynote address outlined some of the issues presented in the two papers. He put forward some of his own ideas on the subject, and discussed the objectives and role of collective bargaining in Canada.

Collective bargaining is "a procedure for determining the amount and form of compensation of workers and the division of the economic pie; it is a method to establish, change and administer the rules and duties of the work place; and it is a system for the peaceful settlement of a great many issues and disputes during the period of collective agreements."



He explained some of the heavy demands Canadians place on the economy and its capacity to produce. To meet these demands, he urged an increase in the efficiency and productivity of our industry.

He cautioned delegates not to place the blame for unemployment on technological progress and automation. "In the past

News Briefs

OLRB chairman to head new public service board

Jacob Finkelman

Photo by R.A. Wooland

Jacob Finkelman, Chairman of the Ontario Labour Relations Board, has been named Chairman of the Public Service Staff Relations Board, which will oversee administration of the new legislation providing for collective bargaining in the federal public service (L.G., May, p. 291). Prime Minister Pearson announced the appointment in February.

An expert on labour law, Mr. Finkelman has been active in the development and application of labour relations legislation in Canada for many years. As a member of the law faculty at the University of Toronto in 1933, he introduced the first university course on labour law in Canada.

Georges E. Gauthier, Associate Commissioner of the Centennial Commission, and former Director of the Pay Research Bureau, Public Service Commission, has been appointed Vice-Chairman of the Board.

Louis Philippe Levac of Montreal has been appointed Secretary. He was Director of Industrial Relations with Fraser Brace Engineering Co. Ltd., and worked for many years previously as Senior Labour Relations Counsellor with Domtar Ltd.

The employee representatives appointed are: Prof. Jean-Réal Cardin, Director, Department of Industrial Relations, Laval University; Prof. Saul Frankel, Department of Economics and Political Science, McGill University; Romeo Maione, of the United Steelworkers of America, Toronto.

The employer representatives appointed are: Philip T. Davis, former president of the Ottawa Board of Trade; Jacques Gilbault, Director of Industrial Relations, Montreal Transportation Commission; and Mrs. Margaret Konantz, a former Liberal MP from Winnipeg.

Taxation report proposes changes in employee benefits

The *Report of the Royal Commission on Taxation* prepared by Kenneth Carter, has proposed radical changes in the field of employee benefits. The general underlying principle is to include everything in the individual's "tax base," and then to set tax rates that would raise the required revenue. And although employee benefit plans have not eluded this large net, retirement savings are granted one of the few significant tax concessions.

Generally, employee benefits would be taxed as received, but tax relief would be given on the contribution made by an employee or employer toward the cost of such benefits.

The Report recommends the following provisions:

–group life insurance premiums would be deductible, whether paid by an employer or employee, and any resulting death benefit would be fully included, for income tax purposes, in the tax base of the beneficiary;

–income indemnity benefits of all kinds (workmen's compensation, unemployment insurance, sick pay, insured weekly indemnity benefits, and so on) would be fully included in the tax base for income tax purposes, and contributions by employers and employees would be fully deductible;

–strike pay would be income, when received;

–hospital insurance premiums paid by an employer would be added to an employee's income; benefits paid under a hospital insurance plan would be neither taxable nor deductible; medical expenses in excess of three per cent of income would be deductible provided that they are out-of-pocket expenses, including premiums or contributions paid to a medical care plan; employer contributions toward medical care premiums would be included in employees' incomes; the "standard deduction" for medical expenses and charitable donations would no longer apply to medical expenses;

–other "fringe" benefits, such as subsidized meals, transportation passes, free or low-cost housing, company cars, club, union or association dues paid by an employer, and entertainment expenses above set levels, would be taxable income; and

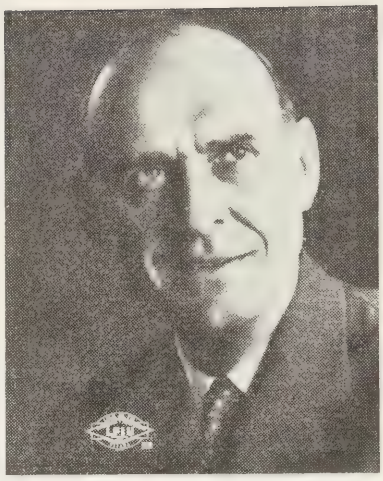
–certain lump sum payments that now receive special tax treatment would be included as ordinary income; among these are lump sums payable as retiring allowances, death benefits, distributions from profit-sharing plans, severance benefits and stock option benefits, which must be considered in conjunction with the income-averaging provision and lower level of tax rates proposed by the Report.

Canada Council survey indicates no brain-drain

Canada is not losing its top scholars to the "brain-drain". A recent report issued by the Canada Council indicates that 97 per cent of the Council's doctoral fellowship winners who studied in Canada in the humanities and social sciences are remaining here. And at least 80 per cent of those Canadians who completed their studies in the United States or abroad have returned to Canada to work.

Canada Council doctoral fellowships in these particular courses have increased rapidly since 1957, when 97 awards were given for the 1958-59 academic year. More than 1,000 were awarded this year.

Jean Boucher, Director of the Canada Council, said: "It is evident that the doctoral fellowship program has achieved its aim of training people for university careers." He was referring to the 92 per cent of award winners who subsequently took up teaching careers in Canadian universities. Mr. Boucher said that almost all of the fellowship winners have received, or are still working toward their Ph.D. The failure rate, at less than four per cent, is marginal.



The survey was made among the 809 fellowship winners of the first seven years of the program, from 1958-59 to 1964-65. A detailed questionnaire was mailed to all 809, and replies were received from 588, or 73 per cent of the total. The questionnaire revealed that all but 13 per cent of the employed respondents are working in Canada. Of the 58 award holders who were working abroad, 34 hope to come back to Canada. The repatriation rate is higher for women (84 per cent) and much higher for French-speaking award holders (92.5 per cent).

Morse re-elected Director-General of ILO

David A. Morse, who has now headed the International Labour Organization for more than 18 years, a term of office unprecedented in the history of international organizations, has been re-elected Director-General for a further five years.

The new period will begin September 1968, at the end of the current term of office. The election was held at the 168th session of the governing body, which met at Geneva in March.

Mr. Morse was first elected Director-General in June 1948 for a 10-year period. He has since been re-elected twice in succession, May 1957 and March 1962, on each occasion for a five-year period (L.G. 1961, p. 1264).

ILO convention influences provincial legislation

During the budget debate in the British Columbia Legislature last February, the Minister of Mines and Petroleum Resources presented a bill* proposing amendment of existing regulations barring women from working in mines by introducing the following section:

> 17 (3) No female shall be employed underground in a mine except with the approval of the Chief Inspector.

The proposal, said the Minister, was suggested in view of the introduction of automated equipment in the mines, and the fact that it would be "possible for a woman to work at a nice clean situation underground pushing buttons all day long."

The Minister's attention was drawn to Canada's ratification in September 1966 of ILO Convention No. 45, prohibiting underground work for women, and to the fact that ratification was made only after prior assurances had been received from provincial authorities in the 10 provinces that they were prepared to abide by the provisions of the Convention, and that they had passed legislation to this effect.

The Convention provides for exemptions of: females holding positions of management who do not perform manual work; those employed in health and welfare services; those who, in the course of their studies, spend a period of training in the underground parts of a mine; and any other females who may occasionally have to enter the underground parts of a mine for the purpose of a non-manual occupation.

When the matter was brought to the attention of the Chief Mining Inspector by the provincial Department of Labour, he said that the Province would not want to go against a code adopted by the federal government. The Legislature's Mining and Railway Committee accordingly amended the proposed legislation to exclude all women except those in managerial positions not requiring manual work, those in health or welfare services, and students and occasional visitors—thus complying with the ILO Convention.

A somewhat similar situation arose when the Council of the Northwest Territories was about to amend the Mining Safety Ordinances** so as to permit employment of women underground in mines. At the suggestion of the International Labour Affairs Branch of the Department of Labour, a revised version of the amendment was prepared that will continue to prohibit the employment of women underground, subject to the four exceptions listed in the Convention.

*An Act to Regulate the work of all Mines except Coal Mines, No. 22. 1967.

Nova Scotia marks 50 years of workmen's compensation

Workmen's compensation coverage in Nova Scotia has been in effect for 50 years. The anniversary was recorded in the *Report for 1966 of Workmen's Compensation Board of Nova Scotia.* The province was one of the first in Canada to enact enabling legislation for workmen's compensation. It was put into operation on January 1, 1917 (L.G. 1917, p. 2).

The report is available from the Queen's Printer, Halifax.

**The Mining Safety Ordinances 1956 Section 10(2).

Parliament

Settlement of a contract dispute between the railway companies concerned and the Canadian Brotherhood of Railway, Transport and General Workers, representing some 20,000 employees, was announced by the Minister of Labour on March 21 (*Hansard*, p. 14251). He said that the agreement, which would be submitted immediately for ratification by the union membership had been reached with the assistance of Carl H. Goldenberg, who had been appointed mediator some months before.

At the same time, the Minister announced the appointment of a board of arbitrators under the Maintenance of Railway Operation Act, 1966 to deal with the dispute between the shopcraft unions and the railway companies mentioned in the Act, affecting some 23,000 employees. Hon. Wilfrid Roach, formerly a justice of the Ontario Court of Appeal, was named as chairman; and Leon Lalande, Q.C., Montreal, and Dr. Horace Read, Q.C., Halifax, were named as members.

Booklet discusses automation and worker displacement

A booklet titled *Automation and Worker Displacement* has been published by the Institute of Public Affairs, Dalhousie University, Halifax.

The study was made by a sub-committee of the Nova Scotia Joint Labour-Management Study Committee, in co-operation with the Nova Scotia Voluntary Planning Board, as a contribution to joint research being undertaken by the Economic Council of Canada, the Nova Scotia Voluntary Planning Board, the Ontario Economic Council and the *Conseil d'Orientation Economique du Québec.*

Part I discusses the impact of change within a company, outlines some of the ways in which an individual company or operation can be affected by change, and cites some of the principles under which labour and management can reduce its possible ill effects.

Part II deals with the impact of change within a community. The problems of automation and worker displacement that cannot be handled internally by labour and management are discussed. It also covers definitions of problems, and frameworks for recommendations designed to cope with a broad range of activities dealing with problems of unemployment and worker displacement.

The booklet is available from the Institute of Public Affairs at $1 a copy. Group rates are also available.

Marine engineers transfer to Merchant Service Guild

A transfer that has been three years in the making has sent about 500 marine engineers in the Canadian Brotherhood of Railway, Transport and General Workers to the Canadian Merchant Service Guild, Inc., in Vancouver in an attempt to re-align and consolidate union jurisdictions.

The engineers, formerly represented by a small union of their own, joined the CBRT in 1959. Five years later, after the Norris investigation of scandals connected with the Seafarers' International Union (L.G. 1963, p. 775), it was thought that a conflict of interest might arise if the marine engineers, who are licensed under maritime legislation, were represented in the same group with seamen or unlicensed personnel. The transfer has been approved by a referendum of the engineers themselves.

Bob Cook, CMSG president, said: "The engineers were happy with the CBRT and satisfied with gains achieved. But they considered their needs would be better served in a larger organization that included other ship officers such as captains, mates and pilots."

W. J Smith, CBRT national president, said: "Although the transfer means a loss of 500 members, the main objective is to provide the best service possible for workers."

Differences removed under two labour acts

Amendments to the Fair Wages and Hours of Labour Act, which applies to construction contracts of the Government of Canada, went into effect on April 1, 1967.

The amendments remove differences between hours-of-work and minimum-wage standards established by the Fair Wages and Hours of Labour Act and by the Canada Labour (Standards) Code.

Under the amendments, hours of work on government construction contracts are limited to eight a day and 48 a week, except with the permission of the Minister of Labour in exceptional circumstances, or as prescribed by the Governor in Council. Hours in excess of eight a day and forty a week must be paid for at an overtime rate at least equal to one and one half times the rates required to be paid under the contract.

The amendment also provides that no rate paid on such contracts shall be less than the minimum hourly rate of pay prescribed by or pursuant to the Canada Labour (Standards) Code.

The amendment also includes a clause which requires that, for every default in carrying out these provisions, the contractor shall pay to Her Majesty as liquidated damages the sum of $50.

The amendment does not apply to any contract for which bids have been invited by the Government of Canada on or before April 1, 1967 or to any contract with the Government of Canada existing on that day.

Maternity protection for working mothers

Problems concerning the working expectant mother and her employer have been documented in a report, *Maternity Protection for Women Workers in Canada*, written by Sheila Woodsworth for the Women's Bureau, Canada Department of Labour.

The booklet reveals the attitude many employers take toward working mothers and the paradox of their declaring that mothers should not work, while at the same time admitting the difficulty of replacing them.

Among the subjects dealt with are: the increasing numbers of working mothers in the labour force; the influence of ILO Conventions and Recommendations; the relevant provincial labour laws; and federal and provincial provisions for maternity leave in the public service. Also included is a survey of maternity leave in business and industry, with details both of provisions in collective agreements and of policies resulting from unilateral management decisions.

The author reports that, although maternity protection in the form of cash and medical benefits is rare in Canada, it is customary in Australia, France, New Zealand, Sweden and Britain. To round out the study, Mrs. Woodsworth cites medical opinion on the health and welfare needs of mother and child.

On the inside of the jacket, a statement by Marion V. Royce, former director of the Women's Bureau, expresses the inherent need for a book of this nature. "Rapid growth of the female labour force over the past decade in Canada has brought to the fore the question of maternity protection for women workers," Miss Royce wrote. "Increasingly it has become a concern of employers, labour unions and governments as well as of women themselves. The existence of relevant policies and programs, or the lack of them, affects the welfare of the nation."

Ontario CS employees get pay raises

Ontario civil servants were given salary increases, averaging about 10 per cent, in April. The new rates were recommended after several weeks of mediation.

Under the new schedule, hospital aids will receive $2.10 to $2.28 an hour; hospital attendants, $2.28 to $2.46; correctional officers and training school supervisors, $2.61 to $2.82; and industrial officers, $2.71 to $2.93. X-ray technicians will receive between $5,000 and $5,500 a year. The new rates are retroactive to January 1, 1967 and are 8 to 14 per cent higher than those provided in an interim adjustment made last October.

Sam Finlay dies at 60

Sam Finlay, 60, International Vice-President and Vice-President of the Eastern Canadian Section of the International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers since 1944, died in Toronto on March 14 after a short illness.

Mr. Finlay was initiated into Lodge 637 in Toronto in 1938. He was appointed international representative in 1942, elected International Vice-President at the 17th Consolidated Convention in Kansas City in January 1944, and re-elected at the 1949, 1953, 1957, 1961 and 1965 conventions.

Mr. Finlay represented the Trades and Labour Congress of Canada at the founding convention of the International Confederation of Free Trade Unions in London, England in 1949. He represented the Congress on the original executive council of the International Confederation of Free Trade Unions at Brussels, Belgium in 1950.

He also represented Canada and the Brotherhood of Boilermakers at the 125th anniversary of the United Society of Boilermakers, Shipbuilders and Structural Workers of Great Britain, held at Whitley Bay, England in 1959, and was a member of the negotiating committee of the Associated Non-Operating Railway Unions from 1944 until the time of his death.

New Frontiers in White-Collar Unionism

Dr. W. Donald Wood, Queen's University, dismisses five long-held myths concerning the attitudes of white-collar workers toward trade unionism

Some of the popular myths concerning white-collar unionism in Canada were exploded recently by Dr. W. Donald Wood, Director of the Industrial Relations Centre at Queen's University, when he presented a paper on *New Frontiers in White Collar Unionism* at the Calgary Chapter of the Administrative Management Society on March 21.

Dr. Wood dismissed as "myths" the following:

(1) There is little white-collar unionism in Canada. People fail to recognize significant white-collar organizations because they look for signs of conventional unionism; but there is large-scale organization in the public service, and substantial groups in "big name" corporations and institutions.

(2) White-collar unionism is a very recent development. There has been a fairly long history of white-collar unionism (at least back to World War II) in the railway, communications, and public utility industries, and among newspaper editors, entertainers and teachers.

(3) White-collar workers can't be organized. Unions have never really attempted to organize white-collar workers on any extensive scale. If they had diverted to the white-collar field some of the energy and resources used in unsuccessful attempts to organize non-union, blue-collar strongholds, the returns on their investment would have been much higher.

(4) White-collar employees have different job interests. The alleged differences have been over-emphasized. White-collar workers, as well as blue, are paid wages, have specific hours of work, work under supervision, are subject to discipline, have misgivings and fears about job security, and want to have some voice in institutional policy and practice affecting their job and employment.

Dr. W. Donald Wood

(5) White-collar workers are less militant. "This [as a myth] should not surprise us when we think of the number of white-collar workers involved in the many protest movements we have seen recently in North America."

Dr. Wood said that although white-collar organization is still on a relatively smaller scale than plant worker coverage, it has recently been expanding at a rapid rate.

On an industrial basis, there is heavy white-collar organization in the railway and communications fields. There are at least 300 organized units in manufacturing with steadily developing trends. There is some organization in public utilities, municipal government, education, hospitals, and retail trade. At the other end of the scale, there is practically no organization in the purely white-collar industries—banking, insurance, and other financial institutions.

In the manufacturing industries, the heaviest concentration of organized office units is among the pulp and paper companies in Ontario and Quebec. There is also a number of organized units in the areas of primary steel, automobile, aircraft and other motor transport, chemicals, rubber, newspaper publishing, food, electrical and textiles, and segments of manufacturing.

Dr. Wood said that the most significant recent developments in the white-collar field have occurred in the public sector of the economy. There was the new Labour Code in Quebec (1964), which provided for collective bargaining by professional groups such as professional engineers. And "one of the most important developments in the white-collar union field in recent years" has been the recent federal legislation providing for collective bargaining by about 225,000 federal public service employees.

Most of the industrial organization, he said, is among office and clerical groups. There is also a number of technicians' units and technicians included in office units.

In terms of size, most of the white-collar bargaining units fall in the range of 25 to 250 employees, with a few larger, and some smaller. The geographical pattern is fairly similar to patterns in the blue-collar field, Dr. Wood said, with the heaviest concentration in Ontario and Quebec cities and the lightest in British Columbia. The major non-city concentration is in the pulp and paper industry in Northwestern Ontario and in Quebec. The remaining units are scattered throughout the rest of Canada.

The Collective Agreement as a Research Document—

Its Potential and Limitations

The analysis of collective agreements in Canada was the subject of an address given by Félix Quinet, Canada Department of Labour, to the Industrial Relations Research Association in Montreal in January. Mr. Quinet spoke about the positive results and useful information that can be derived from an analysis of collective agreements, and the limitations of the collective agreement as a research document.

Mr. Quinet is Chief of the Collective Bargaining Division, Economics and Research Branch. His Division has on file about 8,000 collective agreements from across Canada.

The analysis of collective agreements is conducted mainly in two operations. The "current operation" is a monthly analysis of the terms of settlement, and the progress of negotiations between labour groups of 500 or more workers and management in all Canadian industries except construction. The findings are published in the *Collective Bargaining Review* supplement of the LABOUR GAZETTE. The semi-annual and annual tables are drawn from the material prepared from the monthly survey. The "coding operation" is a detailed and comprehensive analysis of collective agreement provisions signed in all Canadian industries.

About the need to undertake an analysis of collective agreements, Mr Quinet said that "the collective agreement in Canada . . . functions closely to the aspirations, needs, goals and values of the community in which they are applied, [and] reflects, to varying degrees, the nature of the industrial operations and of the economic position of the firm and the industry to which they apply." Hence, the working conditions of a substantial proportion of the work force in those industries are determined through collective bargaining.

Community attitudes and traditions contribute to the environmental factors affecting collective agreements. Mr. Quinet cited the example of the emphasis of biculturalism and bilingualism on collective agreements: In recent months, collective agreements were being expressed as well as translated in both English and French.

Mr. Quinet said, "The collective agreement, through its very substance, has in turn, an impact on ways of life, social attitudes and values. Equal pay-equal work provisions, educational leave provisions, maternity leave provisions, and a strong emphasis placed on education and ability in seniority and hiring provisions may have a definite impact on the attitudes of the work force. Therefore, by responding to outside pressures and new requirements, and by meeting these requirements, the collective agreement accelerates the economic and manpower process of adjustment. In addition, collective bargaining and collective agreements become the testing ground for new ideas, new methods and new policies. This, of course, is more than being in line with change; it is contributing to change."

The Rand Formula (L.G. 1946, pp. 123-232) "is more than a mere union security provision," he continued. "[It is] an approach to the problem of how to ensure the co-existence, within our industrial society, of the principles of individual freedom [and] those of organizational solidarity and strength."

Mr. Quinet talked of the need to examine, analyze and assess collective agreements in order to determine the way in which they contribute to or promote the fulfilment of national economic and social goals. Some cases in which social and economic planning is introduced may contain provisions that run counter to national objectives.

The speaker then reviewed some of the technical problems involved in the analysis of collective agreements. Some problems are connected with the difficulty of obtaining comprehensive and detailed knowledge of each industry or company. This would require a staff of monumental proportions, he said; and furthermore, it is difficult for analysts in the central government service to have the detailed background knowledge possessed by their colleagues in industry.

In the analysis of collective agreements, there are problems of interpreting terminology and measuring statistical data, Mr. Quinet said—and he mentioned the need to develop rigidly formulated definitions and concepts for analysis.

The "industry" and "economic" factors are important parts of the analysis of collective agreement provisions. The speaker used the example of safety committees to show how these provisions reflect the safety consciousness of an industry. Similarly, retraining may reflect provisions that are brought about by the need for technological change, which is caused by the economic growth and expansion of an industry.

He stressed that a collective agreement is not a random assembly of unrelated provisions, but an integrated ensemble of labour-management agreements, some of them closely inter-related. Tabulated individually, they present a sectional view of collective agreements, which may be misleading. The inter-relation between clauses is lost in the tabulation process, Mr. Quinet said.

Information concerning actual practice and costs leads to problems of administration and interpretation by the two parties to the agreement. "More research, therefore, is needed to try to find out what is the impact of a specific provision in meeting a specific problem. I have in this respect . . . made repeated statements to the effect that field research must be conducted to study . . . the way in which collective agreements and the collective bargaining process are meeting the problems of technological change and automation . . . More broadly, I feel that collective agreement analysis is important because it helps us to know better what is happening today within our industrial society, and what is ahead of us."

Disruption of Shipping Operations at Ports in British Columbia

Recommendations designed to prevent a recurrence of disputes and work stoppages that disrupted Canada's West Coast shipping operations in November and December 1966 appear in the Report of the Industrial Inquiry Commission received March 23 by the Minister of Labour, Hon. John R. Nicholson.

Prefacing the report was the suggestion that the prerogative of deciding whether persons are to be classed as management or employee in labour relations should—"as the only sensible course"—be left exclusively to the discretion of the Canada Labour Relations Board. The Inquiry Commission stated that there should not be "any appeal from the proper exercise of the CLRB's discretion."

The commission was appointed December 15, 1966 (L.G., Feb., p. 85) to find the causes that propelled longshore foremen into strike action against several stevedoring companies. The commission was headed by Mr. Justice C. Rhodes Smith, Manitoba Court of Appeals. He was assisted by two assessors: H. J. C. Terry, Vancouver, former president of Northland Navigation Company; and Joe Morris, Ottawa, Executive Vice-President of the Canadian Labour Congress.

The longshore foremen went on strike November 17 after the Canada Labour Relations Board rejected, for the second time, the application of Local 514 of the International Longshoremen's and Warehousemen's Union (CLC) to be certified as their bargaining agent. The Board refused the application on the ground that the foremen were supervisory personnel, and as such, not eligible to be certified as a bargaining unit.

The commission, in its conclusions, also noted that it might be possible for the Board—if another application for certification were placed before it—to uncover distinctions that would lead it to a different view of the status of the foremen.

The commission agreed that legitimate grievances of the longshore foremen prompted strike action. It also stated that, not only did the grievances still exist, but that "if further serious trouble is to be avoided, a positive approach to their solution is required." It was not considered by the commission that "enactment of new enforcement provisions would afford assistance in finding such a solution in the circumstances of the foremen issue."

Concentrating on the grievance aspect, the commission suggested that it be handled in the manner following:

(1) A longshore foreman shall submit his individual grievance in person to his employer. If he so desires, he may be accompanied by a representative of his choice.

(2) Where more than one foreman of the same company have the same grievance, they may present it as a group directly to their employer. Alternatively, if more than five foremen of one company have the same grievance, they may present it to their employer through a group or committee of the foremen of that company selected by the foremen presenting the grievance.

(3) Where foremen of two or more companies have the same or a similar grievance, they may present it jointly to their employers, or to a representative or representatives of their employers, through a group or committee of foremen selected by themselves.

(4) If the grievance is not settled to the satisfaction of the foreman or foremen concerned, he or they shall have the right to have it submitted to arbitration, in accordance with the following rules:

(a) The foreman or foremen concerned shall notify the employer or employers concerned, in writing, of his or their desire to have the grievance submitted to arbitration. Where a representative or representatives have taken part in the proceedings on behalf of either party, the notification may be given by or to the representative or representatives.

(b) Where the grievance is limited to a foreman or foremen of one employer, there will be a single arbitrator, chosen and appointed by the foreman or foremen and the employer within 10 days after notification of the desire for arbitration has been given to the employer. If the arbitrator is not agreed upon within the said period of 10 days, the parties—jointly or (singly)—may request the Minister of Labour for Canada to name the arbitrator, and the Minister will do so with all convenient dispatch.

(c) Where the grievance affects foremen of more than one employer, there will be an arbitration board of three arbitrators—one chosen and appointed by the foremen concerned or their representatives, one by the companies concerned or their representatives, and the third, who shall be the chairman of the board, by agreement between the other two. The foremen and the companies shall make their respective appointments within 10 days after notification of the desire for arbitration has been given to the employers, provided that, if either party fails to make the appointment, the other may request the Minister of Labour for Canada to do so, and the Minister will do so with all convenient dispatch. If, within 10 days of the later of the appointments by the parties, the two arbitrators so appointed have not agreed upon and appointed the chairman, they or either of them may request the Minister of Labour for Canada to name the chairman, and the Minister will do so with all convenient dispatch.

(d) The arbitrator, or board of arbitrators as the case may be, after hearing submissions by or on behalf of the parties—which submissions may be made by a representative or representatives of either party—will make an award based on equity and fairness to the parties, taking into account the circumstances of the employment of the

Continued on page 382

1966 GNP Totals $5.8 Billion More Than the Total for 1965

The Canadian economy in 1966 registered still another strong advance, as continued high levels of demand in the domestic sector, coupled with buoyant conditions abroad pushed the Gross National Product to a level of $57.8 billion, the Dominion Bureau of Statistics reported in April. This figure is 10.9 per cent, or $5.8 billion, above that for 1965.

With the economy continuing to operate at high levels of employment, the resulting pressures exerted on prices and costs by this rise in demand were evident in a 4.6-per-cent advance in prices—an advance that reduced the 10.9-per-cent-gain to one of 5.9 per cent in real terms. This compares with an increase of 9.9 per cent in the 1965 GNP, which was reduced to a volume gain of 6.9 per cent by price advances of 2.8 per cent.

Much of this 11-per-cent gain occurred in the first quarter of 1966. The GNP increased by 4½ per cent, and it registered the strongest quarterly advance in the current expansion. Although increases in demand in that quarter were broadly based, certain special factors contributed both to a marked rise in exports and to a gain in imports that was only fractional. This is a substantial reduction of the import balance, DBS reported. The quarter-to-quarter gains in GNP for the remainder of the year were more moderate: 2 per cent in the second quarter; less than 1 per cent in the third, when strikes were a major factor; and 2 per cent in the fourth.

During the year as a whole, gains over a wide range of final expenditure categories were made. For the third successive year, business expenditure on plant and equipment was a dominant factor, and investment in these categories increased by nearly 18 per cent in 1966, compared with advances of 20 per cent in each of the two preceding years. At the provincial and municipal levels, government capital spending reinforced demands by the business sector, so that total public and private outlays on plant and equipment rose by more than 18 per cent.

For the second successive year, outlays on new housing showed only fractional gains. A sharp decline in mortgage loan approvals by conventional lenders was a contributing factor to the marked drop in the number of apartment units started. Single-family units started showed a slight decrease.

Investment in business inventories in 1966 was maintained at a rate only slightly less than that of 1965.

There was an increase in government expenditures on goods and services, including capital goods, of 16 per cent, DBS reports. Apart from capital spending, increases in outlays on salaries and wages formed an important part of the overall change. In this area, retroactive wage payments, plus increased salary rates to the armed forces and to members of the public service at the various levels of Government—some of which involved adjustments over a period of years—accounted for most of the rise. The surplus, on a national-accounts basis, for all levels of Government combined, increased somewhat in 1966 as a result of Canada and Quebec pension plan contributions. Exclusive of these plans, the federal surplus narrowed by about $440 million and the provincial-municipal deficit widened by about $240 million.

Consumer spending rose by close to 9 per cent last year. Personal disposable income increased by 9½ per cent, and personal net saving rose.

Prices of consumer goods increased by 3½ per cent in 1966, compared with a rise of 2 per cent in 1965. Although overall consumer demand was strong in 1966, there was no rise from 1965 in expenditure on automobiles, in contrast to marked increases in each of the four preceding years. Durable-goods spending as a whole rose by 4 per cent. Outlays on non-durable goods and on services increased by 9½ per cent and 9 per cent.

NOTE: The classification of labour market areas, and the summary table titled "Labour Market Conditions", are not included in this issue because the statistical basis for these tables is not comparable with a year ago. Beginning September 1, 1966, all registered applicants were asked to contact Canada Manpower Centres every 30 days—instead of the previously requested period of 14 days—to keep their registrations active. Another factor influencing the comparability of registered applicants is the extension of provisions, such as temporary layoffs, for exempting certain classes of unemployment insurance beneficiaries from registration.

Employment Review

Employment and Unemployment In March

Employment increased by an estimated 109,000 to 7,089,000 between February and March. This larger-than-seasonal increase was chiefly among part-time workers. The labour force, which increased by 113,000 to 7,489,000 during the period, was 327,000 or 4.6 per cent higher than the total for the same period last year. Employment was 268,000 higher than in March 1966.

Unemployment, at 400,000, remained practically unchanged during the month and was 59,000 higher than the total for March in 1966.

The unemployment rate in March represented 5.3 per cent of the labour force, compared with 4.8 per cent in March 1966 and 5.6 per cent in March 1965. The seasonally adjusted unemployment rate in March 1967 was 3.9 per cent.

Employment

Non-farm employment increased from 6,543,000 to 6,628,000 between February and March; farm employment also rose during this period from 437,000 to 461,000.

The number of men employed in March was estimated at 4,845,000, 41,000 higher than in the previous month; employment of women, at 2,244,000, was 68,000 higher.

Total employment was 268,000 or 3.9 per cent higher than it was a year ago. The largest increases were in community, business and personal service, manufacturing, transportation and other utilities, and trade. Construction employment was 42,000 lower than the figure for last year.

Employment was higher in all regions than it was a year earlier, with the largest relative gain, 8.7 per cent, in British Columbia.

Unemployment

Unemployment, at 400,000, was relatively unchanged during the month, and 59,000 higher than it was in March 1966. Of this total, 330,000 were men and 70,000 women. For both groups, unemployment was higher than it was a year ago.

Of the 400,000 unemployed in March, 288,000, or 72 per cent of the total, had been unemployed for less than four months. Some 81,000 had been unemployed for four to six months, and 31,000 for seven months or more. There was little change between February and March.

Consumer, March 1967

The consumer price index (1949=100) increased 0.3 per cent to 146.5 at the beginning of March from 146.1 in February. It was 2.9 per cent higher than the March 1966 figure of 142.4.

In the current period, all components except food showed increases; the food component recorded a decrease.

The food index decreased 0.6 per cent to 143.3 from 144.1. Lower prices were recorded for bread, some cereal products, coffee, tea, margarine, eggs, oranges, canned and frozen orange juice, raisins, canned pears and apple juice. Price decreases were also noted for potatoes, cabbage, celery and lettuce, several cuts of beef, bacon, cottage roll, and other meats including lamb, veal, wieners and meat loaf. Prices were higher for most dairy products, flour, cookies and cake mix, sugar, most fresh fruits except oranges, root vegetables, tomatoes, canned corn, pork rib chops and shoulder roast, and poultry.

The housing index advanced 0.5 per cent to 148.4 from 147.7 as a result of general increases in both the shelter and household operation components.

The clothing index rose 1.3 per cent to 130.8 from 129.1. Increases were recorded in most items of men's, women's and children's wearing apparel, piece goods and clothing services.

The transportation index rose 0.4 per cent to 155.6 from 155.0; scattered price increases for new automobiles, and advances in the prices of automobile repairs and tires, also contributed to this rise.

The health and personal care index rose 0.1 per cent to 185.2 from 185.1, reflecting slightly higher prices for toilet soap and some other personal care items. The recreation and reading index increased 0.1 per cent to 163.7 from 163.6. Small increases in prices reported for bicycles and television repairs raised the recreation component, but the reading component remained unchanged. The tobacco and alcohol index rose 0.6 per cent to 127.5 from 126.8.

Group indexes a year ago in March were: food 143.4, housing (shelter and household operation) 143.3, clothing 124.2, transportation 150.0, health and personal care 178.1, recreation and reading 156.6, and tobacco and alcohol 123.4.

City Consumer, March 1967

The consumer price indexes (1949=100) advanced between February and March in all cities except Winnipeg, where the index remained unchanged. Rising price movements ranged from 0.9 per cent in St. John's to 0.1 per cent in Saint John and Ottawa.

Food indexes declined in all cities except St. John's, where a 0.1 per cent increase was recorded. Decreases ranged from 1.2 per cent in Winnipeg to 0.2 per cent in Montreal. The housing, clothing and transportation indexes rose in all cities. Health and personal care indexes were higher in four cities, lower in two, and constant in four. Recreation and reading indexes showed predominantly rising price movements; they were up in eight cities, down in one, and unchanged in one. Tobacco and alcohol indexes rose in eight cities and were unchanged in two.

Regional consumer price index point changes between February and March were: St. John's* +1.2 to 127.8; Saskatoon-Regina +0.6 to 137.6; Montreal +0.5 to 145.3; Halifax +0.3 to 139.6; Toronto +0.3 to 148.4; Edmonton-Calgary +0.3 to 136.9; Vancouver +0.3 to 141.2; Saint John +0.2 to 143.5; Ottawa +0.1 to 145.3. Winnipeg remained unchanged at 141.1

Wholesale, February 1967

The general wholesale index (1935-39=100) rose to 262.0 in February, an increase of 0.5 per cent from the January index of 260.7, and 1.1 per cent above the February 1966 index of 259.2. Six of the eight major group indexes were higher, and two declined.

The non-ferrous metals products group index rose 1.7 per cent to 236.4 from the January index of 232.5. An advance of 1.0 per cent to 342.3 from 338.9 in the wood products group index reflected price increases for cedar, fir and paper-board. The chemical products group index moved up 0.6 per cent to 215.2 from 214.0 on higher prices for soaps and detergents.

In the vegetable products group, the index rose 0.5 per cent to 230.6 from 229.4 on price increases for sugar and its products, and tea, coffee and cocoa. The non-metallic minerals products group index advanced 0.6 per cent to 197.0 from 195.8. An advance of 0.3 per cent in the iron products group index to 268.1 from 267.3 reflected higher prices for rolling mill products, tin plate and galvanized sheets, and wire.

Decreases of 0.2 per cent or less occurred in two major group indexes in February—animal products to 294.5 from 295.1, and textile products to 250.1 from 250.4.

*On base June 1951=100.

Farm Products Prices

The index of Canadian farm products prices at terminal markets (1935-39=100) declined 1.1 per cent to 244.1 from 246.8 in the three-week period March 3 to March 24. The animal products index moved down 1.8 per cent to 315.5 from 321.2, and the field products index advanced 0.2 per cent to 172.7 from 172.4.

U.S. Consumer, February 1967

The United States consumer price index (1957-59=100) rose in February by one tenth of 1 per cent to 114.8 from 114.7 in January. A year ago in February the index was 111.6.

Declines were registered in eggs, pork, bread, most dairy products and many fruits and vegetables.

The service component of home ownership continued to rise. Real estate taxes (which count in the consumer price index), insurance, rent, laundry and domestic service, all showed increases.

Medical care continued to increase, as did barber and beauty shop services.

Apparel prices continued to go up with higher prices for spring lines of women's and girls' coats, and women's and children's shoes.

During the 12-months period, three fifths of the rise in the consumer price index of 2.9 per cent was accounted for by services, headed by medical care. Food prices in the stores were unchanged, after rising and then falling last year and early this year, but the price of meals in restaurants was up 5.5 per cent.

British Retail, January 1967

The British index of retail prices (January 16, 1962=100) was 118.5, at January 17, 1967, compared with 118.3 at mid-December and 114.3 at January 18 a year ago.

Increases in the average prices of bread, beef, mutton and lamb, fresh vegetables other than tomatoes, and candies and chocolates were partly offset by a reduction in the average price of eggs. The index for the food group as a whole rose by one half of 1 per cent to 117.6, compared with 117.0 in December.

Housing costs rose by less than one half of 1 per cent, and the group index was 131.3, compared with 130.9 in December.

Current Labour Statistics

Principal Items	Date	Amount	Percentage Change From Previous Month	Percentage Change From Previous Year
		000's

Mexico's Bureau for the Protection of Women and Minor Workers

This article supplements information on administrative arrangements, prevailing in a number of countries, for the handling of questions related to women workers that was the subject of the Women's Bureau Bulletin No. XX, issued in December 1966. It is based on an article by Gudelia Gomez R. that appeared in Revista Méjicana del Trabajo (*Mexican Labour Review*).

The Mexican Labour Department's Bureau for the Protection of Women and Minor workers has broad responsibilities in the fields of social education, the co-ordination of social welfare, and labour inspection services. It also is in charge of the enforcement of legislation applicable to working women and minors. Efforts of the branch are guided by provisions in the Constitution that established the basis of policy related to labour affairs in the Republic of Mexico.

The first official groups established to deal with working conditions for working women and minors were units of research. These later became centres devoted to the study and evaluation of measures that could prevent social injustices. As a result of investigations carried out by these early agencies, and in keeping with their recommendations, a Commission of Enquiry into the Working Conditions of Women and Children was created in February 1936.

The objectives of the Commission were:

–to investigate the actual working conditions of women and children in the various industrial regions of the country, and to collect statistical data on their wages;

–to determine the real differences in wages paid to men and women who were doing the same work;

–in situations in which inequality of pay for men and women appeared to be justified, to propose appropriate measures to improve the conditions of women's work, and raise standards to the level of those of men's work;

–to study the social conditions of women workers with family responsibilities and, without detriment to their obligations as trade union members, to assist them in so far as possible to solve their personal problems, both social and economic; and

–to study existing safety and health regulations in order to ascertain whether adequate protection was provided for women and minors employed in factories and plants.

Initially the Commission spent most of its time hearing private claims and reports regarding the serious problems associated with the employment of women and children. Then, five years after its appointment, the Commission became a Bureau that provided greater momentum for research and action to improve conditions.

One of the first tasks of the Bureau was to organize a suitable inspection service. On the premise that research and treatment should complement inspection, a small group of social workers was set up in the Bureau and given special training in the problems of women and minor workers. The social workers were to be concerned particularly with questions of health and welfare in the homes and communities where the employees lived.

The labour inspectors, on the other hand, were responsible for the enforcement of legal regulations, especially those governing hiring and firing and the working conditions of women and children in the factories.

The joint efforts of the social workers and the inspectors gave reality to the desire of attaining the well-being of the workers and their families, and at the same time fostered a harmonious relationship with employers. Guidance was made available to youth who were beginning life in a new social atmosphere, very different from that in which non-working children live.

Co-ordination of these two aspects of the work of the Bureau has progressed over the past decade, strengthened by further directives issued in 1957 by the Ministry of Labour and Social Welfare.

These include:

–study of the socio-economic conditions of women and minor workers;

–the development of suitable educational programs for them;

–informing them and advising them regarding their rights and privileges;

–ensuring the observance of legal regulations concerning their work; and

–finding solutions for labour disputes in which they become involved.

The Bureau is charged also with the responsibility of establishing protective measures that will help to attain a stage in which penalties may be applied for violation of the laws. International conventions and recommendations are taken into consideration and an effort is made to interpret and apply their essential meaning.

New Frontiers

Continued from page 352

Two main types of unions exist in the white-collar field, according to Dr. Wood. One is the specialized white-collar union (a craft type) whose jurisdiction covers only white-collar employees (e.g., the Office Employees' International Union, and the Federation of Technical Engineers). The other type is the industrial form of union whose main jurisdiction has traditionally been among plant workers, but which is now taking white-collar employees into their membership in separate bargaining units.

Dr. Wood believes that there are three general factors underlying the recent expansion in white-collar unionism. These are:

– the number of longer-run changes in the office workers' environment and relative position;

– the short-run "frictions" and grievances in the personnel field which have often sparked organizing activities; and

– the greater availability and stepped-up recruiting activities of unions themselves.

Among the long-term trends are the "explosive growth in white-collar employment," the narrowing of the economic gap between white- and blue-collar workers, and the "new office," with its increased scale of operations, mechanization of work, and the grouping of jobs into specialized groups.

Dr. Wood points out that a new layer of university-trained professionals has developed in between office staff and senior management, thereby reducing opportunities for office workers to rise to management jobs.

Concerning the frictions and grievances in the personnel field, Dr. Wood pointed out that the 60s have seen a large influx of youth into the Canadian labour force. He believes that a number of management and union policies are still geared to the 30s, and often out of touch with the new work force. White-collar personnel policies, he said, have just not kept pace with the growth of white-collar jobs. "I believe that this 'generation gap' is one of the factors behind the recent greater militancy and restiveness among workers in both union and non-union areas."

Dr. Wood said that unions are trying harder to interest white-collar workers in unionism. "Although this is still on a small scale ... there have been more drives organized and more resources devoted to this field." And Dr. Wood stresses the greater availability of unions as a decisive factor. "It is much easier for an employee to join an available union actively soliciting his membership than to set out on the arduous task of forming a new union."

Graveyard Shift for Women in Quebec Industry

A report* on night work for women in industry has been released by a committee appointed by the Quebec Department of Labour to make the study.

The five members of the committee were: Mme Yvette Dussault-Mailloux, Judge, Montreal Welfare Court; Dr. Georgette Gélinas, Medical Officer, Ville St. Laurent; Louisette Côté, *Jeunesse Ouvrière Catholique*, Québec; Prof. M. Jean-Paul Deschênes, faculty of social science, Laval University; and M. Jean Sirois, Industrial Relations Director, Dominion Textiles Ltd.

The committee first examined existing night-work legislation in the Canadian provinces, in the United States and in several European countries. Published reports on the subject by interested governments and international organizations were studied, together with 32 individual briefs from interested companies, associations and the general public. Wanting to examine health and safety provision, committee members visited plants employing night workers, and were free to talk with employees and to ask questions.

Night Shift Restrictions

The committee found that, in Canada, there are no existing restrictions on night shifts for women over 18 years of age who work in industrial establishments in five provinces—British Columbia, New Brunswick, Newfoundland, Nova Scotia and Prince Edward Island. In four provinces—Alberta, Manitoba, Saskatchewan and Ontario—the committee found that night work is regulated by permit from the Ministers of Labour. Quebec is the only province in which the third shift is prohibited by law.

Would night work isolate women from society? Would children suffer as a result of the mother's absence during the night? Would women night workers in industry be exposed to substantial moral dangers? These were questions the committee set out to answer. Several conclusions were reached:

(1) A woman working the second shift, from 3 p.m. to 10 or 11 p.m., would be at a greater disadvantage from the point of view of social isolation than if she worked the third shift.

(2) Night work for mothers of preschoolers would not be very practical, because some kind of morning day-care assistance would be required while the mother slept. Nevertheless, a mother working on the third shift would not be absent from her children any longer during their waking hours than if she worked on the second shift.

(3) For school-age children, the mother's presence after 4 p.m. is most important for the supervision of homework and meals. A mother working the regular day shift would be away for part of this time, and would definitely be absent if she worked the second shift. Supervision of adolescents could not be more adequately handled by mothers working the second shift than by those working the third shift.

(4) A mother of young children should not be forced to take gainful employment outside the home. Society's objectives should be directed to creating conditions where the father could earn enough to maintain the family.

(5) Moral dangers, to which night workers in industry might be exposed, were no greater than those encountered by night workers in the service industries. The solution lies not in prohibiting night work, but in improving conditions by providing safe transportation for the return home.

Night work for women in industry presents special problems, and should by considered only as an exceptional measure to be regulated by permit from the Minister of Labour. Granting of the permit should be contingent on proving, to the satisfaction of the Minister, the need for a third shift, and on the readiness of the employer to respect regulations regarding age, supervision, first aid, hours of work, meals and rest periods, remuneration, and transportation requirements. The permit should be posted in full view of all employees, and it should be made clear that failure to comply with specified conditions would result in the permits being revoked.

An over-all examination of women's role in the labour force should be initiated, the committee recommended.

The J.O.C. representative attached a minority report strongly opposing the granting of permits authorizing night work in industry. The dissenting report condemned the conclusions reached by the committee, criticized the terms of reference as being severely limiting, and said that false conclusions were reached because the workers were not adequately consulted. It expressed skepticism about the observance of regulation and permits, and enumerated possible detrimental effects on the grounds of health and social aspects. The report concluded that, if night work was necessary for the economic welfare of the province and in order to attract industry, the same results might be accomplished through more favourable taxation and customs policies, rather than through subsidization of industry with "cheap labour."

In line with the committee's recommendations, and the position taken by organized labour, the minority report also recommended a general inquiry into all aspects affecting women workers, and urged that the Government refrain from making any decision until the results of the study were received and evaluated.

Unlimited Skills Inc.

A unique Canadian enterprise whose profits can be measured in human progress and happiness although financial gains are modest

The autumn 1966 issue of *Northern Circuit*, published by Northern Electric Company, carries an account of a most unusual Montreal company: Unlimited Skills Inc. The financial statement shows a modest profit. Its true gains, however, are in the personal satisfactions, human growth and happiness that it brings to its employees. It actually encourages them to move on to better paying jobs in other industries, and saves thousands of dollars in public welfare payments.

Unlimited Skills is the result of one man's dream. Harry Ward, a paraplegic as a result of wounds received while serving as a platoon commander with the Third Division in Europe during World War II, resolved to devote his life to helping his fellow paraplegics and other handicapped persons.

Following his release from the armed forces, he became a founding member of the Canadian Paraplegic Association. As secretary-treasurer of the association, he became well acquainted with the problems confronting paraplegics in finding employment, and this led him to consider ways of helping. Among other ideas, he began to look into the possibility of forming a small company where handicapped persons could be employed on electrical and mechanical assembly, light machine work, packaging, collating and direct mailing work contracted out by other industrial concerns.

He had no difficulty in proving to a group of public-minded businessmen the need for such an organization. At that time, statistics showed that there were 300 paraplegics in Montreal alone, and many more persons with other kinds of disabilities. Fifty per cent of these were unskilled, and many of them lived isolated lives cut off from all social contacts and with little or no financial resources.

Small Start

The company began operation with five handicapped workers in leased premises on Montreal's St. Zotique Street. It now has 70 employees and operates two workshops: one on Port Royal West in Montreal, and the other in the suburb of Verdun. The two shops have a total floor space of 17,000 square feet and an annual sales volume of more than $215,000.

The workers suffer from a wide variety of disabling conditions. Besides paraplegics, there are amputees and persons who have had polio or who suffer from multiple sclerosis or muscular dystrophy. They also include mentally retarded persons and those with other disabilities.

Unlimited Skills Inc. serves three purposes:

–it provides training and employment for disabled persons;
–it proves to industry that many disabled persons are capable of keeping pace with other industrial workers; and
–it enables handicapped persons to earn their own living so that they are not dependent on charity or public welfare.

Industry Conditions

Unlimited Skills Incorporated is not a sheltered workshop; working conditions are similar to those in industry The employees work a full day and are responsible for getting themselves to and from work. They receive standard rates of pay and, through an incentive program, share in the profits of the company. The great difference between this company and others is that, whereas other companies have the work and must go to the labour market for workers to do it, Unlimited Skills Incorporated has the employees, but must look to other industries to provide the work.

When one begins to look at the individuals who have benefited from the opportunities provided by Unlimited Skills, the real value of the enterprise begins to emerge. One young man became a paraplegic at the age of 17 as the result of a bullet wound, and subsequently became despondent and discouraged. He lost interest in practically everything, and officials at the Rehabilitation Centre where he was treated despaired in their efforts to help him. When physically well enough, he was referred to Unlimited Skills.

He was first assigned to do light bench work, but progressed very slowly. Gradually, however, a change began to take place. He learned to laugh and joke again and became interested in his work. He enthusiastically undertook more challenging assignments, each of which he handled capably. He is no longer with Unlimited Skills, but working at a higher paying job in another industry and is doing very well there.

The monetary gains of this unusual company may not be high, but who can calculate the gains in human dignity and happiness? Harry Ward, who served his country so faithfully in war, has, in peace, opened a door to opportunity for his disabled comrades and other handicapped citizens to play their part in the economic life of Canada.

Condensed from *Teamwork in Industry*
Published by the Labour-Management
Consultation Branch

Vehicles of Communication

The word "grievance" is seldom heard in the St. Lawrence Cement Co. at Clarkson, Ont. In the plant's 10½-year history, there has not been one. During the period, a joint labour-management consultation committee has been operating at the plant.

Gunther Heym, President of Local 366, United Cement, Lime and Gypsum Workers' International Union, which represents the 105 employees, says problems are brought to a head and solved by a committee spirit of "goodwill" and "common sense." Donald Griese, Superintendent of Industrial Relations, sees the committee as a vehicle of communication that solves problems and sustains morale.

The company helps new Canadians on the payroll to improve their English. It pays three quarters of the cost of successfully completed language courses, and offers the same financial aid to workers who take job-related night courses.

Three in-plant committees are geared to maintain liaison between management and employees:

–labour and production problems are discussed at twice-monthly meetings of the labour-management committee;
–management meets with supervisors and lead hands six times yearly; and
–a safety committee meets monthly.

TWO-WAY STREET

"The whole process set the stage for the 'two-way street' of employee-management co-operation . . ." said Linton E. Love, general manager of Midland Industries Ltd., who recently described the growth of a labour-management committee at the Midland, Ont., plant.

When the committee was formed in 1962, meetings were mainly an occasion "to blow off steam against management," Mr. Love recalled. But gradually there was "a change of emphasis" at the meetings, and "constructive ideas" began to emerge.

The plant, which makes plastic products, has 165 hourly-paid employees, members of Local 1476, Textile Workers' Union of America.

Local union chief Frank Murphy echoes management's enthusiasm. Meetings offer the opportunity to "thrash out our arguments and get things settled," he says. "With our joint committee we are able to get things solved before they grow."

Mr. Love believes that his plant has licked problems of communications that have been "haunting industry—for many years." Through employee-management sessions, employees learned the "whys" and "hows" of management thinking; and management became more familiar with employee problems.

A monthly newsletter, "Plasticos" gives employees information about what was said and done at committee meetings. Thus, employees are aware when management is unable to answer a question immediately. Management is kept "on its toes" to find an answer by the next meeting.

WE HAVE NO SECRETS

Another Midland, Ont., plant where communication is encouraged is that of Kindred Industries Ltd., makers of steel kitchen products.

"We have no secrets," declares production manager Herb de Jong, who sits on the plant's two major labour-management committees. Six union representatives and two from management form a joint union-management consultation committee. They discuss work problems at monthly meetings.

The "stewards' committee" includes six stewards, Union President Ron Sauvé and two representatives from management. It meets once a month to deal with union matters. By this means, labour and management at Kindred Industries have been free of formal grievances since the plant was opened in 1962.

Mr. Sauvé says the committees are effective because both sides adhere to the policy of opening up and talking over their problems. "We've always managed to solve our problems," he says in support of the free-discussion policy.

According to Mr. de Jong, the plant could have suffered "considerable" losses, had not management and workers been willing to discuss problems. Such meetings have "saved management from making mistakes," he says.

When Kindred Industries, a wholly-owned subsidiary of Kitchen Installations Ltd., opened at Midland, it was necessary to train new employees. It was also necessary to create an atmosphere of trust—and this was done by forming a joint discussion committee as a meeting ground between employees and management.

The 100 hourly-paid workers in the Midland plant are represented by Local 30, Sheet Metal Workers' International Association.

More manpower for Consultation Branch

The Labour-Management Consultation Branch of the Canada Department of Labour is putting more representatives in the field. Their number is being doubled from nine to 18, and they will be based in 14 cities across Canada.

"It's part of a progressive program to assist labour and management in meeting the complex problems of this technological age," said Assistant Director Kenneth DeWitt.

As well, three LMC representatives have been promoted to regional supervisors: A. C. Candline, Western Region; J. G. Seguin, Eastern Region; and S. J. Walton, Central Region. Combined, the three regional heads bring 56 years of government LMC experience to their jobs.

Under the re-organization, LMC offices will answer to regional headquarters at Winnipeg, Ottawa or Toronto.

Job Redesign For Older Workers in Sweden

Prof. Sven Forssman, Medical Expert of the Swedish Employers' Confederation presented an interesting report to the International Management Seminar held in London, England, in October 1964. This report was published later by the Manpower and Social Affairs Directorate of OECD.

Prof. Forssman stated that, in 1950, the Swedish Employers' Confederation realized that, in the ensuing 10 to 20 years, the number of older employees would increase so much that special problems of adjustment to work, impairment of health, and reduced working capacity would require preventive measures such as job redesign, retraining and replacement. Many studies on older people had been carried out previously in Sweden, but these had dealt mostly with retired personnel, often those with chronic diseases and in need of hospital or other institutional care.

Accordingly, a study was instituted by the Industrial Health Section of the Swedish Employers' Confederation in eight Swedish industries with good health services. The study was designed to obtain information on the health, working capacity, productivity, salary and absenteeism of employees about five years below retiring age.

Impairment of Health

The study showed that the frequency of impairment of health increased with age, and that the main reasons for impairment of health among older employees were diseases of the heart and blood vessels, and of the bones, joints and muscles. With the co-operation of an interested management and the availability of an industrial health service, however, it was in most cases possible to place or replace the older employees so that the demands of the job would fit their reduced working capacity. Additional studies were made to investigate psychological and mental capacity in relation to the age of the working population.

A joint committee was set up in 1958 by the State Employment Service, the Swedish Employers' Confederation, the Federation of Labour Unions, and the Central Organization of Salaried Employees. This committee carried out a study on the aging labour force of Sweden. The study covered statistics on age distribution in different occupations, labour turnover, unemployment, and it also included interviews with personnel officers concerning company attitudes toward aging employees.

Adjustment Difficulties

The findings showed that many industries had experienced difficulties in adjusting older employees to work. The main difficulties appeared to be related to a reduced capacity to work at high speed, to learn new methods and to adjust to new working conditions. On the credit side, however, many industries stressed the positive aspects of older workers—loyalty, responsibility, experience and low labour turnover.

During the past 10 to 15 years, mechanization and rationalization have gradually increased production in many industries in Sweden, but at the same time have reduced the need for manual labour. To meet these problems, employers slowed down or even ceased the hiring of new employees, often for a period of several years, in order to avoid dismissing skilled long-term workers. As a result, the average age of employees in Swedish industry has gradually risen, until in one machine industry in 1962, it was 55 years. In many industries, it was necessary to replace and sometimes retrain older employees, and to try to redesign jobs to fit them.

In most industries, personnel officers and production engineers, in close coordination with industrial health services, were able to achieve a good adjustment to work through replacement.

"A common handicap of the older worker," says Prof. Forssman, "was found to be the reduced capacity to work at high speed. Many older workers also had several minor handicaps for medical reasons. Application of the principles of ergonomics—adjusting work to man—is then of great value to the aging worker, as they reduce the workload when he is working close to his maximum capacity. Adjusting the working position, lighting and air temperature and humidity . . . are of value especially to the older worker, even if this adjustment were a general human approach and the job not specially redesigned for the older worker."

In 1963, the Industrial Council for Social and Economic Studies, in close co-operation with employers, unions and the State Employment Service, organized a seminar on the problems of the aging working population in Sweden. These problems were discussed from statistical, financial, medical, psychological and sociological points of view as well as from those of management and unions.

Ergonomics, by generally improving the adjustment of work to man, had been of value—but its practice was limited. The seminar showed that several industries had reserved special jobs for older handicapped workers and had been able to get good adjustment. The use of training methods, especially for older employees, has not yet been tried, but experiences in the United Kingdom have been followed with interest.

Prof. Forssman concludes: "One may say that the attitude of employers and their organizations to the adjustment of the aging employee has on the whole been positive. . . . The problems of adjusting the older employee have mainly been solved through replacement in the individual industry in co-operation between management, personnel officers, supervisors and available industrial physicians."

Certification and Other Proceedings Before the Canada Labour Relations Board

By the Employee Representation Branch

The Canada Labour Relations Board met for two days during March. The Board granted one application for certification and one application for revocation of certification. During the month, the Board received 11 applications for certification and allowed the withdrawal of one such application. The Board also received one request for a review of an earlier decision.

Application for Certification Granted

United Steelworkers of America on behalf of a unit of employees employed in various classifications by the Hudson Bay Mining and Smelting Co. Ltd. at Flin Flon and Snow Lake, Man. The newly certified bargaining agent replaced an incumbent, the Flin Flon Base Metal Workers' Federal Union 172 (CLC), with the latter's concurrence. Six craft unions having bargaining rights for other units of the respondent's employees participated as interested parties in a hearing before the Board.

Application for Revocation Granted

Bernard Doherty, applicant, MacCosham Van Lines Limited, Kingston, Ont., respondent, and General Truck Drivers' Union Local 938, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, respondent (L.G., Apr., p. 247). The application was for revocation of the Board's order, dated July 12, 1961, certifying the respondent union as bargaining agent on behalf of a unit of drivers and warehousemen employed by MacCosham Van Lines Limited and working in and out of Kingston, Ont.

Applications for Certification Received

1. Grand International Brotherhood of Locomotive Engineers, on behalf of a system-wide unit of firemen, helpers and hostlers employed by Canadian National Railways, Montreal, Que. (Investigating Officer: H. A. Fisher).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act involving the functions of the Canada Labour Relations Board, for which the Employee Representation Branch of the Department is the administrative agency.

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Conciliation and Arbitration Branch. The Employee Representation Branch acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944 and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for controlling applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements—that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and Other Proceedings Before the Canada Labour Relations Board and (2) Conciliation and Other Proceedings Before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of the officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; officers resident in Toronto confine their activities to Ontario; officers in Montreal are assigned to the province of Quebec; and officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Conciliation and Arbitration Branch and the Employee Representation Branch are in Ottawa.

2. United Brotherhood of Carpenters and Joiners of America, Local 2736, on behalf of a unit of millwrights employed at Whitehorse, Y. T., by G. M. Gest Contractors Limited, Calgary, Alta. (Investigating Officer: J. D. Meredith).

3. Transport Drivers, Warehousemen and Helpers' Union, Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America on behalf of a unit of mail-truck drivers employed by Transol Inc., Quebec, Que. (Investigating Officer: R. L. Fournier).

4. International Union of Operating Engineers, Local 115 on behalf of a unit of employees of Humphrey Construction Ltd., North Vancouver, B.C., employed at Clinton Creek, Y.T. (Investigating Officer: J. D. Meredith).

5. National Association of Broadcast Employees and Technicians, on behalf of a unit of employees of CTV Television Network Limited, Toronto, Ont. (Investigating Officer: H. A. Fisher).

6. *Syndicat National des Debardeurs des quais de Baie-Comeau (CSN)* on behalf of a unit of employees at Baie-Comeau, employed by Terminus Maritime Inc., Quebec, Que. (Investigating Officer: R. L. Fournier).

Canada (Conciliation Officer: C. E. Poirier).

16. McAllister-Pyke Salvage Ltd., Montreal, and Seafarers' International Union of Canada (Conciliation Officer: C. E. Poirier).

17. Air Canada, and Canadian Air Line Flight Attendants' Association (Conciliation Officer: T. B. McRae).

18. Cargill Grain Company Limited, Baie Comeau, Que., and National Syndicate of Employees of Cargill Grain Company Limited (CNTU) (Conciliation Officer: C. E. Poirier).

Settlements by Conciliation Officers

1. Cassiar Asbestos Corporation Limited, Clinton Creek, Y.T., and Local 564, International Union of Mine, Mill and Smelter Workers (Canada) (Conciliation Officer: J. D. Meredith) (L. G., May, p. 310).

2. Atomic Energy of Canada Limited, Pinawa, Man., and Local 938, Canadian Union of Public Employees (Conciliation Officer: A. E. Koppel) (L. G., May, p. 310).

3. National Harbours Board (Quebec harbour police) and Public Service Alliance of Canada (Conciliation Officer: C. E. Poirier) (L. G., May, p 310).

4. National Harbours Board, and Public Service Alliance of Canada (Prescott elevator group) (Conciliation Officer: T. B. McRae) (L. G., May, p. 310).

5. Central Truck Lines Limited, North Bay, Ont., and Local 938, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: S. E. Emmerson) (L. G., May, p. 310).

6. National Harbours Board, Vancouver, and Vancouver Harbour Employees' Association, Local 517, International Longshoremen's and Warehousemen's Union (Conciliation Officer: D. S. Tysoe) (L. G., March, p. 191).

7. The Shipping Federation of Canada, Inc., and Locals 1039 and 1764, International Longshoremen's Association, Saint John, N.B. (Conciliation Officer: H. R. Pettigrove) (L. G., Jan., p. 41).

Conciliation Boards Fully Constituted

1. The Board of Conciliation and Investigation established in January to deal with a dispute between McCabe Grain Company, Edmonton, Alta., and Local 987, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L. G., Apr., p. 248) was fully constituted in March with the appointment of Roy A. Gallagher, Q. C., Winnipeg, as Chairman. Mr. Gallagher was appointed by the Minister in the absence of a joint recommendation from the other two members of the board, company nominee D. C. McDonald of Edmonton, and union nominee Ross T. G. McBain of Calgary.

2. The Board of Conciliation and Investigation established in February to deal with a dispute between National Harbours Board and National Syndicate of Employees of the Port of Montreal (CNTU) (L. G., May, p. 310) was fully constituted in March with the appointment of His Honour Judge Paul Hurteau of Montreal, as Chairman. Judge Hurteau was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, company nominee Jean Massicotte, Q.C., and union nominee Jean-Robert Gauthier, c.r.i., both of Montreal.

Board Report Received

Canadian Pacific Railway Company, and Brotherhood of Railroad Trainmen (Dining Car Service Employees) (L. G., Jan., p. 41).

Strike Action After Board Procedure

CHAB Ltd., (CHAB-TV) Moose Jaw, Sask., and National Association of Broadcast Employees and Technicians (L. G., May, p. 310).

Settlement After Further Mediation

United Press International of Canada, Ltd., and The Canadian Wire Service Guild, Local 213, American Newspaper Guild (L. G., Jan., p. 42) (Mediator: C. E. Poirier).

Wage Schedules Prepared In February

During February, the Department of Labour prepared 219 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition, and certain services. In the same period, 178 contracts in these categories were awarded. In addition, 100 contracts containing the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation, The St. Lawrence Seaway Authority and the Departments of Defence Production, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned, or to others who have a bona fide interest in the execution of the contract.

Contracts awarded in February for the manufacture of supplies and equipment were:

Department	*No. of Contracts*	*Aggregate Amount*
CMHC	2	$ 18,955.70
DDP	217	743 926.00
RCMP	6	31,556.10
DOT	2	9,543.15

During February, the sum of $3,665.76 was collected from 10 contractors for wage arrears owing their employees as a result of the failure of the contractors, or their subcontractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for distribution to the 116 workers concerned.

Insurance Registrations And Other UIC Statistics

On January 31, insurance books or contribution cards had been issued to 5,227,076 employees who had made contributions to the Unemployment Insurance Fund since April 1, 1966.

On the same date, registered employers numbered 346,294, an increase of 431 since December 31, 1966.

Enforcement Statistics

During January, 10,773 investigations were conducted by enforcement officers across Canada. Of these, 8,066 were spot checks of claims to verify the fulfilment of statutory conditions, and 916 were miscellaneous investigations. The remaining 1,791 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 375 cases, 143 against employers and 232 against claimants.*

Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 675.*

Unemployment Insurance Fund

Revenue received by the Unemployment Insurance Fund in January totalled $38,399,278.92 compared with $35,960,-792.27 in December 1966 and $36,064,-001.38 in January 1966.

Benefits paid in January totalled $41,-382,511.33 compared with $22,426,912.51 in December 1966 and $35,910,149.73 in January 1966.

The balance in the Fund on January 31 was $284,029,253.84. On December 31, 1966 it was $287,012,486.25; and on January 31, 1966 it was $161,919,787.01.
